PASADENA, CALIFORNIA

FRIDAY, JUNE 6, 1997

President Everhart, final thoughts

BY ERIK STREED

Tom Everhart, President of Caltech, is leaving the Institute. We spoke with him for a bit Thursday afternoon to discuss some of his thoughts and reflections on Caltech.

Thomas Everhart: Professor of Applied Physics and Electrical Engineering, takes his steak broiled medium well, answers his own email, and is retiring after 10 years as the president of Caltech. He hands Caltech, the institution he has described in his own words as "a national treasure," off to MIT biologist David Baltimore. This transition follows the addition of Bi 1 to the undergraduate core and continues Caltech's turn towards the biological sciences.

Caltech tried to recruit Everhart in the late 1970's but instead he went to Cornell Uni-

versity in Ithaca, New York. However, Everhart would eventually come to Caltech in the fall of 1987, leaving his Chancellorship (sp?) at the University of Illinois at Urbana-Champaign (sp?) (UIUC) to take on the role of President. He had the typical first impressions of Caltech: a small, focused, excellent institution. In addition to this he was struck by the politeness of both the students and the faculty. Over the years he has come to believe that Caltech's small size and personal aspects breed humility and respect among the members of the community. During his time here he has watched Caltech's sense of community grow to include and appreciate the vital but often unsung staff.

The President of Caltech is the primary fundraiser for the school. At UIUC, Everhart oversaw the creation of a Master Plan which outlined over \$1 billion

dollars in new construction. When he left for Caltech, over 60% of the funding had been secured. The bug followed him and during his administration Caltech has undergone its third building boom. A Master Plan which adds several more buildings along the newly created Rose Walk (it's the thing between Avery and Moore Labs) outlines the expansion of the Caltech campus north to Del Mar Boulevard. Under Everhart, the first big fund-raising push in the past two decades occurred. The Campaign for Caltech, the Second Century of Discovery, exceeded its \$350 million goal and raised \$394 million. After the success of this special fund-raising event, Caltech's annual fund-raising jumped from \$40 million to \$60 million a year. This money helped renovate many of the labs and buildings at Caltech, in addition to financing several new buildings.

Frosh-Soph Battle For Supremacy

BY MICHAEL SHUMWAY

Caltech has probably taught you that academics and a clean suit will get you a job in the real world if you get out of here.* Unfortunately, it is my responsibility to reveal the truth. Brains don't matter. Being bigger and stronger will open the doors to becoming the famous and filthy rich person you are aspiring to be.

So to speed things up in our natural selection society, TODAY will be a battle to the death between the freshmen and sophomore classes. It will be a day of celebration and also

a day of sorrow. The victors will advance in status to either sophomore or junior depending on which side wins. For the side which loses there will be a ceremony in the evening where their remains will be cremated in the Ricketts House Pot.

What is this event you ask? It is called TOWEO (pronounced tow-e-o). Philosophers disagree between two separate origins for this event. Many believe it originates from the Greek word otheos meaning more dangerous than running with scissors. While others believe the word is an ac-

ronym for the Roman Tug Of War-EO which routinely sold out colosseums faster than the gladiator battles.

The contest will begin when classes end. So at 5 p.m. on the lawn between the Ath and the South Houses the battle will commence. Come to cheer and come prepared to mourn. See the survival of the fittest play out in front of you. Find out which class will be successful in the real world. Come participate or come to watch what is being billed as The Spectacle of the Century: TOWEO.

*Note: This may not be the case for those in Ma or Ay.

Election Results

The official winners of the election held last Monday are:

BoC Secretary	Alex Ihler
Senior Class President	Myfanwy Callahan
Senior Class Secretary/Treasurer	Kiran Shekar
Junior Class President	Aimee Pierce
Junior Class Secretary/Treasurer	NO

Handling the NO is the ASCIT BoD's problem, unless 20% of the juniors-to-be submit a petition to hold a new election. (Wait until next year, 'kay?)

Stop reading here.

Okay, if you *must* have the numbers, here we go: 243 valid votes were cast overall. There was one error point for the BoC Secretary election alone (it was on one of the "other" ballots) and no error points for the senior or junior class elections. (This is a Good Thing.) 88 votes were cast for senior class offices, and 71 for junior class offices.

Absolute majority is defined as greater than half the correctly-cast, non-abstaining votes plus half the error. A candidate must receive absolute majority to win. The wacky details of this whole thing are laid out in the bylaws, Article 8, Section 6 - if you're reading this section, you might as well read that too.

Each successive line represents a separate redistribution, as described in Article 8.

