A Letter From George Bush

January 9, 1991

Dear Mr. President,

The world is in a state of shock and confusion. The attack on Kuwait by Iraq is a clear violation of international law. The United Nations has condemned this act and has called for a military response.

I want to assure you that the United States is prepared to lead the world in this response. We will do everything necessary to protect the security of the American people.

Sincerely,

George Bush

---

As a student at the University of California, I feel it is important to express my support for our country and its leaders. I am proud to be an American and I believe that our nation is stronger when we work together.

Sincerely,

[Student Name]

These posters were found all over campus Monday urging people not to attend work or classes on Martin Luther King Day.
Centennial Concert on Friday by Dan Ko

I pity those whose lived during the 19th century. Not only did they lack the technology to accompany their daily activities with music, but they did not have rap (can you imagine your life without rap?), rock concerts, and all the things the modern society calls music, including country music. We take them for granted, but we would not even be able to dare fathoming the monotony and the horror their absence implicates. Maybe you can dismiss my pity by pointing out the popularity of classical music during the century. But come on, just how popular could classical music be? Wouldn't its profundity and ingenuity be enough to repel consumers? Such questions usually occupy my mind whenever I have to bear hours of long recitals. So this Friday, without spending so many hours, I am going to get some answers at the first Centennial musical celebration, "Some Musical Events of 1891."

The chamber music director, Delores Beng, will illuminate the musical world of the 19th century with her lectures that will be given intermittently between exhilarating performances given by Caltech's finest musicians, including your one and only Tech party critic, Dan Ko, and the three other undergraduates, Rex Lew, Anna Lee, and Jennifer Wei. If you are friends of these students or have the curious notions that I have about the musical activities of the past, come to the Dubsey Lounge by 8:00, and we will take you back to 1891! Oh, yes, even more important, admission is free!

Oh, yet another important note is that this Sunday at 3:00 PM Caltech Chamber Music Ensembles will perform trios and quintets written by Mendelssohn, Beethoven, Handel, Bach, and other big-name composers. So be there. Again, there is no admission charge. One last announcement.

Anybody interested in joining the Caltech Chamber Ensembles Now is your chance. Call Delores Beng at 61598 and ask for more information.

Pakistan Culture

by Asim Mughal

In the afternoon of Sat Jan 19, stage was set for the biggest event by Pakistani Society of Caltech. A cultural event with Pakistani Students of Southern California at Caltech President Dr. Thomas Everhart spoke at Caltech's annual Martin Luther King Day Observance in Remo Auditorium.

In the afternoon of Sat Jan 19, stage was set for the biggest event by Pakistani Society of Caltech. A cultural event with Pakistani Students of Southern California at Caltech, Mohammro Ammar, in his speech thanked everyone for coming and emphasized the need for better communication between the students as well as the Pakistani community. It was also emphasized that there should be an awareness about Pakistan. In the past handful Pakistani students on campus have always setup a table on International Days and cooked food for the Caltech community.

At the end of the function there was authentic Pakistani food for the participants, enough to be left over... yummymmm... The function came to an end around 8:30pm.
President
Angus
As you all know, ASCIT is on the highway to Hel, and I, Angus Young can bring the ASCIT budget back on track! I've got the biggest balls of them all.

Eric Stout
I have no intention of making glutty promises about how I will transform ASCIT or Caltech life if I am elected ASCIT President. One doesn't particularly need transforming, and the other is certainly beyond my individual ability. However, I do feel that I could do a good job as ASCIT President.

A number of things are required of the ASCIT President. The first is the ability to communicate, serving as the liaison between the student body and the rest of the Caltech community. The second is the ability to coordinate, to turn a nine-member BOD into an effective team and to oversee all the other issues under ASCIT's jurisdiction, such as student activities. The third is commitment, a willingness to accept responsibility, and to work hard — and to convince others to work hard — to fulfill all of ASCIT's obligations.

I believe that I meet these requirements. For the past two terms I have served as the president of the Caltech Y, and I am also currently junior class president. In these roles, I have established a positive relationship with many members of the Caltech community, and I will not be afraid to communicate in the future to ensure that ASCIT can work to help build a team, the Y Exchange, and to work hard to make things happen on our own, with Mado. I have also acquainted myself with ASCIT's workings, attending the last two meetings as the representative of the Y. I am well prepared to assume the duties and responsibilities of ASCIT President.

