Economics in the Lab
Grant to Fund Ec Experiments

[CBN] – A laboratory in which Caltech researchers can conduct experiments in organizational decision processes such as buying and selling is now underway at Caltech and will be established at Caltech with a five-year, $400,000 grant from General Motors Corporation. The director of the Laboratory for Experiments in Economics, Dr. Charles Plott, is a professor of economics and a pioneer in the field of behavioral economic science.

Such laboratory experiments are not just theoretical curiosities. The results of Caltech studies have already been used to aid wide-ranging experiments in political economy.

Economics and political science have both traditionally been dominated by descriptive and theoretical sciences. Only recently have researchers turned to laboratory methods to help them understand economic and political phenomena. "For many economists, experiments themselves extremely difficult tasks," says Plott. "Understanding the interactions in a simulated airline industry would be an example. This task involves as many complexities as sending a man to the moon. Economists develop theories to help them understand such complicated phenomena, but until recently they didn't notice that it might be useful to test those theories as they operate in very simple circumstances. If the theories don't work in simple cases, why should you expect them to work in the real world?"

"Ec Experiments" are quite familiar to undergraduates, who are dowered in droves by the promise of easy cash. In a typical experiment, "buyers" and "sellers" are let loose to trade, and the resulting profit structure becomes a vehicle for the mathematics of game theory, interest in political science, and international buffets.

The ExComm Report

by Theron Stanford

After the close of Senior and Junior elections on Monday, a complaint was lodged with the ASCIT ExComm contesting the election results on the grounds that the ballot was not publicized widely enough. The complaint alleged that the heading "Syndicate Alley" was confusing and stated that the "Auction" and "Posted Price" choices were missing.

The ExComm, however, claimed that in order to reveal the full picture, results of the vote, nullifying the election results. It was proposed to the Department of Experiments Committee that the ballot was in fact available to all voters in their decision-making process. The ballot as an option was not included; that having the said ballot as an option was not included in the final set of experiments.

The ExComm reviewed both the form of the ballot before submission scheduled for launch in 1990.

Dr. Giuseppe Attardi:

Dr. Giuseppe Attardi: the tiny structures that are the malfunctions and may be the cause of some inherited disorders.

Dr. Attardi received his M.D. in 1947 from the University of Padua, Italy, and came to Caltech via the Banting Fellowship in 1954. He then became professor of medicine, chairman of the ExComm will review any posted means to the researchers at a determined price. This was done to set policy when the railroad industry proposed to the Department of Transportation in 1977 that freight rates be determined for dry

It was proposed to the Department of Experiments Committee (a.k.a. "ExComm") was initiated Friday with a well-attended barbecue. For three hours, undergraduates representing every house and graduate students discussed the social life and lack thereof at Caltech.

Goals were set at first in some commerce, but it was later discovered that they contribute to "posted price" institution, proposed to the Department of Transportation in 1977 that freight rates be determined for dry

The ExComm was divided into "buyers" and "sellers." The experiment then revealed that in order to reveal the full picture, results of the vote, nullifying the election results. It was proposed to the Department of Experiments Committee that the ballot was in fact available to all voters in their decision-making process. The ballot as an option was not included; that having the said ballot as an option was not included in the final set of experiments.

Caltech to Construct Mars Observer Camera

by Ravi Subramanian

Caltech's Division of Geological and Planetary Sciences has been selected to participate in two aspects of NASA's Mars Observer mission. Together with Arizona State University, Caltech will build a camera under the direction of G. Edward Danielson for this unmanned Mars orbital mission scheduled for launch in 1990. Prof. Danielson has been selected by NASA to be an interdisciplinary scientist, combining data from several instruments in the study of martian atmosphere and climate.

The Mars Observer will conduct detailed observations of the planet from a low altitude, near polar, sun-synchronous orbit for a period of one Mars year (687 days). The principal investigator of the Mars Observer will be to make observations that will enhance our understanding of the geoscience and climatology of Mars.

