Ex-MOSH Selects Deanship over MOSH Position

Brennen Becomes Dean

by Josh Kurutz

Chris Brennen finished his leave from student affairs two weeks ago when he was officially installed as Caltech’s Dean of Students. Brennen has been absent from official undergraduate relations since he left the position of Master of Student Houses one year ago.

Brennen said that last year he was, “a bit burnt out after four years as MOSH,” and was interested in how his attitude would change during his first year. He concluded, “I really did miss the close relations I had with the students that I had when I was there.”

Knowing he wanted to work with undergraduates again, he was given the opportunity to become either Dean or MOSH, since both positions were vacant. He chose the MOSH job for several reasons. “For variety,” was one of the principal motivations behind his choice. The office also promised to be, “more formal.” He also said that the MOSH’s job involved having students at his house at odd and frequent hours. “We wanted a little more privacy,” said Brennen.

He noted that the choice was not entirely his own decision. His wife, Dorien, played a major role, given that she shared a great deal of the MOSH’s burden. As an example, Brennen cited, “In four years, she served over 1500 dinners.”

One concern about Brennen is that his perception of the students may change in the new environment. He refrained from saying, “One may have to take a different approach to a particular student, but I’ve been here nearly 20 years, and I don’t suspect my attitude toward the students will change.”

One of Brennen’s first responsibilities was to help run Frosh Camp this year. “I’m particularly well,” said Brennen. “It structured the students and how the UCC’s participated in the discussions.”

The effectiveness of restrictions on alcohol placed on students at this year’s camp was of particular concern. Brennen expressed a change of mind. “I don’t suspect my attitude toward the students will change.”

One of Brennen’s first responses was that in the case of a real fire, the alarm should be of double concern to students. “Security has a direct link with the LA area dispatch and can call for fire equipment. Security should be called regardless of the alarm has sounded or not. With the new system unhooked as it is now, a member of P-Plant must first come over to the South Houses in order to assess if there is a need to call the fire department. Minutes could be saved if a fire is quickly identified.”

It’s also good idea to pull the alarm if it hasn’t sounded because continued on page 2

Rotation News

by Stephen Lew

As the end of rotation approaches, it’s time to start thinking about which houses you will be choosing. You might wonder, “How do I let the powers-that-be know which house I want to be in?”

Before 5:00PM on Saturday, find the Resident Associate in the house in which you are temporarily assigned and give him or her a list of at least four of the seven houses. You can rank the houses by a number between 1 and 7 (inclusive), with 1 being the best. You can rank them any way you desire (even all 3’s if you wish). Be sure you rank at least four houses, however, or your preferences will not be taken into consideration.

The houses are not required to abide by your ranking, but you will not be picked into any house that you do not rank. If you rank at least four houses, to improve your chances of getting into the house of your preference, tell the Resident Associates of the houses and tell them of your preferences.

By 8:00PM, the house RA’s should have a copy of the official frosh selections. Be sure and check to see that they didn’t mess up your selections.

On Sunday at 9:00PM, a list of who is a member of which house will be posted at Winnett Student Center. If you can’t wait that long, you can go around to the houses and find out by talking to the house presidents. They should know by about 7:00PM (or 8 …)

Each house has its own rituals and traditions for admitting new members. As a whole, they are fun and harmless. But remember if thing get out of hand… Just say no.

Frosh Camp Spelled Out

Craig Volden

I’ve come to the conclusion that the best way to understand Frosh is to assume we know nothing. Our minds are empty sponges, ready to absorb the vast quantities of knowledge Caltech has to offer. Unfortunately, our professors have the notion that we are intelligent; that they don’t need to spell everything out for us. Suscribing cabins. AWOL is better than no CABINS installed as Caltech’s Dean of Students one year ago.

Brennen’s outlook on the job so far leans toward helping students out with academic problems and assisting the Board of Control in its processes.

The learning period constitutes the first stage of a four-year plan Bremnen followed as MOSH and anticipates following as Dean. The first year would also be spent thinking of and evaluating changes in the academic structure in the last year or so. I don’t want too many changes in this structure (until a couple of years go by). However, if changes are merited, I’ll pursue them.“

Fire System Installed

by Mike McDonald

This year’s alarms are becoming a way of life for the students in the South Houses. Since September 8th, there have been twenty false soundings of the alarm. These frequent warnings have the administration and students concerned that in the case of a real fire, people in the South Houses would ignore the alarm.

