**Cannon Remains**

**CHM Blows RF TWICE!**

by Dave Peimer

While the rest of the world slept a group of Claremont-Harvey Mudd students tried to steal the Fleming cannon--twice. The first attempt occurred Saturday morning, October 20, while the second time was last Saturday morning.

About three weeks ago at 5:00 a.m., a Tech editor (who shall remain nameless) pounded on my door and told me to wake up. When I asked him what was going on, he replied that some Occidental students were trying to steal the cannon, and he wanted someone to get pictures.

**Rumble Growl Students Gripe, Faculty Ponders**

by Alan Silverstein

For the first time in many years the residents of the seven undegraded student houses are not under a mandatory food contract system administered by the Institute, meaning that each house and its occupants are having to fend for themselves. Many of the students affected have expressed dissatisfaction with the remaining ways of getting meals, such as eating at Chaudler, going off campus, or preparing for themselves in the houses (which have adequate refrigerators but are short on stoves and ranges).

The Faculty Committee on Student Housing has been working on the problem. At its last meeting, which was attended by Dr. Jerry Pine, Director of Student Relations, Dr. Lyman Bonner, Director of Residence and Dining Halls, Robert Gang, Master of Student Houses, David Smith, Dr. Thad Vossler, Dr. Michael Werneker, and student representatives Shelly Smith (Bickets) and Jim Ogg (Page) the committee decided on two actions concerning food contracts.

First, on Friday, Jan. 18, 1974 at 3 p.m. there will be an open meeting of the committee to hear a few short presentations of opinions and offers from various students, faculty, and food contractors. Anyone on the campus is invited to come and listen. The floor will then be opened for discussion. The reason for scheduling the meeting so far ahead is the upcoming holidays, Dr. Pine said.

Second, Dr. Bonner will represent the committee at the next faculty meeting, on Nov. 19, where he will give a detailed:

**If You Missed The BOD Meetings...**

News Brief for BOD 106

BEM 106 has always been offered in a variety of ways to fit the needs of individual students. During the second and third terms of 1973-1974, a new approach is a seminar on “Health Facilities in Our Dyna- mite.” This course will consider social, economic, and operational problems in managing hospitals and long-term-care organizations. Some Caltech students may be interested in entering this land of giving field of service.

The seminar will meet on Tuesday evenings from 7:30 to 9:30 January 8 in the Industrial Relations Center under the direction of Robert M. Sloane, Medical Care Administrator and Professor in Industry and Institutional Relations, California Institute of Technology. A detailed outline of the seminar can be obtained from the Industrial Relations Center.

Putnam Preview

The Math Club will hold its first meeting this term on Tuesday, Nov. 27 at 7:00 p.m. Dr. Lorden will discuss what you can expect to find on the exam. Problems will be discussed and questions answered. The meeting will be in 151 Sloan. All are invited.

Spencer Wants Swimmers

All swimmers (male and female) who plan to go out for the swimming team this winter are cordially invited to a meeting on Tuesday at 4:00 at the pool. Topics to be discussed include practice schedules for the remainder of this term--should we swim at 4:00 or at 5:30 with the age group team? The squad’s first meet will be January 11 at Whittier, but in spite of this it would be a good idea to be in shape at that time. Contact coach Ed Spencer (ext. 2146) for more information.

Color Pictures Wanted

The issue of The California Tech two weeks from today will be produced in color. If anyone has any color pictures of Inter- house that would be worthy of publishing, please bring them to the circulation manager’s office no later than Monday, November 26.

---

**Circulation Policy of The California Tech**

Each ASCIT member is entitled to one and only one California Tech. If more are desired for parents, girlfriends, etc., they may be purchased at Flora’s office in Winnet.”

---

**To the person or persons who have been removing copies of the Tech from the circulation manager’s desk: We are very unhappy with you. If we find out who you are, you will be unhappy, too.**

**Exposed Again**

Create More Pots

by Karl Kuhlmann

This year, in a continuing policy of letting Techers have full exposure to the arts, Dirty Dave is again offering a course in therapeutic mid-pots, otherwise known as the ceramics workshop. It is located in the old houses' basement, beneath Danley. The instructor is Cheri Pann, a professional painter (the artist variety), but highly competent when it comes to ceramics.

The workshop this year consists of many of the people who started with the workshop at its installation third term last year, but it includes a lot of new people.

