Crash Hits SIF

by Ian Dutton

Since Monday, when the top news stories have not been the state of affairs in the Persian Gulf or the progress of the World Series, but the dramatic dive of the stock market and its ensuing rally. The plague of economic uncertainty and foreign market value has not only affected those holding stock, but the nearly anyone with money invested in any form. Here on campus, the Student Investment Fund (SIF) has had a wary eye on the changes in the market.

The Student Investment Fund was started in the late 70's with a grant of $70,000 from Caltech trustee Stanley Johnson. The group has taken that money and invested it in diverse areas for the primary goal of gaining experience handling money, although it also has a goal of increasing its assets by 10% annually. Currently the SIF has assets totaling nearly $124,000, even after Monday's dive.

The members of the SIF have nearly total control of where their money is channeled, but they do have some limits. For example, they are restricted to trading the stocks and bonds of American companies or mutual funds, which means that commodities and foreign currencies are not among their options. President Randy Levinson also mentioned that although members are given many opportunities to experiment with their theories, "the conditions are much different than they would be for the independent investor.

For example, the average small investor can get a portfolio of well over $100,000. Also, individuals don't have to worry about convincing others and can act much faster, not having to wait for a board of directors or a treasurer.

Randy Levinson also mentioned that although members are given many opportunities to experiment with their theories, "the conditions are much different than they would be for the independent investor.

For example, the average small investor can get a portfolio of well over $100,000. Also, individuals don't have to worry about convincing others and can act much faster, not having to wait for a board of directors or a treasurer.

Still, Randy feels that this type of experience beats any kind of economics classes because it is real money that is being dealt with.

More lessons are learned through mistakes, and a point is driven home more deeply when the mistakes cost hundreds or thousands of dollars.

BY DAVID BRUNING

In a talk that vividly depicted the harassment and discrimination that he has faced throughout his career, Turner moved into the political realm, where he has continued to fight for a more just and equitable society.

When Turner moved into the political realm, he showed his lack of in-depth knowledge. He repeatedly used the defense that he was only stating his opinion, which is essentially acceptable because he has no understanding of the facts. An example of this understanding problem is Turner’s contention that our next move in space is to travel to stars, which we will do by traveling “at ten times the speed of light because they are so far away.” Unfortunately, he was not kidding.

Turner’s speech was certainly one of the more entertaining speeches of the year. Besides containing humorous anecdotes, the talk humored the audience by giving the listener a view into the obvious simple mind of one of the country’s most successful businessmen.

Yet Another View on Abortion

BY ERIC FUNG

In a talk entitled, ‘‘When Well DIC,’ Turner has heard about abortion control; following the grand tour of the Page, he turned to the Senate for a discussion on the amendment to the Senate that began its confirmation hearings on one of anti-abortion control legislation.

On the other hand, students on this campus have heard pro and anti-abortion control. Proponents feel that the Senate has a right to decide what happens to a woman’s body. On the other hand, the Senate has a right to decide if abortion control can be used to control the population.

The use of the condom is a rather practical method; but let us discuss a different one - abortion. The term is used in a positive manner, but we must discuss the general view. What abortion control is the issue is rather old, and the primary focus has been over its morality or immorality. Even more fundamentally, the issue is whether or not an abortion is a medical or a personal decision.

As anti-abortionists often argue in horror - what about morality, they cry. Put simply, morality is all in a sense of relativity. That is, each individual has a personal standard of morality. Sometimes, these moralities clash or coincide with another’s. For example, the Church’s teachings are of no relevance, but the Church’s teachings about abortion is moral.

In my opinion, the right to life is indeed a moral question; but then again, if one examines the vi- tal statistics, that is, the right to kill is to be claimed to be part of their own moral code, and is accepted as op- tional by those same people. We all assume, though, that the right to life is a given moral, and to deny this right would be immoral - this is the way most of us think.

So, the anti-abortionists argue we must have all human rights. We are able to make decisions for ourselves - this is what the Constitution says. Then, when is the fetus an actual living entity?