BoC Secretary:

Bradley	Ihler	Yeh	Write-ins	NO	Abstain	Abs.Maj.
84	102	34	4	9	10	118
86	102	35	--	--	20	113
91	109	--	1	--	42	102

Senior Class President:

Callahan	Stofer	Chen	Rodriguez	Wong	NO	Abstain	Abs.Maj.	
47	10	13	4		10	4	0	45

Senior Class Secretary/Treasurer:

Zheng	Shekar	Nakada	NO	Write-in	Abstain	Abs.Maj.
24	36	18	5	0	5	42
24	36	18	--	0	10	40
26	40	--	--	1	21	34

Junior Class President:

Pierce	Astle	NO	Abstain	Abs.Maj.
34	25	7	5	34

Junior Class Secretary/Treasurer:

Dullard	Write-in	NO	Abstain	Abs.Maj.
28	1	34	8	32

Respectfully submitted,

Nicholas Breen, ASCIT Elections Chairman

Whas Dis Ting Called a Budget?

BY BALDEEP SADHAL

In case you haven't noticed, the ASCIT Board of Directors (BoD) made a budget a little while ago. It's one of those things we like to do yearly. No doubt you've read it already. "What? You don't find three pages of numbers exciting? You don't belong at Tech!" But anyway, we're spending your money—make sure we aren't spending it on live adult entertainment (we get that for free anyway) or rehab for the IHC. In case you haven't read it, go ahead and check it out on the web (<http://www.cco.caltech.edu/~ascit/treasurer/budget.html>) or just look for it in your friendly neighborhood undergraduate house lounge.

The first things you might notice about the new budget are the generally smaller publication salaries. The Totem's editors receive \$150 (\$100 plus a \$50 bonus contingent on satisfactory completion of duties) total for their services, as compared to the \$200 they received last year. The little t editors will receive \$600 (\$500 plus a \$100 bonus), which is a significant cut when compared with the actual total payment of \$2 000 to last year's little t editors. The Big T editor(s) are budgeted to receive a total of \$1 000 (\$800 plus a \$200 bonus), the same total amount as last year. The BoD feels that these amounts

are fair compensation for performing these various editorial duties. The general decrease in salaries for editors reflects the philosophy of this year's BoD that payment to editors should be more of thanks than actual payment for duties performed.

Ah, but you're wondering, "What about those elected BoD members that get paid for putting out the UROH and the CLUE?" For some reason, BoD members are somewhat hesitant to blatantly and gratuitously take advantage of the student body by giving ourselves five digit salaries. Because of our affliction, we're paying elected BoD members the grand total of zero for these two publications. (You were expecting \$19.95, weren't you?) Previously, the CLUE editor received \$500 and the UROH editor received \$100 for putting out their respective publications; this year they receive nothing (muhahahah). BoD members that edit other publications will still be eligible for those salaries.

We have added one position to the paid salary role, and that is the position of bookkeeper. ASCIT has hired a bookkeeper to make sure that we keep our books straight, to keep track of our financial records and to ensure a continuous control of finances from year to year. (Besides, the legal maneuverings necessary to move funds between our

Cayman Islands holding corporation and our various Swiss accounts and laundering fronts is often more trouble than John Lin can handle alone.)

There are other significant changes in the budget that fall under the category of miscellaneous operations. Firstly though we have not changed our support of the Coffeehouse, and to that end we have allotted \$1000 to be used by that establishment serving helluvalot-better-than-TFM food. The van fund was eliminated, as it seemed we would no longer be operating ye olde ASCIT van. In the event that we do decide to begin operating the van again, ASCIT has sufficient discretionary funds to cover the difference. Our social director has shifted her funds around so that we may spend on the rather popular SUDDS (Supplementary Undergraduate Doughnut Distribution Service) every term. Miscellaneous adjustments have been made in the funding of several special events and clubs (clubs! pick up your checks!), and I won't list them to avoid killing you acute and intense boredom.

If you have any questions, come to a BoD meeting (SAC 64, 10:30pm, every Monday night), send us email (ascit@cco.caltech.edu) or post on the newsgroup (caltech.ascit). Thanks for taking the time to read this!

Excom Minutes

ASCIT Excomm Minutes (Now in Plural!) 6-1-97 Situation: Several election statements for the June 2 elections were not printed in the May 30 Tech, some due to confusion about deadlines.

Members present: Myfanwy Callahan (chair), Brandon VandeBrake (secretary), Joe Carroll, Michelle Miller, Steve Van Hooser, Mic Westcoat Others present: Mike Astle, Nicholas Breen

Meeting starts: 11:06 pm. In the spirit of our previous meeting, Kohl is referred to as a ditz. Mike explains how the confusion came about. Someone calls Kohl a dope. The packets of statements (which were next to the election boxes on Monday) are displayed and it is proposed that the election be held as scheduled as the packets fulfill Article VIII, sec 1. Mic asks that it be noted that these statements do not count as campaign materials, which are prohibited in rooms where voting is taking place. Brandon complains about the length of the meeting, which is generally agreed to be the fault of the airhead known as the

ASCIT President. A vote is taken and we decide to hold the election as scheduled 5 - 0 (with Myfanwy abstaining due to her candidacy for Senior Class President.) Meeting adjourned: 11:21 pm.