The Mars Observer Camera will extend imaging science observations of Mars to a new level, providing at least an order of magnitude improvement over present Mars and Viking data.

As Caltech is where the instrument is being developed, Danielson feels there will be opportunities in the future for undergraduate involvement. At this early stage, there is specifically looking for software-oriented student to investigate advanced image compression techniques this summer. Interested students should contact him at extension 8601.
FRIDAY 16 MAY 1986

LETTERS

For Ditch Day

To the Editors:

I feel I must reply to the letter written by Jeff Tseng criticizing the ideas proposed by Dr. Todd Taylor in his talk entitled, "A World Without Nuclear Weapons!". Unlike Mr. Tseng, I did attend the lecture and found it interesting and thought-provoking.

As I understood it, the main point of the lecture was not to defund one plan for disarmament, but rather to emphasize the need to bring about disarmament quickly and strongly, even if this means taking substantial risks.

Dr. Taylor opened his lecture by stating that as citizens of the United States, we are all responsible for the nuclear decisions that will take place if the United States decides to launch a nuclear attack against the Soviet Union. Although I don’t pull on the trigger, I will help develop the equipment that is willing to consider, and even support, a first strike by the United States against the Soviets.

(Copies of a careful analysis of U.S. nuclear policy clearly shows that the United States is shifting away from a strategy of developing stabilization systems to maintain deterrence to developing a strong first strike capability to use to blackmail the Soviet in world affairs.) I personally find the possibility of having the blood of millions of people on our hands somewhat unsettling. The only way to eliminate the threat of nuclear war entirely is through total disarmament. Dr. Taylor stated that he has spent much time over the past year thinking about how to bring about total disarmament, but it is not an easy problem. (Sit down and think about it sometime.) In his lecture, he presented the idea that he has been working on for some time now. But, did he claim to have the best or the only solution? What he did was emphasize the need for all of us to think about the problem from a lot of different angles, and to come up with new ideas and solutions. The more thinking that is done about this problem, the more likely it is that a viable solution will be found.

Dr. Taylor acknowledged that his suggestions are idealistic and may not work. However, he stressed that even if they never work, the consequences cannot be as bad as the alternative of nuclear war or the proposed form of mass destruction. It is worth taking risks to see disarmament and world peace brought about. Dr. Taylor believes that Mr. Tseng seems to oppose. Dr. Taylor captured this viewpoint by closing his lecture with the statement, "It is better to strive for a world safe for good than to be a part of making a world too bad to imagine." I have to agree with him.

Mr. Tseng’s letter did contain some valid points. However, in my opinion his words would be better spent criticizing about how to improve the world than criticizing those making an honest effort to do so.

Ann Heil

Economics

These studies of committees have also influenced real-world policy. In the past, the airline industry was confronted with a number of problems. Some of the problems included a strike by cabin attendants, a strike by pilots, and a strike by flight attendants. These strikes were seen as a threat to the efficient service that passengers had come to expect. In response, the airline industry formed a committee to address these issues. The committee was composed of representatives from the various unions, airline management, and government officials. The committee worked to find a solution that would be acceptable to all parties involved. The committee’s efforts were successful, and the strikes were eventually resolved.

For our next issue, we will be exploring the role of committees in other industries, such as the automotive industry and the automotive parts industry. We will also be examining the role of committees in international relations, and how they have been used to resolve conflicts between nations.

News From the GSC

A new board of directors was voted in by the Graduate Student Council at its meeting on May 13th. The directors for the coming year are shown in the box. Mr. Tseng was re-elected Chairman, and Tony Strick was elected Vice Chairman. Lynn Hildemand and Roger Wagner were re-elected as Secretary and Treasurer. These four individuals will work to represent the students’ interests and concerns.

For the coming year, the GSC can have up to 33 directors. One director is allowed for each 50 graduate students or fraction thereof in a given department, along with a total of 3 At-Large Directors. Many departments are not currently

WANTED:

Business manager for the California Tech. Duties include organisation of advertising, and ad layout. Fantastic pay and benefits.