Abortion is a medical issue too; and so we examine the medical concept of life. In determining death, there is the concept of brain death, in which the brain no longer functions, but such organs as the heart and lungs still do their job with the aid of a heart-lung machine. Often, at this stage, a doctor will take the patient off the ventilator, but the brain death is death. Of course, some doctors will disagree.

Because the brain is dead, the person is dead. Thus, the only way of determining human life, if someone else is not having an abortion, is because of the medical condition.

Of course, there must be some standard of morality that everyone must establish; otherwise the world would be in a state of chaos (or at least more so than it already is). Most fundamentally, the right to life is indeed a moral question; but then again, if one examines the vital statistics, that is, the right to kill is to be claimed to be part of their own moral code, and is accepted as optional by those same people. We all assume, though, that the right to life is a given moral, and to deny this right would be immoral - this is the way most of us think.

To the Editors:

As you may already know, there won’t be a TQFR this year. Why? Because our Director of Academic Affairs, Devin Leonard, failed to fulfill his responsibilities. He tried to blame the former Director, James Shih, for his own ignorance. He also tried to blame the administration for refusing to provide funding at such a late date. (The administration, in fact, did not refuse funding. They merely expressed concern about the quality of the TQFR.) And now he can blame the ASCET Board of Directors for deciding not to attempt production this year after first term. It was a serious responsibility to find James when he needed information; it was not James’ duty to seek out Devin and make sure he stayed on the right track. And no wonder the administration expressed concern when Devin finally showed up. He could not possibly have done a reasonable job in the time remaining. The relationship between the faculty and students over the TQFR has been declining, and Devin’s irresponsibility has further jeopardized this process.

The BOD made a wise decision to cancel the TQFR this year and work on improving it for the future, but that does not absolve Devin from failing to fulfill his obligations.

His list of excuses is long, but that’s all they are—excuses. Devin is ultimately accountable for the absence of a TQFR this year. When confronted, he admits to his failure, but simply shrugs it off as inconsequential. In his eyes, there won’t be a TQFR this year, and that’s about as far as it should go. He hasn’t even apologized. This attitude is unacceptable. Voting members of the ASCET BOD should be reliable and responsible.

Devin obviously is neither, and should not remain in office.

The BOD is unwilling to take action because they believe that the day will come when it will become necessary to send someone to office. We agree. Please sign the recall petition and vote to remove Devin Leonard from office.

Sincerely,
Brian Catanzaro

A Blatant Lack of Responsibility

New Health Center Director cont’d

from page 1

The front desk staff is constantly looking for ways to make the center more accessible to students. One program needs a facelift to attract more of female staff, which would allow students to choose either a male or female physician. He is also attempting to boost the quality of medical care at the center, primarily by hiring personnel with great experience.

Dr. Miller is also attempting to change the schedule. Dr. Miller still finds time for recreational activities. He enjoys all sports, and plays baseball, football, and basketball. Listening to music and reading books are some of his other interests.

The Young Health Center is at 1239 Arden Road. The staff is composed of three physicians, and courts, and is open continuously from 8 am Monday to 8 am Saturday.

All students enrolled at Caltech are eligible to use the center’s services, which include: preventative health information, diagnosis and treatment of illnesses and injuries, lab testing, referral, immunizations, allergy shots, birth control services, gynecological exams, and selling prescription medications at cost. Dr. Miller encourages students to visit the center if they have any questions.

The Student Investment Fund benefits all of the Caltech community, not just the SIF members. The SIF is a non-profits organization. Each year, students must give away 4% of an average of their assets every year. This week holds its meetings on Wednesday afternoons at 5:00PM. This week, the BOD is unwilling to take action because they believe that the day will come when it will become necessary to send someone to office. We agree. Please sign the recall petition and vote to remove Devin Leonard from office.