Respectfully submitted,
Brandon VandeBrake

(just kidding, Kohl)

Dean's Corner

Dear Seniors and the rest of you...

by Jean-Paul Revel

friends of the last four years, with whom you have toiled, worked, complained, suffered, played. Lived, in a word.

I just signed the permission to fire the cannon, so it is clear that the ceremony will take place. But then you may not be Joe graduate. Your fate may be more like that of Dave Ho, alum, this year's Commencement Speaker, who preceded you on the Court of Man some years back. Maybe you too will be back in 20 years to give the 2016-17 Commencement speech. I am sure that David Ho was not thinking about that when he graduated...

So what else to say to you at this time? How to convey to you the stuff we fogies have learned the hard way and which we hope will come easy to you?

Why this continuing hope that our parents and teachers had for us, and which, as all youth, we heard only through one ear, confident that we could, etc. . . .

But then, real life is the true master, and being knocked about is the only teacher, and that only if we are capable of listening without self-pity. But all of us elders, your parents and your Profs, wish that the road will be smooth for you.

Carry with you the spirit of Tech. Carry with you the energy to work hard. Carry with you the deter-

mination to face any and all problems, just as you faced your interminable homeworks and the flood of information that we tried to pour into you.

Carry with you the spirit of Tech in the form of the Honor system. Not only in terms of doing nothing to take advantage of another Techer, but in terms of honesty, truthfulness, analysis of both your place, needs and beliefs and of the other people's attitudes.

Walk a few miles in their shoes, along their road, inform yourself about their circumstances, from their point of view, not just yours, before deciding matters which will affect their fate.

Try to understand where others come from, both in work and personal relationships. I know it is hard to do, and most of us fail at it in one way or the other at one time or another. But you'll sleep better at night if you have really been attentive.

Guys and Gals, it is important that you realize and believe in equality, while recognizing physiological differences. Your girl or boy friends, spouse or significant others also have desires, ambitions, the same will and need to succeed that you have. Make room in your lives to allow them to bloom and achieve what they are capable of.

In a relationship there is often an alpha and a beta who takes the back seat. Well, even as the beta, don't minimize your goals, don't think that you'll be happy whatever

happens; and you alpha, give beta a place to flourish. You and your soulmate have to be able to talk to each other even about hard embarrassing, bothersome things. Maybe the Tech experience will be valuable since it will have given you much more intimate access and exchanges than most people have had chance to experience.

This is a momentous time, both for you as you embark on your road through adulthood, and for the Institute. We are losing our Vice President for Student Affairs, now that Gary Lorden is returning to his Math. It is an improbable occasion, since he has served the students needs at the Institute for so long. At a party to honor his work just a couple of days ago, the lounge in Avery was dedicated to him as a small token of recognition.

It is Gary who molded Avery House to complement the other houses and bring together Faculty and Students. He did much to make Student Affairs a cohesive and integrated group, where individual offices each specializing in particular services for the students, are able to work in unison.

All through that time and before, while he was Dean and before that yet, Gary, a Techer himself, did much in support of the students here. A grand job.

Another person who will be missed is the genial Mosh, the king of Steele House and of the byways, the tracks and bushwhacks of the San Gabriel mountains, that other mathematician, our David Wales. All of you have profited from his hospitality, have marvelled at his low key enthusiasms, at his wide welcoming smile. He has been working hard in lining up Faculty as House Associ-

ates, has organized many outings, and occasions for students and faculty to get together in relaxed surroundings, providing the opportunity to learn from, and enjoy a variety of people. Thanks Mosh, for the sonorous explorations of the Steele House Organ and for all the work you have done and the friendship you have spread to us all.

Finally, as I commented before, we will also be inaugurating a new president next fall. Thanks Tom, for the leadership you provided in the last 10 years. It seems like a day.

I remember his solemn inauguration, with the Invocation delivered by his daughter. How swiftly these years have passed, and how much has happened! Some two thousand or so new undergrad alumni, a new house, I mean a house in a different mold, several new labs, a new Gym, a large fund raising campaign, a major reorganization of the administrative side of things many other achievements which may not bear fruit until the future.

Tom always showed intense interest in the students and their welfare. Along with Gary Lorden and Dave Wales, he took time from his busy schedule to join the Frosh at Camp Fox, addressing the new inductees.

So thanks Tom and Doris, thanks for the good times and the wise counsel. Thanks Gary and Dave. Thanks also to all of you, graduates of this "noble CIT . . ." thanks all for having been here and illuminated our lives.

Ave atque Vale . . .