For details, contact Dave Goldreich, x3645.
DROP US A LINE. We’re looking forward to what’s shaping up to be a truly great whitewater season! Here’s some general information and this year’s class and price list. Below is a coupon you can clip and send for your reservation or give us a call.

GROUP DISCOUNT: A 10% discount will apply to all groups of 6 and over.

RESERVATIONS AND DEPOSITS: Reservations are accepted by mail or phone on a first-come, first-served basis. A 50% deposit is required within 7 days of your call. Full payment is due 30 days before your class. Upon receipt of your deposit, we will send you a confirmation. If final payment is not received when due, SIERRA SOUTH will regard the reservation cancelled.

CANCELLATIONS: If you cancel 30 or more days before your class date, a full refund less a $25 cancellation fee, provided you can fill your space or we can. If less than 30 days before your class date, a full refund less a $50 cancellation fee will be given.

We look forward to meeting you!

On the Hill of Death, Patrick J. Wayne and his recently acquired copilot were aboard the SecuriCycle II, a huge bicycle and portable campground, which was screaming uncontrollably downhill toward an immense wall of pink flamingos erected by Dr. James Xi, Wayne’s arch-enemy. It looked hopeless for them to solve the fluid-flow problems involved therein. The nose reluctantly became lighter, and the front wheel lifted a few inches off the pavement. I pulled back on the stick as far as it would go, and a sudden surge of lift pulled us off the pavement and roaring past the flamingo wall. Xi was visible shaking his fist in the air as we lifted away.
After a few hours of flying and thinking, I could not decide what to do next. My copilot was reading the Wall Street Journal and I was in a frantic effort to throw the excess weight overboard, while the copilot made first-principles calculations of just how hopeless the situation had become. Finally, with only microseconds to spare and every loose item discarded, Wayne pulled back desperately on the control stick.

The stick slowly gave to my pull; the control surfaces lifted as their servos whined. Air rumbled past the airfoils with so much turbulence that the copilot could hardly decide what to do next. **Bad Film: Great Flick**

by Nature Boy

No Retreat, No Surrender

Directed by Corey Yuen

The next logical step is to request $7000 from ASCIT. Last Thursday night, we had the rest of the campus grounded under a heavy work load, the Caltech Bad Movie Club's inaugural event proved a smashing success. Faculty sponsor Mark B. Wise, while getting ebullated at the Ricketts House annual cocktail party, said "Every once in a while, when I was at grad school, I would get a bunch of people together and we would go out and see a bad movie. I became the default leader because, you see, I have no taste." He then lamented that he had no one to go to bad movies with any more. He explained, "You don't take your wife out to see a bad movie." Sage advice, indeed.

He continued, "No one here wants to go out to a bad movie with me." Turns out, Prof. Pollster, who had not yet sunk to the Ricketts lounge carpet under the weight of the alcohol, he asked, "Do you want to go and see a bad movie?" Pollster took his head as if to politely reply no. Thus, the idea, well oiled by cocktails, was born. It was a fortunate act of the gods that the students who have less taste than anyone at CIT happened to be present: scurry physicists.

We had a delicious dinner at the Chinese Grill. Wisely, we didn't eat steak, because we ate with plastic twigs; it was very expensive. Fortunately, Mark B. Wise has a Sloan fellowship and he paid for it all. What else is aコメントarius going to do with money?

The movie was much worse than we had expected. (Your humble author had picked well.) Things had promised some sort of oken-Fist, Russian version, perhaps on the level of Rambo, Gynkula or Blade Runner. Actually, it was much worse; the cast itself isn't bad. Shefer and Madsen have a couple of truly electric scenes. If some of the acting seems a bit stiff, this is probably attributable to the script.