In order to educate the students on the new alarm system, a meeting was held on Tuesday with the fire alarm technicians who installed the detectors, the Safety Office, the MOSH’s office, Housing, and representatives from the four Houses involved.

Just what is the new system? In order to comply with existing fire codes, additional smoke and heat detectors were wired into the old pull alarm system. Previously, the system of detectors, a product of renovation, were separate from the pull alarms.

If triggered now, these detectors will sound the fire alarm and send a signal to both Physical Plant and the Pasadena fire department. Because of the many problems, however, the entire South House building will look like the Pasadena fire department—this includes the pull alarms. This is should be of double concern to students.

What should you do in case of fire in the South Houses? If you see a real fire you should call 5500. Security is on a direct link with the LA area dispatch and can call for fire equipment. Security should be called regardless of the alarm has sounded or not. With the new system unhooked as it is now, a member of P-Plant must first come over to the South Houses in order to assess if there is a need to call the fire department. Minutes could be saved if a fire is quickly identified.

It’s also good idea to pull the alarm if it hasn’t sounded because continued on page 2

FRIDAY 30 SEP 1988

letters to the editors

Uncultured and cultured barbarism

To the Editors:

These are quotes I found in 1850's material this summer. I hope you find them interesting enough to publish:

"The habit of [novel] reading never yet produced a single sober, original, profound thinker. It unfit's the individual for the everyday duties of life, and fills the mind with day dreams; peoples the imagination with unreal beings, and fosters the tendency to build as-

calling." - Alphonse Daudet

I know she sneaks in and eats our porridge everyday, but have patience honey. Its all part of my plan. As soon as she's all fattened up, we strike.

Fire Alarms, cont.

from page 1

people will wake up—they might need a little more encouragement. It would be important in the case of a real fire to get people out of their rooms. If the alarm sounds you can find out where the possible trouble is by going down to the South House basement by the laundry room. There is a control panel there that shows which zone is sen-

tailing the alarm signal. The panel currently has some cryptic names that identify which zones each House is in, but will soon be a map which will have all the zones labeled.

Why has the system been sen-

ding false alarms? It should come to no surprise to say that there are a number of bugs in the system. Of the twenty alarms run since the system was connected, 7 have been due to bad detectors, 6 because of cooking and 7 remain unexplained.

P-Plant has been investigating each alarm and is trying to correct the flaws in the system. For in-

stance, a new time delay has been added to the system. This new feature resets the alarm, and if in 25 to 150 seconds after the first trigger, the alarm is triggered again, the alarm then sends the warning signal.

P-Plant is investigating in the process of replacing bad detectors and clean-

ing all detectors. These measures will hopefully reduce the sensitivity of the system.

A trouble signal is sent to the system. The P-Plant has noted a large number of 'trouble' signals from the detector. A trouble signal is transmitted when there is a loss of power or malfunction of the unit. Although some of the signals are legitimate, there were a group of signals that all occurred on one night. Everyone would prefer that the system worked smoothly, but that can only be achieved by letting the fire alarm technicians find and fix the bugs. Not only is playing with the alarm dangerous, if there was a real fire, it is also a crime.

5) Be sensible. Hopefully, we can all get some sleep tonight without being awakened by a false alarm or even better, remember the next time could be real.

mene applying for this position. He went to Caltech 2 years behind you. Do you know him? The answer will be, “Yes.” And hopefully, you will remember more good things than bad. Anon. Alumnus

If you’re in the UC area, park in secure parking! My car was stolen from the street there a month ago.

Editors Note: Because of the generality of this alarm statement ALL undergraduates will be able to pick up a copy of the Frosh Mug Book for this year in the Dean’s of-

fice in Parsons Gates.
Guide to the LA Underground

by Jim Brown

So, we've arrived back in an entertain­ment column? Does it jump off the page and do little carwheels and tricks when you look at it, or possibly do a song and dance rou­tine? I've lost it, but I've learned how to write one of those. To be frank (or even Sam) with you, by the time you finish reading this, you may not have been entertained at all.

Caltech Y

The Caltech Y is the most impor­tant social center on campus af­ter the student houses, and serves as the primary center for clubs and most other campus-wide activities. Officially known as Caltech Y, it exists to make students aware of moral, ethical, and social issues in the world around them, but the Y pro­vides a cornucopia of other serv­ices as well.

