Yevgeny Yevtushenko to Read at Baxter Lecture Hall

Moneekh Sahani

In an event of rare cultural magnitude for Caltech, the Russian poet and film maker Yevgeny Yevtushenko will be visiting the Campus this Monday, March 9. His program (to begin at 7:30 in Baxter Lecture Hall) will include the reading of his most recent film, Stalin’s Funeral starring Vanessa Redgrave, and a short poetry reading. James Ragan will read the English texts of the poems that Yevtushenko will recite in his native language.

The son of two geologists, Yevtushenko grew up in Moscow and Siberia. He considered careers in soccer and geology, before settling on writing poetry for Soviet Sport. He was soon prominent, but not until the publication of his famous poem Babi Yar was he catapulted into the public mind. Babi Yar was critical of the establishment and of Stalin. It was a moving remembrance of the massacre of thousands of Jews by the Nazis while the Soviet army stood by. Although the establishment frowned on the poem, it captured the people’s imagination and Yevtushenko weathered the government’s censor to become his country’s foremost poet.

Besides his career in poetry, Mr. Yevtushenko has been active in the recognition of the uprising of his native country. He was a member of the Soviet Congress of People’s Deputies, is an active member of the Russian Parliament and has been an open and strong supporter of Boris Yeltsin. He is also an accomplished novelist (Wild Berries), actor (he won the Silver prize at the Moscow International festival for the film (Takoff) and film maker (his first film, Kindergarten was well received. (Stalin’s Funeral is his second). Mr. Yevtushenko’s books of poetry include: Brandt Station; The City of Yes, The City of No and Other New Poems; Kazan University and Other New Poems; From Desire to Desire; A Dove in Santiago; Almost at the End and, most recently, The Collected Poems 1952-1990 edited by Albert C. Todd, James Ragan and Yevtushenko.

James Ragan is the Director of USC’s Creative Writing Program and an Instructor in creative writing at Caltech, besides being a prominent contemporary poet, playwright and screen-writer. He has read with Mr. Yevtushenko on many occasions.

Dorea Simmons, one of the artists at last weekend’s Second Annual Tribute to African-American History through the Arts, displays her quilts and dolls in Dunley Lounge. The event was sponsored by Caltech, the Caltech Y and the Pasadena-Foothill branch of the Los Angeles Urban League to showcase the work of prominent and emerging African-American artists from southern California. Photo by Rajan Rana.

Caltech professor James Ragan and Yevgeny Yevtushenko. Yevtushenko will be giving a presentation of his poetry and his film “Stalin’s Funeral” Monday, March 19 at 7:30 p.m. in Baxter Lecture Hall. Photo courtesy James Ragan.

No Oil Doom

To the Editors:
The article that appeared in the February 21st issue of the Tech, "Plans for a Green Planet" contained some very questionable facts regarding America's energy policy. Robert Bowman states that America has nine years of crude oil left, but he omits several important assumptions.

1) He will be discovered in America or off America's shores. Actually, over the past twenty years America's proven oil reserves have risen. This means America is actually less dependent on imported oil now than when we were born. 2) Large deposits of oil will remain off limits due to excessive environmental concerns. Millions of barrels of oil lie underneath "environmentally sensitive" areas. Despite the excellent environmental record of the major oil companies at well sites, these oil deposits remain off limits. Many people feared the Alaskan Pipeline would be an "environmental disaster" for Alaska, however it has operated with an excellent track record since it was built. 3) That America will not import oil from foreign sources. America is actually acting wisely to purchase oil at today's low prices ($18 to $20 a barrel) rather then use its oil supply. America is using much of its reserves only when needed.

America can be self sufficient in oil production for a reasonable length of time (much longer than nine years.) When considering the current rate of discovery, the "depletion date" gets pushed back about another thirty years. If you include foreign oil, this date gets pushed back well into the mid to late 22nd century. Mr. Bowman's overstatement of oil depletion within nine years is the latest in a long series of Doomsday predictions that have passed. America was "supposed" to run out of oil in 1934, the 1950's and in 1965. (As well as many other dates that I cannot recall!) All of these predictions make the same incorrect assumptions as Mr. Bowman. In 2002 we will be able to add Mr. Bowman's prediction to this list. I hope that I have helped to dispel the sense of imminent doom portrayed by Mr. Bowman.

