Indeed, the idea was advanced that not only is the drive to produce research harmful to the teaching faculty from teaching the next generation of researchers but also not as useful to the economy of the United States as might be believed. In contrast to the policy for more students enrolled at the graduate level, Kennedy warned of the dangers in having too many doctoral candidates, mostly producing substandard work. Trying his thoughts with the symmetry's call for sustainability, Kennedy saw the system of higher education which concerns itself with forming business and consortia and filling journals with articles and more with educating undergraduates and producing.we enrich. unprofessional research quality. Otherwise, he argued, major research universities are borrowing against the future just as surely as short-sighted corporations do.

Staff Writer

Dr. Donald Kennedy, president of Stanford University, was the featured speaker at Tuesday evening's part of the week-long symposium entitled "Visions of a Sustainable World." He spoke on the topic of "Social and Political Challenges to Higher Education in the 1990s." For most of an hour, Kennedy addressed the current state of universities in the United States and proposed ways in which the ideal educational system of the 21st century might be realized.

Kennedy received his bachelor's and doctoral degrees from Harvard in 1952 and 1956 respectively. He has been a member of the faculty at Stanford since 1960. He was chairman of the Department of Biological Sciences from 1965 to 1972, and Chairman of the Program in Human Biology from 1973 to 1977. He was Commissioner of the Food and Drug Administration from 1977 to 1979. He has held his current position since 1982.

Kennedy's position as speaker was both awkward and appropriate. Certainly he has acquired a keen insight into the problems of major universities of the world, as well as the United States, but he is not the head of Stanford. He has undergone ten years of administrative experience to account for speaking-in-hand of that has occurred in research overhead expenditures at the university. The discovery of these discrepancies has led to a series of subcommittee investigations at other sites, leaving few major research institutes, including Stanford, intact.

The publicity of the congressional subcommittee investigation which exposed most likely played a large factor in Kennedy's decision to resign as head of Stanford effective the end of this year.

Although devoting a notable part of his talk to education and himself, Kennedy did present several interesting topics for consideration. He noted that universities must win back the trust of the academic community and the public. This trust was won when Caltech became a model of growing impressions that the nation's academic centers have "become special interest groups in their own right," and that they have been too easily influenced by pressures to produce marketable ideas and products.

Regarding David Goldberg

To the editors: This past June, sophomore David Goldberg was put on probation following an incident involving his removing two letters from the Director of Residence Life's office. David later wrote these letters accusing Dave of three things, one of which was dismissed. The first, and most important, was that David was calling Ms. West a "bitch", as required by the Ditch Day stack. The second involved a statement that was not approved. When David called asking for his removal to continue, this "threatening" statement was made: "We shouldn't be going after you. We should be going after you." This was in reference to the house shortage and the part time room with rooms in Pick House, where "them" referred to the Page House Excom. This was a political statement and not a physical threat.

During Dean Brennen's handling of this situation, David felt that the dean was not listening to any explanations David had to offer concerning his actions. The dean also suggested that David seek psychological counseling. After being placed on probation, David spent several days attempting to have the sanctions placed on him reconsidered. David felt that what David thought was an unfair treatment of his character, and that even if he had decided to file a grievance against Dean Brennen.

This prompted a series of meetings between David and Dr. Gary Lorden, the Vice President of Student Affairs. These meetings, each about two hours in duration, took place weekly for the entirety of the semester. From this period on, these meetings were to investigate the facts behind the grievance, in addition to the large number of meetings involved, it appeared to Dave that the dean was not interested in discussing the grievance with the student.

After returning to campus this fall, David assisted a student with moving in planning housing to the ISS. Chester apartment building using an electric cart. Although the student had already been approved for the cart, its use was not approved. When a security officer saw the students using the cart, he said that the students could continue, and asked them to leave the building. As a consequence of this event, David has fallen behind in several of his classes.