The workroom is large enough that one gets a measure of group instruction, but it is small enough that one can get individual help and instruction. Just as an overview of what one can learn, there are three main methods of forming clay, these being pinching into the shape desired, using coils to build something (often bowls), and rolling the clay with a roller into a slab, and then using the slabs to form something like a box.

The workshop is started with the workshop at its dimension environment, then why not abandon Pasadena while there is still something left and build an 80-story cement block buildings as prototype for 1984.

-Karen Current Steele

"Maybe If We Use Dynamite On It..."

It has come to my attention that someone in the Caltech community has decided to become a bookmaker but doesn't quite know how to go about it. He apparently found a door that he couldn't get through by picking or other normal means, so a pipe wrench was tried. This definitely is against the rules.

There exist several methods of opening doors on campus which are tolerated, though not encouraged. The first is the master key. Whole these keys often prove useful, the user of such must realize the responsibilities that go with them (remember, the Honor System covers all Tech property, including offices and the equipment in such). One method used is that of picking the lock. The same responsibilities go with this method. Various other methods have been discovered by Techers to get around or through doors. However, the methods all have one thing in common. The lock and the door are not damaged.

I would like to ask the student locksmith that this letter concerns to consider the rule and follow the rule of not messing up the door more carefully in the future. Every time something like this happens it messes it up for the rest of us.

-Karl J. Kuhlmann

**The Taste of MDD is Offensive**

Over the past term The California Tech has been printing a series of advertisements which I and several other Techers find extremely objectionable. The ads in question are those purchased by Burgers in central in an effort to get Techers business. These ads have been in the poorest taste possible and are an insult to Techers, not only as Techers but also as people.

It is generally conceded that Caltech is a predominantly male school and that the average homemaker couldn't care less what size of cement block building there is several orders of magnitude larger than in the world at large. As a male Techer I cannot deny that photographs of mildly draped women are pleasurable (in fact, I rather affirm the notion). Nevertheless, I and others strenuously object to the pictures and phrases used in Mr. Hindoyan's ads.

It is true that nothing too bleary-eyed passes here in any of the ads, but surely the line "Everybody got it made." in conjunction with the elevated skirt groy and a come-on smile is in poor taste, especially in the most naive frying. If Mr. Hindoyan is running a pick-up parlor, as he seems to be, to sell these and his other ads, he should not be trying to disguise his operation as a business. If Mr. Hindoyan is only trying to sell food he would be better advised to advertise the quality of his food. If his business is any good it will get customers on the quality of the food, whether on the posturings of a few mediocore models.
Tech's Warren Report Is Out

by Easinio Schneuold

Ed Note: Most of our readers will recall that a special Caltech faculty-level Ad Hoc Committee on the Undergraduate Program was created last year to study undergraduate education at Caltech. In February and March this Committee held several Open Hearings, which were attended and addressed by many members of the Caltech community, and which were randomly covered in The California Tech. This Committee has recently released its final report to the Faculty; the following article discusses the material in that report. Copies of the report are available through the office of Professor Knowles, the Committee chairman, in Thomas Lib.

The report briefly cites the history of the Committee, which was formed primarily to meet accreditation requirements for Caltech. The Committee decided to hold its Open Hearings, discussing the question "Is Reform Necessary in the Caltech Undergraduate Program?" in an effort to gather information from many diverse sources.

The Hearings were briefly described. Summaries of the testimony at these Hearings were included in an Appendix to the report, but this Appendix is not generally available, being at pages 150 and 151. The report goes on to say:

"As we expected, a multitude of topics were covered at the Open Hearings. The issues to which attention were most frequently drawn were as follows:

Institutional academic requirements. Are they too numerous? Too narrow? Too restrictive?

The grading system. Is it intrinsic to the creative capacity we want in our graduates? Does it foster unhealthy competition?

The academic spirit. Are we excessively prescriptive in our courses? Are the time and work demanded of the student excessive? Are we too rigid in our academic format?

The Humanities program. Do present or proposed requirements help or hinder the student in his pursuit of, say, the arts; What is the role of foreign languages? How much foreign language should be offered?

"Diversity. Is our student body too homogeneous? Should we admit, or encourage applications from, students with a wide variety of career goals?"

"Quality of Life. Are our student houses stifling? Should a wider variety of housing alternatives be available?"

"As we expected, a multitude of topics were covered at the Open Hearings. The issues to which attention were most frequently drawn were as follows:

Institutional academic requirements. Are they too numerous? Too narrow? Too restrictive?

