B.C. Loses Contract
Total Food To Provide Tech's Meals

by Emily Wen
Next year, Caltech is getting a new food service. The current food service, Burger Continental, has been serving the Caltech community for five years. It has done a good job for the past few years but most of the students think it is a time for a change.

The new food service, Total Food Management, is based in Anaheim. The company has been in operation for three years. Currently it is serving a Catholic girls school, and a boys military school in Southern California, the Arnold and Mabel Beckman Center in Irvine, and several sites nationwide. Its parent company, Chandler Dining Hall, has worked in Caltech between 1982-83 as a representative of Total Food Service, the food service then.

Last week, there was an enormous line in front of Winnett waiting to eat Gary's awesome food. Only on-pre-fresh weekend...

Occidental Shows Up,
Defeats Track Team

by Chris Casper
"We can sneak up on Oxy and beat them in this meet!" Coach Jim O'Brien told his runners in a meeting prior to last Saturday's track meet against La Verne, Occidental, and Cal Lutheran. O'Brien was banking on Oxy's runners choosing to run in a Pomona-Pitzer Invitational that Friday and in the prestigious Mt. SAC Track Meet that Saturday.

But Caltech had its own Weight Monsters, in the form of William Glenn and Jeff Martin. Glenn took second in the Discus to Dargan, with an impressive throw of 125 feet, 5 inches. Martin took third in that event with a throw of 110 feet, 5 inches. In the shot Glenn threw 38 feet 6 inches, good for fourth. Glenn also threw the hammer for a respectable 96 feet, 6 inches. (NOT an easy task as most people can't even grip off a FAIR THROW much less a good throw in the hammer.) While Martin's discus throwing was on target, he was disappointed in his shot put and javelin performances at the meet. "William Glenn BIT me the night before the meet in a showering war. My pecs really hurt and I couldn't throw well at all," Tech's Weight Monsters are so hungry they eat each other. Only have any suggestions for next year's car lest, talk to your respective house food representatives, or call Ron McKinnell (x6794) directly.

You Want to Be Tech Editor
Nominations are now open for the following ASCiT-appointed offices: Big 7 Editors and Business Manager, Totem Editor, Publications Darkroom Chairman and Editor-in-Chief. There will be a signup on the MOSH's door until Tuesday, May 1, and interviews will be held at that night's ASCiT meeting at 10:30 pm in the MOSH's office. If you have questions, call Eric Stout at x6757.

Congratulations Barbara Green
Dr. Barbara Green, Associate Dean of Students, and her husband Dave Volkman, became proud parents of a son Nicholas, on April 22, 1991 at 3:09 AM. Nicholas weighed in at 8 lbs. 4 oz., and 21 inches in length. Mother and child are doing fine. Barbara will be on maternity leave until September 1st, in the interim David Levy, the Director of Financial Aid, will serve temporarily as Associate Dean of Students.

CRIME AND INCIDENT REPORT
Crime Tip: The area on Lura Street between Michigan and Wilson, where the houses have been torn down, should be avoided at night or traversed in large numbers. A student was recently assaulted there. Security will provide an escort for those who want it.

4/18 Several checks were removed from a staff member's desk in Sloan 258. The checks were filled out and cashed for several hundred dollars.
4/19 A car cover from a student's Nissan, parked in the Michigan-Lura area, was stolen. The cover was not locked.
4/20 A graduate student was assaulted while walking on the east side of Beckman Institute. The two suspects approached from the area of Lura and Michigan streets.
4/22 A bicycle parked in the rack at the north side of Arms was stolen. The bike was locked with two locks, one of which was left on the ground.
4/23 A flat of flowers belonging to Caltech were taken from the grounds department storage area. A suspect if any, who immediately drove away in a Dodge Caravan.

Total value stolen or missing: $380

Complaints About Food, Crime & Tech
Sam and Jeff's Bridge Column
Jim's Journal
Food Quality Bad

To Kim West, Director of Resi-
dence Life:

We, the undersigned members of Ricketts House, would like to bring to your attention our extreme displeasure with the current actions of Continental Food Service. Our complaints stem from CFS's efforts to skirt the edges of their contract, and their willingness to violate both the spirit and the letter of generally positive, friendly spirit of life at Caltech.

