Minority Scholarships

[OPR] – Caltech has received a grant of $51 million from the James Irvine Foundation to fund Irvine postdoctoral and graduate fellowships for under-represented minorities. The purpose of the grant is to help increase the representation of minorities in the sciences and engineering. The Irvine Foundation grant will be used in tandem with Institute support for the same purpose.

“Caltech has received a serious problem – a lack of minority representation in the sciences and engineering,” said Caltech President Thomas E. Everhart. “Caltech’s programs are most attractive to outstanding students who have made early and strong commitments to science and technology. We must face the fact that the percentage of the minority population who has had the opportunity and incentive to make that commitment is extremely small.”

As a result, the pool of minority representatives from which Caltech can draw is very limited. The problem is deeply entrenched, and resolving it will require a committed and determined effort. We are prepared to make that effort, because the long-term goals are so important. One of these goals is that the minority graduate students and postdoctoral fellows whom we attract will become role models and will draw other minority young people to careers in science and technology.

“Several forecasters are projecting significant shortages of doctor-level scientists and engineers through much of the next decade, including shortages of available faculty. We cannot afford to ignore the talented minority students in our midst. They represent an important resource to help us fill this shortfall.”

“We are deeply pleased to be partners with the Irvine Foundation and support this vital effort. We believe the offer of special assistance, along with determined efforts in recruitment, will enable us to be successful in attracting minority students at the graduate and postdoctoral levels.”

The James Irvine Foundation is dedicated to enhancing the social, economic, and physical quality of life throughout California, and to enriching the state’s intellectual and cultural environment.

Housing Notes

by Nancy Carlton

All undergraduate students living in on-campus houses, off-campus houses, 150 S. Chester, 1170 E. Mark, Marks/Braun House, or Catalina Complex I were billed for second term room charges on their December monthly student account statement as follows:

- $710.45 for off-campus houses
- $761.84 for Marks/Braun
- $765 for 150 S. Chester
- $770 for 170 E. Del Mar or Catalina Complex I.

The Housing Office is preparing the second term board billing and will assume students will remain on a board plan (at the rate they were on first term). For example, if you were on a lunch plan for first term, you will be billed for lunch only for second term. Students who wish to change their meal plan for second term must do so by the end of the first week of second term (2:00 PM, January 5) in the Housing Office.

Remember, there is a mandatory full board (dinner and dinner program) for students living in the seven on-campus undergraduate Housing buildings. The mandatory fee is charged back on campus should you choose to leave the housing. The Housing Office will work with you to make board program changes.

For questions or concerns with your room and board charges on your student account statement, feel free to come into the Housing Office and speak with Patti Pratt.

Crime and Incident Beat

11-26 Three people trespassing in the basement of central plant. They had gained entrance through the tunnel system.

11-27 Four Lloydies were found in the gym pool at 11 p.m. They had climbed the fence to get in.

12-2 Caltech security found someone that had set up housekeeping in the attic of the Synchotron building. There was a false bed, two suitcases of clothes and books, plus a makeshift closet. There was a postcard dated 11/14 addressed to a student, signed "Mom".

11-31 At 10:12 p.m., Victim was walking NW past Beckman Auditorium when he observed the suspect, who was masturbating with his shorts down. Suspect was gone when security arrived.

12-5 Purse stolen out of unlocked car on Holliston.

12-5 Bike stolen from the second floor of the Central Engineering Building.

12-2 Two people were soliciting magazine subscriptions at Catalina III.

12-5 Another person was soliciting subscriptions at 360 and 312 South Holliston.

12-6 Two students in Sloan Lab tunnels had their key confiscat ed. They said they were checking the tunnel system.

12-9 1988 Toyota in Lura lot had its window smashed and was ransacked, but nothing stolen.

12-9 An 18 year old man was passed out drunk in Fleming House. The Pasadena Police came and called his mother in La Canada, who took him home.

12-10 Some kids tried to break in from BSB lot by pushing it away. Security chased them away.

12-12 Unknown bike stolen from the gym.

12-12 Unknown bike stolen from the Housing Office.

12-13 Unknown bike stolen from in front of Lloyd House.

12-14 At 5:40 p.m., a female student walking on California past South Mudd was confronted by a male in a car. When the suspect asked if she needed a "ride down to Hill," the victim observed the suspect mugging for the second time.

