Regulations issued for car repair lot

This year, due to the increased demand for repair space, the Car Repar Lot has been moved from behind the Student Shop (no affiliation whatsoever) to the parking lot behind Building T-3, and it has been enlarged from two to three spaces. During the past years numerous incidents of car "stripping" have occurred on campus. It was concluded that the slogans of those students who have been victims a rule should be passed prohibiting all dormitories to do repair work anywhere on campus even in the designated areas.

1. Purpose. Obvious.
2. Location: Southwest corner of the parking lot north of Building T-3.
3. Hours: From 7:30 a.m. to 7:00 p.m.
4. Size: There are spaces for three cars.
5. Duration: To be determined by Monitor or the Second Representative. Determining factors are extent of repairs and availability of space.

6. Key. A safety key, physical permission, and key for lock from the Monitor or the Second Representative. The names and room numbers of the Monitor or Second Representative are posted on their rooms.
7. To Stay: Some appearance of cleanliness and progress must be maintained.
8. To Leave: Key must be returned to the Monitor or Second Representative after the lot has been cleaned by you.
9. Cleaning Equipment: This will be provided for you.
10. Tools: Provided by you. If tools are taken from some campus shop, please return them in good, clean order. This makes it easier on the next person who wants to borrow equipment.
11. DONT:

"The Quiet One" will be shown Mon.

The Caltech Y will present the film, "The Quiet One," on Monday evening at 7:15 p.m. at the Y residence on 391 S. Holiston. This will be the first of a new series of programs planned for the future which will deal with racial relations.

The film is an award-winning study of the effects of discrimination on the life of a small Negro boy who is growing up in the slums of New York. This hour-long feature has been acclaimed by lawyers, psychologists, and social workers as one of the finest studies of its type.

Auto show offers rods, custom jobs

One of the largest collections of custom autos, excluding those on display at the third annual Interhouse Drive, will be at the Automobile Repair Lot has been moved to the west side of the campus. The show will be open daily from 9:00 a.m. to 6:00 p.m. from Nov. 16 to 18 at Los Angeles Pan-Pacific Auditorium. The autos on display will be made by manufacturers from the Pacific area, and will be made by manufacturers from the Pacific area, and will be seen in more than 200 cities.

The first fiberglass car will be displayed, the 1951 Lincoln Futura. A fiberglass car will be displayed, the 1951 Lincoln Futura. The car will be made by the Ford Motor Company, and will be seen in more than 200 cities.

1. Take your car out and put in somebody else's without permission.
2. Leave the chain down unless absolutely necessary.
3. Think that working on your car near the student car lot is permissible.
11. DO: Use waste oils and scrap cars provided.
President’s Message...

Next week is the big week of our 1952 football season with the broncs and Pomarion on Thursday and the Caltech-Oxy football game on Friday night. As always, this is our big game with the tradition and quality of many years behind it. In the past the rivalry has built up to such an extent that there has been inter-school raiding at a destructive nature throughout the week preceding the game. The rivalry is very good, the more the better; but instead of raiding Oxy and causing a lot of property damage that our student body must pay for, use your spirit and enthusiasm to collect boxes for the broncs and to cheer and yell at the Pomarion and at the game.

The Board of Directors asks your support.

JOHN D. GEE,
A.S.C.T., President

Secretary’s report...

In the special balloting held last Thursday, October 30, Ron Ratney was elected editor of the California Tech. The student body extends good wishes to Ron in his new duties. Because of his coming into the military service, Bob Hollbrook, Co-Business Manager of the Big T, presented his resignation to the Board of Directors. Bob’s partner, Bob Peckoe, will continue the work alone for this year’s annual.

At a recent meeting of the Student-Faculty Relations Committee, a resolution was passed to be sent to the Faculty Committee. This resolution strongly recommends once-a-term visitation by Department Heads or their delegates to all sections taught by graduate students. This is not a new idea; however, it is hoped that the resolution will bring about wider use of the visitation system. It is an opportunity for you to make known your opinions on the instruction you receive to someone who can do something about it, if necessary.

George Johnston.

THE DU PONT DIGEST

Production for M.E.’s

Du Pont’s manufacturing side offers opportunity to mechanical engineers

The young mechanical engineer interested in production finds plenty of opportunity at Du Pont. His skills are in great demand because so many of the Company’s products are made in equipment which must operate continuously on automatic controls.