The grading system. Is it intrinsic to the creative capacity we want in our graduates? Does it foster unhealthy competition?

The academic spirit. Are we excessively prescriptive in our courses? Are the time and work demanded of the student excessive? Are we too rigid in our academic format?

The Humanities program. Do present or proposed requirements help or hinder the student in his pursuit of, say, the arts; What is the role of foreign languages? How much foreign language should be offered?

"Diversity. Is our student body too homogeneous? Should we admit, or encourage applications from, students with a wide variety of career goals?"

"Quality of Life. Are our student houses stifling? Should a wider variety of housing alternatives be available?"

The report went on to state that "... many provocative ideas were offered by those who felt strongly enough to present their thoughts to the Committee. After discussing various topics suggested in the Open Hearings, the Committee decided to concentrate its attention on the issues of Institutional Requirements and Offerings. These two related subjects were matters of concern to the students.

Muddy Mudders

Continued from Page One

editor and I walked in (we still thought they were from Occidental). Everybody just stood around and talked. I took some pictures and the police made the token effort of getting the license number of the drver of the truck.

Is Meevy a Matter

Around the time I discovered that they were really Mudders, Dirty Dave drove up and was immediately surrounded by the curious. Shortly thereafter, Mrs. Brown arweled with her dog. She explained that she decided to give the dog an early morning walk because she hadn’t realized to California time from Swedish time.

People talked for a few more minutes. It would be nice if the cannon were returned to its original site. The Mudders did this but weren’t very careful. They pulled the 3000 pound cannon over the ditchies rather rapidly causing the wooden wheels to complaint.

By 6:00, everyone had left and things remained quiet (relatively) until sometime between 4:00 and 5:00 a.m. last Saturday. But this time an anonymous tipster notified the police. Some 250 Mudders finally arrived.

Of Competence

In preparation, Fleming chained the cannon to a tree and boarded up the doors. Then they connected two fire hoses to ample water supplies, one in alley one and the other in alley two. The Mudders gathered in the Athenaeum parking lot again and prepared to block the truck and things were stalemated for a few minutes until campus security showed up.

In an amazing display of loyalty, one of the guards unscrewed the valve stems of the trailer tires. People stood around and talked. Some turned on the police and things remained quiet (relatively) until sometime between 4:00 and 5:00 a.m. last Saturday. But this time an anonymous tipster notified the police. Some 250 Mudders finally arrived.

Mag Wheels and the Lug Nuts are back at the Ice House, and seem to be ready for their try for stardom at the Ontario Motor Speedway superconcert. At one time, the only things that Mag Wheels etc. had going for them was their drive and energy on stage, their ability to sweep the audience up into the music of the fifties and early sixties. This they can still do, but what is more important, now they can do it with more musical skill.

At one time, the sax player seemed about the only really competent musician of the group, with the guitarist barely competent and the bassist and drummer just sort of keeping the beat. Each time I heard them, though, the music was done better and better, and this time the instrumental work was really good. The guitarist did better on songs like "Johnny B. Goode" than I had thought him capable a few months ago, and on "La Ramba" he did a solo that I actually found impressive. The show opened with "Chantilly Lace," ran through a lot of Elvis and other stuff, and ended with the real rockers. For the first time I felt that Mag Wheels did at least as good a job as most of the original versions of the songs.

If you dig any of the music of the fifties, go see Mag Wheels and the Lug Nuts.

News Briefs

Continued from Page One and what-have-vous should be directed to either Philip Mansey (Ruddock), or left with Flora in Wisconsin, as soon as possible. Anyone vaguely connected with the Institute is invited to submit stuff.

New Brief For Biology Tutorials

The list of Biology tutorials (Bi 23) to be offered next term is now available in the Biology Office, 156 Church. The tutorials are staffed by Biology faculty, post-docs and grad students. They provide an opportunity for learning through personal contact in a small group situation and cover a broad range of subjects. Bi 23 may be taken for up to 6 units; grading is pass/fail.

Audit

Chamber Music

Due to the balance of instrumentation and the intimate nature of small ensembles the Chamber Music Clunes were not able to accommodate everybody. Some classes even had to be divided. However, a warm welcome is extended to all those that were not accommodated to audit any of the classes on Thursdays from 5:30 p.m. to 7:30 p.m. and from 7:45 to 9:45 p.m. in Baxter Hall, rooms 19 and 25. This can be an opportunity for gaining knowledgeable experience and of meeting with congenial people.