Free Speech and Us

Ever since political correctness [PC] burst forth as an issue two years ago, the press has devoted reams of space to print polemics on the subject. The press relishes a good fight, and this one is being passionately fought from every island of political opinion on the ocean of public consciousness. The partisans believe they are fighting for the soul of the university, although they fail to realize that universities play an important but ultimately peripheral role in education. The controversies of political correctness raging on college campuses around the nation have (mercifully) eluded this campus. That is because Caltech has a non-political soul, and English literature has never been a popular subject here. But we should not simply disregard PC as yet another issue that better stays on the other side of California Boulevard. Vital issues, like the purpose of education and the role universities play in it, are being raised in the debate over PC.

If there is one issue, however, that goes to the heart of political correctness, it is free speech. Since free speech is a right enshrined in the constitution as its first amendment, it remains in the news as constitutional battles are fought in the courts. PC has given a new twist to free speech, and keeping with the historical tradition, the twist is being fiercely debated. Those sympathetic of PC argue that speech that offends certain groups is an invasion of the first amendment, and detrimental to the harmony of the society. The democrats free speech advocates cry foul, noting the irony that the same people who fought for free speech in the sixties are now urging "sensitivity restraints" on speech.

Free speech is not an academic issue, but a fundamental question of democracy as we know it. Regrettably, free speech is almost always entangled in politics, which some of us find unworthy of attention. But let us not forget that unimpeded exercise of speech is a fundamental right and requires protection from each one of us (a reading of Orwell's Nineteen-Eighty-Four, perhaps). As college students, we have an on-the-spot luxury of not having to think about mundane realities of life like jobs and families. This is the time where we should be going profound thought to fundamental issues before forming our opinions. Each one of us should find out where he or she stands on free speech.

SPRING RECEPTIONS FOR ADMITTED STUDENTS
The Alumni Association and Admissions Office are hosting receptions across the country for newly admitted students. The receptions will be held over Spring Break. If you can be present at any of the following, please call Karen Carlson at x6593. If you remember, students really want to talk to current students as they make their decisions.

Seattle
Saturday, March 28 2:00-4:00 p.m.
Portland
Saturday, March 28 3:00-5:00 p.m.
Sacramento
Saturday, March 21 2:00-4:00 p.m.
East Bay (California) Sunday, March 22 3:00-5:00 p.m.
Peninsula—San Jose (Saratoga) Sunday, March 29 3:00-5:00 p.m.

Minneapolis—St. Paul
Tuesday, March 24 7:30-9:00 p.m.
Chicago
Saturday, March 28 10:00 a.m.—noon
Denver
Thursday, March 26 7:00-9:00 p.m.
Dallas— Ft. Worth
Friday, March 27 7:30-9:00 p.m.

Boston
Tuesday, March 24 7:00-9:00 p.m.
New York City
Tuesday, March 24 6:00-8:00 p.m.

ME 71: New Class Enrollment Policy
Joel Burdick

We were totally unprepared for the large demand for ME 71, and thus did not think it necessary to formulate a policy for ME 71 enrollment prior to pre-registration. The limited enrollment of ME 71 is not arbitrary. The mechanical engineering school handles only a limited number of students.

Since Caltech prides itself on its honor code and sense of fairness, we have decided to enact the following policy for ME 71 which we think is a more equitable approach to allocating space. We are also trying to formulate a solution to the long term problem of balancing the class so that the best (we hope) solution to the immediate problem.

From March 4 to March 11, students who want to enroll in ME 71 for the spring semester would fill out a simplistic questionnaire in Thomas Building 238. This new sign up procedure will NOT be a first-come-first-serve affair. Instead, we will use the following priority scheme to determine who is most eligible to enroll in the course.

1. Juniors. They need this course to be able to take ME 72.
2. Seniors (it's their last chance, but they can't take ME 72, so they are lower in priority than juniors).
3. Sophomores.
4. Freshmen.

Engineering and Applied Science majors will be given priority over other majors. Students who try to enroll in ME 71 last year, but were unsuccessful, should indicate so. They will be given some additional priority. Finally, students who stayed up all night to pre-register will be given a small priority as well.

continued on page 3
The California Tech

continued from page 2.