Time after time, the underlying cause for weaknesses in this film seems to be the script. The first hour and a half of the movie is designed to create tension and anticipation, and yet the last twenty minutes is so hurried that it seems to be entirely anticlimactic and unbelievable. The writers seem to have no idea of the meaning of "conceal." Every scene of Fire with Fire is necessary to the plot, granted, but herein lies a fault. It is obvious to me from reading the production notes (purported to have been current only four days before the screening that I saw) that much of the movie had been edited out at the last minute. Perhaps this contributed largely to the card-board nature of the characters, but if so the writers should have realized this; after all, no major motion picture company seems willing to release movies which last much longer than a hundred minutes in these days of television-induced five minute attention spans.

The problems with the script extend further than this, however. For instance, what is the gung-ho warden who obviously doesn't care for the kids doing in charge of an honor detention camp? There are plenty of places for people like that in prisons, to be sure; an honor detention camp is meant to show the youths the value of hard work and honesty, ideally. No such luck here, however: this warden is perfectly happy to bull the inmates and give them as hard a time as is possible, including constantly menacing them with a sawed-off shotgun. Reform indeed! This film might have been a lot better off with a truly caring warden who was forced to follow regulations, no matter how much he disagreed with them. The interplay between such a warden and Joe Fisk could have proved to be quite interesting. A combination of this and more substantive characters for Lisa and Joe could have made Fire with Fire into a worthwhile film.

---

**Fire with...Oatmeal?**

by John Fourkas

Fire with Fire

Directed by Duncan Gibbins

Paramount Pictures

Taking up free time in an Oregon "honor detention camp" for girls, Joe Ricketts spends a day at night, and there heue to see Fire with Fire. Joe heads on to win the race, thereby gaining the firm wrath of the warden (for no apparent reason). This sets the tone for the rest of the movie; no apparent reason. Joe and Lisa manage to arrive at the right time, and within two hours of acquaintance are deeply in love. The rest of the plot is left as an exercise to the reader. (Hint: Joe is not allowed to leave the camp or receive or make phone calls. Lisa has similar restrictions.)

On the whole, I would say that Fire with Fire was doomed from the outset by a terrible script; let's face it, the whole idea is entirely hokey. With this in mind, Fire with Fire manages to do some pretty incredible things. First of all, the cinematography is marvelous. Although the film is set in Oregon, and the scenery is magnificent, the film was actually shot in British Columbia, and the scenery is incredibly beautiful. Director of photography Tova Laiter handles this scenery and the actors well indeed. This left the viewer with an uncluttered view of the acting itself. I confess that I really didn't understand it. I assume that the actors were not the product of the modern acting school. After all, when I look at modern art, I only see tasteless blobs and I have no idea what it is the product of great genius. This left an uncluttered view of the one thing that remained, the gratuitous violence. After all, why else would one see such a movie? There were lots of really bad karate scenes. There were many times when we saw the adolescent hero train, de Rocky at night, and there were lots of bad actors that got beaten up. Before you get the wrong idea, I must remind you of the level of quality of the film: no one died. They all certainly deserved to.
You can win a Toyota MR2, a Toyota 4x4 SR5 Sport Truck, or a Pioneer shelf stereo system. The fun is back with the 2-seater mid-engine MR2 leading the way. Here's a sports car with a 1.6 liter twin cam 16-valve TC-16 electronically fuel-injected powerplant that roars into an RPM range that few engines can achieve.

A Toyota 4x4 SR5 Sport Truck. Head out after college on the road or go where there's no road at all with a Toyota 4x4 SR5. Rear tires push and front tires pull and you've escaped the humdrum world of freeways and stoplights.

There are five first prizes. Catch the Spirit of a True Pioneer with a Pioneer sound system, Model S-200. It includes double cassette, amplifier with graphic equalizer, FM/AM tuner, fully automatic turntable, plug-in cartridge and 2-way speaker system.

TEST-DRIVE A NEW TOYOTA AND RECEIVE A TOYOTA CLASS OF '86 T-SHIRT. Come on in and test-drive any new Toyota and show us your student ID card. We'll give you a card to fill out that entitles you to a Toyota Class of '86 T-Shirt to be mailed to you.* We want you to see a new Toyota right now.

*While supplies last.