Despite its name's implications, the Y itself is completely secular, although it does support several reli­gious organizations for students, including the Caltech Christian Fellowship, Caltech Hillel, the Lat­ter Day Saints, and the Newman Center. For the most part, though, the Y is more of a wholesome than non-religious organization.

The Y is mainly notable for its own activities, events, and serv­ices. In direct support of its stated purpose, the Y sponsors speakers on moral, ethical, social, and philosophical issues.

Along similar lines, the Y sub­sidizes tickets to encourage students to attend. These include tickets for plays and sporting events, discount passes to music venues, UA theaters, and the (Peter Lind­strom) Caltech Philharmonic. The Y also has one dollar passes to use the Pasadena YMCA's facilities for a day.

The Y also organizes and spon­sors many activities open to all stu­dents. The most widely-used of these is "decompression," which can relieve a lot of the stress that tend to furl your mind during fi­nals week. Decompression pro­vides hot food, movies, and various other not-particularly-intellectual activities for the stressed-out student, all at no charge.

For easy entertainment on cam­pus, the Y has anöy in the front of Winnet on Fridays, usually at noon, but sometimes in early even­ing, as well as Wednesday night movies in Winnet. The first of the noon concerts will be next Friday. Be on the lookout for more.

For smaller groups of people, the Y funds a host of sign-up ac­tivities, such as the annual full backpacking trip on September 16th, day trips sailing, horseback riding, and "beaching," and ski trips in winter.

I'm sorry if I've offended any­one reading this, but I feel that me­tal music receives too much hype simply because it's loud and not very creative. Therefore I don't like most of the metal bands out today. You can still enjoy E & E & A or many times before it sounds to sound the same every time. This goes for all music. Lack of creativity usaul­ly results in a lack of audience at­tention. But rules are meant to be broken, so if your idea is fairly at­tractive, has long hair, and can play a few chords on a guitar, he'll probably end up doing well in L.A.

There are a few very sati­fying political message that glides along with the swelling melodies. While watching the performance, one might wonder if they were watch­ing a performance art exhi­bition. But I guarantee that this band is loads of low calorie fun for anyone with a sense of humor.

Divine Weeks

Divine Weeks used to be called The Need when they weren't very good. Now the band is a power­house secret. You rarely hear any­thing about them. Why? I don't know. But if you like good rock with flowing energy, this band's one of the best. They were voted in the top then bands of L.A. a year ago. Since then they've been recording. The Y also awards the $1900 Student­ski travel award.

In the Y's office upstairs in Winnet, there is a photo of the machine, and paint and paper for making banners, all of which are available to students, clubs, etc. The Y is also a good place to just hang around, and if you have an idea they may want to sponsor, if you want to find out more about the Y, or if you just feel being friendly, you'll find that the new Director Paul Gibson, Administra­tors Assistant Aline Bolster, and Secretary Gloria Brewer are all friendly and helpful. You may want to get involved in Y Escom and Board of Directors to help the Y survive the next academic year and to meet faculty and IPL staff in a non­academic environment.

AASCIT van release for. We're try­ing to cover our ears immediately.

I. The Class Listing of Under­graduate Education (CLUE) is out. A good number of transfers currently liv­ing in Winnet's dorms.

2. The list of which house owes the IHC $10.

3. Does everybody have their picks to the RA's of the house they are rotating from before 3PM/ Oct.

4. By Wed. of rotation, Dwight H. will make lists of the picks ranking.

5. The Class Listing of Under­graduate Education (CLUE) is out. A good number of transfers currently liv­ing in Winnet's dorms.

HELP WANTED

Are you feeling bored at Caltech?

The California Tech is looking for a few good men and women who are up to the challenge of being Editors-in-Chief of the most prestigious student-run newspaper on the Caltech Campus.

Power, prestige, and honor come with this position. Work with some of today’s top writing talents. Deliver probing, provocative stories to readers of a discerning class.

Also available for a limited time are the positions of Circulation Manager, Entertainment, Features and Sports Writers, Entertainment, Features and Sports Photographers.

These positions are open immediately, and all qualified applicants will be considered. Since The California Tech is an equal opportunity employer, women and minorities are encouraged to apply.

California Tech Meeting Today

The staff of the California Tech will meet this afternoon in room 127 of Baxter Hall at 12:15pm. All persons interested in writing, news photography, or even editing are encouraged to attend.