The Berkeley Shakespeare Festival returns to Caltech with their production of "Henry V" Friday, October 23 at 8 P.M. in Beckman Auditorium. This version of Shakespeare's tale of war, politics and love features one of the West Coast's finest Shakespeare ensembles. CIT student rush tickets for $6.00 and CIT faculty and staff TECHTIX—$7.50-6.25-5.00—will go on sale Friday, October 23 at noon at the Ticket Office. The Berkeley Shakespeare Festival will also hold a workshop on stage combat on Friday, October 23 in Dabney Lounge beginning at 2 P.M. This activity is open to anyone who would like to participate.

Irish folk music and dance is featured on Saturday, October 24 at 8 P.M. when the Green Fields of America come to Beckman Auditorium. Led by the inimitable Mick Moloney, this group performs traditional Irish-American music that expresses the experience of the Irish in America. CIT student rush tickets for $6.00 and CIT faculty and staff TECHTIX—$7.50-6.25-5.00—will go on sale Friday, October 23 at noon at the Ticket Office.

Also beginning this weekend is the T.A.C.I.T. production of "A Life in the Theatre" in Ramo Auditorium. David Mamet's play will be performed Friday and Saturday, October 23 and 24 at 8 P.M.; Sunday, October 25 at 7 P.M.; Friday and Saturday, October 30 and 31 at 8 P.M.; and Sunday, November 1 at 2 P.M. Student tickets are priced at $4.00; regular tickets are $6.00.

That dazzling duo of comedy, The Alchemedians, will appear Thursday, November 5 at 8 P.M. in Beckman Auditorium. Bob Berky and Michael Moschen conduct comic experiments staged in a laboratory setting using both raw materials and the audience alike. CIT student tickets are priced at $8.75-7.50-6.25. CIT faculty and staff TECHTIX—same price as CIT student tickets—will go on sale Thursday, November 5 at noon at the Ticket Office.

Russian folk music and dance highlight the appearance of Tziganka Saturday, November 7 at 3 P.M. and 8 P.M. in Beckman Auditorium. Russian and Gypsy songs and Cossack dances are accompanied by the balalaika for true Old World entertainment. The 3 P.M. matinee is a special 60-minute program designed especially for children and families. Tickets to this performance are priced at $8.00 for adults and $5.00 for children. The full-length evening performance is priced at $8.75-7.50-6.25 for CIT students and $15.50-13.00-10.50 for CIT faculty and staff. CIT student rush tickets for $6.00 and CIT faculty and staff TECHTIX—same price as CIT student tickets—will go on sale Thursday, November 5 at noon at the Ticket Office.

If you like chamber music, don't miss Conrad Josias and Friends on Sunday, November 8 at 3:30 P.M. in Dabney Lounge. Included on the program will be works by Randall Thompson, Gordon Jacob and William Bolcom. Plus, the concert is FREE!

The Caltech Ticket Office is located just north of the Beckman Auditorium parking lot. For information on all Caltech Public Events, call 4652.
SPORTS

X-Country Still Fast

by Y. Eimi Running

After completing two meets in a row at Caltech's home course, namely the lower Arroyo Park, the fleet-footed Beavers traveled to the Yorba Reservoir for their next meet on October 10. As the team members can vehemently insist, the course at Yorba Linda unraveled before their eyes into a relatively flat ribbon of dirt path. However, the fact that there were minimal hills was balanced by the often rugged terrain.

It may have been the psychological confidence associated with a seemingly flat course or, more likely, the ever-growing strength of the women's team that gave them overall victory! In a skilled display of endurance, the Battling Beavers defeated Whitnall (24-32) and Redlands by forfeit. Surprisingly, this was the girls' first win in five years or more. The last time the Caltech women's team won a meet was in 1982, also against Whitnall.

The beauty of the meet occurred shortly after the women were halfway through the race. After one mile in a half mile, the score was 27-28, with Whitnall in the lead. Thanks to the efforts of the Caltech women though, that score was soon turned around to our advantage. Bibi Jentoft-Nilsen once again set the pace, and the Caltech pack to the finish line, placing fourth overall.

