Sophomores Win Mudeo First in Eleven Years

by Alan Silverstein

Caltech's 59th annual Mudeo was held last Sunday afternoon and once again it proved a success, drawing a large crowd of spectators and participants, including TV and press reporters. This year's contest between the frosh and the sophs was held on the old Throop site, which with only a little effort was converted into a mud pit that rivaled the Alumni Swimming Pool in size and surpassed Baxter Pond in muckiness (but not in number of goldfish).

The combination horn/kloax/bells resounded off the walls of the campus precisely at 2 p.m., under clear skies and the Mudeo began. The first event (for which no points were awarded) consisted of having as many frosh as possible wade into the glop, supposedly to get used to local conditions before the experienced sophomores entered, but actually so they could do the dirty work of clearing the bottom of the pit of bits of Throop (ouch!). Throop was the winner, outnumbering the frosh.

The Herd of Judges, Lou Scherer, Rick Snydor, Dave Novikoffimoto, Bruce Schupler, Channon Price, and Franches Janssen, then declared that the frosh won, chose the south end of the Throop site Mudeo pit, and wondered why the sophs were stealing half the length of the tug-of-war rope.

Ho, Ho, Ho, Ho, Joe

The sophomores' strategy soon became apparent. As the frosh (who outnumbered the sophs three to one) pulled the rope through the hands of the sophomore contingent, A surly Tech editor tied the end of the rope to the railing on the North Throop steps. By the time the stratagem had been discovered, a tie (appropriately enough) had been declared. The frosh had avoided a sure win. Score: Frosh 1/2, Sophs 3 1/2, Handrail 3.

Pit the Handrails!

Next up on the agenda was the Sack Race, a maddeningly slow relay hop-skip-and-slide. The object was to be the first of the two classes to complete ten laps across the pit, and the rules stated that the team member must keep both feet inside the sack whenever in the "water". However, there was nothing in

Get Some ACTION

Volunteers Needed Immediately

by David Callaway

This last Wednesday, ACTION came to the Tech. ACTION is a federal agency formed by the affiliation of several federal volunteer programs, the most well-known of which is the Peace Corps, an organization comprised of over 8,500 volunteers and trainees working in over 500 programs in 56 countries. On July 1, 1971, it was merged with other citizen service organizations to become the International Division of ACTION, a federal agency designed to put more people, more money, and more ideas into citizen service than ever before. The idea of ACTION came from President Richard Nixon in early January 1971. He voiced a need to "forge an alliance of the nations" of the world in service to the needs of the people. The aim of ACTION is once again (as if it ever stopped) collecting material for a probable Fall's Totem. (No, that isn't going to be its name.) For those among you who may have forgotten, Totem is put out every once in a while, and contains poetry, short stories, photographs, drawings, and varied what-have-you's, all done by people who are, in one way or another, part of the Caltech community.

The last issue, A Winter's Totem, was getting kind of ready a year ago, and it's about time for another one. Unfortunately, there seems to be a certain lack of material. If you would like to help correct that by submitting your what-evers, you may direct them to Philip Massey (Rudock), or leave them in Flora's office in Winnett.

Earn Money; Recycle Yourself

$2.00/hour wages will be paid to you if you come work at the CEAC recycling center (parking lot behind Steele) this Saturday, 9:30 a.m.-2:30 p.m. We need your body. (Free lunch provided).

The Great Pumpkin Is Coming

Next Wednesday night. Yes, kiddies, here again is your chance to go trick or treating for UNICEF. Collection boxes will be available on the Olive Walk next Monday, or directly from Brian Yandell.

BOD To Prepare a New Budget

The BOD's New Budget Meeting will be held Sunday from 5:00-7:00 p.m. Anyone interested in coming should go with an open mind.

Yacht Club Needs Members

Caltech students, faculty and staff are welcome to attend the November 7th Yacht Club party to meet other sailors and nonsailors from seven Southern California colleges and universities. The party, a monthly event, is held at the Occasional Yacht Club recreation room at 4635 Admiralty Way, Marina del Rey.

For information call Lan Lienvend in 790-1835 or Bob Bera at 570-9174, or Occasional Yacht Club at 821-0827. To join, send $10 for a full year's membership to Intercollegiate Yacht Club, 2005 W. Vine Street, Alhambra, California 91801.