The enrollment limit of 25 students will be increased to 30 students. It is our intention to first enroll juniors and deserving seniors. Remaining slots will be filled by a random lottery pick. We will post the final class enrollment list on March 13 outside of 208 Thomas Building and in the Registrar's office.

Because of the limited enrollment, no pass/fail grading will be allowed. We hope this will discourage students who are not serious about the course. I apologize for the inconvenience, confusion, and lack of sleep this whole affair has caused. Questions can be answered by Prof. Joel Burdick, 356-4139, Mail Code 104-44, jwb@robby.caltech.edu, or the Registrar’s office.

We have openings for all staff positions; inquire at room 40 of the SAC or editors@tech.

Y News

Leven Leroy

End of the term coming up, ready or not... Really, it’s just because it’s second term that it all feels so bad. It gets better. Actually, it only really gets better for seniors. Stiff upper lip, it builds character! De-compression around the corner, too, but there’s more:

March 7: Saturday night till Sunday morning, the second Broomhall of the term!

March 10: Tuesday, 7PM, in Dalsey Hall, The Impact self defense group will be giving a demonstration. The class has been offered for two terms now here at Caltech, and I’ve yet to hear a bad word about it. Impact teaches verbal and physical self defense based on realistic rape/mugging scenarios and full-force attacks against protected opponents. The class will be offered again third term thanks to contributions from the OWC, the GSC, ASCIT, the Caltech security office, and, of course, your humble servers at the Y. March 11: Wednesday afternoon at 4-5PM there will be a discussion on date rape prevention in the Winnett Lounge. March 14-15: DECOMPRESSION! The biggest event of the term, of course: lots of food, movies, and the Dating Game back by popular demand. We will need volunteers to help out.

If you can spare a couple of hours Saturday or Sunday, sign up in your House or at the Y. It’s not long, it’s a flick, there’s lots of fun people around, and you can get first pick at the food. Spring Break:

The ski trip to Mammoth (March 22-25) is full. The camping trip to Joshua Tree (March 23-25) and the mountain biking trip (March 26-28) still have some space, as does the volunteer trip to Tijuana (March 21-28). Contact the Y for information and to sign up. People in the camping trip: Keep reading, please. IMPORTANT — Organizational Meeting:

Today at noon in the Y Lounge the first meeting for clubs interested in participating in International Day will take place. International Day will be in May. If your club is interested, please send a representative to this meeting.

Wednesday, at 4PM, in the Y Lounge, there will be an organizational meeting for those who signed up for the Spring Break Camping Trips. We need to discuss food, transportation, equipment, and other important matters.

The Y, last defender of campus activities in those dark, recession-plagued times, is located in the heart of campus, on the second floor of the Winnett Student Center. Stop by or call 6163. The Y Excom meets in the Y Lounge from noon-1PM on Mondays. The area around the Y offices also contains our RideShare Board for those trying to organize rides across the US and the Y Book Swap shelves.

The Day is Bad and I Feel Similar, Likewise, And Equivalent To

Did anyone ever tell you to enjoy being young? I mean, did you ever have anyone come up to you and say: “Hey, kid, just wait until your body withers away?”

My high school physics teacher once laughed at us and said, “Yeah, all you young kids. Just you wait. You’ll wake up one day and everything’s going to hurt... After 19 it’s all downhill. And then you’ll find out just how old you really are.”

I can remember that the class laughed along with him and that I thought “... till then, buddy, till then...” But that was four years ago.

It doesn’t exactly happen overnight, but it is somewhat annoying to realize that things aren’t going the way you’d usually expect them to. First comes the pulled hamstring, then the twisted knees, and then the strained back before everything starts piling in a neverending avalanche of reminders that hey kid, you’re not any younger.

And then you figure that yeah those chronic shin splints probably really are from flat feet, that you really should take 15 minutes to warm up (and even that’s waaayyyy short), that banging into walls really is doing the Nancy Reagan to Just Say No. That, and the weird realizations that things aren’t going the way you’d usually expect them to.

Took me 6 years to get over it.”

Six (6) YEARS!!!

Forget it. I’m not old. There’s nothing wrong. I feel fine, great, just dandy. The teacher was wrong. Yeah. Sure. I don’t need anything. Healthy as anything.

Not.

I want the body I had when I was 18, dammit. Now. Here. Pronto. In the present. Like you reading this.