More than half of Du Pont’s M.E.’s are currently engaged in some phase of production work. There are three main categories.

1. MAINTENANCE SUPERVISION. Responsibilities and initiative are needed to men selected for this work. Among their many duties are the scheduling of preventive maintenance and emergency repairs to minimize down time, suggesting equipment improvements to reduce maintenance load, and estimating costs of changes or major repairs.

2. PRODUCTION SUPERVISION. Other mechanical engineers at Du Pont use their knowledge of mechanical equipment in solving production problems. They must see that raw materials are on hand, that machines are obtained with minimum loss, and that the products meet rigid specifications. In addition, they must train men in proper equipment operation and maintain good personal relations.

One area supervisor, also an experienced man, usually has charge of from 125 to 150 people, including 6 foremen.

J. D. McHugh (at right), B.S. in M.E., Rochester ’36, and lifelong duPontco worker, discusses duties of an experienced man.

3. PLANT TECHNICAL. Other M.E.’s at Du Pont are assigned to the teams of technical men responsible for process and production improvements. In this work, they help solve problems on machine design, strength of materials, control in production, and other items needed in high-pressure equipment, etc.

Actually—in maintenance, production and development—the possibilities are almost unlimited at Du Pont for the M.E., who likes the manufacturing side of industry.

If there is one thing I can’t stand, it’s inconstancy—Jeanette.

About half of Tech was out at the Medieval Knights dance at Scripps this past Saturday, much to the disgust (vok, vok) of the Claremont Men’s Club fellows present. The dance was decorated by an able Tech crew, but they evidently forgot the old rule of physics that two bodies cannot occupy the same space at the same time, nor can two hundred fit in space designed to hold one hundred.

A party composed of Otto, Stockerlund, old grad Heifer, and some obscure Rickets man preceded the dance by a dinner party in a cabin on Balch. Their most most most attractive dates prepared an ample dinner, which took too long in the consuming that they didn’t make the dance until 11:15.

D.T.’s. Our apartment for the garbled state of H bwells last week. Apparently the printer was slightly uncoordinated at the time the

For Chuck Benjamin: The sight of this illustrous publication does not write this column.

For the Rowdy Fresh: That luminous plate of which you may have caught a fleeting glimpse last week was the Travis Thur.

For Don Roberts: Monke have Troubles Too.

Bull Durham

Embezzled over the lack of the Camel Concession being in the house, many me in the Northeast corner are following the lead of Sun (Hurl Ives) Phillips and are making doggedly pathetic, but highly entertaining attempts at "rolling their own." Phillips and Tucker have capitalized on the addiction and now have worries only about where to cache their loot.

200 copies.

Earle K. Bergery, famous for his BEM-Bum-Babe covers for TWS and $8 since 1940, died in Bridgeport, Conn., September 29. He was the victim of a heart attack. So far R. J. Reynolds doesn't seem unduly alarmed.

(*) At the great Hercules Static Alley Party Friday night, Pee Wee was inaugurated with Jim Adams' blind date. As to (Pee Wee) was about to ask about the lovely to the Inter-House, she inquired if he would consider taking her little sister! After receiving this blow plus an extremely cold shoulder the following sight, the Pee One is now seriously contemplating the monastic life.

Tough luck

John Lilley is the man of the hour this week in Fleming. Stunned he opened his big mouth too far in front of too many witnesses by offering Kiddie the usual service (offered only when the odds are supposedly infinitesimal) if Kiddie should score. Come Saturday Bill John made the TD, and the recall of the foregoing offer caused much interest among the Darbs Ellmore and Waggen.

Peekin' In

by Patraw

In modern football the key to victory has always been thought to be attack. Ever since the advent of the passing and quick-opening attack, offense has been the byword of the collegiate "big league." Even diversified defenses such as the slanting or looping line and the zone pass defense, could not keep up with the "mousetraps" and pass patterns.

STUDENT S!)

$25.00

Write a Lucky Strike jingle!

No box tops! No entry blanks! It's easy!

Just write a 4-line jingle based on the fact that:

LUCKIES ARE MADE BETTER TO TASTE BETTER!

Here's your chance to make yourself $25. Just write a 4-line Lucky Strike jingle, based on the fact that Luckies are made better to taste better.