What is even more amazing is that the men's team came close to beating Redlands, finishing third in the running talents of John Gehring, Joe Shiang, and Doug Chang. They would rather have taken some random test, called the Graduate Record Exam. Come on, guys, where are your priorities? (J.K.) It could have been this absence of the running of the five through nine in the entire meet!

A whole scene of personal best sweeps over the team like it was con­juring. Paul Soccolow, sixth for Caltech, ran an amazing time of 31:27, while Ray Hu impressed him to run a time of 30:29, an entire 2:55 over last week's time! The two butterflies started buzzing down the trail, because in a mere ten seconds after Alex, Chris Campo met the finish with his best time ever of 30:13. Mark Lyttle was right on his tail, cracking out 31:13, a 25-second improvement over his time at the previous week's meet. As a result of these fine performances, the Caltech men's team placed five through nine in the entire meet!

Paul Soccolow, sixth for Caltech, ran an amazing time of 31:27, while Ray Hu impressed him to run a time of 30:29, an entire 2:55 over last week's time! The two butterflies started buzzing down the trail, because in a mere ten seconds after Alex, Chris Campo met the finish with his best time ever of 30:13. Mark Lyttle was right on his tail, cracking out 31:13, a 25-second improvement over his time at the previous week's meet. As a result of these fine performances, the Caltech men's team placed five through nine in the entire meet!
Dear Dr. Beaver:

Since moving to Pasadena, I have had off and on symptoms of what I think is a cold. I wake up in the morning with a sore throat (red bumps). I have also had a runny nose, sneezing, and itchy eyes. My symptoms seem to get better after I take a shower and drink something to drink, but my symptoms are always around again around 3 p.m. I don't really feel sick, just uncomfortable. Is this a cold or what?

-Snuffy

Dear Snuffy:

Your symptoms may seem like a cold, but it's likely it could be a yeast infection, which can be caused by a range of factors, including stress, humidity, and hygiene practices. It is estimated that over 85% of the population is said to have a yeast infection at some point in their lives. So, it is normal to experience symptoms of a yeast infection.

There are two main types of yeast infections: candidiasis and candidiasis vulvovaginal. Symptoms can include redness, irritation, itching, and rash. It is important to see a healthcare provider if you are experiencing symptoms, as yeast infections can be treated with topical medications.

However, if it is a cold, you can usually recover within a few days. Rest, hydration, and over-the-counter medications can help alleviate symptoms.

Dear Dear:

I have had an ongoing problem with vaginal yeast infections for the past several months. I have seen my gynecologist, who prescribed medication that works for awhile, but then the itching and burning returns in a very short time. I'm a very clean person and I'm not that sexually active (at least not as active as I'd like to be). What can I do?

-Comfortable Undergrad

Dear Comfortable Undergrad:

It's possible that you may have a yeast infection, which can be treated with over-the-counter medications. However, it's important to see a healthcare provider if you are experiencing symptoms, as yeast infections can be treated with medication.

You can help prevent yeast infections by maintaining good hygiene practices, avoiding tight-fitting clothing, and avoiding yeast in your diet. It's important to see a healthcare provider if you are experiencing symptoms, as yeast infections can be treated with medication.

More Inside World

of being called a beast by Gaby, decided to surprise her by getting a goat in their bed. Gaby was sufficiently impressed, but also told Sam that the goat could not be sold because Sam grows hirsute just like it. Laura understands how Gaby feels since she used to have a goat of her own. She remembers:

- The Lib Cook-Man and the Great Neck Strangler

Roddock: Hello, we are the Senior Class Secretary/Treasurer and the Senior Class Presidential Wanna Be. Top 10 things that happened this week:

10) Roddock Beats Ricketts in softball.
9) Take a Lethal Cross becomes a 1-5 favorite (argh!)
8) Caltech soccer ties Oxy.
7) Caltech Volleyball Whips Warner for the 2nd time.
6) Stock market crashes.
5) Stock market regains 40% of loss.
4) Roddock2 hosts mission conference.
3) Vav's cast comes off.
2) U.S. bombs Iran's Framatome.
1) Roddock announces Potato Interhouse.