It’s like Keith Oslakovic said: “It sure would be nice if you could go a day without anythin’ hurtin’, you know? I mean, it sucks not bein’ 19.”

IHC Minutess
3 April 1992

Ben Smith

Sign ups for IHC secretary will go up on the door to the IHC Room (next to Kim’s office) on Friday 6 Mar 1992. Sign ups will be taken down on 31 Mar 92 (the first Tuesday after Spring Break). The IHC will select a Secretary on Wed, 1 Apr 92.

Nate introduced Joanna and immediately took off.

Discobolus: Lloyd and Page are playing this weekend. The next challenge will be in third term. Baseball. I summarized the issue for Joanna. It was suggested that Dan Bridges should be invited to an IHC meeting next term to discuss baseball. Bryce offered to convene the committee of House Ath teams to talk to Dan Bridges about equipment, price of equipment and of course baseball.

Undergrad Phone Network: I mentioned that Walker and I are looking into procuring a extension network that would put a phone in every on campus room. Initial indicators are $200,000 for the system. Walker and I are looking into severely cutting that number. Possibilities include replicating Blacker’s HTF for all Hosses. Note: 800 students x $62.5 x 4 years = $200,000. To get a phone installed in your room by PacBell is $60. It costs $30 to switch the phone every time you move.

Rickets will no longer be able to use 241 Holliston starting this summer as an off campus alley. Since there is a large demand for the unaffiliated spots, Kim will not give more spots to affiliated housing. Current affiliated housing is as follows: Brackets denote number of spaces:

In January of 1992, we undertook a research project to collect data on possible differences in the six undergraduate houses. We discovered not only that there were differences between the houses, but a surprising correlation between the percentage of frosh females who were dating other Caltech students and the number of people who “flamed.” In reading this, please keep in mind that many data points have changed during February so that the old statistics are no longer accurate. Research teams have not yet collected current data; however, we have good indications that our new data points also support this correlation.

In each of the six houses, I collected information on what percentage of the freshman females from each house were going out with other Caltech students, and how many students had flamed from that house. The surprising correlation is shown below.

“Sometimes I think you spend more time on Gerbil than you do on me and the children,” she said.

He denied it at first. But then he thought about it a little more: the late-night trips to Builder’s Emporium (“Damn, that’s a lot of wood, cardboard, duct tape, rope”) they’d say, whatever was being bought; the all-nighter lamination sessions. When was her birthday? When was their anniversary?

She wasn’t listening anymore. All he heard was the almost-silent whirring of the pumps. It wasn’t “Paperback Writer,” it was “Weird Al’s Greatest Hits.” And if it wasn’t that—that, he could ask the CD player in Matt’s room, which had taken control of its destiny and chosen the songs it wanted to hear, it alone and nobody else. You could ask it to play twenty different songs and after each one it would come back, panting, to “Paperback Writer.”

“The upperclassmen don’t even have the dining room to eat in anymore,” she said, accusingly. “When is that cardboard going to mix up glue rather than having dinner with us, at home? How many times have you sat alone in the courtyard, listening to “Paperback Writer” with the volume up? Too many times, he knew—too, too often. And if it wasn’t “Paperback Writer,” it was ‘Weird Al’s Greatest Hits.’ And if it wasn’t that—well, you could ask the CD player in Matt’s room, which had taken control of its destiny and chosen the songs it wanted to hear, it alone and nobody else. You could ask it to play twenty different songs and after each one it would come back, panting, to “Paperback Writer.”

“Sometimes I think you spend more time on Gerbil than you do on me and the children,” she said.

He knew every inch of her, his ASCIT Van. “How many times,” she said, pointing her finger, “how many times have you gone out to mix up glue rather than having dinner with us, at home? How many times have you sat alone in the courtyard, listening to “Paperback Writer” with the volume up?”

He wasn’t listening anymore. All he heard was the almost-silent whirring of the pumps. All he saw in his head was one huge Gerbil, accusingly. “When is that cardboard going to mix up glue rather than having dinner with us, at home? How many times have you sat alone in the courtyard, listening to “Paperback Writer” with the volume up?”

“Sometimes I think you spend more time on Gerbil than you do eating or sleeping,” she scolded. He couldn’t deny it.

All he saw in his head was one huge Gerbil, accusingly. “When is that cardboard going to mix up glue rather than having dinner with us, at home? How many times have you sat alone in the courtyard, listening to “Paperback Writer” with the volume up?”