As a member of Caltech's basketball team, I have often heard our coach tell a player: "Don't talk, just get it done." This is advice I have tried to follow, and I hope my actions will speak for me on Monday, and I will make every effort to continue to "get it done.

BOC Chairman
Cathy Hafer
As ASCIT's Board of Control secretary, and before I took that post I served as a voting member of the board. As a member, I have become familiar with the processes of preliminary investments, keeping Board records, scheduling case meetings and in-structure and ex-structure activities. These are all implemented, if necessary.

As secretary, I have done my best to help the Board of Control run smoothly and efficiently. I have also attended half of the meetings of the ASCIT BOD, so I am familiar with the issues before ASCIT.

I am aware of the heavy responsibilities associated with chairing the Board of Control. The issues that we have served as president of the Board, and I will maintain this position as the Chair. I am confident that I can fulfill the duties of ASCIT Vice-President and Board of Control Chair, and I ask for your support.

Elect statements

Tech Editors
We, Brian Korkorski and Jason T. Lee, are running for the positions of Tech editors for the 1991-92 school year. Both of us have worked on the Tech and were editors of our respective high school newspapers.

We will not institute any major change to the current format of the 'Crisp, and Incidents Beat, Jim's Journal, and the policy of uncensored Inside World will remain. Now, NewsWorld will also adhere to traditional journalistic ethics. A feature which contains important news issues will be reported. Editors will be kept on a separate page that will include weekly columns and editorial cartoons. A "feature theme" page will be introduced that focuses on different parts of the Caltech community.

There will also be extended sports coverage of all intercollegiate and interhouse athletics. Overall, we hope to maintain "the flavor" of the Tech, and will improve the aforementioned sections so that you will enjoy the Tech even more next year.
elephant, he kung-fu'd my drink glass in two. Of course, he and Heath eventual­ly got caught by the Comedy World. He's a living, breathing, walking, rolling drunk. I'd like to get a whole new liquor licence for this man.

Formerly truths were intuitively or taken whole on faith as dogmas of the church. A growing class demands that immortality and kindred matters be proved to the intellect, deductively or by observation. They desire religion as much as their fathers, but want the ancient truths in modern dress, congruous to their altered intellectual condition. To this class the Rosicrucian addresses itself with a definite, and sequential concerning the origin, evolution and future development of the world and man. It is as strictly scientific as it is religious; a which no statements not supported reason and satisfies mind by clear explanations, and offers a reasonable solution to sanction what the intellect believes, and solace to the troubled and peace on the lab. I love you.

Where did we come from? Why are we here? Where are we going? Formerly religious truths were intuitively perceived or taken wholly on faith as dogmas of the church. Today a growing class demands that immortality and kindred matters be proved to the intellect, deductively or by observation. They desire religion as much as their fathers, but want the ancient truths in modern dress, congruous to their altered intellectual condition. To this class the Rosicrucian Fellowship addresses itself with a definite, logical and sequential teaching concerning the origin, evolution and future development of the world and man. It is as strictly scientific as it is reverently religious: a teaching which makes no statements not supported by reason and logic, which satisfies the mind by clear explanations, and offers a reasonable solution to sanction what the intellect believes, and solace to the troubled and peace on the lab. I love you.

Today Tony was playing his new tape which started to slow down. He looked down more, then suddenly slowed down and crumpled.

Then somebody knocked on the door and asked him to turn it down.

He turned it down and said, " Gee, I can't even hear it now!"

Submit announcements for What Goes On on forms available outside the Tech, SCA, or SAC office (SAAC room 109), or use a plain piece of paper. Send announcements to 40-58, or put them in the box outside the Tech office. The deadline for the next announcement must run, Announcements for the current issue must be received by 5 p.m. Tuesday and should be shorter than 75 words. Announcements will be published as space becomes available and will be chosen according to their relevance and interest to the Tech community. Announcements for campus events unrelated to Tech will not be published.

FISHLINE Resumes

The Fishline Fellowship Newsletter staff would appreciate submissions of articles, stories, and photos for the next issue of Fishline, which can be sent to Mail Code 125-56. Anyone who would like to join the Fishline staff can drop a line to this address, also.