The editors, business manager, and staff of the California Tech would like to thank the Caltech Service League for helping to make this and future color issues possible.

Yearbook Facs

Major Crisis Due to Leadership Vacuum

by Gavin Claypool

Fallon in filling two positions on The Big T staff could result in the cancellation of this year's book.

Even if an editor and a business manager are found, the annual still faces the problem of increasing revenues or ending up with a substantially different which ASCTW dues would have to cover.

Past History

The year's staff, like most other organizations, is usually self-perpetuating. (This was very apparent in the last sixties, when nearly all staff members came from one house.) In general, one of the members of the past year's staff became editor, and underclassmen were recruited to help on that book and as potential future editors.

All this went down the drain when The Big T started coming out later and later. Peter Chau, editor of the '72 book, was forced to finish up the '71 book before leaving for grad school in August, and it was left up to '73 editor Phil Neches to complete it. Caltech February 1973 by the time he did.

By the same time, the number

memoriam

Thomas Lautrissen

by Dave Peisner

Dr. Thomas Lautrissen, world renowned expert on the energy levels of light mu and professor of Physics at Caltech, died October 16, at the Huntington Hospital in 67.

Born in Copenhagen in 1915, he arrived in Pasadena in 1926 where he attended Marshall Jr. High and later Pasadena High School. At Caltech, he received his B.S. in 1936 and his Ph.D. in physics three years later.

During his graduate years, he and his father built the first of free prescinted Van de Graaff generators that later made the Kellg Radiation Laboratory famous. This generator is still being used today by Dr. Whiting and is the oldest operating electrostatic accelerator in the United States.

A memorial service for Thomas Lautrissen is to be held in the Athenaeum at 3:30 p.m. on Thursday, November 1, 1973.

The following excerpts by members of the Caltech community represent a few of the fond memories of Tom Lautrissen.

"Always a champion of the Institute, what it stands for, and the policies required to achieve its goals. He loved light and did what he could to instill enthusiasm.

"...Most recently he helped ease the trauma of partially abandoning The Feynman Lectures on Physics on Ph 2 by taking over the job of lecturer in the non-Feynman track (track A) of the course. Though everyone had his own idea of what should be done about Ph 2, Tommy was able to put the show running despite the overabundance of divergent viewpoints.

"To those of us at Caltech who knew him well, we have lost a loyal friend and a unique source of solutions to the problems we did not hesitate to share with him. We'll deeply miss his wise council and the sense of humor that helped tie us together as a real community.

"When Tommy was Chairman of the Division of Nuclear Physics of the American Physics Society and Fay Ajzenberg-Selove was Vice Chairman, I remember a meeting when she was not there and he announced, "Mrs. Chairwoman is not here tonight--it is sick."

"...One day when I was a grad student and Tommy was a sophomore, I noticed his roller skates going down the hall past my

THE CALTECH FORUM

House Presidents
Hungry, Too

The Caltech Administration has seen fit to introduce a new food system in the student houses, and in some measure the students are suffering from it. Even on a day like the Chandler--R&R cafeteria is expensive beyond our means. Those who purchase meals (a moderate breakfast, light lunch and dinner) costs around $5.00, as opposed to the $3.15 a day that we were paying last year or the approximate $4.00 to $4.25 a day that we would have paid this year under a food contract. And the estimates for this year that were turned down included five waited meals and unlimited seconds.

We are hungry and the Institute seems unwilling to do anything about it, and what is most embittering is that it could help us to some extent at a relatively little cost. For instance, the 255 students of the old houses have 36 refrigerators. The 255 students in the new houses have only 18. We in Page, Lloyd and Ruddock plainly need more. We need them to keep our milk in so that we can have some cold cereal for breakfast. We need them to keep some cold cuts and mayonnaise so that we can make sandwiches for lunch. For the moment we are trying to have our evening meals catered, but we need help for our breakfasts, lunches, and snacks. The Institute has realized some advantages in doing away with board contracts, but we strongly resent being the ones who have to pay for the loss of a good gal.

--Richard Baker, Rudder Prez.