12-14 A cordless electric drill and a small electric hand saw were stolen from Lauritsen Lab.

12-15 650 4.6 electric cord stolen from Church Lab.

12-15 Five skateboarders apprehended by Ramo Auditorium and made to leave.

12-17 At 12:10 a.m., Celina Mikolajczyk called security to report that three Christmas ornaments had been broken and thrown on the floor of the Blacker House lounge. There were no suspects in this heinous crime although extra patrols were assigned to the area.

12-19 Person running around the track had his shoes and keys stolen from the ground.

12-19 Pickup truck stolen on Hill next to the Athenaeum.

12-19 Attempted burglary from auto in Chester parking lot north of Beckman auditorium.

12-20 Alarm set off at the Lunatic Asylum in Arms Building.

12-20 Unknown bike stolen from inside Behavioral Biology.

12-22 Macintosh computer and related equipment, answering machine, software, and research notes stolen from Crellin Lab.

12-22 Bag containing wallet stolen from an unlocked truck at the Athenaeum.

12-24 Bike stolen from second floor balcony. The person removing the bike announced it as the force surrounding the balcony below the victim's apartment then pull themselves to the balcony above, a rather Herculean effort, to steal a bike.

12-29 Macintosh and related hardware stolen from Beckman Lab.

Dollar value of items stolen over Christmas Break: $24338.
LETTERS

Communication Breakthrough

To the Editors: Responding to President Everhart's call for constructive di-

alogue about undergraduate life and to specific suggestions made by the InterHouse Committee, I have recruited a small committee of faculty and students to engage in a variety of discussions with mem-

bers of the Caltech community, particularly the undergraduates. The goal of this committee, chaired by Rob Kiewitz, the chairman of the Student Housing Committee, and Ted Rogers, the secretary of the IHC, is to develop an understand-

ing of the range of feelings and concerns about recent events and broader issues, such as standards of social behavior and responsibility. The other members of this group are faculty members Jean-Paul Revel, Mary Listerdown and David Van Essen, and students Eric Candell and Jennifer Ronnke.

Sincerely,

Gary Lorden

President for Student Affairs

Farfetch? Not At All

Dear Editor,

The use of space technologies such as satellites, solar system probes and the Space Shuttles, have been useful in the search for life in the universe in search of its origins and extraterrestrial life. Could it be that the reason why other civilizations have not yet been found may be that other "civilizations" used their technolo-

gies for the very same purpose: namely to explore other worlds, sadly neglecting, until it was too late, the problems that were facing their own worlds, as the problem of ozone depletion now faces ours?

Perhaps if we could lay aside this mad quest for other life forms similar to our own until with our incredible technology we can solve at least this one problem threaten-

ing Mankind with imminent extincti-

on, we can indeed then live to resume the search for life.

Until then, let us orb it an ion generating satellite or two in the next Space Shuttle, checking the data in a month or so to see if at-

mospheric dustion could be come a possibility. Does that idea seem far-fetched?

-Jim Kirby

Coral Cuisine Good

By Kim Lombard

The Ocean Coral restaurant stands on East Colorado Boulevard, between Altadena and Sierra Madre. A large yellow fluorescent sign hangs above the entranceway, and the outside front takes up less than fifteen feet of sidewalk space. The outside is done over in white stucco. Yet do not be misled by the tacky exterior; inside is a rare treasure for college students.

First and foremost, the food at the restaurant is excellent. The Ocean Coral specializes in "Mandarin Cuisine and Sea Food," and all the meals are prepared under the direction of the award-winning chef Chia Lam. They have a wide selection of gourmet dishes, and each one is delicious. A sampling which the author himself has surveyed includes the Three Ingredient Tastes (shrimp, chicken, and beef), delicate Braised Baby Lobster Tail, and the house's special Tangerine Beef. In fact, if you don't find your favorite dish on the menu, they will actually prepare a custom meal to your specifications (if they have the ingredients available).

The prices of the gourmet meals are reasonable, with a single plate costing about $9 to $12, a full repast with soups, appetizers, and dessert included costs about $12 to $15 per person. Ocean Coral caters to the poor man as well (which includes every Caltech student). There is a selection of 12 Kinds of Bagels Baked Continuously Daily On Premises, and the service is always prompt. An array of cocktails and wines is offered, and there is a cocktail lounge as well. While reservations guarantee seating in advance, it is possible to walk in and be seated without delay. This is a great place to take that special someone (subsidized by the Don Shepard Fun Fund, of course).