Cross Country

Martin Places First

by Scott Kister

Last Saturday, for the second time in as many races, freshman Jen Martin placed first for the Caltech women's cross-country team. This time, however, she finished ahead of everyone, beating every runner from three other teams, including a strong team from Claremont.

Claremont dominated the meet by finishing a runner in every position from second to seventh. Whitier edged Caltech by five points to take second. Caltech finished third by beating LaVerne.

Martin's time of 18:31 on the 5K course was 19:35, more than two minutes better than her performance the week before. Varsity runners finishing after Martin were Margi Pollack (22:06), Bibi Jenoff-Nilson (22:26), Golda Bernstein (22:14), Liz Warner (24:30), Mary Rowe (25:28), and Emmeline Narango (26:47).

Close behind were Marin Shepard, Bianca Pavli, Teri Engelemb, Angi Choksi, Cynthia Wittman, Dee Morrison, and Marta Toronto.

In a close battle for first place on the men's team, freshman Dan Flees, running in his first collegiate race, edged out Scott Kister. Both Flees and Kister finished with a time of 29:56 on the five mile course. Other varsity runners were Chris Campo (30:53), Paul Socolow (32:17), Mark Lyttle (33:24), Ed Narango (33:32), and Kurt Storm (33:40).

Also finishing were Mike Mahon, Andy Crews, John Bowers, Alex Duncan, Chris Raymond, Derek Syle, Mike Ida, Steve McLaughlin, Joe Pierro, Eric Stout, Delwyn Gilmore, Todd Kaplinsky, and Todd Storm.

The men's team finished second in the team standing despite having no juniors or seniors among their top nine runners. Claremont won the team competition. Whitier finished third, and LaVerne fourth.

The Beavers next race is this afternoon at 5:00 p.m. at home in the Lower Arroyo Park. Caltech is hosting Masters, Christ College, Pepperdine, Whittier, and LaVerne.

Rebuilding in Air

by Al Fansome

The key word for this year's water polo season is rebuilding. Of the nine seniors in last year's starting rotation, only one is left. The team that is still here is young (only one junior and one senior), but it has the building blocks for a powerful and successful future.

The foundation for that team lies in Brian Engin, a senior who turned in his water polo capabilities. In the absence of Devon Leonard, he is displaying leadership and motivation along with his water polo skills. Recognized as Caltech's best freshman water polo player last year, he continues to improve and succeed.

Graham Gitlin and David Geraghty are two other sophomores who are contributing to the team. Juniors Ted Rogers is playing all positions and has shown much improvement since last year. The goals duties are shared by senior Tim Hochburg and sophomore Brad Swanson.

The team is looking for a lot from its freshman, and they are coming through. Tamaki Murakami is quick in the water and has an excellent shot. Doruk Engin provides superior handiing capabilities. Lee Burrows is picking up the game very quickly for someone who is just a swimmer, and many more freshmen have come out since preseason to help out.

The team has played four games so far this year. The opening loss was to Cal State San Bernadino. Next up was Rio Hondo. Another loss, by a score of three goals to a lot. Tamaki, Shim, and Geraghty each scored a goal.

Chapman, Caltech's next opponent was frustrating with a very tight defense. Again Caltech lost by three goals to a lot. All three goals were scored by Geraghty.

Their latest game, against the alumni, was probably their most fun. With the opposition made up of three people from last year's squad and many alumni game regulars, the mood was friendly and everyone had a good time. Once again, Caltech lost by a score of three goals to a lot. Geraghty had two defense, and Tamaki the other.

Despite being winless, the team is having a lot of fun and improving along the way. Although the outlook for this season is dim, hopefully the rebuilding will have Caltech ready for the next year.

THE INSIDE WORLD

This week's Inside World was brought to you by:

Blacker: Marty O'Brien
Page: Random Page Boy
Ricketts: Su-Lin Wu

Blacker: Good mORning, everyone, and welcome to BlackOR House, the evil master house of graceful living, fine dining, and kitchen mumbo, such as this little ditty inspired by our experiences at Frosh Camp.