Since the decision to terminate CFS's contract was made public, the quality of the food served in the student houses has plummeted. Student attendance at CFS meals has dropped sharply in a response to the lack of edible entrees. A typical dinner in the student houses is now comprised of pasta in pureed tomatoes, unboned chicken parts (or the dinner of April 17, whole chickens on paper plates), and a "salad" consisting of lettuce and salad dressing.

For this, we are charged over $7.25 and are not willing to pay that much for such a meal, when good-tasting, wholesome meals are readily available at any number of restaurants, at less cost.

Gary is now serving meals on paper plates. This does not techni-
cally violate his contract, since "CONTINENTAL is not to use paper or plastic plates, except for the exception of--dish machine breakdown (of which CONTINENTAL is to advise the Manager of Housing im-
nediately)."

However, it strikes us as a strange coincidence that remolding the situation should take so long and that the dishwasher breakdown should so closely coincide with Gary's discovery that his contract is ending. This is just one of a num-
ber of things that CFS if doing if they are to cut corners and aggravate students.

For lunch on April 18, for ex-
ample, the doors of the cafeteria were closed until precisely 11:30, and again closed at exactly 12:30. In the past, cafeteria doors have been open, and food available from 11:15 until almost 1:00. Though

CAMPUS CRIME

To the Caltech community:

Last Saturday evening shortly before 10:00, I was attacked by two men as I was walking on the pas-

tus just east of the Beckman Insti-
tute. After the attack, I ran to my office and called Caltech security at

9:55 p.m.

Baren Sokolman, 42 other signatures

Math 2, Phys 2 on Pass/Fail

To the administration, I wish to ask a question that I have asked before and have yet to receive a reasonable answer to.

The problem is this:

Why can I not take Math 2 and Phys 2 on Pass/Fail? Like sheep, everyone I ask gives the canned response that it is a "Core Requirement." I have heard no bet-
ter argument.

I give this simple argument for making Math 2 (or Phys 2) Pass/Fail. If I were to take a liter-

ture or fine arts or science option (Biology) as Math 2 is, I could take it Pass/Fail. In fact, there would be a police that I would simply be doing the "nor-
mal" thing, were we to request to take Math 2 Pass/Fail, on the other hand, it would seem as if I was taking Math 2 "For Fun." It is simply unheard of.

My one other point is this: the existence of the dreaded "pass/fail" system on well-rounded students. This, in its collective mind, is achieved by the apparent abuse of an unimportant sci-
cence requirement, along with the basic "Math and Physics for everyone!" attitude. The rules then allow the students, though, to simply pass/ fail. As running on existing humanities requirements and get away with as little learning and work as possible.

This is hypocrisy. The litera-
ture in my example is much more useful and enjoyable for Math 2, yet I can't ignore Math 2 because I must take it. It is this I find this unfair. Under the re-
quired courses for my option, Math 2 and Phys 2 are 2 totally unrelated to anything else I will take. More to the point, except for those two classes, there is no requirement for Math 1 or Phys 1!

Finally there are those that tell me not to worry about it. I tell them why. If a student takes the minimum required units and Pass/Fails one class a term, twenty percent of the G.P.A. will depend on Math 2 and Phys 2. There are also those who say that my option GPA is all that is important. I would agree, since my non-

Math/Phys GPA is almost a half point higher, but this does not take into account the effect that taking these classes has on my other classes. These were not 16 units of my sophomore courses, but 18, 2 more total units than my sophomores.

I have spent many nights working on studying and work for these two classes. Obvi-
ously, this had an adverse affect on my other courses, and those who say that my option GPA is all that is important are wrong.

I lay no blame to being a great student. If one were to look at the 2:00 p.m. class, it would be impossible to measure my ability. I would fall far short of many of my fellow stu-
dents. But I have worked hard to stay here and continue in my edu-
cation and I would like to go for-
ther once I leave this place. I am worried though, that those numbers would prevent me from having a place as decent as Caltech and eventually removing some of the options I might have available.