Well, what's happening around the old homestead? Ultimate on Sunday was a big success, so here again next Sunday at 1:00 p.m. The party at Lloyd's was fun. No bad people came except for the Page DJs.

90% of Roddock assets were lost in the crash. Now we are as poor as Black Eyed Susan (who incidentally lost the softball game to the Spuds on Wednesday), or if you are tired of being inferior slave) will be Jamal, a man so desirable, his testicles (though atrophied from Bibi), as well as other willing volunteers to provide various other (or the same) services. Page Drs. is a woman, and we can't afford to lose her. If you are interested in providing her the service of staying up all night, hoping to see someone, please contact her.

Kicking off the week: Edkie spent the weekend sleepwalking. (We hope he wore a hard hat to protect his head, and a gas mask to avoid suffocation.) Betsy Quote of the Week: "Strike Three!"

by John Haba

Last weekend, a couple of friends and I were paging through the L.A. Times Calendar section, looking for a good movie to see. Frankly, we couldn't find any. Since one pass through the paper wasn't enough, we decided to try the warning signs. The warning signs in my mind were obvious: Billy Crystal has a brief role in the film; and Norman Lear and Rob Reiner are the executive producer and director, respectively. Billy Crystal, the creator of one dimensional catch phrase comedy (remember the line, "Are you serious?") is perpetuator of the crotchety old Jewish guy impersonation, is one of America's unfinest (sic) comedians. The Lear-Reiner combination has visions of 70's TV sitcoms running in their fluid intake (but not as active as I'd like to be).

Living in the future—wish you were here

Bellcore— it's a place with a perfect view of the next century. The surf breaks on the leading edge.

On a clear day you can see the future taking shape. A future in which information will belong to everyone and move with the speed of light into every corner. It's the perfect climate for new ideas—wish you were here.

We're the central research and technology source for the Bell operating companies. Our areas of inspired research cover software development, applied research, network information systems, systems engineering, network planning services and equipment assessment.

We have opportunities in our northern and central New Jersey facilities for individuals with BS, MS and PhD degrees in Computer or Electrical Engineering or Computer Science who can help us provide superior technology and implement strategies that will allow the Bell operating companies to deliver advanced systems to their customers. We're also looking for creative talent with PhD degrees in Mathematics, Statistics, Operations Research, Physics or Human Factors Engineering.

Working in the future is the place to be—if you would like to join us.

Sign up at the Career Planning & Placement Office to meet our recruiters on campus, November 18

Alternatively, send your resume detailing your education and experience to: Manager, Technical Employment, Bell Communications Research, Department 127/5438/87, 4B-130, CN 1300, Piscataway, NJ 08854. An equal opportunity employer.
HELLO AGAIN... NOW THAT EVERYONE IS BACK AND SETTLED IN, IT'S TIME FOR OUR ANNUAL "BACK TO SCHOOL" OR "I WANT TO CREATE EARTHQUAKES, MYSELF" SALE!

THESE SPECIAL SYSTEMS WERE MATCHED AND SELECTED FOR optimum PERFORMANCE/PRICE RANGE. HOWEVER, ONE MAY OPT TO EXCHANGE A CD PLAYER FOR A TURNTABLE (OR VICE-VERSA). THIS IS ACCEPTABLE. SALE STARTS IMMEDIATELY. PRICES GOOD AS SUPPLIES LAST OR OCT 31 (WHICHEVER COMES FIRST!)

Now that you've gotten into Cal Tech, IBM can help you get more out of it.

The road to graduation is paved with term papers, lab reports, cramming, all-nighters and, of course, exams.

To ease that journey and awaken your professors to your exceptional abilities, we suggest the newest member of the IBM Personal System/2 family: the Model 25 Collegiate.

