Women and Porn

by Chris Dunn

Tuesday, two feminists vexed the question of whether pornography affects the position of women in society.

On a panel on “Women and Pornography” were Carol Sobel, attorney for ACLU; and Shells Kuehl, managing attorney at the Southern California Women’s Law Center. Sobel represented freedom of speech and choice while Kuehl advocated the right to equal opportunity.

Sobel’s arguments relied less on the centuries-old tenet of free speech than on the unspoken assumption that the principle that pornography is responsible for actions.

She admitted the existence of a link between pornography and violence, but she mentioned studies of the mitigation of violent attitudes through education.

Kuehl discounted the potential of education with the example of its negligible impact on racism. She favored an idea, declared unconstitutional, to allow women to use publishers when status is damaged by the influence of sexist materials.

Stated Kuehl, “Women do not get to speak their own sexuality in this pornographic environment.”

One woman in the audience pled not to just give up and let the law protect us.

When a man cited other examples of societal oppression, which, he argued, should receive the same attention, Kuehl explained that the indirect oppression of women is of a different quality.

One participant lamented that society was “so in touch with racism and so out of touch with sexism.” That may be true, but that description could not have been applied to anyone in attendance that evening.

CRIME & INCIDENT BEAT

CRIME TIP: In the wake of recent textbook thefts, Harold Goldner of campus security reminds faculty and students to keep office and room doors locked. Occidental College and Pasadena City College security departments has released information that three persons have been stealing textbooks from colleges throughout southern California.

1/17 Car speakers and an amplifier were stolen from a car parked in a Caltech parking lot. There was no attempt to sell the goods, but the perpetrator must have used tools to force the door open.

1/18 A recipe book was reported lost from a Firestone Labor office. The victim could not recall if the door had been locked. The crime occurred between 1/15 and 1/18.

1/18 AT 01:05 a suspicious person left a message at Lab professor’s door. The professor didn’t immediately answer, and the suspect opened the door and told him that he was buying used books. When the professor stated that he had no books to sell, the suspect left.

1/18 More textbooks were reported stolen from Downs Labs. The previous thefts had resulted in a makeshift security system.

1/18 Three suspicious persons, Latino males ages 16-17 years, were reported smoking what gave the odor of marijuana. A search by Caltech security proved fruitless.

1/19 A grey sedan pickup was stolen from Chester parking lot between 09:00 and 18:00.

1/19 A perpetrator cut through the cloth top of a vehicle in the Business Services parking lot and removed a flashlight, miscellaneous audio cassettes and victim’s wallet. While security was investigating a yellow 1975/76 Chevy was observed being driven by a male Latin. When the driver saw the officers, he left at a high rate of speed.

1/23 AT 08:45 Athletic Director Dan Bridges observed a man who in the past had frequented the Caltech tennis courts, giving lessons in the sport for money. Bridges advised the suspect that if he was again caught he would be subject to further charges.

1/24 An innocent Crime and Incident Beat editor was in the security office taking down the week’s crimes and incidents when an unidentified writer asked, “What about the 1000 dollar? I lost my wallet.”

Total dollar value stolen this week: $11,080.

INSIDE
Dear Chandler Diners,

Don't let a few pounds overweight after the holidays make you attempt to limit by daily calorie intake by eating only salads for lunch. An average salad with 2 cups of lettuce one medium tomato, 1/2 cucumber, 1 tablespoon of mayonnaise, 1 tablespoon of fresh sliced mushrooms and 2 tablespoons of low calorie Italian dressing has approximately 190 calories. It is often impossible to make such a salad at Chandler. Today for instance, if you were to examine the salad bar there were lettuce, spinach, carrots, artichoke hearts, Chinese pea pods, alfalfa sprouts, and mushrooms.

These items are certainly excellent salad bar but everything else that appeared on the salad bar either came out of a can or was heavily marinated in oil, adding about 190 calories to table spoon, or covered with mayonnaise, adding about 101 calories per table spoon. I want unmarinated tomatoes, cucumbers, bell peppers, and green onions on the salad bar.