We believe that the way in which Dave's situation was handled is unfair and improper in a society that prides itself on people's right to freedom of speech not only by this situation, but also by its implications. The way in which Dave's case was processed was a trial of the human. Any reasonable person would be insulted at the suggestion that he/she be subjected to psychoanalyzation. Dave was particularly mired in a place where he was so grossly misinterpreted by Ms. West. Also, Dave inferred that if he did not submit to the test, he would be forced to take a mandatory leave of absence. This "threat" of a leave of absence is not only by this situation, but also by its implications.

JetBlue
Peace in our time. Everybody will admit to desiring peace. Whether it will be free for all the men that dwell upon the earth, is another question.

Currently in Spain a conference is being held between the representatives of Israel, Syria, Lebanon, and Palestine, with delegates from the United States and Soviet Union presiding. This meeting of bitter enemies is being hailed as the news in modern Middle East history. If the conference of these four nations should actually succeed in even attending such a conference. With the ostensible purpose of coming to some resolution between the Arabs and Israel regarding the nations of Palestine and Israel, the representatives are expected to be able to bypass their respective histories for the sake of a more peaceful future.

But what do we mean by a better future? Are we better off than we were before? Has society actually changed? Has society actually become better off than before? Has society actually seen a better future?

As hopeful as this may all be, however, it still does not evince any characteristics of a complete palliative.

As we are the United States, of all the many ways by the fact that we do not have a long unified history. Our scant two hundred and so many years on this continent affords us the luxury of having relatively shallow social and economic divisions—shallower in the sense that they have not been with usimmering for too long. Unlike the other nations, we do not have to deal with insinual emotions siphoned off from deep fractures within our society.

In the Middle East, on the other hand, more than perhaps anywhere else on the globe, one must deal with the intermeshing conflicts and outright tribalism that have fed each other in a frenzy since the dawn of recorded history. Indeed, the sons of Ishmael and the children of Israel have essentially been at odds immemorially. In many ways, the spirit of conflict has become an integral part of their existence, producing in cyclic pattern the notions of ethnic honor, family unity, religious zealism, and above all the justice of vengeance for the sins of one's father. "An eye for an eye, a tooth for a tooth," as the saying goes.

The only measure of progress and also their downfall. Within their sphere of history, family, and identity they have the power of unity and a tribalism that have fed each other in a frenzy since the dawn of recorded history. Indeed, the sons of Ishmael and the children of Israel have essentially been at odds immemorially. In many ways, the spirit of conflict has become an integral part of their existence, producing in cyclic pattern the notions of ethnic honor, family unity, religious zealism, and above all the justice of vengeance for the sins of one's father. "An eye for an eye, a tooth for a tooth," as the saying goes. The only measure of progress.

As hopeful as this may all be, however, it still does not evince any characteristics of a complete palliative. It is debatable whether or not delegates in a conference room in Spam can bridge the abyss between peoples created by the millennia—if these few men can overcome the giant barriers erected by...

Zeitgeist 1: The Meaning of Life

by Manoch Sakani

(So I stole the title. What of it?)

If anything in literature has been said before. Even that. Not that I can militantly contend that this is literature. Zeitgeist is the spirit of the times. A flavour left in the back of one’s mouth after an afternoon’s contemplation on the folly of modern man. One of those grim intellects...)

I occasionally even have fun. But almost never do I succeed. My optimism is a mere fiction. The man is a cardboard cutout. I must respect the desire to...
So for some unknown reason, Seiya Fukuda and I wound back up in Blackened. I keep trying to get out, but they keep pulling me back in. I’ve noticed that in Page, and especially in Blackened, a different dialect is spoken. Some you may recognize and some you won’t. For proper pronunciation, go to Blackened.

Page by popular demand:
Hey all you frosh and sophomores, this Sunday is the big day. Starting at noon, east of the athletic complex, you will be involved in one of the slimiest, dirtiest, muddiest experiences of your entire life. Yes, it's time for Mudeo, that annual pitting of Tech's weakest two classes against each other for bragging rights. The sophomores have a one year winning streak they will be try-
ing to maintain. There will be free food for all who dare to venture over, and possibly some vol­leyball action afterwards in the ooze. Plus your chance to meet Chris Brennan, David Wales, and notable others as they flip burgers for you! Come one, come all, to Mudeo, this Sunday.
Dave: Seiya! Put down that knife. Oh, no! AAAHHHHH!
Seiya: Don't worry, readers. He'll be ok. Next time, top ten ways to glom!