O, Come, A! Ye Faithful

This weekend CEAC invites all of you to alleviate your frustrations at the recycling center behind Steele, and get paid $2/hour with a free lunch. We'll be loading glass, starting at 10 a.m. Pliers or a screwdriver may be useful.

Plunketry

Plunk-Plunk

Rich Grenier, Al Nikuro, and Kelly Beatty are trying to start a Dave Brubeck-type quartet for next term, but they still need a string bass player. If you can be of any help, and would like to do the arts a great service, see Rich (Page 209) or Al (Ruddock 103).

Karate Demonstration

By Blackbelts

Kung fu and Korean Taekwondo styles. Saturday, November 17, at 2 p.m. Pasadena Public Library Auditorium, 285 East Walnut Street. Admission free.
Jazz is a difficult music form to pin down. It has no very specific rules and is very flexible with regard to such subtle things as style and composition. This very amorphousness makes definitions of good and bad jazz pretty much subjective matters. Each person can decide he himself is the ultimate authority on the quality of a piece or a group and very few will say him nay or contest his judgement for want of specific criteria for evaluating jazz.

Despite these difficulties there, are times when even the most vain jazz relativists will concur. When in the presence of perfect-
CERAMICS

Continued from Page Two

When you come to Caltech, you are available now. R. Stiles, world-respected authority in the field of ceramics, has been an inspiration to many people. He encourages his students to do several projects using ceramics techniques, and instruction on the techniques is available in the workshop. After one completes a project, he has a large variety of glazes to choose from. Because of the type of clay, however, these are generally dark colors, but quite attractive. The workshop possesses its own kiln, as well as just about anything else you would need for ceramics.

The workshop is open for new members. If one is interested only in one Saturday at 11 a.m. and join simply because they may not be accompanied by graduate work, or may involve only a small number of tenured faculty. The effort in foreign languages appears especially vulnerable in this respect. The Committee regards foreign languages as an integral part of the Institute's academic activity, one which needs naturally with other areas such as literature and history. The language program should accordingly be carried on by a faculty whose stature and status is comparable to that of the remainder of the faculty of the Institute.

Parents' Day

Continued from Page One

As art and culture and independent research.

Mark Johnson was the third speaker, and began with mentalities about Caltech, then says "Things here are massive ..." He is not convinced that all nonphysicists need a second year of physics, especially as given in the present Physics 2. He suggests in response to questions that it might indeed be possible to offer in one year a course which would provide a sufficient minimum of physics as needed by all Caltech students.

The Committee considered several alternative formulations to Physics 2, although delaying any decision on the matter was a matter of deliberative bodies. One proposal considered called for retaining one year of physics as an Institute requirement, with perhaps just one additional term of (any) physics, to be taken at any time during the students' stay at Caltech. Physics 2 would be retained, and continue to be required by such options as wished to do to.

Other proposals included: to retain the two-year requirement, but broaden 108 physics to include other topics, such as biophysics.

To permit Physics 2 to be taken at any time after the freshman year.

To revise the grading system to permit all Institute required courses to be graded A–B–C–No credit, or pass-fail.

Courses to be graded A–B–C–no credit, or pass-fail. The Committee feels that Physics 2 is too specialized and narrow to be required of all students, particularly certain biology, mathematics and social science majors. Still others consider that two years of physics is too much physics to be required of all undergraduates.

Time out for Cheers

The Open Hearings had not broken out much comment on the Institute physics requirement, so the Committee solicited additional information, in particular from Professor Robert Vogt, well known to generations of Caltech underclassmen. Dr. Vogt "expressed strong dissatisfaction with the need to teach 'conscripted' students in Physics 2. . . . He is not convinced that all nonphysicists need a second year of physics, especially as given in the present Physics 2. He suggested in response to questions that it might indeed be possible to offer in one year a course which would provide a sufficient minimum of physics as needed by all Caltech students."

Proposition 1

Change Article XIII, Section 7 from:

Section 7. BIG T ASSESSMENT. A special assessment to make the Big T available to all students shall be made payable on the days of registration at the rate of three dollars first term and two dollars second and third terms. An undergraduate withdrawing before the end of third term may either receive a refund for installments paid on the subscription, or, upon written request to the Business Manager of the Big T, complete payments and receive an annual. Before the end of third term, a member who does not wish to receive a copy may, upon written request to the business manager of The Big T, receive a refund of any installments paid toward that year's book.

Proposition 2

Change Article XV from:

Section 1. NAME. The official newspaper of the corporation shall be The California Tech.