There are myriad little things which make the restaurant memorable. Moist towelettes are included with the meals, so the diner doesn't feel embarrassed eating some foods with his hands. The diners have their own plates, and the entrées are served on separate ones; therefore, two or more people can partake of a variety of dishes at the same meal. The fruits and vegetables are cut up into shapes, spicing up the meals in more ways than one. There are free parking spaces behind the restaurant.

The Ocean Coral restaurant is well worth visiting. It is an old style restaurant; every attempt is made to accommodate the diner, and it is possible to get to know the staff on a first name basis. "I give this restaurant two thumbs up; I would gladly give it more if I but had more thumbs."

Jones Grant

gift. "Undergraduates are required to take 20 percent of their courses in the humanities and social sciences because it is important for scientists and engineers to understand people, both individually and collectively, and the cultures of the world. We are, therefore, particularly grateful to the Fletcher Jones Foundation for its attention to this aspect of our excellence in education."

The Fletcher Jones Foundation was founded in 1969, and is named for the co-founder and CEO of Computer Sciences Corporation of El Segundo. Jones died in 1972. Since 1969 the Foundation has made substantial grants to private colleges and universities, primarily in California. At Caltech, the Fletcher Jones Foundation has established a professorship and a student loan fund, and has provided support for the construction of the campus computer network.

HENRY V
Daily 7:00, 9:45 p.m.
Sat-Sun matinees 1:20, 4:10 p.m.
Today I was just sitting around watching TV. (Bewitched was on.)

Kurt, Tony's friend, came over. He was eating a bag of cheese puffs.

Tony wasn't home, so Kurt came in and waited for him.

He sat and watched Bewitched with me and laughed out loud.

Today I was trying to do some French homework. This time it was parts of the body we're supposed to learn them all.

It was aggravating--just trying to memorize words. For a while I just stared at my book and crossed my eyes so the pages melded together.

Today Steve told Tony and me that we have to wash the dishes more often.

He said there's always a giant pile of dirty dishes in the sink, and it annoyed him.

Tony said, "They're not dirty dishes, at least most of them aren't."

We both told Steve we'd try to wash them more often.

Dean sat next to me in my Ethics class today.

He said, "Which tie do you think Bauchman will wear today?"

"The red and yellow striped, or the brown? (Bauchman is the professor)."

"He came in wearing the brown tie, and Dean said, 'next time let's put money on it.'"

"I say red and yellow," he said.

Macintosh® computers have always been easy to use. But they've never been this easy to own. Presenting The Macintosh Sale.

Through January 31, you can save hundreds of dollars on a variety of Apple® Macintosh computers and peripherals.

So now there's no reason to settle for an ordinary PC. With The Macintosh Sale, you can wind up with much more of a computer. Without spending a lot more money.

Why Morgan is looking for a special breed of genius.

Graduates who have analytic talent sparked by imagination should consider market analyst and research opportunities at J.P. Morgan.

To assure that success, we seek exceptionally talented, team-oriented individuals who have strong mathematical and computer modeling skills. Demonstrated mastery of computers-based decision and simulation tools is important, as is a desire to work in an environment that fosters and rewards superior performance. Interested students are encouraged to send a cover letter and resume to James-Keith Brown, J.P. Morgan & Co. Incorporated, 60 Wall Street, New York, NY 10289.

Career Opportunities at Morgan
This holiday, impress your parents with your knowledge of economics.

Even if you’ve never cracked an economics text, you can still show your parents how much you’ve learned about this subject at college.

Announcing The Macintosh Sale: An incredibly economical way to put a Macintosh® computer on your desk. Because now through Jan. 15, 1990 you can save hundreds of dollars on a variety of Macintosh computers and Apple® peripherals.

You can learn to use a Macintosh in less time than it takes to do your laundry. Its unique graphic interface is based on items you use every day, like your desktop and trash can. And virtually all Macintosh software works the same way. So once you know one, it takes very little time to master others.

With a Macintosh by your side, you'll be cranking out dazzling term papers, creating professional-looking charts, and crunching numbers like they were potato chips. Which is sure to impress your professors.

