Mainwaring Is A-MOSH

by Jeff Teknic

For those of you who are asleep the first week of classes, I should like to repeat the information about available ASCIT offices which was printed in last Friday's "Tech".

Once again, there are currently nine positions available for those who are looking to add fun and adventure to their lives. But I must remind you that time is running short for anyone who is interested. Nominations will close Monday, October 12, at 5:00pm and elections will be held Tuesday, October 12. There will be no extensions. So if you are looking for the respect, admiration, and possibly money of your fellow students, here is your chance to get it. The following offices are available:

1. Office of the Director for Social Activities;
2. Office of the Editor of The California Tech;
3. Senior Class President;
4. Senior Class Secretary/Treasurer;
5. Junior Class President;
6. Junior Class Secretary/Treasurer;
7. California Tech Business Manager;
8. Two Co-chairmen for the Student-Faculty Conference.

For information about any of these offices, call the current holder of that office, whose name should be listed in the little[t].

It is difficult to pick just one of these glory-filled positions, but you must choose soon. The first six offices mentioned are selected by a vote of the Classics Body. For these offices, nominations will close Monday, October 12.

Elections will be held Tuesday, October 13. If a run-off is necessary, it will be held Friday, October 16.

To be nominated, please put your name on the sign-up sheet on the Master's Office Door and send a signed note to the Classics Body which indicates the office for which you would like to be nominated to Eric "Stumpy" Smith, Classics Body, No. 1-53.

The positions of Tech Business Manager and Student Activities Conference Chairmen are selected by ASCIT interviews. For those interested, again, signs up on the MOSH's door by Monday, October 12, and we will arrange an interview with you for that week.

Elected and Appointed Offices

by Marc Turner

As Caltech's first Student Activities Coordinator, Nancy Matthews has little time to sit down. A one-person team, she manages the new 30,000 square foot student activities center. Nancy comes to Caltech with considerable experience in student affairs, having served as a resident associate at Scripps College. There she worked in the psychology and women's studies.

When Nancy arrived at Caltech six months ago, several million dollars had been spent in renovations, but the new activity rooms were largely undeveloped. Considering student needs, she asked questions such as "What kind of art after editing are invited to attend."

The positions of Student Activities Coordinator, Nancy Matthews, the new Coordinator of Student Activities, comes to Caltech from Scripps College. She has organized the growth of the SAC.

Bustling Basement

by Sayuri Desai

Have you taken a stroll through the basement of the South Houses lately? If not, please do so immediately! As upperclassmen can attest, the basement has undergone dramatic changes. It's hard to imagine that the brand-new Student Activities Center hasn't always been here. The 50,000 sq. ft. complex, open 24 hours a day, contains 20,000 sq. ft. of storage space and 30,000 sq. ft. of student-use space. Open to all students, it seems sure of itself, but at the heart of its unassuming demeanor and overwhelming size lies a spirit of innovation and flexibility.

Nancy Matthews, the Student Activities Coordinator, will be glad to help with organization, equipment and space requirements, and communication problems of student clubs. Since her position is still being defined, she's open to any opinions on student needs.

She office at 64-58 is located between the laundry facilities and the game room, and she can usually be found there in the afternoon. If she is not around, leave a note on her door or a message with her answering machine at extension 6955.

Nancy is one of two staff representatives in the Coffee House Users Group (CHUG), which manages the house's operation. It is her job to familiarize herself with the MOSH and Dean in developing programs to increase awareness of the student activities office. In her spare time she enjoys lifting weights, playing several instruments, and singing in the women's glee club.

If you didn't see it above, or if you have a question, concern, or idea about Caltech student activities, Nancy Matthews, the Student Activities Coordinator, will be glad to talk to you. She can be reached in room 64 of the Student Activities Center (x2935, mail code 64-58).