It's a high-powered personal computer with advanced graphics capabilities, designed to fit on your desk without adding to the clutter. And it comes with a generous 640 KB memory, two 3.5” diskette drives and an aid package every student can appreciate — a big discount, plus Microsoft® Windows 1.04, Write, Paint, Cardfile, IBM DOS 3.3 and a mouse.

Pop in the load-and-go diskette and your Model 25 Collegiate is set to help you write and revise long papers and illustrate your points by combining words and graphics. So your professors will draw favorable conclusions about your work.

For more information on the Model 25 Collegiate, visit the IBM Education Product Coordinator on campus. You'll quickly learn how to get the most out of this personal computer.

**X-Country**

X-country points each time we met with them, we've got some catching up to do. It works out that for the repeat men's team, redemption time is October 24 at Redlands. Let's beat 'em this time.

October 17 marked the day of the Whittier Invitational 5K run. Not located at the same place as last week's meet, this course proved to be a bit more hilly and challenging. The difference between this meet and most meets was that both the men and women ran five kilometers, which is approximately three miles.

Despite the difficulty of the trail, the men's team beat Whittier (60 -- 103) and Chapman (60 -- 135). However, they lost against Master's College at 42. Although the women's team was defeated by CSSB (34 -- 98), Master's (41 -- 98), and Chapman at 51, they beat Pepperdine for Caltech. She was followed closely by Christina Garden, who was also Caltech. She was second for Caltech was John Gehring, ninth for Caltech was Joe Shiang, neck and neck with a little strategy and a lot of muscle, the Beavers can balloon their win even higher!

by Skip Schotte

The past week has seen the loss of some golden opportunities by the Battlin' Beaver Polo Team. In a six team tournament held over the weekend, the team went 2 -- 3 for a third place finish and subsequently was handlanced by the obviously superior Pomona team on Wednesday.

The first game of the tournament occurred early Saturday morning, and some of the team must have been asleep during the game. Playing against first-year team San Bernardino Valley College, the Beavers lost a close but poorly played game. In a problem faced all year long, the team was not able to overcome a fourth quarter deficit, and lost by a close game in a row.

The next game was against Tech's favorite polo opponent, Chapman College. This team is the favorite opponent for a reason, as the Beavers went out and destroyed Chapman 12 -- 7. The game was not even this close as Tech had a 9 -- 1 lead when almost anyone that could swim started to enter the game to get experience.

Saturday evening after a three hour break which included SURF talks by at least 2 members of the team, Caltech battled the Hawaiian horde from Chaminade. All through the game the score was close, thus engendering great support from the fans of both schools. It was, however, a loss as the final score was Chaminade 17, Caltech 16. This was probably one of the most heartbreaking losses of the year, as Chaminade beat every other opponent by large margins to win the tournament.

Sunday morning Caltech battled the other perennial downder of the conference, Redlands. Led by the goalkeeping of the only Mystic Studies major on a water polo team, the Redlands team defeated the Beavers 9 -- 7. This game was another morning game where the Caltech players could not hit the back of the net, or in this case, the oft wide open goal. The team battled Redlands twice more before the season was over, to hopefully avenge this loss.

In the third place game, Caltech finally won a close game, 10 -- 9 in sudden death overtime. The victory was achieved with a shot by Mark Holdsworth, ten seconds into sudden death overtime. To get to overtime however, the Beavers defense had to disappear with 1:00 to go and a two goal lead. By squandering the lead, the Tech team gave the fans and especially Coach Dodd all the excitement and grey hair they will ever need.

Wednesday afternoon was the Caltech version of Wall Street's Black Monday. In a game against Pomona -- Pitzer marked by the absence of true offense and defense, Caltech managed to lose a 22 -- 7 decision. This was actually an improvement after a 16 -- 3 halftime score.

The last week has seen the return of the old style Eric Christensen, who has reemerged as a point leader in goal. This will, of course, be especially helpful as Caltech prepares to battle conference opponents for the conference crown.