“Sometimes I think you spend more time on Gerbil than you do eating or sleeping,” she scolded. He couldn’t deny it.

what direction it occurs in, is not precisely determined. Either frosh females dating encourages others in the house to flame, or people flaming somehow encourages frosh females to date. Some have suggested that perhaps no causality is involved, and that the correlation is the result of the type of people the house selects - this is clearly false", as is apparent to the casual observer.

One common misconception is that it is the people who date are the same ones who flame. Our statistics do not support this conclusion.

Before finishing this report, I feel that I must include new data from February, even though all our data has not yet been confirmed or analyzed. Mid-February saw a sharp campus-wide drop in the freshman female dating rate, a phenomenon termed by many as the mushroom effect. Interestingly enough, the same week, reports came in of inverse flaming - that is, people who flamed earlier in the year coming back voluntarily. We are still trying to interpret this, but we do not currently believe that this supports any theories of causality.

Important work still remains to be done in this field. Most importantly, we wish to determine in which direction causality acts. This will only be possible when we improve our research methods so that we can determine the exact times and locations of dating and flaming. Therefore, it would be greatly appreciated if any new data was directed to the Office of Caltech Attrition, located in Dabney, rooms 17 and 33.

+ No reliable information can be found in Fleming.
   An apparent black hole of information exists.
* For those who question my data or scientific method, I refer you to the lab notebook of the great Robert Millikan.

And now, a limerick from the Pungent:

There once was a man from Venus
Who had a long Encinas.
Encinas is a city
In California.
Yes, that is Encinas.
Welcome to Blacker House, the disaster area of the Western world. Where Pestilence strikes at least once a week, and the lounge is full of severed heads.

To help fund our reconstruction, Blacker is sponsoring several new fund-raising ideas...

ARE YOU HAVING PROBLEMS WITH YOUR FINALS?
Looking for a way to get someone else to take them for you, only you’re worried about repercussions from the BOC?
WELL LOOK NO FURTHER!!! AN ANSWER HAS ARRIVED!
For only $29.95 (That’s $29.95!), you can have a BOC rep take your finals for you! In the unlikely event of his deciding to prosecute you (and himself as well) you will get a FULL REFUND!

That’s right, forget your fears! Forget your work! Forget your morals! Have a genuine BOC rep take those messy finals for you and relax this term! (Biology, Chemistry, and freshman courses our specialty.)

Contact Gary Olsen, Blacker room #22 for more information.

(and if you’re still worrying about the BOC, come see them in concert on Wednesday, March 11 in San Rafael!!! Don’t fear the reaper!)

STRESSED OUT???
Do you just feel like beating the crap out of something/one????

Come down to Blacker’s Stress Relief Hut, where for only $5 you can whack your favorite prof or TA over the head with a 2x4!!! Hurry on down, the first 3 hits are free!!! And for a limited time, you can use a 4x4 (!!!!!) for the same price!

(subject to prof availability)

TOO MANY HUM PAPERS???
Bring your assignment down to Blacker, and for a modest fee, we will write it for you!!! In a new experimental version on the “infinite number of monkeys” method, each mole will contribute one or two words to your paper, which when collated and translated, will be a literary masterpiece worthy of Shakespeare, Thoreau, and Douglas/Adams!! Don’t delay, get your paper written by a near-infinite number of moles today. (we’re cooler than monkeys).

UNABLE TO GET THE CLASSES YOU NEED TO GRADUATE??

Reserve your spot in line now for PRE-REG 2004!!!!
With the way Registration is going, you’re going to need a spot in line soon! For two dollars a day, an experienced, professional, Blacker line sitter will SAVE YOU A SPOT IN LINE for pre-reg, third term, 2003-4! Hurry up, estimates show that ME71 is already half full!

INSOMNIA PROBLEMS? CAN’T SLEEP?
For practically nothing ($6.66) you too can be lulled to sleep by Mozart’s famous “Sonata for Power Drill and Sawzall” featuring the Blacker Symphony Orchestra.

Conductor: Kristin Polito
first Hammer: Matt Clapp
second Hammer: Debbie Leung
Circular Saw: Brian Moerdyk
Power Drill: Adele Shakal
Makita Cordless: Christine Chen
Sawzall: Bevan Bennett

Just ask one of our many satisfied customers to the North...