Jen

HELP! The Caltech R.A.C.E. Tech music (Really it Such a call Golda Bernstein sonority will lead into music) Anyone who enters will be warmly received. R.A.C.E. Tech is located in the Student Renewal Center, and is located in the Student Renewal Center (the building where the information desk is.) A sign at the entrance is s1613 (learn it, know it, use it).

Glory is about the raising, raining, training and most famous battle of the 54th Massachusetts, a regiment of free black soldiers raised at the request of some of the most crucial anti-slavery factions in the North. While a few historical glitches creep in, Glory has a degree of historical accuracy that puts other movies of that period to shame, including making the much-beloved Gone With The Wind look like all Ted's Excellent Adventure as a portrayal of the Civil War.

You see, when black regiments were first formed, they were used as untrained runaway slaves. When these men were gathered together no one could read or write, the best they could do was to teach a slave to read in most slave states, and some spoke dialects thick enough to choke on, so their Northern white officers had little faith in them. If they were captured in battle by Confederate troops, they could be summarily shot or hanged. But since the Northern officers didn't trust them, they didn't want to give them guns, or trust them to fight in a battle, so they used the ex-slave, or "contraband" regiments for manual labor. Cutting wood, standing guard of the prisoners, instead of guns, they armed them with pikes. You know, sort of a long sharp stick. Oh, yes, and they didn't receive as much money as white soldiers. Some were told that they had to go out and risk death or slavery at a cut in salary, or you could only have a sharp stick to defend yourself, how many could act? Let's have a show of hands! Well, a lot of the "contraband" regiments had problems with discipline and low morale. Funny thing... The 54th Massachusetts was different. From the beginning its mission consisted primarily of free-born black men from New England, educated at least to some degree. These weren't direct refugees with nowhere else to go. They were proud to volunteer to serve their country, and to help free those held in slavery. Of course, under the articles that the regiment to exist, all of the officers had to be white... that's how things worked in the U.S. Army until World War II. By the way... but they were dedicated, spirited troops that wanted to help win the war. And their colonel, Robert Gould Shaw (played by Matthew Broderick), wanted to prove that a black regiment could be counted on, trusted in time of battle. And that led to both the regiment's achievements and its downfall.

The 54th's campaign can be divided into three parts: the first 54, the rest of the 54, and the fate of the 54th, because the way it unfolded is a powerful visual work, easily on a par with the best American-made war films. I'll start with the 54th, because you that the 54th is most famous for a fight, that had a dozen poet choruses to write about it. It's right up there in the memory of the masses. (Keep Charge of the Light Brigade.)

Glory was made at enormous cost, and with enormous love for the subject and the medium by all involved. Many of the extras who played slaves in Glory had lived on location in a recreation of a Civil War camp, rather than commute to a nearby city, just to keep the feeling of what they were portraying.

Glory is rated R, primarily because of violence in the battle scenes (the graphic stuff is there, but is necessary and quite briefly viewed — this movie is not gory for the sake of bloody), but also because of the most creatively foul-mouthed drill sergeant I've seen in years. The photography, the music, the acting, the script... it's all (except for the gratuitous note. It's a powerful, gut-wrenching movie, a trip back 125 years in time, an insight into the feelings and beliefs of the time. But even without that, it's a damn good movie, and one that's just as heroic as anything John Wayne or John Wayne did (or even Wayne fan). I intend to see it again, but not until I recover from the first time. It's that kind of movie.
Johnston Spurs Fencers to Title

by Robert Randolph
Caltech defeated all other Divi­sion III fencing teams, this past Saturday to secure the Pacific Coast Collegiate title sponsored by the United States Fencing Asso­ciation. The event was held in the huge 6 month old athletic complex at Place firg. a Pitzer college which fielded a very strong home team. Other schools participating includ­ed the University of La Ver­non, U.C. Santa Barbara, Drew, Ponoma, Occidental, and Claremont-Mudd-Scripps.