Pond

Misses Rock #8

To the Editors:

You may have seen the old rocks we have in and around the Throop pond, but have you seen the impressive plaque on one of them with information on the age and type of the different rocks? If you did so carefully, you would have noticed that rock #8, supposedly in the pond, is nowhere to be seen. Furthermore, the rock on which the plaque is itself on, is not on the map. Where is Rock #8? Could it be that it was stolen by a collector of valuable old rocks? Or is it that the water level rose during the recent earthquakes submerging #8? Is it true that some undergraduate senior is using it and magnetic fields to prove that dinosaurs liked to barbecue? Could the simple solution be that #8 is the one with the plaque? The mystery deepens as these hushed whispers make the rounds on campus and the authorities are unable to explain the disappearance.

"Dr. Ron Scott and Ravi Thiyagarajan
P.S. Oop's #12 is gone too."

THE CALIFORNIA TECH
25-58 Student Activities Center California Institute of Technology
PASADENA, CA 91125
Phone: (818) 556-6154

Published weekly except during examination and winter vacations by Associated Students of the California Institute of Technology, Inc. The opinions expressed herein are strictly those of the authors. Letters and announcements are welcome. All contributions should include the author's name and address, and be typed double spaced. Letters are subject to abridge and edit letters for experience. The deadline for copy is Wednesday at 5PM; Turn in copy (preferably on a disk) to the office mail. The deadline for announcements is Wednesday at 5PM. Late copy may not be printed even if prior arrangements have been made with the editors.

We are ready to leave the Tech in the hands of Ty lis Chang's crew of editors, or the hands of anyone else who is lucky enough to get elected to the helm. We go on now to things like grades and graduation.

When the new editors come to you and ask you to sign up for the Tech, take them up on the offer because you may find that you enjoy the opportunity to appear in the publications scene completely. Rather we will stick around to get a few more issuex out over the first few humps. And then we can get back to proper arrangements of the paper that we particularly enjoy. Go easy on the new guys. Don't barrage them with "Inside Worlds" at 9:00 Thursday night.

...
Statements of the Candidates

Senior Class President
Rob Burch
As you may have figured out from the heading, I am running for Senior Class President. The most important function of the Sr. Class President is to assist in the selection of the commencement speaker. In past years, the guideline used for selecting the speaker seems to have been "money talks." Perhaps with the change in Caltech's President, a more interesting speaker can be found—such as an engineer turned politician (unless, of course, Letterman happens to volunteer), instead of somebody whose only qualification is big bucks.

Of course, the Sr. Class President also helps set the date for ditch day. We already know when it is, so I could easily handle this part of the job (underclassmen—a senior can tell you).

So please vote for me, Rob Burch, for Senior Class President. I thank you for your support.

Keith "Jethro" Owens
Secretary/Treasurer
John "Skeeter" Wilise
The California Tech Editors
Chang, Fung, Huie, Lew
Mornin' kids!
Eric Fung, Mark Huie, Steve Lew, and Tylo Chang (the nomenclatural group are taking over this taco truck [sic]). On a more serious note, we are planning to run for the Office of TECH Editors. If you have not noticed, we represent a somewhat skewed cross-section of the Caltech community (i.e. Undergraduate Freshmen, Juniors and Seniors). We feel that their diversity and enthusiasm will allow us to do a good job as editors.

We welcome any support that we can garner from you the readers (including your vote on next Friday), and we are open to any suggestions you may have.

We have some nominal experience in working for this journal of the Caltech community, and even helped to put this issue together. If you would like to become involved with TECH or even run for us, there will be a meeting in 127 Baxter Lecture Hall today at 12:15pm.

Vote "Yes" and Vote Often. Your Friendly Editors in Training—Eric, Mark, Steve, and Tylo

Watson "Star Wars"
[CNB]—In a recently released study, a committee of scientists sponsored by the American Physical Society (APS) concluded that several more years of research and development will be needed before a decision can be made on the scientific and technical feasibility of the "Star Wars" Strategic Defence Initiative. Caltech professor and APS committee member Amnon Yariv will discuss the panel's findings in a free, public lecture entitled "Star Wars: Is It Starry-Eyed or Warlike?" on Wednesday, October 14, at 8:00pm in Beckman Auditorium. Dr. Yariv's talk is the opening lecture of the Ernest C. Watson Lecture Series for fall/winter 1987.