So with this in mind, in this letter, I demand that I be able to answer to my question. Why can't I take Math 2 Pass/Fail?

Shane Sauny

Published weekly except during exam periods and the summer months by Associated Students of the California Institute of Technology. The opinions expressed are strictly those of the authors.

Letters and announcements are welcome. All contributions should include the author's name and phone number. All contributions over 500 words in length are subject to publication. The editors reserve the right to edit manuscripts for clarity, length, and style. Opinions expressed are strictly those of the authors.

For this response to be effective, one must dial the regular number for Caltech security, 356-4701. For this to happen, a call to the 911 emergency number must be made.

In the event of a medical emergency - those extra phones or pay-phones. Instead one must dial the regular number for Caltech security, 356-4701.

The insurance is required by law for all California corporations. The cost is $250.24 per year.

Eric Stortz

This is a new defunct organization that died owing approximately $1400 to Student Activities. It was a direct ASCIT organization, but it was linked with Tech. We are looking for someone who may be responsible for their debt. This would be a pretty bad thing.

More to come later ...

continued on page 8
I saw the guy from down the hall today.

He passed by me and said, "How are you today, in a really loud voice.

I said I was fine.

"Hey, Jim, guess what I did," he said, and then he told me he signed up for a calculus class.

I was surprised. I thought I would never get into a calculus class.

The guy was very excited. He kept talking about how he got into it.

I tried to pay attention, but I was feeling really tired.

I decided to go home and try to nap before my next class.

The day ended up being pretty uneventful. I guess I'll have to study for the test tomorrow.

The Insider World
The Insider World

U Can't Eat This
Can't eat this
Can't eat this
U can't eat this
U can't eat this
My my my stomach
Trusts me so hard
Makes me say why'm I on board? Have you for caming me
With a meal so eat that looks like this
Feels bad when it's going down
A super doped rumble from the flat clown
And he's known as such
And this is a meal
U can't touch
I told you Pogueby
Can't eat this
Can't understand how we're living and you know
Can't eat this
Look at the flies man
U can't eat this
Yo can I trust this funky feeling
Fresh new pots and pans
you gotta like that
and you know you wanna chance
a move outa your seat
and get a fly-swatter to catch this beast
while its squirmin' hold on
and eat a little bit
just to see what's going on
like that
Pull a little bit and you see it is mostly fat
Let em know that it's too much
and this is the meat
U can't eat
To I told you
U can't eat this
How're you standing there man?
U can't eat this
Now you standing there man?
U can't eat this
Yo sound the bell dinner's on sucker
Can't eat this
Give me a sandwich or soup
'Cause what Gary is giving them is making 'em poke
Now, they feel you talk about the
Hindloyn you talking about a meal that's hyped but triu
eating just rolls is a dinner that bites
this is a chance to learn
What medicine to take when your heart starts to burn
Quick drink up
Either eat fast or you might as well quit
that's word because you know
U can't eat this
U can't eat this
Bol't it down.

Oh no
Stop – Dinner time
Go with the flow
and its said if you eat this you're gonna be dead
so shake hands with the devil
so just a few bites, and you win a medal
This is for the winner
eat this and you're gonna get thinner
Move slide your rump over the seat 'cause you've gonna take a
dump
dump
dump
Yabbbuh
Don't eat that
Look man
Can't eat this
You better get out boy cause you know you can't
U can't eat this
Ring the bell, Tech's back in
Suck it down
Oh no
Oh no
Oh no
Stop – Dinner time
Can't eat this
Can't eat this
Can't eat this
Choke it down
Oh no
Oh no

Oh no
Stop – Dinner time
Every time you see him
His gruey never thickens
He romps on the floor and puts pork in the chicken
Now why would I ever
consider eating this with others making food they won't serve to Tech
I've eaten around the world
from London to the Bay
It's better really better lot better much better
and Gary can go and play
Don't eat this
U can't eat this
U can't eat this
Yeahhhhh
Can't eat this
We can't here

ASCIT Minutes from page 5.