A bientôt,

J.P. Revel

MAXTECH YESBOOK

We Took The "NO" out of Notebook

- ✓ Intel Pentium processor, 256KB PB cache
- ✓ Max. 40 MB RAM (Use standard DIMM)
- ✓ 8X CD-ROM Drive (6X for Dual Scan)
- ✓ 1.44 MB floppy drive
- ✓ PCMCIA Type 4 slot
- ✓ Removable HD (Up to 2 GB)
- ✓ 16-bit sound card, 2 speakers & mic
- ✓ PCI accelerator w/2 MB video RAM
- ✓ 11.3" DS or Active 800X600 display
- ✓ Touch pad & Infra-red port
- ✓ Windows 95 keyboard
- ✓ Rechargeable NiMH battery
- ✓ 7 lbs. with battery
- ✓ Composite TV video output
- ✓ Universal AC adapter & deluxe carrying bag

ASCIT

Minutes of the ASCIT BoD Meeting, 2 June 1997

Present (at some point): BoD, Mic Westcoat, Nicholas Breen, Mason Porter

(This week Megatron = Mike W. and Optimus Prime = Mike A.)

Meeting called to order at 22:50. Kiran immediately removes his trousers. Word to your mother.

Dealing With Guests

Mic - Presents the updated compensation schedule for the Tech. All mention of bonuses has been removed and the commission percentages changed back to pre-WWII levels. Mic - who is only a man, and not a god - enjoys rock climbing, water sports, and romantic walks on the beach. The BoD votes 7-0-0 to approve the proposal, biotch.

Mason - Requests the Totem publication budget and my compadre John "Dr. Funkenstein" Lin cuts him a check.

Nicholas - Needs people to help tabulate the results of the election. Resolving elections copier account. Reveals that he is in fact the Original Gangsta predicted by long dead prophets.

Officer Reports

Baldeep (a.k.a. Q-Tip) - No news from the Sherman Fairchild Library.

An article about the new ASCIT budget will run in the Tech this week.

Kiran - (a.k.a. Pepto-B) Working on getting the vehicle formerly known as the ASCIT van in the same status as the new fly-ass Student Affairs Van (perfect for all your drive by killing needs). No news about student access to Moore conference rooms.

Adrienne (a.k.a. Lady J) - The ASCIT formal is over its projected cost by several thousand dollars. It did not receive funding from some campus organizations that have been more financially helpful in the past. We spent about \$50 per person who went to the formal (150 folks). ASCIT Social Team still has enough budgeted for scheduled events.

Megatron (a.k.a. Galvatron) - Nominate professors and T.A.'s for ASCIT teaching awards. Forms will be available soon in a house near you (except Fleming, just because). Submit CLUE reviews or Megatron will personally jack your sorry ass. The CLUE program may not be updated this year because it is just that good. Several ideas are being thrown around for restructuring Winnett. It is possible that the Book Store will expand into none of, some of, or all of the first floor and other entities will have to relocate. If you have any input, this committee

Minutes

they're all new minutes

has its last meeting for the year at (insert time date place here).

Lori (a.k.a. Mush Mouth) - The Tech is asking the IHC to find out if the houses want Tech distribution stands. There will be an open forum to discuss alcohol related issues on some date, at some time, somewhere. (the first person on the BoD to supply this info gets a prize!)

John (a.k.a. MC Dough Boy) - Get your club money by Friday (6/6) or lose it forever. We need a little t business manager real bad. If you've got some time over the summer please let ASCIT know (ascit@cco). The last meeting for the Caltech Ia committee is this week. Lori is trying to put together a big women's meeting and would like to make it part of the program.

Optimus Prime (a.k.a. 18 Wheels of Plasma Welding Robotic Death) - There were some serious problems with the election due to a deadline error but the Executive Committee thinks that things are OK. The bylaws have been fully updated and the version on the web should be taken as the authoritative version (<http://www.cco.caltech.edu/~ascit/documents/Bylaws.html>). The roster of corporate officers has also been updated (<http://www.cco.caltech.edu/~ascit/officers/OfficersRoster.html>).

Maria (a.k.a. The Notorious BoC) - I got more rhymes than those other guys do, they're just a monkey, I'm

the whole damn zoo. The lights are blinking, I'm thinking, it's all over when I go out drinking. Word to your moms, I came to drop bombs, I've got more lyrics than the Bible's got psalms.

Kohl (a.k.a. Kohlamite) - The ASCIT BoD is getting departing gifts for both President Everhart and Gary Lorden. If you don't settle down, I'm gonna put my clothes on.

Meeting adjourned at 12:30. Man that took a long time.

Respectfully submitted to all my homies,
D. Astle, ASCIT Secretary

IHC

Present: Lori (chair), Judy (secretary), Brett (Page), Steve (Lloyd), Marty (Blacker), Geoff (Ricketts), Geoff (Dabney), Shumway (Fleming), Jeremy (Ruddock), James (Avery), Mic (The Tech), Rickey (Big T), Nick (Ice Cream Consumer), Ryan (Ice Cream Consumer).