Frank Hobbs, Page President
Ken Stuteik, Lloyd President

Call Goes Out
For New Pronouns

As a women's lib advocate, I nevertheless think it ridiculous to neutralize words such as milkman or human. As long as these words are understood not to exclude women, they are fine. But in another respect the English language is, if not ambiguous, then uniquely. The pronouns 'he' and 'him' are usually understood to mean just that, not 'she' and 'her' commone terms. But when discussing a random person, it is wrong to have to say 'he or she' or 'he or her'; ambiguous to just say 'he,' 'him,' or 'it.' One way to remedy this would be to make it understood that at times 'he or him' will connote male or female, but this solution seems unacceptible. An alternative would be to coin two or three new pronouns containing a human being, replacing 'he-she' and 'he-him' respectively, in the same manner that 'Ms.' has been coined to replace 'Miss' and 'Mrs.' I am open to suggestions for the precise syllables to use for this purpose.

--Judy Powelson

Local Businessman
Responds to Letter

In the October 19 issue of The California Tech, an unreasonable and outspoken lady referred to us as an "unethical" business activity.

In mid-season a note was referred to me, stating that because she was a girl, I couldn't take advantage of her. I had an appointment with her at 2:00 p.m. She was quitting and taking all her brochures with her. It was signed (Laurie Schalit).

This young artist's letter has definitely exhibited a great poise and courage in appealing for moral and unreported remarks which we believe are not characterize.

Our establishment does not have to "tune Techers," as stated by this artist. The facts are as follows:

(1) Our organization is run by well educated, well mannered and extremely reliable students.

(2) Our establishment is patronized by several hundred students, faculty members and the alumni. We are proud of being able to satisfy the needs of these qualified patrons.

We are happy because we are able to provide these deserving students the best possible service in the market today. I would like to enlighten the readers with a few facts which are not well known by many.

I believe this young artist is unable to differentiate between facts and flashes of grandeur and ego inflation. Her understanding of the business world is so limited that I couldn't help laughing at some of her thoughts.

I don't recall seeing an ad in any magazine or newspaper where the name of the designer of that ad is mentioned! After all, we are selling a Very Good Product! For that we are buying a space in the student publication.

The California Tech, as one of the largest food contractors, uses hundreds of dollars for that design as part of a brochure, AND THAT IS OUR PROOF THAT WE ARE IN ANY WAY POSSIBLE. Most humans are ego seekers. We live with our egos and seek to attain them at any cost. We have paid one hundred dollars for that design as part of a brochure. AND THAT IS OUR PROOF.

As far as her compensation is concerned, we don't think one human being can do it by herself. Several artists have indicated to us that she has been very well compensated. That is not our concern. Our concern is a matter of personal integrity and we are not concerned with the economics of the business. We are concerned with the quality of the product that is purchased by the students. We are concerned with the satisfaction of the customer. We are concerned with the integrity of the business and the quality of the product.

We are not concerned with the economic aspects of the business. We are concerned with the quality of the product and the satisfaction of the customer. We are concerned with the integrity of the business and the quality of the product. We are concerned with the integrity of the business and the quality of the product. We are concerned with the integrity of the business and the quality of the product.
On October 13, a young rat was captured in the Page House lounge, running away from the Food Service kitchen. The next day, there was exactly one hamburger missing. It isn’t known whether the rat had eaten the hamburger or whether the rat was intended to be the hamburger. Maybe it was just scared off by the prices. The rat is now safely caged with real food available. She has been named Dabney in honor of the two-legged rats living in the house of the same name.

The Keeper of the Rat

Mary Beth Strikes Back

This is in response to Anita and Roger Lighty’s letter in the October 19 Tech. The article on language was intended to intend [sic] to illustrate how our language reflects attitude about women. I do not believe that changing words is going to have a significant effect on attitudes. I do believe that if we start to think about some of these things we take for granted, they may start to change. That is the purpose of the column— to stimulate thought on subjects relating to women.

Your point that I could have used, such as the “Dr. and Mrs.” even when both are women, is valid. I would emphasize that a name such as Maury, Mau­say, or Manis would be a quorum as soon as Manor was replaced by a rat.