Assembling... Reg 5231 00 •

240 bottles of beer at Frosh Camp
240 bottles of beer
Take one down, pass it around
270 bottles of beer at Frosh Camp

Lighter things aside, injuries have plagued many moles this summOR. Harry subjected his car to his driving. Anna, already pining for the glory days of Fresh Girls, took a Freshman slip down a mountainside, fracturing her leg. Not to be outdone, Brad was talking to some frosh girls this summOR when he slipped in a pool of slime, smashing his ankle. All of us in BlackOR House hope this type of carelessness will end, but in the meantime we wish both Brad, Anna, and Harry's car a speedy recovery.

107 bottles of beer at Frosh Camp
107 bottles of beer

And if you can find the time today, you might reflect in silence FOR a moment in memoRY of BobKe and Mike, BlackOR's most recent victims of SCP (Sporaneous Combustion of Flesh).

106 bottles of beer at Frosh Camp

Insiders (evil masters of the very bowels of BlackOR House) have revealed BlackOR's picking strategy FOR the Great Fresh Grand Lottery. An anonymous source stated that only frosh with names ending in -ar, -er, -ir, -OR, or -er (from the tradition of Cliff KnOR (evil master and overseer of rotation and all its evils), Matt TyOR (evil paraplegic red-haired sophomore OR from off-campus), Glenn EychanOR Gust (plain evil), Mack RhinelandOR (evil master of DinOR), or Dave KriOR (the LastOR Day Saint, evil master of the very bowels of BlackOR), will be picked into the house.

Until now.
Free AIDS Speakers Available
At 10 a.m., members of the American Red Cross AIDS Speakers Bureau will come to speak to groups of six people or more and present the facts about Acquired Immuno Deficiency Syndrome—AIDS.

**International Student $5**
The seventh annual International Student Scholarship Competition—a nationwide re- 
say competition for international students studying in the U.S.—is now underway. 
First prize is $1,500 to be used for academic or professional advancement. International Underwriters/Brokers, Inc. will award $1,350 to the International Student Office of the first-place winner.

Deadline for the competition is December 1, 1988. International student interest is 
existing with each student completing the essay of not more than 1,500 words on the topic: "Important 
ant historical and current issues often found in hu-
man activity in your country with a city in the USA. Include 
examples of human situations resulting from cross-cultural misunderstandings, either in the U.S. or on your first visit back to your home country.

Additional scholarships will be award-
ed for second place ($1,000), third place ($500) and five honorable mentions ($100 each).
The International Student Scholarship Competition is open to all full-time foreign 
students enrolled in a prescribed-degree 
showing program at an accredited 
top public or private higher education 
institution in the USA. 

Additional qualifications are as follows:
• Students must be full-time college 
enrolled in an accredited U.S. university.

**SAMP3 Call For Papers**
The Society for the Advancement of 
Material and Process Engineering (SAMP3) is now accepting abstracts for papers to be presented at its Fall Meeting, Third International 
Electronics Materials and Processes Confer-
ence. "Electronics Materials for the 90's and Beyond" is the theme of next year's con-
ference.

Applications for the Los Angeles Dis-
tribution Center, 3311 Hyatt Drive, Rancho 
Palos Verdes, CA 90274. Telephone: (310) 
331-0616.

**Monte Carlo**
Structural Engineering.
Analyzing and designing bridge. The HP-28S helps him analyze structural stress and geometry. It's the only calculator with RPN lets him analyze prices, equations with solver, analyze budgets and forecasts.

New Achievers in Heavy Metal, Swing Blues and Motown.

**U.S. San Jose, Marine Biology**
Studies behavior of blue whales and effect of environment on distribution of marine mammals. The new, easy 
to use HP-22S has a built-in 
equation library with solver, plus time value of money, cash flows and linear regression to analyze budgets and forecasts.

**University of Michigan, MBA candidate.** Assistant at pricing 
projects for GM. The HP-17B offers easy algebraic-entry 
variables. Hewlett-Packard's calculators are built for 
your success. Look for them to your home 
campus bookstore. Or call 1-800-752-0000, Ext. 6583E.

**Computer Science**
with graphing calculator. HP-22S scientific calculator.

**GEM Fellowships**
The National Consortium for Graduate Degrees for Minority Groups (GEM) is accepting applications for its 1989 Fellowships. GEM will provide 150 awards to minority students in engineering.

**Bag Tag on Green**
RESALE CLOTHING for 
WOMEN
1136 E. Green St. • Pasaden (818) 796-9322
Mon-Sat 10 a.m. – 5 p.m. • Fri till 7 p.m.