1. Encourage him to do the descent from Milikan Library into Milikan pond.
2. Electocoute him with twenty or thirty Ph 1b high voltage power supplies.
3. Impale him on that helicopter thing in Milikan pond.

Dave's World, Dave's World! Party on! Excellent!

Dave: Welcome to another edition of Dave's World. Party on, Seiya!
Seiya: Oh! Party on, Dave.
Dave: For those you don't know, it is a widely believed notion that if your roommate dies, you will receive straight A's. What a coup!
Seiya: WHOA! WHOA!
Dave: Don't get any ideas, Fukuda!
Seiya: Today, we have the top ten ways to kill your roommate.
Dave: Wait a minute!
Seiya: Here they are!

1. Convince him to stay on board every purchase of one Fukuda.
2. Lock him in a room with Mikce Baghera, nadau, nadau! We will have dates. Slam, see ya! Lucy, is that you? Slam, sidown! Life is sooooooo hard. Oh, no! I'll be alright. Jimmy Hofstee! Everybody, troll now! (Bass and percussion track begins) I was up above it, now I'm down in it. Ooh, I'm in jail! Free Dave Goldberg. Jisoooooooo! Hey, it's the Korean mafia! Now it is the time in Apostol's when we dance! I'd rather stick a screwdriver up my urethra than sit through another Tommy lecture. That's the best move I've ever seen. You translucent sophomore. He's just a shadow of a fourth dimensional being. Free him!

5. Feed your roommate your unknown carboxylic acid.
6. Introduce him to MUD games. He'll play until he dies of starvation.
Soccer Takes a Lickin’ and Keeps on Tickin’

by Jim Werner

Thanks to slaughterers at the hands of Pomona-Pitzer and Claremont-Mudd, the Caltech Beaver soccer team leads the league in the number of kickoffs per game. Against Claremont, the final score was 0-8, which is giving rise to the dominance shown by the Stags. The first half went rather well, as the Beavers held their opponents to a 2-0 lead. In the second half, the Beavers seemed to run out of gas and the Stags took total control. At least the benches of both teams saw some playing time.

In the last Wednesday’s game

BIRTHDAY CAKE!

The Pasadena Community Orchestra

The Pasadena Community Orchestra will be holding November concert featuring pianist Susan Svrcek. Selected music consists of works by Artsibouchev, Mozart, Tchaikovsky, and Sibelius.

The performance will be held at 8:15 PM Friday, November 1, 1991 in the First Church of the Nazarene, located on 3700 E. Sierra Madre Boulevard. For more information call (818) 445-6708.

ENTERTAINMENT

Restaurant Review:

Bistro 45

by John Krowas

Bistro 45 is a trendy, California-French restaurant that happens to be located in an easy walking distance of campus, at 45 South Mentor. You may not have noticed it if you’ve walked by, but it’s definitely worth a second look.

Located Bistro 45 on two separate occasions, in June and October of this year. On both visits, we were impressed by the excellent food and wine and the quick, friendly service. However, the menu changes seasonally, so the selections we mention here may not be available when you visit.

There are about eight appetizers on the menu, plus a soup, terrine, and ravioli of the day. On our first visit, I tried the ravioli of the day, which was charbroilled beef tenderloin with a tangy cheese sauce, while Nina had the braised artichoke salad. Both of these were delicious. The ravioli is not quite what you’d expect. It was served in a small bowl, and consisted of a few strips of very tender beef and a few spicines between two circular sheets of pasta. Unusual, but excellent. On our second trip, we shared the escargot appetizer. Now, I’d never had escargots before, but Nina loves them, so I conceded to trying them. At Bistro 45 they’re sautéed and placed in a pastry shell with a peppery tomato and wine sauce. It’s a very gentle introduction to something that’s easy to be scared of. There aren’t any shells, so they’re easy to eat, and they’re really quite good.