Mallonee recommended that everyone go to the lounge as soon as Manis walked in. Mallonee recommended that you could have related it more to Caltech is well as to who the rat is. New students are sometimes confused by the different kinds of people at Caltech. In high school, there were exactly three BODies. At Caltech, there are many more, and the BOD is certainly not a quorum.

The rat is now safely caged with real food available. She has been named Dabney in honor of the two-legged rats living in the house of the same name.

The Keeper of the Rat

Mary Beth Othletic

Very Dull BOD

by Dennis Mallonee

This week’s BOD meeting was a travesty (as usual). At 4:00 Sunday, at which the meeting was supposed to begin, there were exactly three BODs present. John, Manis, and Mason. Mallonee was standing in the Tech office and volunteered to go over to Page and get a quorum. He found Wakai in the library and Peisner in his room. Wakai was told to get his ass over to Winnett, and Peisner was told to bring his checkbook because the Big F editors were going to be paid.

By the time everyone got back, Massey was disappearing. He had been sent over to the Winnett library and Peisner in his room. Mason said Johnson would be right over.

Then it was time for the meeting. Mason announced that there were exactly three BODs. Johnson-blithering that Mallonee was going to try to have a quorum. Mallonee recommended that everyone go to the lounge as soon as Manis walked in. Everyone did, except for Peisner who was writing checks. The meeting finally got under way at 4:20 when Johnson came back. Johnson was misleading the minutes of the last meeting. They were very uninteresting at that point. The vote to adjourn was another. Claypool and Beck­man wandered in to join the quorum. Mariani and Mallonee, and a couple of other people who were already there.

Mallonee moved to approve the Junior Class run-off election results (Lou Schefler, President/Dave Novikoff, Vice). After a little discussion, it was carried unanimously.

Johnson spent an hour-and-a-half rambling on about some of his pet projects. One of them was a good idea for TV ads.

It was suggested that ASCIT join the Y in sponsoring an anti-Proposition One (Reagan Tax Limitation) meeting if it’s held by midnight, November 20. 1973. In addition, Benson's Loop Dealie was brought up at the meeting. Benson's Loop Dealie has been introduced to the California Tech community for eleven years with special attention and lounge, running away from the Food Service kitchen. The next day, there was exactly one hamburger missing.

Burger Continental

For a coffee break or a delightful lunch, Burger Continental is the place for the Techer banch.

Caltech Discount Tickets Still Available!!

536 S. Lake Ave., Pasadena, Tel. 792-6634 — 2 blocks from Campus

The CALIFORNIA TECH have Ph.D's, or of sending the invitation to "Dr. — (who may be a woman) saying "Bring your wife." There is no problem here of having to invent or distort words to make them suitable; it is purely a matter of not thinking.

Finally, if you feel there are topics which aren’t being covered, why don’t you write the column occasionally? I would appreciate it.

—Mary Beth Othletic

Gor!s Yeu!

State Scholarships Now Available

Undergraduate college students who are in need of financial assistance to continue college should file a State Scholarship application. Approximately 11,475 new State Scholarships will be awarded in March 1974 for use in 1974-1975. Most of these new scholarships will be awarded to high school seniors but students who are not high school seniors are also available for currently enrolled college students who are not underclassmen in the State Scholarship Program.

State Scholarships can be used for college tuition in any two year college in California, plus the California Maritime Academy. California College Grants range from $500 to $2,200 at independent colleges, $300 to $600 at the University of California. There is a limit in the amount of fees charged to students at the California State University and Colleges (approxim­ately $160). In addition, students planning to attend a community college during the 1974–75 academic year may have their scholarships held in reserve for them until the time they attend a four-year college. Those who will be underclassmen in 1974-75 and are not in the process of continuous military service.

Applications are available from Dr. Schaefer’s office (101 Dabney) or directly from the State Scholarship and Loan Com­mission, 1410 Fifth Street, Sac­ramento, California 95814. Applications must be filed with the State Scholarship and Loan Com­mission by midnight, November 20, 1973 and 1974. Confidential Statements must be filled with the College Scholarship Service, Box 11, 1173, Scores on the Schol­astic Aptitude Test must also be furnished as part of an application.