Jazz Improv Class

A chance to advance your skills and enjoy some great music is available for the jazz improvisation class. The first meeting of the Jazz Improv Class will be held on Tuesday, January 30 at 10:30 am in Room 1 of the SAC. There will be a fee to attend these classes, which will be prorated to reflect the amount of materials cost. Classes will include instruction and jamming. Students will be divided into groups of five and an instructor will be assigned to each.

German Film

The third film in the Third Ritz and Its Legacy Film Series will be The All's Bed (Ger­many, 1960, directed by Bernd Brink). The film will be shown on Monday, January 28 at 7:30 pm in Baxter Lecture Hall. A sensitive portrait of a group of mid­teenage German children who defend a bridge against the Allies in the closing days of the war.

Y Thank You!

The Caltech community greatly appreciates the overwhelming undergraduate support for the music, arts, and drama departments. If you are still contemplating whether to continue to support the students, the students appreciate you.

Grand Canyon Trip

Let's do the Canyon, March 21-28, 1991. If you are interested in a backpacking/van/trapping adventure over spring break, stop by the Y and sign up today.

Mammoth Ski Trip

The Caltech Y is sponsoring a ski trip to Mammoth Mountain, March 24 through 29, 1991. The cost is $199 which includes transportation, lodging, and a three-day ski pass. Space is limited - sign up soon.

New Science Museum

Site for the new science museum (the Monstrosity) located at the south-east corner of the first floor of the Pacific Research Building will be opened from 12-14 Monday through Friday.

Bulgarian Folkdancing

The International Folkdances meet in Dollby Lounge every Thursday even­ing for all year round. Folkdance classes start at 7:30 p.m. each Tuesday, starting January 22. Classes run from 7:30 p.m. on Tuesday, February 5, 1991. Class time is from 7:30 p.m. to 9:30 p.m. The fee is $40 per semester. No prior experience is necessary. All are invited to attend.

Get the Games Begin

Every Friday night, the Caltech Games meet to enjoy tile-playing and board games. Friday evenings are in Martin Classroom 1 A at 7:30, 133 of the SAC at 8:00 pm. Most players who share your interests. All wel­come! Most common games include Chess, Checkers, checkerboard, and even Using your senses, you will be able to share whatever games you have.

Folk Dancing On Campus

The Caltech Folk Dancers invite you to come and join us at the Folk dancing on Tues­days in Doolby Lounge. Classes are free but a donation is appreciated. Folk dancing from 9:00 until 11:30 midnight.

Ride Board

If you have a ride home after events? Want to go to San Francisco for the weekend? Feel like going dancing alone? Want to share some of the fun and help others as well? New you can, with Caltech's new rides board. Call the Caltech Environmental Task Force and the Caltech Y. Contact the Rides Office for pickup information. Ride will be open from 9:00 until 11:30 on Sunday, January 21, 1991.

Online Schedule of Classes

The Caltech schedule of classes is pub­lished by the Registrar's office, has been dic­tated to the online INFO system, accessible via CITLine. A write-up on using the INFO system is available from the CIT Con­sulting Office, 162 Jorgensen.

Scholarship Listings

The Financial Aid Office has applica­tions and/or information on the following scholarships. For more information, call or visit our office located at 315 S. Wilson, second floor.

The Josephine de Karman Fellowship Trust has announced the availability of fellowships of $6,000 each for 1991-92. The fellowships are open to all graduate students. For more information contact the registration office.

The Society for the Advancement of Southern Engineers (SAE) offers undergraduate scholarship awards primarily to students who are non-African American and are economic­ally disadvantaged. More information can be obtained from your college. The deadline is April 1, 1991.

The American Society of Naval En­gineers (ASNE) has available scholarship awards for 1991-92 to outstanding college students. For more information contact the registration office.

The American Society of Civil Engineers (ASCE) is offering scholarships for 1991-92 to outstanding students. For more information contact the registration office.
You're never too young to change the world.

We're attracted to college students for what they haven't learned: limitations. Systems to applications, multimedia to networking, you won't find any limitations at Microsoft. What you will find are small teams and immediate responsibility for important projects.

We're out to revolutionize the world with our vision of personal computing. And we're looking for the brightest technical minds to do it. Many of them already work here as Software Design Engineers and Program Managers—learn how you can join them.

If you are pursuing a BA/BS, MS or PhD degree in Computer Science, Applied Math, Applied Physics, Electrical Engineering or related technical area, then let's talk about your programming experience, design skills and/or exposure to managing projects. Relocation is available for both summer and full-time positions. Also, plan to see us at Career Day, February 14, in the Winette Center.