Section 2. POLICY. The Editor and Business Manager of the newspaper shall be elected by a vote of the student members, for the success of that publication. The Board of Directors may make...
Section 3. FINANCES. The Business Manager of the California Tech shall be responsible for all funds belonging to the California Tech and shall deposit all funds received in said bank as approved by the Board of Directors. He shall account for all monies and expenditures in a manner recommended by the Treasurer of the corporation. He shall submit term and annual reports to the Board of Directors on the financial condition of the California Tech. All checks for expenditures shall be signed by both the Business Manager and the Editor.

Section 4. PROFITS. The Editor(s) of the California Tech shall receive a salary of three hundred dollars ($300.00) for the year's work. On advertising sold and paid for, not subject to any commission in class or outside advertising agencies there will be a net commission of 35%. The same rate will hold for all advertising from which such outside commissions and discounts come to less than 35%, the amount remaining when the outside commissions are subtracted being considered the net commission. Should the external discounts and commissions exceed 35%, the net commission shall be divided as follows: The first six hundred dollars ($600.00) shall be guaranteed to the business manager of the remainder, 50% shall go to the business manager and 50% to the editor(s).

Section 5. EXPENSE ACCOUNTS. The Board of Directors shall be solely responsible to the Board of Directors for the success of that publication's funds in a bank as approved by the Board of Directors. He shall submit term and annual reports to the Board of Directors on the financial condition of the California Tech. All checks for expenditures shall be signed by both the Business Manager and the Editor.

Section 4. PROFITS. The Editor(s) of the California Tech shall receive a salary of three hundred dollars ($300.00) for the year's work. On advertising sold and paid for, not subject to any commission in class or outside advertising agencies there will be a net commission of 35%. The same rate will hold for all advertising from which such outside commissions and discounts come to less than 35%, the amount remaining when the outside commissions are subtracted being considered the net commission. Should the external discounts and commissions exceed 35%, the net commission shall be divided as follows: The first six hundred dollars ($600.00) shall be guaranteed to the business manager of the remainder, 50% shall go to the business manager and 50% to the editor(s).

Section 5. EXPENSE ACCOUNTS. The Board of Directors shall be solely responsible to the Board of Directors for the success of that publication's funds in a bank as approved by the Board of Directors. He shall submit term and annual reports to the Board of Directors on the financial condition of the California Tech. All checks for expenditures shall be signed by both the Business Manager and the Editor.

Section 4. PROFITS. The Editor(s) of the California Tech shall receive a salary of three hundred dollars ($300.00) for the year's work. On advertising sold and paid for, not subject to any commission in class or outside advertising agencies there will be a net commission of 35%. The same rate will hold for all advertising from which such outside commissions and discounts come to less than 35%, the amount remaining when the outside commissions are subtracted being considered the net commission. Should the external discounts and commissions exceed 35%, the net commission shall be divided as follows: The first six hundred dollars ($600.00) shall be guaranteed to the business manager of the remainder, 50% shall go to the business manager and 50% to the editor(s).

Section 5. EXPENSE ACCOUNTS. The Board of Directors shall be solely responsible to the Board of Directors for the success of that publication's funds in a bank as approved by the Board of Directors. He shall submit term and annual reports to the Board of Directors on the financial condition of the California Tech. All checks for expenditures shall be signed by both the Business Manager and the Editor.

Section 4. PROFITS. The Editor(s) of the California Tech shall receive a salary of three hundred dollars ($300.00) for the year's work. On advertising sold and paid for, not subject to any commission in class or outside advertising agencies there will be a net commission of 35%. The same rate will hold for all advertising from which such outside commissions and discounts come to less than 35%, the amount remaining when the outside commissions are subtracted being considered the net commission. Runners Fall To Fifth

The Caltech cross country team completed its season with the SCIAC Championships meet at Puddingstone Dam two weeks ago and the District Meet last Saturday. After a respectable 4-4 season (3-3 in the Conference), the squad tuned in a catastrophic sixth place out of 7, leaving Caltech fifth in the conference.

The Beavers came back with a satisfying fifth place finish in the District Meet, however. The "grueling" race claimed a number of casualties resulting in the disqualification of several teams. Due to superb hill and mog training, the Caltech contingent, consisting of Junior Greg Griffin and Freshmen Steve Kellogg, Joe Argazi, Tom Corfeli and Rich O'Keefe, persevered. Oxy was the undisputed victor of the race as usual, but Caltech exacted some revenge by defeating Cal Lutheran.