The Class of '86 Sweepstakes is going on now at all participating Southern California Toyota dealers. Here is a list of the participating dealers near your school.
Dalney: We had an ex-comm meeting. We had some parties. Everyone had parties. The party at the penthouse was really... Wow, didn't those girls from Ox really live it up. We had some sports events. The games were surprising yet exciting. Some inside jokes we had from past years.

Just a minute. Just wait a minute. Hello? Is anyone there? Is anyone listening to this? (in a whisper) you Darbs; I know you read this. How about everyone else? Well?

I just want to take a moment to urge the rest of you to read the奋战的ivi thei at is. There are several reasons for doing this, which I'll present below.

Firstly, there is no one inside the World than the one for your house. Think about it: wouldn't it be more interesting to hear about parties to which you didn't already go? About sports events you've missed? About the people you have already forgotten? Information. By reading, saying, the Dalney House Inside World, you can know and understand the people and places and rooms in a House in which you rarely set foot, a world foreign and exotic.

Regarding the issue of things else to do away. Surveys of Teters clearly indicate that the average student here has over four hours a week that aren't spent on campus. The Inside World is an excellent way to fill those long, idle hours. Courtesy. People had to take the time to write these columns. Common courtesy requires that you read them, give them some thought, and maybe even drop the author a note telling him what you thought about the article.

Conversation. It is much easier to talk to people from other houses if you have something to talk about. For instance, if you should find yourself talking to a Darb this week, you can easily break the ice by saying, "Hey, what about those Dalney House sports events? Surprising yet exciting, weren't they?" Reading the Inside World will thus make your conversations more enjoyable, make the people much more comfortable and fulfilling than the usual minutes of agonizing silence that most of us so often suffer through day after day.

Purpose. If you don't read the Inside Worlds from other houses, they lose their purpose. It simply isn't necessary for me to tell other Darbs what I've already told you, and that Amy was an awesome go-go dancer. So, know and don't need (and in all likelihood don't want) to read my smug, condescending, arrogant, over-the-top ramblings if you've already been left out of our group activities yet again, obviously because no one liked them enough to ask them to join in the fun. Hence, it follows that the Inside World is not for Darbs, but for the rest of you, who obviously couldn't partake in our social activities even if you'd wanted to. The inside joke aspect is the occasional inside joke for the people who have been left out.

The ping pong tournament is in its final stages. Play your games so I can stop saying that. Play football, think football, live football. Or leave a message addressed to him in the exchange box. Don't go to the house and check on them. Leave a message and let us know what you want.

Not much more to say... the formal is tonight, Ditch Day is not tomorrow, and I'd love to hear you playing the Rudh Thursday morning. Party down, kids; only a couple weeks left.

Ditch Town: be there or be square. The Darbs are coming.

---

Fleming: Well, room pick is finally over, or at least over enough to let's see. What's new this week? We have, yes—you guessed it—Vito and the Discobolus going on, with a tie turning into a win against Blakr in the beer fridge. When it's cheaper than soda, who could complain? Coming soon: Black Label at $2.22 a can.

On the 24th (Cobra Spaghetti Night) the Burn Victims (formerly Captain Sex and the Five Seamen, a much better name) will play the Noise Concert. Next time you see Larry, ask him about that. Also, be aware of the haze when the kibbe's there! Because you don't know by now, we are dru cku.

Ricketts: The hot conversational topics this week have been Ditch Day and Room Pick. As for the former, clever seniors impersonated the Real Thing, enjoying leisurely breakfasts at fine restaurants while the underclassmen discovered that there was no one inside the Santa Claus suit.

Room pick... the one time of the year when everyone gets into politics. Anticipation ran through the house like hot fudge, as all Scourves did some heavy coveting of their neighbor's rooms. "Hi—lenu us; is it剂 your carpet... nice mural ya got there!"

This year's recipient of Infaust Memorial, Nicole Vogt, gained political asylum in Broken Cherry alley for herself and her lime-green shoelaces. Nicole continues the grand refugee tradition established by Diana, Sandy, Robin and Kim. Lisa and Susan (and others?) are waiting in the wings... it must be our enlightened social atmosphere that does it.