Entrees range from the ordinary done in a unique style to the exotic prepared outboundly. The ordinary is contained in charcoal grilled chicken breast with peppercorns and a slightly spicy sauce, and in muscovy duck with a light raspberry sauce. The exotic consists of grilled Norwegian salmon with apricot glaze and braised veal shank. The entrees are attractively presented, often with beautifully arranged garnishes and accompaniments. It’s almost a shame to eat them. The chicken I had was easily the most tender,File sizes exceeded maximum limit for the current file size.
The Computer Inside...

Mystery black button...

...there isn’t any light here.

Callbox Information

You've seen these callboxes all over campus. Most of you probably know how they work also (if you don’t then you either have never seen them or you need some help). What actually goes on when you push that button, remember that the entire conversation is being taped by security monitoring.

To learn more about our challenging opportunities, visit Intel College Recruiting. Intel Corporation is an equal opportunity employer and fully supports affirmative action practices. Intel also supports a drug-free workplace immeasurable.

As you've seen, the location of the callbox lights up on a map in the security office. Also a light on top of the box starts to flash which makes it easier to spot (it also has another purpose but more on that later). After about 20 seconds an officer will activate the intercom and then you can tell the officer about your situation. If there is an emergency then an officer will be dispatched. So far the callboxes have been used once for an emergency. The callboxes are also used to monitor the area where you are and ensure that everything is under control.

There is a light in the door of the building that you are in. This light is a security light and will be on if anyone is in the building. If you are not sure if anyone is in the building, you can use the callbox to let the security office know. They will then dispatch an officer to check on things. If you are not sure if anyone is in the building or if there is a problem, you can use the callbox to let the security office know.

Jim’s Journal

I went to a park with Ruth today. She bought a sandwich with tuna and tomatoes. She said, “I just love you.”

by Jim

BY权:BEZ.

Powerful People. Powerful Products.

You are about to receive a technical degree from Cal Tech, one of the world’s most renowned educational institutions. Congratulations!

At Intel, we’re carrying our legacy of technological innovation on into the ‘90s and beyond — with a variety of development programs in advanced technologies, systems and components. The types of projects that transform world-class degrees into world-class careers.

POWHER HOURS

To learn more about our challenging opportunities, unique benefits and desirable locations, you are invited to attend the Intel Presentation/Reception scheduled:

Date: Tuesday, November 5
Time: 7pm – 9pm
Place: Athenaeum

Campus interviews will be conducted on November 6 & 7 for BS/MS/PhD EE, CS, ENAS, Material Science, APh, Chern E. Check the Placement Office for details.

If you can’t meet with us on campus, please send or FAX your resume to Intel College Recruiting, 2600 San Tomas Expressway, Santa Clara, CA 95052, FAX 408-765-3979, to and wheel. Value: $50 College Recruiting. Intel Corporation is an equal opportunity employer and fully supports affirmative action practices. Intel also supports a drug-free workplace and requires that all offers of employment be contingent on satisfactory pre-employment drug test results.
Arise. 

November 1, 1991

CITECT Wants You

The CITECT Engineering Club (CITECT) wants you to help build a tulip and future projects such as a hovercraft. We will meet Tuesday the 5th of November in room 25 of the SAC. For more information call Stephen Heise at ext. 1711.

Arra Association of Caltech

The CITECT/JPL will hold their fall general membership meeting on Wednesday, November 13 at 7:30 PM in 206 Reness. The evening's program will include a talk on "NASA/Ames-Dryden Research Flight Operations" by Ed Schneider of the Dryden Flight Research Facility. For further information contact Fisher Shirley (ext. 986), Thomas Burghart (ext. 9740), or Kevin Condrick (ext. 966).

Surf Speaker's Bureau

The CITECT Speaker's Bureau will be having its second meeting this Friday, November 1 at 2:30 PM in the Student Center. If you are interested in participating in the activities of the CITECT Speaker's Bureau this fall, please attend this meeting. Administrative maintenance will be provided. If you have any questions, please contact video Cite at 755-9472 or tattle at 756-9730. See you later!