Your parents will like hearing that. That's the time to mention The Macintosh Financing Program,* a low interest loan that could make a Macintosh easier to own.

So see us today for a demonstration. Then phone your parents. They'll be impressed with your ability to capitalize on an important economic windfall.

The Macintosh Sale.
Now through January 15.

ASCIT Elections

Voices Needed!
On March 23, 1990 the Caltech Men's Glee Club will perform Avenue Q, The Revolu-
tion of St. John the Divine for the late-
collegiate Mens Choral Festival in Santa
Barbara. This annual event draws together
the best men’s choirs from all over the coun-
try. Caltech will be featured among these choirs
at this year’s festival. We welcome all those
interested in singing, regardless of what you
think of your own ability. Please call Don
Calwell at x879-1657.

SSSSP: Duties Needed
We will be seeking members for our Sun-
net Secondary School Science Program, that
began last 25th and goes through June,
gut98. The hours are from 9:00 am to
3:30 pm, Monday through Thursday. We
need 4 tutors each teaching Molecular
Biology, Chemistry, Physics/Trig and
Physics/Calc. Our first preference is to
have seniors, then juniors and then sopho-
more. Applicants may call x2307 or x2828, or
come by Lee Brown’s office at 107 Win-
nett Center.

Japan-American Conference
Positions are available on the American
delagation of the 1990 Japan-Amercian Stu-
dent Conference (JASC). JASC is an interna-
tional coordinated program for university
students held alternately in the U.S. and Japan.
The program is held in En-
glish. This year’s program will start in An-
chorage, move to Seattle, and conclude in
San Francisco. There will be an orientation
in Portland before the program. JASC is open
to any student who is a U.S. citizen or has
permanent resident status. Applica-
tion deadline is February 23, 1990 for this
summer’s program. The Career Develop-
ment Center has more information and ap-
pl ications. Stop by at 40 Parsons-Guino.

Kach International Presentation
Are you tired of hearing the same old-
waving, same speeches, same old music
on Arab-Israeli conflict? Do you want to
learn about some that DIFFERENT and
challenging points of view? If your answer is
yes, then you want to join us and come to Kach International
presentation at Caltech on Wed. January 10th at 7:30 p.m.

Recruiting for ExComm
This Monday, January 8, 1990 will be
the 1st ExComm meeting for 2nd term.
Start off the new term right by joining this
very important meeting. It’s at noon in the
Y Lounge.

Gay/Lesbian Discussion Group
On the 1st and 3rd Tuesdays of each
month, all students, staff and faculty are in-
vited to an informal discussion of LGB-
TQ issues, from 7:30 to 9:00 pm. The next topic is: Activism-If, how, and by
whom. After this time is devoted to infor-
tional and discussion on future monthly activities. This informal meeting is held in the
Health Center Conference Rooms; call x5311 for further information.

Ricketts
Remember in the old days, when they all laughed at me and said I was too
abrupt to take serious. Occasionally, I was brought to a meeting, but usually
I just sat on a shelf or in the back of a closet, waiting for some year when my
credentials would properly appreciate me. But time passed and eventually I was
put away for several years and forgotten.

Then, last year, I was found again and delivered to my elected custodian,
that person who has been selected from among all Caltech undergraduates to
uphold the ideal. Represent. Yet he had intimidated me and forced me to wear
tuxedos and a bow tie. After these indignities, he then abandoned me over the
summer, leaving me alone again. Yet I endured all of this, for I knew that
somebody my time would come.

From this desolation, I was removed to one room after another, placed in
a position of prominence to shock the occupant as an RF. After several weeks
of this, I was placed in a public room to once again become an object of deri-
sion. Finally, I was now known, I could find someone to take me seriously
since I was not stuffed in a closet somewhere.

Then somewhere in this time something wonderful happened. Those
who used me as the butt of jokes came to have a certain respect for me. They
began to accept me as something unique, without precedent. When classes began again,
I was included in part of the ceremony of induction for new residents, fans cheered
my name, and I was placed on a pedestal of great height so that all might see
me.

As a guest teacher. Join us on Feb. 6th for the first "Beginners' Night." A great way
to get started. Last but not least, come on February 13th for our 21st Anniver-
sary/Valentine's Day Party, with live music.