Middle East Crisis

To Be Discussed

In Winnnett Lounge

Last night, Dr. Jean Houston lectured on “New Ways of Being-Consciousness and Its Transformation.” A poster of the Foundation for Mind Research, she is studying non-drug ways of exploiting human potential. Among the topics Dr. Houston discussed were altered states of consciousness, accen­tered learning processes, scientif­ic creativity, visual thinking, and the internal control of pain and pleasure.

Various members of the Caltech community feel the need to discuss the Middle East crisis this Monday, in Winnnett Lounge, at 7:30 p.m. Topics will include various economic, and political aspects, and a question-and-answer period will be held at the end.

Female folk guitarist Ber Spangle will perform in the Y’s concert next Friday, Novem­ber 2, in Winnnett Plaza.

Next Friday will also be Barbara McCutcheon’s last day with the Caltech Y. Barbara has been with the Y for two years and on campus three years. Among her many duties were maintaining the Y’s program ideas into reality. Friends who wish to see Barbara before she departs for Maine are urged to do so before Friday after­noon.
Spectrum specializes in unusual/mainstream flown but high quality plays. This does not mean that Spectrum productions are "experimental," but rather that the less known works of playwrights great and small are produced if they are of sufficient quality.

Please remember that the Dobson Lounge Chamber Music Concert Series opens on Sunday, November 4 with the CalArts Art Ensemble of Chicago (flute), Maurita Thornburg (soprano), Allan Vogel (oboe), Buell Neidlinger (string bass), and Patricia Welch (harpsichord), performing a program of Bach, Cooperman, Handel, Scarlatti and Telemann.

Sophomores (and all others), Dr. Andy Ingersoll, on Monday, October 29, will be giving his famous lecture on relativism and faculty and the shape of the universe that was so well received in the '72 Starbucks. This is not the first time that this has been repeated; indeed this was the week that was widely known that Dr. Ingersoll was being besieged by requests for it. This time he'll be giving it in Beckman Auditorium. Go, Andy!!

Yearbook

Continued from Page One of staff members dropped consid-

erably. The '71 book (according to the staff book) had a few more-

ner staff. Peter Char and three others put out the '72 book. At the
time Neches resigned as editor, his staff was virtually nonexistent. The people who could help the new peddler of his staff ended up as editors of the '73 book.

Under the self-perpetuation theory, one of Neches' staff would have taken this year's book, none of last year's editors want the job again. And thereby hangs the tale.

Make an Easy Buck

Oddly enough, the number of people who are willing to work for the staff is quite high (comparedly). A majority of last year's editors and at least four others have agreed to help. An editor must be found, however, to coordinate their work, make the deadlines, and pick up his salary ($300 currently), although the Excom is considering a proposal to raise it.

The business manager's main responsibility is to augment the $800 that Neches' staff will have this year. He does this by advertising as much as he can. In addition, he sends out bills after the book is printed, circulates the book (including mailing copies to seniors), does the bookkeeping, and makes the ad-paste-ups. He receives a commis-

sale of the books will be used to sponsor the Los Angeles Public Library. Monies raised from the sale of the books will be used to benefit the library system.

In addition to the sale of books, the gala event will feature entertainment and food. Admission is free.

The state of the economy has been one cause of the small number of ads. Another has been the failure of the book to come out on time. The first problem ASCIT can do nothing about; the second one has hopefully been eliminated. The '73 book cost $7000 for printing alone. The current assessment of $8 per copy brings in just over $6000.
LET'S GET IT ON by Marvin Gaye, Tamla T2329V

The dedication of this album has a quotation by the artist stating, “I can’t see anything with sex, between presenting anybody.” That is the theme of Marvin Gaye’s newest album, borne out by most of the songs. The title cut is getting radio airplay, and is probably about the best thing on the album. The semi-reprise, “Keep Gettin’ It On” is also good, as is “You Sure Love to Ball.” The rest of the album is acceptable but not outstanding. One of the biggest things in the album’s favor is the fact that it is a refreshing change from the sexual hearts and flowers type of love song that makes up most pop music. This isn’t a teenage album, nor is it an album for people who get their kicks listening to Andy Williams and Johnny Mathis. What it is is an album of good music that deals with people and sex as sex. Listen to it — Nick Smith

Mythopoeicism

Lothlorien Wants You

Do you speak Elvish? Do you know the lyrics to the “Rohin Rohi” theme song? If you find yourself fighting a dragon, would you believe it? Do you enjoy reading and discussing fantasy? If you answered yes to any of those questions, there is an organization in which you might be interested. The Mythopoeic Society (the second ‘i’ is silent) is a national organization concerned with the furthering of fantasy. Its activities include publishing several magazines, sponsoring an annual convention, and having local meetings to discuss various works of fantasy. The local chapters have names drawn from different fantasies and legends such as Lothlorien, the chapter that meets in this area.