The first event of the day was the men's Sabre competition. Seniors Robert Fox and Sabre Team Captain Justin Johnston fenced their preliminary rounds flawlessly, and entered the direct elimination rounds in the first and second seed positions, respective­ly. In the semi-finals, however, Robert Fox came across Ponoma fencer, Alexei Orskov, an eight-year fencing veteran who defeated the Caltech senior. The final bout was between Justin Johnston and the Ponoma fencer. Realizing that the Ponoma fencer was considerably stronger at defense than offense, Caltech coach Robert Randoph, told his fencer to aim for a much closer distance than normal from his opponent, and then from there, launch carefully targeted attacks. Johnston com­plied with this advice and his ser­ies of running attacks proved too much for Orskov to handle, and awarded himself a gold medal for the in­dividual championship.

Foil Team Captain Robert Cok­er followed the fortunes of his sabre team colleague and fenced successfully through the prelimi­naries to earn the second seed to the elimination round. Using a stylistic combination of attacks and body evasions, he advanced to the finals before losing a tough fought bout to US fencer Kashi Way. Coker earned the silver mer­­itorial for his efforts. Combined with Johnston's results, Caltech had as­sumed the lead over all other teams, with Ponoma-Pitzer in se­cond place, USC in third, and UCLA in fourth. The Epee event was next and Caltech captain, Joe Duke, fenced superbly to be seeded third in the eliminations. It looked like Joe was heading for his own individu­al medal, however, he was matched against teammate Julius Yang (number 14 seed), who up­set his team captain in a bout which saw-saw back and forth before the sophomore fencer snatched the victory. Julius advanced to the fin­als before being defeated and finished in eighth place. Although this finish furnished the Caltech team with additional points, Stevenson, a 67th percent from Po­noma had earned the silver medal to close the gap between the two teams, and Stewart from Cal-State Fullerton had earned the gold, to bring the Fullerton team into third place above UCLA and USC.

Only the women's foil event re­mained and it was up to the Caltech women to hold onto the dwindling lead. All Caltech fencers were well, however the laurels fell to fresh­man Gabriela Mallen-Orelunas who advanced to the finals, to secure the Division III title for Caltech.

Rickets Well, I guess a few of you liked last week's RHS. Maybe in a while I'll continue this gripe-ning saga. This work, though, is for complaints and griping. First of all, what are the goons in the Tech office doing with all of the disks I submit these things? It is too much to ask that they put them into the outgoing box so I can reuse them. I'm getting sick of having to hunt up a new disk every week when there are at least three perfectly good disks that say "Ricketts House Inside World" on them roting in the Tech office, a life, guys. Next, who is the geek who said our votes for Angus wouldn't be counted? This is a democracy and I'll vote for whatever I feel like voting. No Neo-Nazi with a word processor is going to tell me what to do with my franchise. Just go stick your head in a pig, bozo. Well, I guess that's enough Chris-esque whining for now. On to some topics of substance. Kitt wanted me to be sure and announce that her wave function has collapsed, and she is no longer stuck in that stuffy box. Congratulations. I'll vote for whomever I feel like voting. No Neo-Nazi with a word processor is going to tell me what to do with my franchise. Just go stick your head in a pig, bozo.

Ruddock Rudd Rumor Mill: Kim has turned down a contract with G.L.O.W., saying "I'd rather wrestle men!" Mike Tyson has been seen hanging around her room lately, and was witnessed telling her "I want a woman who hits back!" Will he propose?? Is this Ruddock, or Ricketts? Only those present in Room 242 Saturday night for real... Fang, the amazing and rare Peruvian Dwarf cat, in another feat of stunning prowess, dove nearly two stories from the Ruddock-Lloyd bridge to a graceful four-point landing. Almost six judges gave the dive a "9.1" Nik has reportedly given up all "small Oriental women" and is now exclusively dating his cat Quasar. They were seen last week doing "a tri" in the upstairs. Finally, let us get down to the nitty gritty. Rich or are they not doing it like Scotty... and Dave & Drew. Are they or are they not doing it like a pair of sex-crazed weasels? You be the judge, and I'll print the results next week.

I'm going to keep it short this week since I have work to do. Remember: It's not whether you win or lose, but how many bare breasts radioactive deserts you leave behind.

...The Physics Messiah (Still accepting applications)

Jim's Journal

I went to the French class today. Afterwards I went to eat a tace. I opened up my French book and thought I'd get caught up while I ate. But I didn't feel like it, so I stared at the table while I ate.