Thank you for your support.

Thog like inside world. Go bite heads off of lizards now. mmmm good. Thog LIKE lizard heads. Thog also like music. Listen to Megadeth. sound almost as good as banging two rocks against head.

Bye bye.

-thog

RICKETS

Last night was the most lethal broomball I’ve ever seen! Dan got a scratched cornea, I was hit in the throat (thanks, Frank, you gozo), Justin got nailed by a wall and Newton’s Laws, and numerous injuries were sustained by all. I guess we’re getting a little too vicious on the ice, but all that means is that the Damn Scurves will win Boffo this Saturday/Sunday.

Along those same lines I overheard some Rudds talking about playing totally smashed since OPI is the same day as Boffo. All youse geeks, stop dat studdyin’ and party. Ya gotta have some fun at college, or you’ll wind up like Melissa. (Oops, there goes my APh 24 grade.)

I wish I had a car. Albert, Rob, Rich and I went up to Sacramento last weekend to play in a fußball tournament. Unfortu-
PA37 (0-3-0) Flaming
Projects in this course will involve the correlation of GPA with amount of time spent working. The ideal student will have absolutely no qualifications except a willingness to try new things. Instructor: Renner

PE6 (4-0-8) Football Theory
Football, a sport whose origins are lost in the mists of time, is covered in depth. Mechanics of wrist action, the Spot, banks, and cheating is covered. There will be special emphasis on verbal abuse. Instructors: Yang, Renner

PE10 (168-0-0) Broomball Marathon
In the pursuit of physical fitness the time-honored sport of broomball will be examined closely. Registration is limited to twenty students, no subs. Instructors: Schaaf, San Clemente

Mu98 (0-0-11) Amplification Lab
Earplugs recommended. Instructor: Wagner

But now that that is all over, let’s move onto the more important things... The BRASS-BALLED, IRON-FISTED, WELL-EQUIPPED, STRONGER, TALLER, MEANER, FARM-BOYING, HELL-RAISING, GODS AND GODDESSES OF THE ONLY ALLEY WITH ANY ATHLETIC PROWESS IN THE HOUSE (or on campus, for that matter), ALLEY 1, have been challenged by the lame-ass, beer-zooking, sniveling, whining, jis-dripping, class attending, 95-snaking, fag blowing, definitely not the alley of the gods, to the wimpiest, lamest, limp-dickest ALLEY CHALLENGE ever seen in Fleming House. Gimme a fucking break. Just because you asshole, male-chauvinistic, mother-fuckers have driven all of the women out of your piece-of-shit alley, doesn’t make you superior in any way, shape, or form. (Okay, maybe you don’t have to knock when you go into the shower, now, but that’s not that big a bonus.) Just because you are too fucking BALD to grow any hair doesn’t mean that you are cool. Let me tell you — bald does not equal sexy. Besides, isn’t a little hypocritical that the only (dare I say “man” ?? not!!!!) male in your entire fucking alley that had enough balls to take the abuse at dinner ISN’T EVEN COMPETING BECAUSE HIS HAIR IS TOO LONG!!!! How lame. Fuck you. Besides, only a Loser (with a capital “L”) would forget that that the only way to win is to cheat the best. So just because there are four women and one long-haired fag in ALLEY ONE doesn’t mean that you’ll win.

In the great tradition of Fleming House Social Events where we go over and drink other people’s alcohol, this weekend’s social event is PUING IN RUDDOCK COURTYARD!!! There is never a better event than getting to drink someone’s beer for no cost at all!!! So I encourage everyone to go over and drink and puke in Ruddock courtyard on Saturday night.

Although I was not here to witness it, I have been told that a certain UCC (and a true permafrosh) drank for an hour and then zooked like a bitch for four hours. Get a clue!! “Beer then liquor, never been sicker. Liquor then beer, your in the clear.”

Well, as the night progresses, I am getting further behind on already overdue assignments. (Too bad I can’t sleep for 29 hours and wish my assignments away.) But stay tuned next week for the latest in gossip from Fleming House, WHERE MEN ARE MEN, GIANTS WALK THE EARTH, AND THE THUNDERING HERD IS REAL!!