The agenda lists Lori has hooked us up with 2 lunches and 1 dinner. Lunch with Admissions is on Tuesday, Lunch with Helen from the Ombuds office on Friday and dinner with the Alcohol committee on Monday. You can all sleep better knowing that the house presidents are well fed.

Mic brings in a Tech dispenser and asks which presidents want them for their lounges. The one he shows

us has a Romy and Michele's High School Reunion advertisement on it. The dispensers are free, but you can't rip off the ad. The presidents say they'll ask their house, except Geoff (Ricketts) who says Ricketts will say they want one and they'll proceed to deface and destroy it. Mic also adds that "ASCIT Sucks." We offer him more ice cream and sympathy for having to deal with the evil organization.

Maria isn't here to collect BoC surveys, so we draw straws to see who has to find the ASCIT type and deliver the surveys to her. I lose.

The alcohol policy has been finalized. We will have student trained and paid bartenders. Each house will have a head bartender who will have to be 21. The head bartender will have a special training. General 21-year old+ bartenders will have a less intense training in order to be allowed to serve drinks at parties. The houses will be expected to pay for 1/2 of the cost of the bartenders at the party ~\$50-70/term. Thursday at 4:00 there was an alcohol review committee meeting and I hope you brought your comments and your spirits.

Next Ricky takes our picture for the Big T. Robert Millikan, George Hale, and Arthur Noyes crash the photo session.

We end the meeting with a closed session.

Happiness and Sunshine and the end of classes!

Respectfully Submitted,
Judy Green

THE CALIFORNIA TECH

When I'm not giving mouth-to-mouth or consoling a fellow lifeguard with sun-damaged hair, I worry about real-life things like getting osteoporosis when I'm older. You know, men and women are both at risk when they don't get enough calcium. That's why I drink lots of milk now. 1%. And depending on how much I drink, I wait a half hour before saving a life.

BY IMA PLAYER

DOUBLE DIPPING

Q. I'm a student at PCC and I am dating 7 guys from Caltech. They happen to come from different Houses. How can I keep them from finding out at such a small school?

A. First of all, we'd all like to thank you for evening out the ratio a bit. I'm sure everyone can appreciate that gesture. Furthermore, I don't think you really have to worry about your boyfriends ever finding out. No one ever actually talks to people from other Houses except about obscure mathematical proofs, so there is no danger of the gossip being spread from House to House. Just make sure that you take your dates off campus when you do go out. They will even thank you for it. If you manage your time right you can even get a free meal every day of the week!

IGNORED

Q. I hear that the average man loses his virginity by the time he is seventeen. I am 19 and still a virgin. Does that mean that I am above or below average?

A. You are decidedly *below* average in that respect, but you are *above* reproach. The main reason you don't have a girlfriend is that you haven't yet mastered persistence. Stop reading the BFD, and start talking to real women. Take a look around next time Rotation comes to your House. There are always a few upperclassmen and many frosh who eagerly mob the women. If you're careful and use your head instead of your ego, you'll soon attain the preferred spot as the favorite of the mob. After a week or two of persistent pressure, you too can have a girlfriend.

GETTING SHAFTED

Q. I have been invited on a date by this hot guy I have had my eyes on for weeks, but I have three differential equations to solve by tomorrow involving homogeneous boundaries at the origin and $x=1$ for the derivative of the function. Should I punt my work and go out for a night on the town, or should I sit down for several hours and finish my problem set?

A. Going out and enjoying yourself is sometimes the best way not to get stressed about your work so you can be productive again. Also, having a gorgeous man ask you out is an opportunity you might regret refusing. Go ahead and take some time off, but come back and start your work again. For the differential equations I suggest you try a Fourier cosine transform. A stiff coffee or the Blacker Coke machine will provide you with the necessary caffeine to keep you going. Good luck!

WILTED CARROTS

Q. Eating TFM has really reduced my sex drive. My girlfriend is starting to notice. Is there any way I can regain my virility?

A. TFM doesn't serve the best entrees for your problem. Instead of going for the usual burger and fries, you should take a walk over to the vegetarian bar. Some students have taken advantage of this well-kept secret for years. Try asparagus or zucchini for a change, and always take the opportunity to eat fresh uncut carrots. For dessert, rather than flaccid jello or pudding, an orange push-pop is just the thing to restore your vigor. Just take the time to change your diet and you'll be back in shape in no time.