Proposal 2 (cont.)

Continued from Page Seven

with books previously approved by the Board of Directors. He will account for all receipts and expenditures in a manner recommended by the treasurer. He will submit term and annual reports to the Board of Directors on the financial condition of that publication. He is the only one empowered to transact business in the name of a publication. All checks must be signed by both the editor and the business manager.

Section 4. Contracts may not be made by the business manager of any publication for a longer period than the academic year in which he holds office, except that The California Tech may enter into contracts for national advertising and The Big T may enter into contracts for covers for a period not to exceed three (3) years, if the proposed contract is first approved by the Board of Directors.

Section 5. All commissions and salaries will be paid on the satisfactory performance of the year's work. No commissions may be paid to any newspaper, unless the advertising has been paid for.

(a) The California Tech: The editor will receive a salary of six hundred dollars ($600) per year, and the business manager, if paid for, will receive a commission of 25%; the net commission will be the difference between 25% and the total external discounts and commissions received.

(b) The Big T: The editor will receive a salary of four hundred dollars ($400) for the year's work. He may appoint a maximum of four assistant editors, who will each receive one hundred dollars ($100). The business manager will receive a commission of 15% on all advertising sold and paid for.

(c) The Little T: The editor will receive a salary of two hundred fifty dollars ($250). The business manager will receive a commission of 15% on all advertising sold and paid for.

Section 6. The Board of Directors may, at its discretion, honor all personal expense accounts incurred by the members of any publication staff while in office.

Section 7. The editor and business manager of The California Tech take office at the beginning of the academic year in which they are elected; the editor and business manager of The Big T take office at the beginning of the academic year covered by their edition; the editor and business manager of The little t take office immediately following their election; the editor and business manager of Totem take office the first day of June.

Section 8. The distribution date of Section 7 must be no later than ten (10) days after the beginning of term the following year.

Redlands Not Crushed

by J.M. Wett

Caltech water polo continued its winning streak last Saturday with an 11-1 victory over Whittier. All good things, like winning streaks, usually come to an end, however, and Redlands' 16-7 defeat of Tech on Wednesday in the SCIAC's latest two-game streak.

The tankmen were in high spirits for the Whittier game, which occurred three days after Tech's 5-0 shutout of Pomona. Whittier's slow first-year team was swamped by Tech's moderate speed, so that even Tech defensemen were able to get body-length leads over their opponents during 10-yard sprints.

Saturday Morning Scores

Russ Denierio started the scoring spree with two first-period goals. Howie Bobb scored two in the second quarter, and additional tallys by Denierio and Steve Bitondo gave Tech a 6-0 halftime lead.

With the outcome of the game in little doubt, Tech's halftime talk centered around the hopes of holding Whittier scoreless. No tech water polo team has ever won two consecutive shutouts, but the 1973 tankmen has a string of six consecutive scoreless quarters at this time.

Shoutout Steak Broken

Whittier finally got its chance to score after Tech was assessed an ejection foul. They got off one good lob shot—their only good shot all day—which escaped goalie Virgil Shields' outstretched fingertips and ruined his shutout. But goal in two games isn't too bad a double record, regardless.

With the pressure off for getting a shutout, the Techers had a lot of fun (at Whitter's expense) in the final period. Nearly everybody scored, and those who didn't were busy passing the ball to those who did.

Freshmen Mark Visser and Mike Wilson scored their first varsity goals, though Wilson's was nullified because one of Tech's co-captains committed a 2-yard-line violation (offside to you soccer and hockey fans). Denierio (yes, the same co-captain) scored twice more, giving him five goals for the day, while Bitondo and Bob Kieckhefer added the other four-quarter tally.

Redlands' indoor pool has often been the scene of very poor showings by Tech's water polo teams. Wednesday's 16-7 rout was no exception, as Tech looked like the little team which led Redlands for 3½ quarters at Tech three weeks ago.

Despite giving Tech a 1-0 lead less than a minute into the game, Redlands came back at 7-1 at the end of the quarter and 7-2 at halftime. Tech narrowed the lead to 10-6 after three quarters on two more goals by Denierio and one apiece by Bobb and Bitondo. Astoundingly shows that Redlands outscored Tech 6-1 in the final period.

Tech now has a 4-5 record in SCIAC and is in solid possession of fourth place. The season ends Saturday with a homr game against Occidental at 10:00.