In his presentation, Yariv, Thomas G. Myers Professor of Electrical Engineering and professor of applied physics, will summarize the historical and scientific background of the SDI; outline its applications to intercontinental ballistic missile systems; and identify several major areas in which the APS Panel found that the technical demands of Star Wars far outstrip present-day technologies.

The Inside World
Blacker: Dear Mom and Dad,
I'm having a wonderful time during my first week at Caltech. The weather is great, the campus is beautiful, and yesterday I saw these lovely mountains to the north that I never really noticed before. I've already made lots of new friends and the workload hasn't been too heavy.

Anyway, rotation ended the other day. The other students here to some great music to celebrate the end of rotation. For the rest of the day, we all just hung around the dorms—playing pool, cards, or just relaxing. I got the oddest letter from Darien Lefkowitz. He said that he knew I was a good speaker at commencement—so he wanted to give me a $500 bonus if you capture him alive.

The Medieval Renaissance Society

The Second City Touring Company comes to Beckman Auditorium on Saturday, October 10 at 8 p.m. This remarkable magician will knock you off your seat. See tomorrow's story for the company, which spawned John Belushi, Joan Rivers and Bill Murray, deals with social, cultural and political satire. CIT student tickets are $7.50-5.25-5.00. CIT faculty and staff tickets are $13.00-10.50-8.00. CIT student rush tickets and CIT faculty and staff TECHTIX — same as regular CIT student discount prices — will go on sale Friday, October 9 at noon at the Ticket Office.

Then on Tuesday, October 13, The Second City Touring Company comes to Beckman Auditorium with rip-roaring comedy that will knock you off your seat. See tomorrow's story for the company, which spawned John Belushi, Joan Rivers and Bill Murray, deals with social, cultural and political satire. CIT student tickets are $7.50-5.25-5.00. CIT faculty and staff tickets are $13.00-10.50-8.00. CIT student rush tickets and CIT faculty and staff TECHTIX same as regular CIT student discount prices — will go on sale Tuesday, October 13 at noon at the Ticket Office.

Travel adventurer Robin Williams will take you on the "Voyage of Columbus" Friday, October 9 at 8 p.m. in Beckman Auditorium. Following Columbus' route from Spain to the Canaries Islands and the Bahamas, and back! Admission: $7.50-6.00. Hear the music of Martini, Bartok and Hindemith on Sunday, October 11 at 3:30 p.m. when Martini comes to Dabney Lounge. This enchanting concert features clarinet, viola, piano and soprano in a free program.

Want to know more about "Star Wars?" Here is your chance — Dr. Amnon Yariv will be the speaker on the Earnest C. Watson Caltech Lecture Series Wednesday, October 14 at 8 p.m. in Beckman Auditorium. Dr. Yariv was a member of a study group of the American Physical Society asked to study technical and scientific feasibility of the Strategic Defense Initiative. In his lecture, he will summarize the findings and conclusions of the recently published report. Admission to this lecture is free.

**The National Security Agency is looking.**

We're in search of new professional relationships with both Mr. and Ms. Right. What we offer in return is a unique career that may well be the answer to your personal desires.

What we offer is certainly different. As NSA, our threefold mission is critical to our country's security. We process foreign intelligence information. We safeguard our government's communications. And we secure our nation's computer systems. A mission of that proportion requires a diverse range of leading technology and talented professionals.

Currently, NSA is searching for Mathematicians. Computer Scientists, Language Specialists and Electronic Engineers.

Our Mathematicians work with applied and pure math. They apply—and create—a host of advanced concepts from Galois theory and combinatorics to probability theory and catastrophe.

Computer Scientists discover a variety of projects and technology that is virtually unparalleled. We use literally acres of computers, including hardware from every major manufacturer. Applications include everything from communications software to artificial intelligence.