Talent Show – Shane Sauby has come up with a budget for the show and is requesting $750 from ASCIT. Art and the BOD decide that this money should come out of the social budget.

6. ASCIT Alcohol Policy – The ASCIT BOD has decided that ASCIT will no longer fund the purchases made for Caltech social events. As three-fourths of the people paying for the drinks aren’t supposed to be drinking the drinks under the new DAPAC policy, we’re wasting their money. Jason comments on how little hockey is becoming worse and that there are too many rules now.

Track

from page 1

crow backing up Bowden in the 1500 meters was measured off by John Pham, Ellis Eckland, and Mike Ida. The three techers were easing in on in down the last 100 meter stretchaway of the race when a La Verne runner rocketed past them to finish ahead of all three Beavers. John Pham finished second seconds behind the La Verne runner in 4:51.1, good for sixth place. Pham might not have lost had he simply kicked down the straightaway instead of turning around to check to see if anyone was pursuing him. “I had to be in position to eliminate somebody,” was Pham’s mysterious explanation for his action. Teammate Mike Ida was baffled. “What was he doing?????”

Ida’s reaction to Pham’s about face on the last straightaway of the race. Ellis Eckland and the perplexed Ida finished close behind Pham in times of 4:51.1 and 4:51.3 respec-tively.

In the sprints, Rob Whitely showed that he has gotten quite fast, dazzling teammate Brady Montz’s drawers with a blistering 11.55 in the 100 meters, good for fifth place. Montz posted a respectable 11.77, finishing in eighth, with teammate Gerard Ketefian finishing one place back in 11.83. It is a credit to the sprinting coaches Al Ross, Tony Remie, and Frank Little that Tech’s sprinters continue to perform at such a fantastic level this year. A real team spirit has developed among the sprinters at practice, and this spirit combined with hard work and dedication has paid dividends in the performances of the sprinting Beavers in this year’s meets.

In the 400 meter dash, Sophomore Greg Duden finished in second place with a time of 53.4 seconds. His teammate Kurt “Geo” Storm was fourth in 56.8 seconds. In the 200 meters, Rob Whitely showed some more of that blazing speed he’d displayed earlier in the day in the 100 meter event. Whitely finished in second place, running a time of 23.44 seconds.

Gary Eastvedt won the high jump with a jump of 1.83 meters. Eastvedt, whom this reporter had earlier believed to be redshirting this year, has in fact decided to compete THIS season. Coach O’Brien feels he will be an invaluable asset in the upcoming SCIAC Championships.

Greg Duden showed off the versatility which made him a decathlete in high school by com-peting in the pole vault in addition to his sprints for the day. Duden won the event with a vault of 12 feet, 6 inches. Teammate Kay Miyake vaulted 12 feet flat, good for second place.

On the women’s side, there were a number of notable perfor-mances by the Beavers. Jennifer Remine won the shot put with an impressive mark of 31 feet, 11 inches. Jen also threw 69 feet, 11 inches in the discuss, good for sixth place. Teammate Emmeline Naranjo was without a doubt Tech’s female star of the day.

Em run 17.4 seconds in the 100 meter hurdles, a good time which would have gotten her a high plac-ing even if she hadn’t been the only person running the event. Emmie was also second in the 400 meter intermediate hurdles, run-ning 71.4 seconds. She also finished second place in the triple jump with a jump of 30 feet, 10 inches.

The 4 by 100 relay squad of Emmeline Naranjo – Jean Marie Gimbels – Kat Hodden – Liz Wurler set a new school record of 44.11 seconds. “Be sure you get this on video tape!” O’Brien’s gleeful comment just before the race.

Tech has no track meet this weekend, but will compete in the SCIAC Championships next weekend at the University of Redlands and Col-lege. Barring any injuries to teammates, members by biting attacks from William Glenn or spontaneous clawing assaults by Jeff Martin, the squad should be in good shape to “smooth a good one,” in the words of the outspoken Coach O’Brien. His final comment going into the Championships: “Stop making ex-cuses and start making produces!”