- Mom

PS: This document had to be heavily edited by the GOD-AWESOME ALLEY 5555555555555555555555555555 because we all know that Mom doesn’t go to school.
Bridge Without Sam

Jeff Goldsmith

Caltech Wins Intercollegiate Regional

In a very tightly contested regional final, Caltech "B" came from fourth place after two sessions to win the Intercollegiate Regional Tournament. Our region includes California, Nevada, Hawaii, and a bunch of islands. The winners were Jeff Goldsmith, Fred Upton, Bobby Bodenheimer, and Brian McAllister. Leading the field after each of the first two sessions, and finishing third were Caltech "A", Dan Weaver, Dan Xystus, Phil Confield, and Willy Watson.

Average was 100 Victory Points. The final leaders were:

1st Caltech B 180 VPs
2nd Berkeley 1 172 VPs
3rd Caltech A 169 VPs
4th UCLA 1 160 VPs

This week's hand almost cost the winners their match against UCLA 1.

I held in second seat, not vulnerable vs. vulnerable.

This would be an easy 2C opening bid, but unfortunately, dealer, on my right, opens 3C. This call in easy: I must double. I intend to bid hearts, but I want to indicate to partner that my hand is flexible; I have a decent dummy for spades, or maybe even clubs. The opponents have done their dirty work and pass hereafter, but partner finds a 5D call, leaving me with a problem.

The choices seem to be: Pass, 5C, 5NT, 6H, and 6D. Partner has shown some values, so we must have a slam, so I do not want to pass. Clubs might well be not the right strain, either, so I must bid something. 5C would be fine, I suggested that partner describe his hand, but in this position it must be a forcing club raise. I want to get the majors into the picture, so I think 50 is on the wrong tangent. SNT is the Grand Slam Force in clubs, asking partner to bid seven with two of the top three honors in clubs. He must have club length and either the 7 of clubs, or the 6C, or both. For an honor, this is not unreasonable, but I do not think I ought to commit to a grand slam having never bid clubs. SNT must be better than 5D, though, since it puts a grand into the picture. What about 6C? That has to be wrong; partner will pass when clubs or spades are better.

If partner does not have support, I might lose a heart and a diamond before I get started. How about 50? Oddly, I think this should be forcing. I cannot have a two-suited hand because I doubled rather than bid 4C over the preempt. If I have just a one-suited hand with hearts, it must be so good that with partner's stated values (he jumped), then slam must be on. With good, but not quite this awesome a hand, I would have bid 4D immediately over the preempt. Therefore, I must have either a flexible hand that is not sure about the strain, or a huge hand that wants partner to further describe his hand (at the five-level!)

If 5D is forcing, is it right? It seems right to bid hearts now. If partner bids spades or rebids clubs, at least I have some confidence that we are in the right suit. I am still concerned, however, about the play of the hand at hearts. Can I see two quick losers if partner does not have the SNT? Partner has stated that he thinks that clubs ought to be trumps. I cannot tell, and I do not think that I shall ever be able to decide intelligently at this level, so I think it is best to follow partner's lead. I rank the choices, adding 6NT and 7NT, which, at least, are possible guesses as to the final contract:

SNT 10 6D 2
50 7 5NT 2
6C 6 6NT 1
50 5 Pass 0

The American Contract Bridge League Nationals will be held the Pasadena Civic Center March 20-29. There will be nice gifts for everyone and for all novices. Caddies are needed during the week; the pay is $40 per day (two four-hour sessions.) The Caltech Bridge Club meets every Monday night at 7:15 in the Red Ball Room. The club is looking for new players every Tuesday night in Jorgenson Hall at 8:15. Everybody is welcome; call Jeff Goldsmith at x2818 for details.

Unprecedented Computer.

Unprecedented Price.

$4,926

*NeXTstation Color with 16MB RAM, 160MB Hard Disk, 17" Color Monitor, Sound Box, and Starting Point Kit. Price includes shipping, handling and tax.

Other configurations also available.