Special thanks go to the most faithful of the polo fans: Junko Munakata who traveled to northern California with the team last week and even brought her sister along to cheer on the team. Also included are Liz Schlindwein and Jen Noda who regularly make an appearance at the Caltech home games. Please come out and join these regulars to cheer on the hard-working polo team.
Low Calorie Scholarships

College students can win thousands of dollars in scholarship money by creating a healthful recipe that uses Swett N Low and sweetened without a conventional kitchen.

"The Swett N Low Grade 'A Recipe Contest' features a grand prize of $5,000; first prize of $2,000 and second prize of $1,000. The recipes must be suitable for prepa- ration in a residence hall room using only small appliances such as a toaster oven, blender, wok, compact microwave or small refrigerator. They will be judged on the basis of healthfulness, taste, originality, ease of preparation and cleanliness.

Entry forms are available at sending a self-addressed stamped envelope by December 15, 1987 to Swett N Low Recipe Entry, P.O. Box 91, New York, NY 10014.

Einars will be postmarked by December 31, 1987 and received by January 10, 1988.

CIC Minorities Fellowship Program

The CIC Minorities Fellowship Program, sponsored by 11 Midwestern universities, will award up to 40 fellowships to members of underrepresented minority groups seeking PhD degrees in social sciences, humanities, sciences, mathematics, or engineering. Each CIC Minorities Fellowship provides support for four to five academic years, depending on the field of study. For 1988-89, each award will pay full tuition plus a stipend of at least $13,000. Fellowships can be used at any CIC university in the conference. Application deadline is January 1, 1988. Apply as early as possible. For more information, call (312) 496-4992, or write to: CIC Minorities Fellowship Program, Northern Illinois University, Bloomington, IL 61701.

Central America Studies Group

The Northwest College and University Center for Central America Research, established to provide research and educational opportunities for students from all disciplines to consider the complex social, political and economic issues that affect Central America today. The Center will sponsor a range of activities, including conferences, lectures, field research opportunities, and the publication of a newsletter to keep interested individuals informed of the latest issues in Central America.

Student fellowships are available for the 1987-88 academic year. The fellowship will provide $3000 stipend plus a minimum of 10 hours per week of research work under the direct supervision of experienced scientists in the fields of agriculture, education, health, law, and political science. Applicants must be ability to work in Spanish and have completed one year of college study or the equivalent.

Please send applications to: Central America Studies Group, Northwest College and University Center, 820 Sprout Road. Burlingame, CA 94010-1795 or phone: (415) 840-0732.

DOE Research Appointments

The U.S. Department of Energy (DOE) finances research appointments in science and engineering that are administered by NIGUSUC, the American Physical Society, and several other groups. The program is designed to attract talented early-career scientists to careers in cardiovascular research. In the program, students will work in DOE research laboratories in California for a ten-week period starting May 21, 1988. Applications must be postmarked no later than April 1, 1988, and may be postmarked no later than May 10, 1988.

The program provides an introduction to scientific research and offers the opportunity to observe research methods while working under the guidance of experienced scientists and engineers. Candidates should have completed their undergraduate studies and have some experience in the field of cardiovascular research. Applications are available for summer and longer-term appointments.

DOE Research Appointments are available in a wide range of institutions, including universities, federal laboratories, and private industry. For information, call 517-543-7878 or write to: DOE Fellowships, College of Natural Resources, University of Michigan, Ann Arbor, MI 48109.

For more information, please contact the Career Development Center, 08 Parsons-Gates.

EOP Scholarships

Undergraduate students planning to pur- sue degrees in science and engineering are encouraged to apply for the Caltech EOP Scholarship Program. One $500 non- renewable scholarship will be awarded for each of the four years during which the student must be enrolled. Applications must be postmarked by October 1, 1988. For more information, call 626-395-7257, or write to: EOP Scholarships, College of Natural Resources, University of Michigan, Ann Arbor, MI 48109.