He's lying Jake, it was meant for us.

The California Tech
I didn’t bring my glasses. Is his thumb down?

Ruddock

HEY! HOLD ON! Wait just a minute! Moooo! Moooo! Let’s get a few things straight here! The reason Rudds don’t talk to other houses isn’t because we’re stuck up, or lame, it’s because the other houses are too damn stuck up, or lame, or having parties, or beer, or whatever it is that Rudds need. The reason Rudds don’t talk to other houses is because the other houses are too damn stuck up, or lame, or just too damn cool, or whatever it is that Rudds want. Jesus Christ... Nik seems to think that is down hill. He wants to return to the “Glorious days of yesteryear”, when Rudds beat each other with sticks, threw shit into each others alleys and there were only three girls in the house and four bitches. Welcome to the nineties Nik! An age of peace, love and understanding! Of course this doesn’t mean you can’t get a snowball down Melissa’s short, thrust Alley 4 with a hockey stick, or run screaming through the lounge in Kit’s underwear!

We’re on the lookout for a new movie featuring background noise by Ruddock, Blacker and a few drunk Page Boys. They had to bribe us with 8 cases of beer to keep us quiet, too bad Colin wasn’t there or we would have gotten a brevity. Congratulations to the new Ath Team that managed to pull this off and beat Blacker in Ultimate (of course they didn’t care, they had beer.) The Corona was great, but, uhhhh, anyone want a free six-pack Coors?

Travel advisory to all Darbs and Scrubes; While all the glass has been removed from Alley 4, there are now large shards of wood and splinters littering Alley 4 and 4.5. Rudd’s Rhino-Rage rampage left a wake of destruction and Nik quaking. And all this just because he had to move down to Alley 3. He’s already causing trouble, Fatima had to slap him around a little when he played his stereo too loud (she’ll soon learn that this slapping business only stimulates him further - poor girl) Ya, Nik really fisted him good (hey, it’s better than fisting your self!) -Nik But Mato rises to give as good as he gets - we caught him wrestling with Colin on the stairs wielding a can of Kris-co.

In related news, the Boo-Foo-Choo-Choo has been laying new tracks in Alley 4 and 5, and Blake seems to be the new caboose, a prime target for Kim’s loose noose. Look for exciting wrestling action outside a shower near you!!

OOOOOH! AAAAAAH! Coming up for air! What the hell are you doing with your hands?!! Now that’s a dick-chain! We all laughed as Melissa’s own special rose-tinted world came crashing down around her eyes, which, incidentally, were bugged wide open! Larry was pissed with our laughing imp’s interruption that night, perhaps Celia learned something new in Nik’s room.

Five Kit-Kat units?

SFC 90 Update

The second session of the 1990 student-faculty conference by the office of the Dean of Students and the Caltech Y will be held on Friday, March 2 from noon until 2 pm, or later, if there is interest. The topic of discussion will be the state of the Honor System. Applications for membership of the panel initiating discussion (See The California Tech two weeks previously) are invited from the entire Caltech community. To apply submit a short (page or less) essay on your perception of the state of the honor system to the Caltech Y by 3 pm on Wednesday, January 31. See you at the first session on February 16 to discuss “Diversity”.

Graphic proof of high-tech leadership.

The Casio fx-7000G $89.95. It's the world's first programmable scientific calculator with a graphic display. It can give form to your figures, instantly drawing graphs that depict your formulas and calculations. With a screen that measures 16 characters by 8 lines, the fx-7000G can display enough information for some of your biggest ideas. And you can store graphs and formulas, then bring them back for an instant replay.

With its 422 step memory and 193 functions—including linear regression, standard deviation and computer math—the fx-7000G lets you perform computer functions, without acquiring computer knowledge or incurring computer costs.

For additional capabilities, there's the fx-7000G ($109.95). It has a larger memory capacity, with 186 functions, 4,996 memory steps, instant graph enlargement or reduction feature, plus a convenient horizontal folding format.