Go ahead. Be impulsive. We promise, you'll save a few thousand dollars in the process. Because if you make your purchase by March 20th, you'll get the NeXTstation Color™ computer with 17-inch Color Display - for nearly half off the list price. Of course, you'll get everything that makes the NeXTstation Color™ such a tremendous buy in the first place:

• 15 MIPS Motorola 68040 microprocessor
• Motorola 56001 DSP chip
• 16 bit (near photograph quality) Color System
• 17" MegaPixel Color Display
• 105MB Hard Disk Drive
• 16MB RAM - Expandable to 128MB
• 7 Built-in Ports: 2 Ethernet, 2 Serial, SCSI, DSP, & Printer
• CD Quality Sound - Mic & Headphone Jacks Built-in
• 3.5" 2.88MB Floppy Disk Drive, DOS Compatible
• Software Release 2.1 - Free Upgrade to 3.0
• 30 Bundled Applications including Mathematica 2.0 and TeX

So if your first impulse is to come in and buy a NeXTstation™ for yourself, don't fight it. You're just genetically inclined to recognize an incredible offer. But remember, you only have until March 20th.

Add a NeXT 400 dpi Laser Printer for $559, upgrade to a 21" Color Monitor for $924, or do both for $1399

WHY YOU SHOULD START PLANNING FOR RETIREMENT WITH YOUR EYES CLOSED.

For retirement to be the time of your life, you have to dream a little—about the things you’ve always wanted to do: travel, explore, start a business. Just imagine...

With a dream and a plan, you can make it happen. Your pension and Social Security should provide a good basic retirement income, but what about all those extras that make your dreams possible? You’ll probably need some additional savings.

THE DREAM IS YOUR OWN.
WE CAN HELP YOU WITH THE PLAN.

TIAA-CREF Supplemental Retirement Annuities (SRAs), tax-deferred annuities for people like you in education and research, are a good way to save for retirement and save on taxes now. SRAs are easy—you make contributions through your institution before your taxes are calculated, so you pay less tax now.

You pay no tax on your SRA contributions and earnings until you receive them as income. And saving regularly means your contributions and their earnings can add up quickly.

What else makes SRAs so special? A broad range of allocation choices, from the safety of TIAA to the investment accounts of CREF’s variable annuity; no sales charges; a variety of ways to receive income, including annuities, payments over a fixed period, or cash. You may also be able to borrow against your SRA accumulation before you retire.*

All this, plus the top investment management that has helped make TIAA-CREF the largest retirement system in the country.

So start dreaming and planning for the time of your life. Because the sooner you start your SRA, the greater your savings and your retirement will be.

**2/21 The victim states that nine books are missing from his office in the Health Sciences building. The books were believed to be taken between 9:30 PM on 2/20 and 11:00 PM on 2/21. Value: $450
2/26 At 9:30 AM Caltech security noticed a suspect drive into the N. Lura parking lot and park next to a car. The suspect then exited his vehicle and removed the hubcap of the car he parked next to. Security approached him and asked what he was doing. The suspect stated that he wasn’t doing anything. Security then informed the suspect that he was placing him under arrest for trespassing and theft. The suspect then tried to leave and security had to use force to detain the suspect. The Pasadena police were called in to transport the suspect to jail. The owner of the vandalized car was called in to file a report with the Pasadena police.

Total value: $450

*Depending upon your institution’s plan and the state you live in, CREF annuities are distributed by TIAA-CREF Individual & Institutional Services, Inc. For more complete information, including charges and expenses, call 1-800-842-2733. Ex. 6016.

NOTICES
Board of Control Representatives on Large Selection Results - The board has chosen the following people to fill the two Representative seats: Robert F. Everson, Jr. and Daniel M. Bishop. The excellence of candidates made our choice very difficult and we wish to thank everyone who participated in this selection process. Congratulations to the new Board members! If you have any questions, please contact Michael Stout at 378-9643, or leave a message x3620.

A first-year student at a GeorgiaTech Medical School in a MD/PhD Program will be in Room 25 of the Student Activities Center on Tuesday, March 10, 1992 at 7:30 p.m to talk about last year’s experiences and advice to students in related fields. All undergraduates welcome. Refreshments will be served.

GRADUATING STUDENTS
Will you have a job at graduation?

FACTS:
• On-campus interviews will be over in April.
• The job market is slow this year. Fewer offers have been made by employers.
• Many jobs will be offered by smaller companies this year, while larger corporations layoff workers.

SOLUTIONS:
• Career counselors can help you by designing a personalized job search plan.
• Comprehensive directories of companies are available for your use.
• Job listings from many companies are displayed on our own job network, or available in notebooks in the office.

WE HOPE TO SEE YOU AT THE CAREER DEVELOPMENT CENTER