Language Specialists in Slavic, Near East, and Asian languages contribute to our mission in many ways. NSA linguists tackle the challenges of translation, transcription and analysis. They use both their language skills and their knowledge of world events.

Electronic Engineers also find a vast array of specialties from Signal Processing and CAD CAM to Speech Processing and Computer Security.

The mission is vital, the variety staggering. And the benefits are also impressive. Our employees enjoy competitive compensation plus the many advantages of the Baltimore-Washington area.

If you're in search of a meaningful career with variety and distinction, look to NSA. Schedule an interview through your College Placement Office. Or write to us at the address below.

**Polo Win 2, Lose 2**

by Skip Schotte

The Caltech Battlin' Beaver Water Polo Team is off to one of its more impressive starts. Although suffering defeats at the hands of Rio Hondo and PCC, the team has defeated Chapman twice and the Alumni once.

Since the last article appeared, the polo team is 2-2. The first game was against Rio Hondo. In a game where the Rio Hondo defense played well, the absence of ROTC member Clark Highstrete severely hurt our chances. Eventually Caltech lost this game 19-14.

As usually happens, the Alumni brought back anyone who could bring back anyone who could storm back to a 14-11 victory. As Chapman will be in our next game, we have the opportunity to play more in one game than all previous playing opportunities.

Wednesday evening's opponent was the other Pasadena school, PCC. In the toughest game of the year, PCC won 23-18 in overtime. This game was marked by the absence of goalie Eric Christensen. The other three goalies all had an opportunity to play more in one game than all previous playing time. After leading by two goals with 1:30 to go, the Caltech defense weakened just enough to allow the PCC players to tie the game and send it to overtime.

Leading the team's offense this year are seniors David "Bruno" Bruning and Mark Holdsworth. In the first five games, Bruno has managed to amass 39 goals, including many of the "Slime Polo" variety. Also important this year have been juniors Clark Highstrete as a secondary hole man and Devin Leonard as a driver.

This weekend the team travels to Northern California for a game against Dominican College and a four-game tournament against Cal Maritime and other assorted schools. The next home game is Wednesday at 4:00pm, and then an all-day tournament Saturday and Sunday of next week.
moseh

to our talents or fulfill our goals. And in his spare time he likes quiet, relaxing things like reading, walks, concerts or sports, or just peace and quiet. One day he would like to return to teaching philosophy. But before that he will no doubt have his share of grey hairs and sleepless nights.

The new Mosh Handy Emergency Phone Number should connect you to Conrad any time of day or night. If he doesn’t answer the phone at x3671 then try banging on his door at 1170 Del Mar. Of course, you may have problems understanding him in an emergency. He says “he’s eager to hear undergraduate opinions, from inexperienced freshmen to sophisticated seniors.”

Bike Shop

The Caltech Bike Shop will have an organizational meeting this Saturday, October 24, at 12:15 at the Bike Shop and a workshop in the NEW South Building (room 52). To win a prize you must sign up on the MASH’s door by make appointments in advance if you can, as there is always a long line.

Feeling Operatic!

The 1987-88 Los Angeles District Auditions of the Metropolitan Opera will be held October 15-17 in Hawthorn Auditorium by a U.S.C. and a Caltech collaborative venture. The ten singing auditions, ranging in age from 18 to 35, will be on October 15-16. Of the 257 singers who applied, 112 were qualified. Women’s roles are less than half the total. If you are interested in participating, call (213) 839-1472.

Attention Swedes!

The Swedish Club of Los Angeles is offering scholarships for 87-88 for $500 to $1000. To apply you must be a student at one of the member universities. For more information, call (213) 777-1296.

Minority Fellowships

The National Consortium for Graduate Degree in Minority Associates in Engineering, Inc. (GEM) is accepting applications for its 1987-88 Minority Fellowship Program. The fellowship will provide one-hundred and thirty (130) awards to minority students in engineering. The awards are $20,000 per year for three years. To apply, write to Minority Fellowship, GEM Program, P.O. Box 537, Coral Gables, FL 33130.