Six years ago, Glen Goodkind (yes, that’s his real name) got the thing started, and it’s been growing ever since. While the primary interests of the Society, I refuse to spell it again), are involved with three authors (J.R.R. Tolkien, C.S. Lewis and Charles Williams) there is a great deal of discussion and interest in other works. At each meeting a book or topic of some kind is discussed, ranging from a particular passage from Lord of the Rings to such books as Grendel, which is the Beowulf legend told from the viewpoint of the monster.

Besides the literary discussions, there are a great many other events in the Society, most of them slightly crazy. There are parties and picnics in costumes taken from history or fiction. Play readings and presentations are done. Articles, fiction, poetry and art are published. One group is doing a study of the various languages and alphabets used in major works of fantasy. An Elvish-English dictionary now exists. At their convention this year, the Mythopoeic Society will release a critical ear

Child Care Center Needs Volunteers For Second Season by Todd Hinkle

The Caltech Child Care Development Center, which serves children of Caltech students, faculty and staff is beginning its second season, and needs a variety of volunteers help from members of the Caltech community.

The kind of help needed offers potential volunteers the opportunity to work directly with very young children in their play and study or alternatively to assist the center by organizing and design and repair work at the center.

The center is housed in a converted Caltech house with a large yard at 239 So. Chester. The learning activities center around nature study, organized and free play, and are designed to accommodate the children’s own interests.

Everybody interested, either now or in the future, is cordially invited to the Open House at the Center Sunday, November 4 from 2–5 p.m. Or phone Todd Hinkle (793–0469), Caltech x2237 to talk about what you might like to do as a volunteer.
**Cross Country**

**Beavers SACked By CHM & Whittier**

by Steve Kellogg

Mount SAC! The name alone is enough to psyche one out. Two weeks ago the Caltech cross country team ran three against Claremont and Whittier and the smog and the dust and the never-releasing hills.

Junior ace Greg Griffin emerged victorious over the 4-mile course. His winning time of 21:11 benefited that of arch-rival Aikyana from Claremont by more than a minute.

Freshman Rick Debus, still suffering from an achilles tendon problem, turned in an outstanding performance, placing sixth overall of this has been a white, however, ran a mediocre race, splitting with a win over Whittier 22-33 and a loss to Claremont-Mudd 31-24.

**A Home Meet!**

Last week, Griffin led the Caltech team in a home race against Pomona and Occidental.

Lauritsen

**Continued from Page Two**

... 

"When I was a sophomore, I was among the first group of students in the new track A Ph 2. Dr. Lauritsen was the lecturer that year and the following are the best of his remarks to the class.

"I'm the only one who has to be here."

"Physicists aren't all that smart. One generally looks to experiments to get a hint."

"Cutting a magnet is like creating a magnetic dipole whose north end is north and whose south end is south--easy to remember."

"They couldn't make currents, they were still chasing cats."

"Volta discovered that although cats couldn't make currents, frogs could."

"The circulation, like whirlpools in a bathtub, is the strength of water biting its own tail."

"After you have written 'but' and 'and', you are required to write 'that'".

"This is a very pretty expression. I ... Motional emf, sometimes called emotion."

"Both of the experimenters were out sick and Dr. Lauritsen could not find the galvanometer apparatus, so he asked us to imagine a demonstration: 'When I push those two conductors together, what happens? Nothing.'"

"What happens when I turn on the magnetic field is we separate the sheep from the goats."

"Theoretically, the final covers what I didn't mention in class."

There have been very few lectures I have considered to be excellent. Dr. Lauritsen was one of them.

Dave Peiter

**Soc Streak Ends**

Caltech's two game "drawing" streak came to an end for Wednesday afternoon. The cross country team can claim a win over several members (including other Caltech sports like football in size). Most of these runners are freshmen not yet accustomed to the Caltech climate. Under the direction of Coach Leroy Neal, the team still has a bright future.

