Six Tech grads get Hughes aid

Six Caltech graduates have received Hughes Master of Science Fellowships enabling them to continue their education while employed part-time at Hughes Aircraft Company in Culver City, California. They are William G. Blodgett, BS, Physics, ’56; Louis M. Bogdanovic, BS, EE, ’56; William R. Hagemeier, BS, Physics, ’56, and Richard S. Van De Houten, BS, EE, ’56; Thomas Pike, BS Physics, ’56; and Richard S. Van De Houten, BS, EE, ’56.

Bogdanovic, Keer and Plambek are continuing at Tech, while Blodgett attends U.S.C. Hagemeier, U.C.L.A. and Van De Houten, Stanford. These men, along with others from 75 universities, receive salaries and payment of tuition, books and fees from Hughes.

New assistant to Dean Jones chosen

In the past several years, the duties of the Admissions Office have become more numerous and complex. In order to avoid utter swamping, the Administration has created a new post, Assistant to the Director of Admissions. Here to fill this position is Dr. Peter Miller from New Jersey.

Dr. Miller was born in Albany, N.Y., and he spent his undergraduate years at Albany Academy. He received his Ph.D. in English from Princeton in 1959. There he taught English until the war, in which he served as a Captain. After the war, he again resumed his teaching post at Princeton. In 1940, he left the University to work as head of the humanities division for the Educational Testing Service.

Farrago cries for poets and writers
by John Velman

Do you mind wandering in a world of pure imagination? Is your pen yearning to write? Do you like to draw? Do you have any kind of talent that you think you'd like to develop? This FARRAGO is your chance to express your ideas and feelings. Why not see your name in print? If any of these things apply to you, you may have talent, but if there's any place we can use talent, it's in Farrago.

Farrago—for freshmen and those student writers who don't know—it's the contribution of the Caltech student body to the world of letters. A farrago, according to Webster, is "a medley, a mixture," and this is perhaps the best description of Farrago. The magazine bears the dual burden of being the outlet for the drive of the Caltech student to create serious literature as well as a source of entertainment and laughter for the Caltech reader who is mainly interested in the result, in short, a farrago.

Which brings us to the point at issue. In order to meet these stringent demands, the magazine needs a galaxy of contributors. What kinds of things do we want? You ask, 'What else kind of stories? Should I just be serious, or should I be fun?' These are just a few of the questions that will be answered by the committee.

It would be reasonable to assume that the faculty committee on educational policy feels that they are doing as good a job as humanly possible in taking care of their students. If the committee does not choose to solicit this information on a formal basis, it is quite possible that the committee is the "true" forum for formal faculty-student cooperation.

It is worth mentioning that the faculty committee on educational policy feels that they are doing as good a job as humanly possible in taking care of their students. If the committee does not choose to solicit this information on a formal basis, it is quite possible that the committee is the "true" forum for formal faculty-student cooperation.

Secretary's Reboot
EVEY ONE A QUEEN Today the student body votes to select a Homecoming Queen and two attendants from among the six queen candidates.

POMONA HOMECOMING Saturday Take your date to the picnic at Brookside Park at 6 p.m.—after buying a ticket for her at the entrance. Then, to the game to see the Queen crowned and the perfect evening with the Homing Dance, a sock hop at the gym.

RALLY COMMISSIONER ELECTIONS will also be held this noon. Thus far, lovable Van Kirk is the only candidate.

WORLD UNIVERSITY SERVICE All students will be unable to attend the meeting on October 15 and 14, he suggested that anyone interested contact W. Herlemag, and then the committee will be able to proceed with the rally.

THANKS The board gave Jim Cribbs and his assistants the following for their hard work and dedication.

SPEAK-IT-REL-COM Any student is welcome to attend the meeting of the Student-Faculty Relations Committee held the second Monday of the month at 4 p.m. in 208 Daley.

Pep rally develops fighting spirit in Tech footballers

Those who were present at the pep rally held in the gym last Thursday (a large percentage of the house members) displayed a brand of fighting spirit which seemed out of place. It was real inspiring to hear the enthusiastic response that this excited group gave to the introduction of the coaches and the senior members, and see the excellent cooperation they gave the yell leaders and song leaders. The rally was packed with excitement and seemed to instill an unprecedented will to win in the students and team.

This new spirit, or something, anything, certainly seemed to have a beneficial effect. The team we saw in the Rose Bowl yesterday was far from the Tech football team we saw last Thursday. The players seemed to be more accustomed to, which often seemed somewhat lethargic. They didn't manage to win, but they came away with more than a fair share of confidence. They demonstrated that they had found the winning formula, and the other team, the University of Oregon, was more than happy to let them go.

Let's keep up this will to win and make the other conference schools take another look at Caltech as a football power.

Dick Van Kirk runs for Rally Commissioner

Members of the ASCIT.