Submit announcements for What Goes On on forms available outside the Tech Office on the first floor of thejohn 5.0. Announcements must arrive by 4:30 p.m. Wednesday, one month in advance of a monthly event or 10 weeks in advance of a one-time event. Make copies of your announcement and submit four copies to the Tech Office. Announcements that are not typeset will be typeset by the Tech Office at a cost of $1.75 per line. Announcements that are not submitted in triplicate will be typeset by the Tech Office at their discretion. Announcements that are not submitted in triplicate will not be included in the Tech Office for Collected will not be published.

Play Bridge
Play bridge at the Caltech Bridge Club Monday, Tuesday, and Thursday from 7:00 pm at the Red Door Cafe on the second floor of Goudsmit. Bridge is free, membership fee, no membership card, no partner needed, 52-30. Thursday, just bridge. Ask for your hand. MASTERCARD!

Martin Luther King Day
Although the federal holiday commemorating Dr. Martin Luther King, Jr., is not a school holiday, the Institute will proceed with the program commemorating the impact of the civil rights leader on our campus on January 15, 1990. The event will take place in the McAdams Auditorium, a tradition being continued on the Caltech campus.

The program will begin at 1:00 p.m. and will last approximately two hours. The first part will begin with Dr. John Slaughter, president of Occidental College, addressing the ceremony. This portion of the program will be an opportunity to join us in the civil rights struggle in America today.

The second part of the program will include a special section for the students of Martin Luther King, Jr. Martin Luther King, Jr. was an African American, a member of the Student Nonviolent Coordinating Committee. The students will be invited to participate in the ceremony.

The third part of the program will feature major speakers who have been involved in the civil rights struggle. These speakers will be invited to participate in the ceremony.

The program will conclude with an address by the Reverend Dr. Martin Luther King, Jr.

Chemistry Course
The Chem 27A: Structure and Bonding course is for students who are interested in a background in organic chemistry. The course will begin on January 15, 1990, and will last for approximately eight weeks. The course will be taught by Professor J. Morgan Koumoutsakos, professor of chemistry and physics.

The course will cover the following topics:

- Introduction to organic chemistry
- Structure and bonding in organic molecules
- Chemical reactions in organic molecules
- Spectroscopy in organic molecules

The course will be held on Tuesdays at 10:00 am in McAdams Auditorium. The course will be taught by Professor J. Morgan Koumoutsakos, professor of chemistry and physics.

Korean-American Students
The Caltech Korean Student Association is holding a Korean culture night on Monday, January 22, 1990, from 7:00 pm to 10:00 pm in Johnson Hall. The event is open to all students interested in learning more about Korean culture. The event will feature traditional Korean music, dance, and food.

Cross Country Run
The Cross Country Run, sponsored by the Caltech Cross Country team, is being held on Monday, January 22, 1990, at 5:00 pm in the Fermilab Fields. The event is open to all members of the Caltech community. The event will feature a 5K race and a 10K race for those who want to run longer. The event will be held on a rainy day if necessary.

Clayson and Cervantes
On January, Wednesday, January 10th at 4:00 pm in the John B. Cuthellium, Professor of Chemistry, will present a lecture on the history of organic chemistry. The lecture will cover the development of organic chemistry from its beginnings in the 19th century to the present day.

Maggie Crayton
The Maggie Crayton Memorial Lecture Series is being held on Thursday, January 11th at 4:00 pm in the Johnson Hall. The lecture will be given by Professor J. Morgan Koumoutsakos, professor of chemistry and physics. The lecture will cover the development of organic chemistry from its beginnings in the 19th century to the present day.

SOPHOMORES
TV’s, with and without invitations will be extended in the John B. Cuthellium, Professor of Chemistry, will present a lecture on the history of organic chemistry. The lecture will cover the development of organic chemistry from its beginnings in the 19th century to the present day.

Credit
The American Society of Naval Engineering Foundation has seventeen $1,000 scholarships available for full-time students of Korean American heritage. Applicants must be at least their sophomore year. Deadline is January 31.

The International Leadership Center is offering a summer leadership program entitled "Seeking National Security in an Insecure World." Applicants must be U.S. citizens, and have received an advanced degree in graduate academic achievement as well as commitment to the field of national security. Deadline is March 15.