If you need even more power, our fx-8500G ($149.95) techs you even higher, with 6,566 memory steps and 255 functions. And when hooked up with our optional FA-80 interface, it works with most parallel dot matrix printers or plotters including Casio's own models.

If you have any doubts as to who's the leader in high-tech calculators, just pick up an fx-7000G, fx-7500G or fx-8500G and draw your own conclusions.

Today I bumped into Dean, a guy in one of my classes last semester.

We talked for just a couple minutes about school, and he joked about his coat, which he got for Christmas. We came to a corner and he said, "I go this way, see you around, Jim." I walked away more and for a brief second I couldn't remember who I'd bumped into.

by Jim

Today I had my European history class.

I was taking notes with a pencil and the lead broke. I didn't feel like asking somebody for a pen, or getting up to sharpen my pencil. So I just didn't take any more notes.

by Jim

Today I walked by a fast food restaurant.

It had a big sign in the window that said "Now Hiring." But the window frame blocked part of the sign, so it looked like "Now Firing." I thought that was kind of funny.

by Jim

A year sent into a Silverian the Red that he had collaborated Nazis. After all of isolation, he had habilitation in 1981. Is he or is he some between the forces of answer is that there is to determine the scientist in a similar situation. She could advocate that scientists (e.g. those working in nuclear physics) should be aware if not active in, politics of face the dilemma of lacking a moral standing for their action and work.

The next SEPP seminar will be at 4 in Baxter and a Genome Seminar on "Human Genetic Information and the nos is of Human Disease and order" Thomas of the department Gencetics at the Howard Hughes Medical Institute, at Baylor College of Medicine. All members of the Caltech community are welcome.

Nazi Genes from page 1

ration? In this respect, the case of Timotheoff is especially well suited for intellectual scrutiny, for it contains all the elements of controversy that are involved in the similar cases of scores of other scientist (e.g. Heisenberg and Plank.) As a Soviet citizen, he was ordered to return to Russia during a period of widespread political and scientific purges which were greatly damaging Soviet science and society. As an authority in his scientific field, he was offered the opportunity to leave Germany and to continue his work at an American institute. Instead Timotheoff opted to stay in Berlin and to continue to work in his institute, arguing that it was i the best interest of his family and of his research (which as far as we know, was never linked directly to any Nazi motive.)

The war and its aftermath proved to be tragic for Timotheoff. To the despair of a father who harbored fugitives at the risk of his life, the Nazis executed his eldest son on conspiracy charges in 1944.

A year later, he was arrested and sent into a Siberian labor camp by the Red Army, on the accusation that he had collaborated with the Nazis. After going through several periods of public humiliation and isolation, he died without any rehabilitation in 1981. Is he really guilty or is he some tragic figure caught between the forces of History? Paul's answer is that there is no objective way to determine the guilt of a scientist in a similar situation. She could only advocate that scientists (e.g. those working in nuclear physics) should be aware of, if not active in, politics of face the dilemma of lacking a moral standing for their action and work.

The next SEPP seminar will be Wednesday, February 1, at 4 in Baxter Lecture Hall and will be a Genome Seminar on "Human Genetic Information and the Diagnosis of Human Disease and Disorder" by Thomas Kaskey, director of the department of Molecular Genetics at the Howard Hughes Medical Institute, at Baylor College of Medicine. All members of the Caltech community are welcome.

Boy, he's touchy.

**ENGINEERS OVERSEAS**

**DON'T:**
- wear a suit and tie
- "shuffle paper and answer phones"
- sit at a desk all day

**DO:**
- live in foreign countries
- work outdoors
- make decisions
- face many challenges
- bear heavy responsibility
- work long hours
- operate sophisticated electronic equipment
- record information on oil and gas wells
- interpret that information

**ENJOY:**
- being their own boss

**THIS JOB IS NOT FOR EVERYONE - BUT IT COULD BE FOR YOU!**

Schlumberger, the world leader in Wireline Well Logging has immediate career opportunities **Overseas** for individuals with an M.S. or B.S. degree in E.E., M.E., Physics or the Geos-Geosciences, excellent scholastic record, hands-on aptitude and 0-3 years work experience.