Caltech Y Halloween Open House

The Caltech Y will be having a Halloween Open House on October 31 from 2:30 PM to 4:00 PM in the DUC room of the new Master's Office (ground floor Webs—now and weekly meeting). Show up if you are interested in the quality of life at Caltech. We will be featuring improvements from last year's event (including the trick or treating) and discussing new issues as they arise.

Danish Movie in 22 Gates

American Pickers, a multimedia show by Jack Newfield about his personal journey through the Ancestral Native, will be shown Thursday, November 14 at 7:00 PM in 22 Gates. Sign up for the Caltech Y or call us at 356-1200 for more information.

Caltech Women's Glee Club Fundraisers

The Caltech Women's Glee Club invites you to see the Rose Parade on New Year's Day, 1992, and will provide transportation, seats and a continental breakfast. Proceeds from this trip will be used to support the Women's Glee Club 20th anniversary tour. Tickets will be sold starting next Monday. Tickets are $25 per person and include round trip transportation and one seat at the Rose Parade. For information call LeePerson at 578-2083 as soon as possible.

CITECT: What you can do

With production facilities in Europe, Japan and Santa Clara, California as well as service offices in more than 10 countries, Applied Materials has had unprecedented success in penetrating the world's semiconductor equipment marketplace.

For over 20 years we have committed ourselves exclusively to the research and development of new generation products for the semiconductor industry, investing approximately 15% of our annual revenues per year.

Our efforts have paid off with immense success. If you want to share in our success, explore the following opportunities to join us.

Teach the world how to communicate.

At Interleaf, we've done it, with a history of innovation and first-rate technology, to turn the most mundane of words into the most powerful of ideas. Our approach has been at the forefront of providing state-of-the-art technology, helping organizations communicate information effectively.

Along the way, we've pioneered new markets and technologies (workgroup publishing, database management, electronic commerce and Document Distribution). To see our history and our evolution, visit our exhibit in the Made in America exhibit at the Science and Industry Museum of Westchester.

Interleaf is interested in interviewing students with backgrounds in:

- Computer Science
- Applied Mathematics
- Information Systems
- Electrical Engineering (disciplines: entry-level technical consulting positions. Students must have a particular interest in and be familiar with the following:
- Information management systems
- Database systems
- Computer networks

For more information, please contact your Career Services Office, or send a cover letter and resume to:

Teach the world how to communicate.
Hockey Beats UCLA

by Jim Carrot

On Sunday, October 20, Caltech got its first division I victory against U.C. Berkeley. This was a big win for the Beavers as it dispelled some rumors that Caltech may not be able to compete in this league. Caltech played with the heart, intensity, and desire that it lacked when they played USC. This win installed a lot of confidence in the team as they won 5-3.

The first period was entirely dominated by the Beavers as they jumped out to a quick two goal lead. The first goal was scored by Max Heitzmann and assisted by defenceman Jacques Blanger and Herman Cho midway through the first period. The second goal was scored unassisted by right wing Dave Braun. Caltech's pregame intensity paid off as they quickly showed UCLA that they were here to play hockey.

The second period was a bit of a disappointment for the Beavers. Caltech seemed to get comfortable with a two goal lead and stopped playing with the level of playing that had gotten them there. As a result, Berkeley scored three goals in the second period, making the Beavers feel like an one-legged man in an an-ankle-bearing contest.

In the beginning of the third period, the tables turned in Caltech's favor. Berkeley tied it up early in the period. Answering that one minute later, the stealthy Jeff Hall stole the puck from a Berkeley defender and scored the go-ahead goal. Topping it off, Dave Braun also got a second goal.

Caltech is on the road for a weekend series in San Francisco against Stanford University. It is too early in the season to know what to expect out of this team. Coach George Yates said, "Regardless of how good Stanford may be, that does not take away from the fact that we are there to play hard and win the games. - hockey like Eddie Shore. A lot of skating and shooting."

One thing is for certain, Yates is going to be watching out for Kurt Stephens. Yates does not want to have to relive the incident with Stephens last year when the team played U.C. Davis in Stockton. "He's on his own this time," said Yates furiously, "He can't keep relying on the team to keep pulling him out of jail every time he loses his temper." Stephens could not be found for a comment on the matter. However, it was suggested that we should not seek his comment because it might give him some ideas.