BY THE REAL EXPERT: GOD

Aries (MARCH 20 - APRIL 19)
It sucks to be you today. You should have stayed in bed. You are about to have a terrible calamity enter your life. However, I find it so amusing that I don't want to tell you about it beforehand and spoil the fun. So just go about your day as you normally would, and remember to wear clean underwear.
Lucky days: 33rd, 34th

Taurus (APRIL 20 - MAY 19)
Ever stop to think and then forget to start again? If you weren't such a flake, you would have noticed by now that there is someone you know who really really likes you, and has been lusting after you for ages. Hint: this person is probably the same person who "accidentally" stuck their tongue in your mouth yesterday.
Lucky day: yesterday

Gemini (MAY 20 - JUNE 20)
Today you will meet a gorgeous, sexy plumber who will plunge the two of you into the ultimate pipe dream! By the end of the day, you will be gushing with emotions for which the flow will not cease until you have been completely drained. However, by next week, your relationship will spring a leak, and you will be flooded by anger and resentment.
Lucky days: the next 7

Cancer (JUNE 21 - JULY 21)
Man, you sure are ugly! I may be God, but I make mistakes occasionally as you so clearly demonstrate. Your day will probably improve if you go around today with a paper bag over your head. In an attempt to try to make the earth more beautiful, I'll have you run over by a Daihatsu containing several donut-munching security guards tomorrow.
Lucky days: Not tomorrow

Leo (JULY 22 - AUGUST 22)
Ever wonder why the rest of the world hasn't acknowledged your brilliance? They are, of course, all ignorant fools. You should take advantage of the fact that you are the most attractive, most intelligent creature ever to

BEDSIDE HOROSCOPE

June

grace the face of the earth. Why don't you go out and write a Cosmo quiz and claim to be God and try to get credit for everything?
Lucky days: Every day!

Virgo (AUGUST 23 - SEPTEMBER 21)
Today is your lucky day! A curvaceous, voluptuous, attractive Taurus will try to sweep you off your feet. Make sure you wear heavy shoes. However, you should wear stiletto heels if this Taurus happens to be a Tech editor. Tech editors are generally not only the best-looking, but also the most available people on campus. They tend to be fairly stubborn, but they come pretty cheaply.
Lucky days: until your money runs out
From Cap to Taurus.

Libra (SEPTEMBER 22 - OCTOBER 22)
You are about to be accosted by a tall, dark guy wearing a glow-in-the-dark periodic table t-shirt. He will show you his 48-GX HP calculator and offer to show you what a stud he is at performing the calculations on your next math assignment. He will proceed to offer you a transistor as a token of his love. Beware of geeks bearing gifts.
Lucky days: could possibly be today... then again, maybe not

Scorpio (OCTOBER 23 - NOVEMBER 21)
In a short while, you will be bitten by a black widow spider that escaped from the attic of the south houses and crawled down your shirt while you weren't looking. Remember, the phone number for medical emergencies is x5000. While you are hospitalized, the building you are in will catch on fire following an devastating earthquake that results in a 3 ton concrete piece of ceiling falling on your stomach. The fallen patch of ceiling will have 46 more black widow spiders on top of it, every one of which will proceed to bite you out of fear of the hot flames rapidly approaching your bed.
Lucky days: Grim's Reaping Funeral Home is having sales on the 12th and 13th

Sagittarius (NOVEMBER 22 - DECEMBER 20)
Are you aware of your cocaine addiction?

Remember, denial is one of the most telling signs of addiction. Here's a tip for today: don't rob Bank of America... pick a bank with lower security. For your information, the cheapest dealer on campus happens to work for the Residence Life Office.
Lucky day: The day you happen to drop by the Residence Life Office to pick up your final exam support kit.

Capricorn (DECEMBER 21 - JANUARY 19)
Love is about to play an important role in your life. You will enter a new stage in a relationship. Just remember, love can sometimes be expensive. Nonetheless, it just might be that special time to spend some extra money on that special person you are after. The going rate is about \$200 per hour or \$1000 for the night. Don't pass up a once in a lifetime opportunity.
Lucky days: The day your pay check comes in.

Aquarius (JANUARY 20 - FEBRUARY 17)
The planets are aligned in your favor. It is the perfect time to do that astronomy lab you have been putting off all term (there is also the fact that this is the last day of class). Since you are such a flake you should also talk to your TA's about those old assignments never turned in and hope for some more E's. A good thing to bribe you TA with would be purple fruit loops.
Lucky Day: Graduation

Pisces (FEBRUARY 18 - MARCH 19)
In a past life you were once Inigo Jones, the great English architect. You should watch out for fluorescent green mutant crayfish invading Milikan Pond. Tomorrow you will inherit a twenty million dollar gold plated cheese slicer. You hamster will become infected by the Ebola virus and die. Your life as you know it will soon cease to exist, being replaced with the the terrifying feeling of falling to your doom engulfed in a fiery inferno.
Lucky days: Friday 13th

God was born in Portland, Oregon in 1893 and has accurately predicted the Northridge earthquake in 1993, Michael Jackson and Lisa Marie Presley's separation in 1996, Fox Mulder's death on the X-Files season finale in 1997, and the breakup of the United States of America into 14 fascist nations in 2003.