DOE Research Fellowships

The U.S. Department of Energy (DOE) offers research fellowships to minority and non-minority graduate students for the purpose of increasing the number of U.S. citizens entering the field of science. The fellowships, which are available at DOE laboratories, provide a stipend of $22,000 per year for two years.

Student and Conference Faculty Wanting Chairmen, Issues

d by David Bruning

This spring Caltech will have its bi-annual Student Faculty Conference. Right now we need volunteers to be chairmen and committee chairs. Right now the job of these people is to find out whether there is enough interest and need to hold a conference this year.

The 1986 conference was successful due to its very specific goals and proposals. The following examples are now being realized: longer Christmas and Spring Breaks, the renovation of the South House basement; changes in the PH 2 homework policies; more effective feedback mechanisms between students and professors; and the 480 unit graduation requirement as written into the Chan committee proposal. As you can see, these proposals affect everyone here at Caltech.

This year we need to find out what students perceive to be the problems that the conference might solve. Some suggestions have included the male-female ratio and how to improve it, the addition of more business-oriented classes, and a general restructuring of the student government. Students interested in the position of conference chairman should sign up for topics on the MASH’s door by Monday, October 12. Also, if you have any ideas for topics to discuss at the conference, please call me (David Bruning, x976) or write to the student conference chairman.

From page 8

Loss, Blood, Gain Beer

The Caltech Fall Blood Drive will be on Tuesday, October 27 9-12 and 2-5, Wednesday, October 28 12-3, and Thursday, October 29 9-12 and 2-5. There will be a contest between the Student Senate and the House Basement to see who can donate the most blood. The rules are: 1. any blood you donate goes to the house with the highest percentage of participants. 2. The Blood Drive will be at Winstead Lounge. Please make appointments in advance if you can, although drop-ins are welcome if you can't. For appointments call Donna Guarnizo, 567-5147 in the Personnel Office.

Jazz Improvement Class

This is an introductory and advanced class, open to all members of the conference, starting Saturday, October 24, 1-3 PM. Registration for the 11 students of the conference activity should be at the conference registration desk Sunday, October 11 of the student activities center. If you’re very serious about learning an instrument, now’s the time. For further information, please call Kurt Festinger at (213) 777-1472.

What Goes On?

Announcements for What Goes On should be submitted on an announcement form available in the SAC copyroom (room 337) or on a plain piece of paper. Please indicate that the announcement is to run immediately or specify a door of Room 404 of the SAC. Announcements must be received by the Tuesday prior to publication.

FAGGOT SHIRTS

The "Faggot Shirts" came in early September and they're really quite gay. It's quite nice, that stick's the dirty work of get­
ing rid of all. Unfortunately, the list of people who ordered them got lost halfway through summer. Everyone in Blocker & Rickeys should have their shirt. If you're not sure and don't have your shirt yet, see the guy with the bleached-blonde hair. Half the peo­ple in Daskey should have theirs. To see in Lloyd, Buddick, Page or Fleming house has got you yet. If you ordered a shirt, call me or send in a note with your name, mail & T-shirt size, and I'll think you ordered (Doc, 1--38, x4178). With any luck, your mom will give it to you.

P.S. Some friends have expressed some con­

WANT A FREE PRESS?

For reasons of health and sanitation, it is necessary for students to register pets with the Housing Office. Students who registered pets last year are required to register them each year. If you have an unregistered pet, you may be fined $5 per day.

There is no fee to register or maintain a pet. However, pets currently not registered that are found in the houses will be dropped from the pet rolls and are not allowed in Housing. Pets are not allowed in Brus or Marks House.

Central America Studies Group

A discussion of the role of the United

nations and peoples of Central America is a timely subject. It is difficult to discern what is actually hap­pening in this region. Many people who have experience in Central America are available as sources of information on past and current events. If you are interested in working with refugees, the sanitation program, or other aspect of American involvement, please see me or send a card for further information. If you are interested, call Cis­co (625-042) or Murt (873-756).