Then, if we select your jingle, we'll pay you for the right to use it, together with your name, in Lucky Strike advertising... probably in this paper.

Read the sample jingles on this page. Then get the gang together, break out the rhyming dictionary, and start writing. If you think you can sell the American Tobacco Company, you've got a good one.

Hint—the more jingles you write, the more money you have a chance of making. Hint—be sure to read all the instructions.

HERE ARE THE INSTRUCTIONS:

1. Write your Lucky Strike jingle on a plain piece of paper or post card and send it to Happy Lucky, P. O. Box 67, New York 46, N. Y. Be sure that your name, address, college and class are included—and that they are legible.

2. Base your jingle on any qualities of Luckies. "Luckies are made better to taste better." is a good one. (See "Tips to money-makers.")

3. Every student of any college, university or post-graduate school may submit jingles.

4. You may submit as many jingles as you like. Remember, you are eligible to win more than one $25 award.

*TIPS TO MONEY-MAKERS:

To write a winning Lucky Strike jingle, you're not limited to "Luckies are made better to taste better." Use any other selling points on Lucky Strike such as the following:

L.S.T.F.

Lucky Strike Means Fine Tobacco
Luckies' cigarette-tasting demonstration
Luckies taste cleaner, finer, smoother
Be Happy—Go Lucky
So good, so firm, so fully packed
So free and easy on the draw
Buy Luckies by the carton
Luckies give you deep-down smoking enjoyment

Tech loses heartbreaker; outgain, outpass La Verne

Caltech’s Beaver football team lost a heartbreaker last Saturday night to La Verne College in the most exciting game played by the Beavers this season. La Verne’s margin of victory was a single point, the final score being 21-20. The Beavers came up with their best game of the season, outgaining the Leopards in every department, and in the second half showed a drive and power which had been lacking in the team for the first half of the season. 

Aaron LaVerne

The final score in first downs and total yards gained was in the Beavers’ favor by 17-10, and 350-239, as they outplayed their opponents for the fourth time this year. A missed conversion when you just need relaxation

soccer team socks midlands as forwards flash

caltech's soccer team put on a fine display of offensive team work last saturday to completely crush a good midlands team, 9-2. leading the tech scoring parade were william wallace and renee gutierrez with three goals each, sedat serdargetti with two goals and swaroop bhanjdeo with one goal.

the game commenced on a high note for midlands as they drove right through the tech defense and scored the first goal of the afternoon. after this lapse, however, tech settled down and scored nine straight goals before allowing midlands a return.

great forwards
could have broken the game wide open in the first half, but they couldn't put away the midlands goalie, and the score remained 1-0 at the half.

another problem facing tech is the physical condition of the players, for the "great plague" seems to have hit the soccer team with approximately five first-string players in various states of disrepair-the ailments range all the way from infectious mononucleosis to bad ankles. be that as it may, tech played ucla, there, friday at 3 pm, and will go all-out gunning for an upset victory.

water polo

wednesday saw tech lose a hard fought game to lacc at the cc pool. at the half it was 2-0 in favor of lacc but in the third quarter goals by bush and wallace moved tech ahead 3-2. the beaver defense held until the last 30 seconds when lacc scored, tying the count at 3-3. this three the game into extra quarters, but the tech seven was spent and lacc scored four times in the overtime.

the fresh squad fared better than its two goals by bush and wallace, moved tech ahead 3-2. the beaver defense held until the last 30 seconds when lacc scored, tying the count at 3-3. this three the game into extra quarters, but the tech seven was spent and lacc scored four times in the overtime.

a responsible consulting organization has reported the results of a continuing study by a competent medical specialist and his staff on the effects of smoking chesterfield cigarettes.

a group of people from various walks of life was organized to smoke only chesterfields. for six months this group of men and women smoked their normal amount of chesterfields—10 to 40 a day. 45% of the group have smoked chesterfields continually from one to thirty years for an average of 10 years each.

at the beginning and at the end of the six-month period each smoker was given a thorough examination, including x-ray pictures, by the medical specialist and his assistants. the examination covered the sinuses as well as the nose, ears, and throat.

the medical specialist, after a thorough examination of every member of the group, stated: "it is my opinion that the ears, nose, throat and accessory organs of all participating subjects examined by me were not adversely affected in the six-month period by smoking the cigarettes provided."