COSMO TEST

Is He a Solar Cell? an RPN? or a TI-92?

Two top calculator stylists tell you how to find out.

Winter: "It's old and it's cheap. The guy who owns this calculator is obviously not concerned with performance. He'll give you last night's TFM dessert for a Valentine's day gift. Not worth your time."

Robin: "The 39¢ he spent on this calculator is more than he'll ever spend on you. He probably wears used corduroys."

Winter: "This guy just can't leave his calculator at home. He will spend more time with his calculator than with you. He probably sleeps with it at night."

Robin: "A calculator watch is a sign of an obsessed mind. Watch out. When you break up with him, he will stalk you. Avoid him at all costs."

Winter: "This calculator is so complicated, you may need another as a backup for a few months. The person who owns it delights in the details."

Robin: "Expensive, yet behind the times. It can't live up to the newest model. The guy who owns it has probably seen better times. Watch out — he may be trying to be someone he's not."

Winter: "Guys with solar calculators are closet Eco-Weenies. He will recycle glass shards from monitors dropped off the roof. Don't date him unless you enjoy couscous."

Robin: "Nothing more, nothing less than he needs. This guy will be a perfect gentleman. He'll open doors for you and buy you flowers when you've had a bad day."

Winter: "This HP has a sense of fun. You can program it to play Pong. The guy who owns it will take you Rollerblading on the beach and hang out in togas."

Robin: "Don't trust anyone who uses an RPN calculator. Not only are they impossible to understand, Reverse Polish people are known to ask for strange sexual favors."

Winter: "Has he been stuck in the attic since the seventies? Clunky buttons, square build: this guy will wear plaid with stripes to your best friend's wedding."

Robin: "Since the last time he spent money on a calculator was in the seventies, he's probably got plenty of money. Whether he'll spend it on you is another story."

GENITAL SHORTCOMINGS

field unit. The tongue can probe over a large area, or it can contract to a point and dance on your skin and every nook and cranny (especially your cranny!). A plus is that it self-lubricates not with some thick bitter milky discharge, but warm, sweet, and wonderfully coating but at the same time sensually scalding saliva.

What you can have your lover do is partake in oral submission at the same time as using their hands to provide maximum one-on-one contact. Again, don't forget the inside of thigh, and other highly erogenous zones such as the aureola (you can get a wonderful tantalizing feeling by having your lover tease your nipples into thinking they were going to get in on the action).

When nothing else works

However, some tongues just weren't made for this kind of action, so make sure that your tongue is of good length as well. (If your boyfriend or husband is not well hung, and his tongue isn't too versatile, and he's an amputee at the wrists, then you must really love this guy, so you should invest in a vibrator or a dildo. We can recommend one great value for under \$20, available at La Sex Shoppe in Pasadena. It's about four inches in girth, and fourteen inches in length and it's called the Destroyer. With this bad boy, you get more bang volume for your buck than any other dildo on the market.)

Or you can be a lesbian.

Coping With Your Man's Small Penis:

"I thought I'd have to give up sex."

One woman's story, told by Judy Cum

Dick and I met on a skydiving trip a few months ago. We ended up jump-ing together, but all I remembered from the fall was his gorgeous green eyes. Two weeks later, we'd seen a lot of each other ... but not enough for my taste. I invited him to my apartment and, after a romantic dinner, we began undressing each other in the bedroom. When I took off his BVDs, I thought for a moment that I'd gotten stuck in a bad takeoff of *The Crying Game*. His penis was about the width of my pinky! He must've noticed the look on my face, because he gave me this little knowing smile. That smile was right — Dick's creativity more than made up for his small size.

Technical Tools

How to order them without embarrassment.

How to use them without disappointment.

Today, you know that wanting the most from your tech life is natural and healthy. Look through the new Riveting Engineer's Gold Edition catalogue and discover a wide array of technical tools for giving you, by yourself, even greater pleasure.

Trust our experience. Techers have delighted in the Riveting Collection for more than 75 years. We select only the finest tools from around the world—tools consistent with the philosophy of our advisory board of professors in tech life and anal rape.

Rely on our 100% three-way Guarantee. If you've been reluctant to purchase technical tools though the mail, consider the Riveting Guarantee:

1. We guarantee your privacy. Everything we ship is plainly and

securely wrapped with no clue as to whether it's a calculator, slide rule, pocket protector, etc. All transactions are strictly confidential, and we never sell, rent, or trade names.

2. We guarantee your satisfaction. If a tool is unsatisfactory, simply return it to us for replacement or refund within 69 days.