"powerful and easy to use..."
Late Additions

Humanities Offered

H 152. America in the Era of Roosevelt and Truman. 9 units (3-0-6). Topics in the history of the Depression, World War II, and the origins of the Cold War.

H 161 & H 180. Venice in History and Literature. 9 units (3-0-6). Venice was, from its beginning, unique among the Italian city-states of the Middle Ages and Renaissance. Byzantine rather than Roman, with no protective hinterland, or resources beyond the cleverness of its citizens, it developed a unique blend of government and a trading empire that were highly successful and dependent upon secrecy. Europe came to fascinate with Venice and the city came to stand as a symbol of many things, generating a dazzling literature.

A one-term course that may be taken for Advanced History or Advanced Literature credit. Professors Sorensen and Sutherland will explore the city's reality and its reputation simultaneously. The size of the class will be limited to allow discussion.

H 134. History of Latin Imperial China. 9 units (3-0-6). An exploitation of several major problems, including the growth of autocracy, population distribution, social mobility, and the Ming-Qing dynastic transition. A history of China, from the formation of the Mongol empire to the eve of the Opium War.

Humanities Offered

SS 33. Introduction to the Law. 3 units (3-0-6). An introduction to the legal and the social scientific point of view. Subject can vary from year to year.

Literature Review Seminar.

H 110. Early Modern Europe 9 units (3-0-6). An exploration of the economic history of Europe up to the 19th century, with special attention to quantitative analysis. Topics will include the crisis of the later Middle Ages, violence and repression, and the role of political stability.

Instructor: Hoffman

Wed., 2 - 3:30

Electron Microscopy $$$

The EMRA Council (Electron Microscopy
Research Association) is offering a 1-2 year
undergraduate scholarship program to further
the educational and research potential in stu-
dents intent in pursuing electron microscop-
eic as a career. The applicant must be a U.S.
citizen or resident and a full time under-
graduate student. The application deadline is
Nov. 15. For further information please con-
tact:
Dr. Robert Price
Bioinstrumentation Center
Case Western Reserve University
2155 Adelbert Road
Cleveland, Ohio 44106

More Engineering $$$

Equal Opportunities Publications, Inc.
offering two non-scholarship $500 scholar-
ships to honor outstanding women, minori-
ty, or handicapped students who are pursing a
career in Engineering. For further
information please contact the Financial
Aid Office, 515 S. Wilson.

Goddard Memorial Scholarship

The National Academy of Science is off-
ering a $7,500 scholarship for the academic year
1989 for the memory of Dr. Robert H. God-
dard. The 1989 award winner will also be
introduced to the nation's leaders in science,
government, and industry. The applicant must be a U.S.
citizen or resident and a full time undergraduate
year, and have the intention of pursuing un-
dergraduate or graduate work in astronomy or engineering during the interval of the scholarship. The deadline is Jan. 6. For further information please con-

Tutors Needed

The High School Saturday Science Pro-
gram is currently recruiting tutors. The meet-
ing will be Sunday, October 30 from 2-4 in Room 37.
For an application please contact SWE's office, 515 S. Wilson.

JPL Arts & Crafts Fair

The NASA Jet Propulsion Laboratory pro-
sides opportunities for graduates and grad-
uates to participate in the JPL Arts & Crafts Fair. The deadline is October 15, 1988. For further information please contact the Financial Aid Office, 515 S. Wilson.

Watson Fellowships

The Watson Fellowship provide post-
graduate Fellowships of $13,000.00 ($18,000 for
married couples) for a year of indepen-
dent study and travel. Fellowships are not
intended to support graduate study at a foreign
university. They encourage, in-
stead, independent study overseas in the normal
sequence of graduate/postgraduate education. Appointments are also
available for engineering students who have a potential interest in professional engi-
neering. Fellowships are available to the amount of up to
$4,000.00 ($5,000 for married couples) and are awarded in September of each year. The deadline is October 15, 1988. For further information please contact the Financial Aid Office, 515 S. Wilson.

SAC Overview

The Student Activity Center provides
services for the students of Caltech. It is located in the SAC at 39 of the
Building and is open 24 hours per day.

Women’s Glee Club Signups

The Women’s Glee Club is welcoming
members interested in vocal music. The group
will be meeting every Tuesday at 7pm in Rooms 3629. For
further information please contact Mrs. McClellan or (818) 992-6966.

California Cryobank, Inc.

Aren’t your sperm bank?