Stanford's hockey program is well known for its very well funded university. The Beavers arrived to a very large crowd of people on Friday night to an arena that is used for pre-season practices by the newly formed San Jose Sharks. Unfortunately, the Beavers lost that game by a score of 8-1. Caltech was severely out played and actually lost the game within the first ten minutes of the first period as the Cardinals were up by five goals. Perhaps it was due to the travel lag.

It was interesting to see how seriously the Stanford community took their hockey. On Saturday morning the team went to Stanford's training room to get rubdowns, and save, save, save! As Nothing seems the Beavers have a reaction to this. As a result, the Beavers knew they were in a game. Nevertheless, the Beavers came back to show how serious Palo Alto is to show how serious Stanford is to do.

The first goal of the night came early on in the first period from winger Jeff Moore assisted by Jeff Hall and Jacques Blanger. Then, putting UCLA down by a two deficit was rookie Dave Spencer. In the second period the Beavers out and UCLA coming back to within two goals. Caltech know they were in a game. Nevertheless, the Beavers came back to score three more in the third period.

The next home game for the Beavers comes out next week. They were well rested and ready to play. All except for Kurt Stephens who arrived ten minutes before the game time. It seems that Stephens broke curfew and spent a good part of the night trying to pass out some of the first houses. He succeeded.

Ironically, one of the members of the team played for Stanford in the early 1970s and recognized Stephens as teh guy who hit him near the throat during a pile up in front of the Caltech net. That resulted in a ten minute misconduct penalty. The brothers in the house then proceeded to get Stephens pissed drunk to the point that he passed out. The next thing he knew was that he was butt naked lying in the back of the campus security car. He ended up spending all morning and part of the afternoon explaining what had happened. Yates was found to comment that, "it was an unorganized like thing for Stanford to do."

Regardless of the incident, Caltech lost at 4-1 in a well played, fast-paced game by both teams. On Wednesday night, Caltech played at home against UCLA—a team that had already beaten Stanford. The Beavers knew they had to come to the arena that night and play hard and tough. Caltech showed UCLA that they are not to be taken lightly, as the Beavers took the game with a score of 5-2.

The soccer season is winding down and the Beavers only have two more games left, both at home. This Saturday (11/2, 10am) against Cal Lutheran, and another next Saturday (11/19) at noon against the Alumni. Come and be an athletic supporter.

CITY OF PASADENA

The California Tech

Soccer page 5

sueing three times to steal the victory.

Unlike the Claremont game, Caltech managed to score against the Pomona Sagehens. However, the Sagehens were able to score six times against Caltech. The Pomona game was a "10 am Saturday clas­".

These games are proving to wreak havoc on the schedules and bio-rhythms of the typical Tech student. At these games, the Beaver squad is driven by sheer impu­

seulation mechanisms and bad social

brain activity. Unfortunately, it seems the Beavers have a reaction time comparable to that of a com­

mon garden snail. Against Pomona, Caltech's sole goal came from Osman Kubar. Osman put in a beautful shot over the goalie on a backhanded kick by some totally bad stalling Rohan Mahadevan.

Attempts are being made to implement a BEEVAGE incentive program, similar to the one which worked to well in hockey for Dwight Berg. Saturday (11/1, 10am), against Cal Lutheran, Gary Eastvedt will have a program involving Thor, God of Thunder, and the horizontal plane. He will also provide a BEEVAGE for every ten ticks he scores, a gets, or has a good slide tackle.

Soccer coach Jim Werner is installing a similar program: if he scores, a bag will be shared by all (of course, proper ID required). Every time he slide tackles an opposing player, or scores a trick goal. His teammates, fans participating in said program will receive a BEEVAGE. If you yell during the game, "That Werner's a stud," it will be upgraded to an imported BEEVAGE. If you yell it more than once, he'll think you're really cool.

The soccer season is winding down and the Beavers only have two more games left, both at home. This Saturday (11/2, 10am) against Cal Lutheran, and another next Saturday (11/19) at noon against the Alumni. Come and be an athletic supporter.