**Go For Blood**

The squad runs to uphold its name in the Chapman Invitational tomorrow at Hart Park. Next week they go for blood in the SCIAC All-Conference Meet at Puddingstone Dam.

---

**Credit Card Expiration Date**

**Up your aptitude.**

FIGURING OUT MATH PROBLEMS IS NOW AS EASY AS DIALING A PUSH-BUTTON TELEPHONE. IN LESS THAN A SECOND IT TAKES YOU TO READ THIS SENTENCE, YOU CAN ADD, SUBTRACT, MULTIPLY, DIVIDE, AND GET ANY ANSWER UP TO EIGHT DIGITS LONG...

**Satisfaction guaranteed**

Return within 90 days for a full refund. This is reflected in the fact that for the first time in many years, the cross country team can claim a win over several members (including other Caltech sports like football in size). Most of these runners are freshmen not yet accustomed to the Caltech climate. Under the direction of Coach Leroy Neal, the team still has a bright future.
Mudeo

Continued from Page One

the rules about attempting to steal the other team's sack, thus preventing them effectively from finishing, so twice a pair of silly face-for-allals developed around each sack (and its unfortunate occupant). When it became ob-

vious during the second such melee that the race would take hours to complete according to the rules, the judges just changed the rules—"First sack on dry land wins!" For some reason it was not quite obvious to the Judges that the first sack out was actually the frosh's, and then the point to the rooftops, who now led 1½ to ½.

Another relay race followed, called the Wheelbarrow. One contestant attempted to swim while his partner tried to hold onto his feet and keep up. The swimmer had the worst in the glooppy 3-foot-deep creed but both racers got a chance to get a mouthful of mud, as they changed positions in the middle of the round trip across the Pit. The sophomores were clearly more at home in the mud on this event, winning it for another point.

X-X Component Exists

For the first time in Mudeo history, the sophomores had more than one girl in the event, winning it for another point. The final, deciding contest, the Pole Rush began in the year 1915.

The Mudeo President, Fred S. Pomplano, announced: "Team with the most points wins!" The value for the event was (arbitrarily) set at 6 points—just what the frosh needed to tie. Naturally they spent some time making sure the tires were in the exact center of the pit (and not closer to the sophomores, as they had been tossed in). Then the klaxon sounded, and within 30 seconds about 7 tires were tossed out of the pit on the frosh side. Just about now the President and his Herd saw fit (for good reason) to call the event in the favor of the frosh, tying the score, and make good their well-planned escape into Tech's lighted windows during the ensuing chaos. It was not clear which team had won, or anyone knew if it was their assigned task to catch the filthy cheating rascals and send them into the Pit, or to protect the same wise, competent authorities from the losing team's wrath. Soon both classes got the mud out of their brains and went away by the villagers, but by then it was too late, and the judges were far away.

During the coronation graduate student Dave Clark, President and sole Member of the Revolutionary Mudeo Committee, took matters (and the media) into his own hands and declared a bounty on the head of the legal Presidents, announcing that the tie would be decided when one class produced him in the middle of the Pit.

Smart Juniors

The judges and President however remained out of sight for the legal one hour—with the exception of one poor unfortunate—and then spread the word that the Mudeo was officially over, with the sophomores victorious. Considering that the frosh have won the Mudeo for the past 11 years, we can only conclude that this year’s Judges were the worst ever... the worst ever. In any case, this year’s Mudeo will long be remembered... at least by B&G, who will have to clean out all the mud that various participants deposited in Millikan Pond while washing off.

Here, for the first time, is a comprehensive listing of all the Mudeos that ever have been—since the Pole Rush began in the year 1915.

The Caltech water polo team is currently swimming with a two-game streak in SCIAC competition. Victories over Pomona-Pitzer (by a 5-3 margin) and Whittier (6-1) give the tankmen a 2-1 record midway through the first round of conference games.

Pomona-Pitzer scored first and held a 1-0 lead at the end of the first quarter of the game at Pomona last Friday. But Tech co-captain Russ Desiderio soon turned the tide in the pool and Whittier actually managed to who scored three goals while the.