3. We guarantee that the tool you choose will keep giving you pleasure. Should the tool become limp or defective, just return it to us for a replacement.

Order today and see. The Riveting Gold Collection helps you turn good tech into great tech. Send for your catalogue now, and we'll apply its \$4.00 price to your first order.

You have nothing to lose and an entirely new world of enjoyment to gain.

The Rivetting Collection, Dept. F4769
P.O. Box 666, Virginiville, PA 13013-1234
Please send me, by first class mail, the Riveting Gold Edition Catalogue.
Enclosed is a check or money order for \$4.00, applied to my first purchase.
I am a teacher who wants some bad.

COSMO QUIZ

BY S. RASH

Would He Rather be Spending Time With His Computer?

When you and your guy have a romantic dinner at his place, do you sometimes catch him staring — at his computer? Find out if he'd rather be communing with microchips.

1 When he types, he

- a. Pounds on the keyboard.
- b. Types quickly and smoothly.
- c. Caresses the keys — and you sometimes think you hear him moan.

2 You hear him mumble in his sleep. He says:

- a. "But I always thought Poisson was fish . . ."
- b. "The Dean's on Krak."
- c. "cc -Ae -o foo foo.c | grep movl."

3 When you're making love, he calls out

- a. Your name.
- b. "Oh, God!"
- c. His computer's name. ("Oh, frappe! Compile me, baby!")

4 His "size obsession" has to do with

- a. Your breasts.

- b. How many marshmallows the guy next door can stuff in his mouth.

- c. His hard drive.

5 His idea of a hot date is

- a. Rollerblading in the SAC.
- b. Dinner and a movie.
- c. Sitting on the couch at ugs, coming up with new network routing algorithms.

6 For your birthday, he

- a. Bought you sexy lingerie and took the phone off the hook.
- b. Designed and put up a web page about you.
- c. Renamed his hard drive after you.

7 The book on his bedside table is

- a. *The Kama Sutra*.
- b. *Foundation's Edge*.
- c. *Numerical Recipes in C*.

8 When you mention that you'd like to meet his family, he

- a. Invites you home for a weekend.
- b. Pulls up each family member's web page, including his great-aunt's.
- c. Shows you pictures of and printouts

from every computer since his Apple II+.

9 When you rent a movie together, he picks

- a. *Terminator 2*.
- b. *Sneakers*.
- c. *2001* — and starts to drool and pant when he sees HAL.

10 You run across his diary and discover that

- a. He's thinking about upgrading his processor for "more performance."
- b. He sketches you when you're sleeping.
- c. It's entirely written in LISP.

Less than 16 points: Great Guy

Where did you find this guy? Sensitive caring, and a great lover — looks like a keeper!

16-23 points: On the Edge

Yes, he's starting to develop a hardware fetish, but he can be saved. Get him to a treatment center before he starts playing Nethack.

More than 23 points: Lost Cause

When you're making love, he's thinking only of caressing microchips. Ditch this loser. For a goodbye gift, get him undergarments that double as a mouse pad.

WHEN YOUR LOVER HAS A SMALL PENIS

BY JUDY CUM

Sometimes Mother Nature doesn't know best. But if your man is less than well-endowed, don't despair! Your love life can still be satisfying.

Let's face it: some things are just hard to see with the naked eye. But it's the nineties, and you shouldn't base a relationship on how well your man fills his jeans. So if your man doesn't pack a lot of sausage in the grill, here are some ways to make sure that your love lives are still rich and fascinating.

Sex, Brains, and Hands

There are only two real substitute to a penis when it comes to lovemaking. The first is, as everyone knows, someone's hands. Now, this doesn't mean that you should just lie sprawled on your bed fingering yourself wet while you scream out "I need a man! I need a man!" Masturbation is fine and dandy but isn't the same as a real Adonis grappling you with strong, powerful hands.

Now a tip for the guys would be to make sure that you probe around, and

don't forget about our old friend, the clitoris. Go open palm if you like, throw a little mixture into it. Don't for-

"The ability of the tongue to bend and wiggle far outclasses any pelvic deep field unit."

get to massage the inside of the thighs as well, since you're trying to bring utmost pleasure to your loved one, and if you're doing a good job, then her entire body should be one giant erogenous zone. And to the ladies, despite

all the hoopla about people not even knowing about your magic love knob, guys these days are pretty sex-starved to discover anything at all. So don't worry — if you've found the right guy, then you're in good hands already.

On the Tip of his Tongue

The other solution to having a small penis is to have a prehensile tongue. It's a known fact that a man with a short dick should have a creative tongue, and in almost all cases, will completely make up for any penile length at all. Try to see if your lover is dextrous enough with his tongue for oral sex. You'll see that he'll bring you to orgasm faster than you can say, "I wish I were a lesbian." The ability of the tongue to bend and wiggle far outclasses any pelvic deep