**Volunteer**

by Golda Berstein

Have you ever been told that Techers are self-centered, introverted, even selfish? Last Thursday in my morning Lit class, the professor told us that compared to other college students he has known, Caltech students are basically very selfish. They don’t get involved, do not become political activists, and show little concern outside their scientific endeavors. Hmm. I guess someone forgot to tell the growing list of Tech students and staff who are volunteering to help kids all over Pasadena: (Pasadena has a lot of kids who need it! Children of recent immigrants, members of low-income families where education is not stressed, or just ordinary kids who could use a helping hand.)

Actually, my prof was right. Students volunteering for tutoring are selfish - because getting away from campus, making friends with kids and teachers, and feeling like you are making a difference to someone is fun. Not to mention rewarding. When the little girl you are tutoring writes a story about an elephant that cried because he couldn’t read, and how the elephant got a tutor that helped him learn, which made him very happy, you feel good even if you don’t like elephants.

At present, there are 12 techers visiting five different schools around Pasadena, and more have expressed interest. If you’d like to join us, please call the Y at 6163 - you are really needed. Whether you are about to become the next Nobel Laureate, or you have some difficulty understanding the intricacies of Quantum Mechanics, or both, you can definitely help any elementary or high school student with their studies. And in a radical shift from the Tech norm, you have some stressed, or just ordinary kids who could use a helping hand.

We are not looking for people interested in general business consulting; rather, we seek those who wish to apply their rigorous technical skills to real-world situations.

Dubney: The Dublin House Paper-Within-a-Paper

Upcoming Folkdancing in Dublin
Dancing on Tuesday nights in Dublin's
Dining Hall from 9:00 to 11:30 pm. On
March 22nd, we will have Larry Langton, internationally known folk dance instructor, as our guest teacher. Larry will present a
beginner’s “First Night.” A great way
to get started. Last year’s first night was
February 13th for our 21st Anniver-
sary Dublin House Party, with five
presentations. For more information,
call Craig Volden at 1-602-990-6907.

Speech and Debate Announcements
Debate meetings and meetings for
the Speech Team will be from 4:30 to 5:00 this term in SAC Room. 13.
Next Wednesday is the North East
Challenge and District. There will be
meetings for information, tournament
preparation, and practices. For
more information, contact Craig Volden at 1-602-990-6907.

Voice Needed!
On March 23, 1990 the Caltech Men’s
Glee Club will perform Ave Regina,
The Queen of Heaven, for the Inter-
conference League of San Diego. This
event will be a fundraiser for the
Mozarbeiter. This event will be another
of the many goals he has set for himself
this year. We welcome all interested
in singing, regardless of what you
may have done in high school. There will
be auditions on the day of the event.

Mechanical Universe
The Mechanical Universe will have
dinners every Tuesday from 10 pm to midnight in
the Bagels Baked Oval, and in the
Y Lounge, upstairs in Winter.
Freshmen, sophomores, juniors,
or seniors are welcome to come. Come
on and have some fun.

Fishing For Ideas
The second annual “Fishing for ideas”
contest is now open for participation.
All interested students are encouraged
to participate. First prize for the best
idea or project will be given to the
student who submits the winning
idea. Second and third prize winners
will be announced at the end of the
school year. All prizes will be
awarded at a ceremony to be held
later in the year. Prizes will be
awarded for the best overall idea
and the best overall project.

Leadership America
Leadership America is a unique,
opportunity for students to gain
knowledge and experience in
leadership, management, and con-
ference planning. This program is
sponsored by the International
Leadership Center and is open to
students, faculty, and staff.

Leadership America will be held in
Portland before the JASC is
connormally scheduled to be held in
the summer of 1990.

The International Leadership Center is
an educational program that
provides a unique opportunity for
students, faculty, and staff to
attend leadership conferences and
to participate in the development of
leadership skills. The program
is designed to help students,
faculty, and staff develop the
skills necessary to become effective
leaders.

Leadership America offers an oppor-
tunity for students, faculty, and
staff to attend leadership confer-
ences and to participate in the
development of leadership skills.
The program is designed to help
students, faculty, and staff develop
the skills necessary to become
effective leaders.