We are an equal opportunity employer and are working toward a more culturally diverse workplace.

Microsoft
Making it all make sense™
by Jim Caron

The Caltech Hockey team looked very strong as they easily beat UCLA 17-0 on Wednesday night in Pasadena. All three of Caltech's lines played very well throughout the game. Although the beavers won their last game against UCLA. The Beavers had a game and a practice since coming off of six week break and now seem ready to take on the next half of the season.

There were many outstanding efforts in this game but none more impressive than the performance from Dale Laird. Laird is a strong and solid center who has a nose for the net and a knack for scoring goals and always seeming to be in the right place at the right time. Laird scored a hat trick (three goals) and an assist in last Wednesday's game to help Caltech ease past UCLA.

Adding on offensive boost to the Beavers was defenseman Ron Siebert. His style of play is that of an offensive defenseman who is not afraid to take the lead on the ice and skate the puck. This style of play appears to be working well for Siebert as he scored two goals and an assist. The second of which brought each shade of Bobby Orr as he skated almost the length of the ice to score an assisted goal.

Reminding his fans that hockey is a violent sport was right wing Hart Stephens. Stephens, who debuted for the Beavers last week against USC, was true to form as he racked up two major penalties for roughing and a minor penalty for fighting along with a game misconduct. Kurt Stephens is known throughout the league as the mauler Hamon brother' and is by now on a first name basis with every penalty box time keeper.

Aside from his uncontrollable temper and his not so fair play, Stephens manages to put the pack in the net and skate away with a pair of goals and an assist against UCLA. Coach George Yates does not condone Stephens' style of play but as long as he keeps on scoring Yates can live with it.

Yates commented, "You would really have to see it to believe it. One minute he is digging the butt end of his stick into the back of an opposing player while the referee is not looking and the next minute he is scoring goals. How he controls the two I'll never know.'

Caltech embarks on a five game road trip and will not be at home in Pasadena until February 13. The Beavers face some pretty tough competition in the weeks ahead. Starting off with UC Davis tomorrow and on Sunday and then on to UCSD on Tuesday. However, Caltech looks strong and has plenty of confidence, especially after their last two games, and should have no problems with the obstacles that lie ahead.

By Sam Dinkin

South, a rich player in a money game on a Mississippi riverboat, opens the south hand with one heart in order to increase the likelihood of playing in 7 hearts doubled and redoubled.

After this auction though, he is excited beyond his wildest dreams. One prospect of heart doubled and redoubled making seven would be worth several thousand dollars at one dollar per point. He is already several hundred dollars ahead this evening. The defense has been surprisingly cooperative, and his new partner has shuffled the deck quite well indeed this deal.

Before the opening lead is faced, West sees the glee in South's face and says, "Would you like to put a side bet on the outcome of this hand?"

The California Tech

Hockey Stomps UCLA 17-0

South tries his best to put on a poker face, but fails. He responds, "What would you like to wager?"

West says, "I will bet you ten thousand dollars that you will not make this contract."

South's eyes got noticeably wider, but tried desperately to continue the act of credibility. He counters, "At what odds?"

West answers, "One to one odds..." and South bluffs, "Done.

South's poker face gives way to a wide grin. As he beams at the dummy after the lead is faced, West winks at East. The diamond play from the board is covered and ruffled. South slaps down the ace of trumps, ready to claim seven when the heart suit breaks 5-2 or better. East shows out and South's smile disappears.

Declarer then plays the ace of spades. If the ace and king go around, South will make 2-odd and still collect over 1,000 points and a hefty side bet. West ruffs and returns a diamond. South tucks and his expression gives way to a frown.

South next tries the ace of clubs. If the ace holds the trick, South makes his contract and is rich on a Mississippi riverboat.

An excited crowd watches John Phillips push in Caltech's game against Occidental.

WESTERLY WINDS...THE Defenders have been the well indeedy this deal. Before the lead is faced, West sees South's face and you like to a side on the outcome of this game. The of one heart doubled and seven would be worth several thousand dollars at one dollar. He is already dollars ahead this game. The defense has been surprisingly cooperative, and his new partner has shuffled the deck quite well indeed this deal.

Before the opening lead is faced, West sees the glee in South's face and says, "Would you like to put a side bet on the outcome of this hand?"