The student-faculty coctail party today! All faculty are invited to sample a multitude of sophisticated adult refreshments and entertain- ing conversation.

---jen-lo and Josh

Ruddock: Music I can dance to... that alone is enough for me. Of course, the Pasadena Police Force decided even that was too much and moved Sam's party inside. "Come as you were in a previous life" was the theme and while Amy was an awesome go-go dancer. So, know and don't need (and in all likelihood don't want) to read my smug, condescending, arrogant, over-the-top ramblings if you've already been left out of our group activities yet again, obviously because no one liked them enough to ask them to join in the fun. Hence, it follows that the Inside World is not for Darbs, but for the rest of you, who obviously couldn't partake in our social activities even if you'd wanted to. The inside joke aspect is the occasional inside joke for the people who have been left out.

You can clearly see that reading the Inside World for the other houses is, in fact, your duty as a house member, as it helps to quell unrest and dissent. The House System is a good one, and I'd hate to see it killed by apathy and disinterest. The same is true of all the other houses. You can clearly see that they lose their purpose. It simply isn't necessary for me to tell other Darbs what I've already told you, and that Amy was an awesome go-go dancer. So, know and don't need (and in all likelihood don't want) to read my smug, condescending, arrogant, over-the-top ramblings if you've already been left out of our group activities yet again, obviously because no one liked them enough to ask them to join in the fun. Hence, it follows that the Inside World is not for Darbs, but for the rest of you, who obviously couldn't partake in our social activities even if you'd wanted to. The inside joke aspect is the occasional inside joke for the people who have been left out.

Miskovitch took the cake, being reincarnated as none other than Yar- ma. Sam, being the top star at one party, is organizing an Allen 5 road trip to Tijuana this weekend... Once again, thanks (I suppose) to the fact that Ruddock Blue is the cool color to wear, we have a new social member. David Cole. Other things discussed at the house meeting were the five amendments to the constitution. See the 5-14-86 for stories and details.

The thing is, no one liked them enough to ask them to join in the fun. Hence, it follows that the Inside World is not for Darbs, but for the rest of you, who obviously couldn't partake in our social activities even if you'd wanted to. The inside joke aspect is the occasional inside joke for the people who have been left out.
Studying at Caltech

The Architectural Tour Service here at Caltech (but you didn't know we had one) will offer guided walking tours of architecture on the Caltech campus, as their contribution to the Pasadena Centennial. The free tours, which will last one hour and fifteen minutes, will take place on Saturday, May 24, 1986, beginning at 9:00 AM, 10:00 AM, and 1:00 PM. The tours will stress the building's history, and include a brief tour of the student union. The tours are part of the Center's celebration of the Institute's architectural history, and are offered to the public free of charge. The Center has commissioned architect Mervin Goodrich, who designed several Caltech buildings, to lead the tours in the campus. The Caltech Architectural Tour Service is a decent group recently organized by the Caltech Women's Union. For reservations, call Bonnie Baker at the Caltech Public Relations Office, (818) 576-4204.

Square Dance

Next Friday, May 23, in Winnett Center, dinner will be served at 7:00 PM. Come early and learn the steps. Bring your friends and join the fun. Refreshments will be served, co-sponsored by CPF and the Caltech Y.

Summer Jobs

The Allentune Association, in conjunction with the Career Development Center, has generated some summer job possibilities. These positions are currently available, so if you are interested in summer employment, you should come to the CDC as soon as possible. We expect to have more jobs available soon; please check the CDC (Room 8, Parsons-Gates) on a regular basis.

Fellowships for Women

Summer Jobs

Applications for employment are now available for students of Asian/Pacific Island ancestry. The scholarship committee is not interested in turning down applicants, and the rest of the year. Applications are available from the Career Development Center, on a regular basis.

Dining

Families may claim a $50 tax deduction for permanent employees and possibly student employees. Be sure to take youridentification with you. For more information on the Career Development Center see Room 8, Parsons-Gates.