Next week a special election will be held to fill the position of Rally Commissioner on the ASCIT. It will be held on Wednesday, October 15, at approximately 4 p.m. in the Student Union.

We must congratulate the Rally Committee on their successful election last year, and let's hope that they will continue to be successful in their new positions.

Musical comedy to open at playhouse

The Pasadena Playhouse re-opened last week launching its 40th year with a lively musical comedy, "Two Adams for Eve." The play was well received by the audience, and the actors did an excellent job of portraying the complicated characters.

Miss Bennett in her 40 years of theatrical experience has supported many of the big names of Hollywood, including Charlie Chaplin, and Ginger Rogers and others.

Ed Pendled, an old-time favorite since the days of W. C. Fields, once formed a comedy, team with Jimmy Durante. He is best known for his portrayal of the "yumping flaming Swede.

Wardrobe loan available to Techmen

Numerous articles of special-purpose clothing are available for all Caltech students and graduates. The Caltech Service League, sponsor of the loan service, announces that forms, slacks, jackets, and accessories may be borrowed for dances or other formal occasions. For informal occasions, the loan service offers ties, shirts, and hats.

The wardrobe loan is operated under the Honor System. Keys are housed in the Y.M.C.A. and the Health Center.

Fulbright Scholarships can be won to study abroad

This announcement applies to American students who might be interested in studying abroad under the Fulbright Program. Fulbright awards cover the entire costs of a year's study, including transportation, tuition, and living expenses, in a large number of countries in Europe and in a few countries in other parts of the world. In some countries knowledge of the foreign language is a prerequisite, but in others it is not.

The Fulbright Adviser at Caltech is Professor H. N. Gilbert; members of the Caltech selection board are Dr. Carl Anderson and Dean H. P. Bohminhull. Detailed information regarding the Fulbright Program, and application forms, can be secured from Professor Gilbert in 104 Dabney Hall. The awards are made as the result of local, state, and national competitions.

The selection procedure followed in making awards tries to find the student who will enjoy the year abroad, and who will make a favorable impression on the people he meets in the host country. The principal objective of the Fulbright Program is the promotion of international understanding. Academic matters are considered as they may relate to the attainment of that objective.

Two years ago there were 26 applicants from Caltech, six received awards; last year there were 16 applicants, five received awards. Of these 11 men, five were at the B.S. level, and three each at the M.S. and Ph.D. levels...we do not know the bases for the selection of these men. Grade Point Average appears to have been important, but not predominant. The language consideration makes Great Britain exceeding competitive.

Proficiency in a foreign language helped some applicants materially. Students whose homes are in the less populous states appear to have a better chance than residents of California and New York, for example.

Marshall Scholarships

The British Government is offering 12 scholarships for two years' study in Britain. The value of each award is $550 per annum plus transportation.

Information about these scholarships, and application forms, can be secured from Professor Gilbert, 104 Dabney Hall.

B & G finds new name to end confusion

This summer, following the national trend in institutions of higher learning, Building and Grounds changed its name to Physical Plant Department. The objective of this change was to facilitate the naming of Mr. W. R. H. H. Gilhert, director, to avoid the confusion which arose from having too many posts with the title of supervisor.

Other achievements of the physical plant department this summer include such things as the installation of bulletin boards and the planting of olive trees in front of the Coffee Shop, building a cement walk and filling the area between the coffee shop and the student houses with decomposed granite. Other projects in progress include the re-painting of the interiors of the student houses, the installation of equipment and research facilities in the physics and chemistry laboratories.

Rumors now it that grass is to be planted in the area adjacent to the coffee shop and west of the student houses, as part of the newly expanded program.

The student members for this year, appointed by ASCIT are: Glenn Converse, Craig Elliot, Ed Park, and Jim Workman. The alumni appointed by the CIT Alumni Association is John E. Osborn, '39. This council deals with many of the problems which arise over the athletic program, including letter awards.

Social graces scattered to four winds as rotation ends

The hour grew late and the pluckering went on and on. At last the weary assembly, consisting of the four resident associates, the four house presidents, and Dr. Mayhew, Master of Student Houses, had determined the placements of entering freshmen in the Student Houses. The meeting was gladly broken up at about 10:30 p.m. a week ago, and each house president carried a copy of the house assignments back to his house bulletin board.

Rotation 1956 was officially over

Each house bulletin board immediately became a center of activity as both freshmen and upperclassmen huddled intently about it. Many freshmen were happy to see that they had been assigned to the house of their first choice, while others were somewhat crestfallen to find that they were not so fortunate.

Other house members noted with satisfaction that Joe Fresh, with whom they had so laboriously cultivated a bosom friend, spent so many hours extolling the merits of their house, had seen the true light and was in house A. or perhaps curbed him under their breath for being so blind as to prefer house B. He is included, no doubt, by the duplicitous cunnings of the unethical members of said house.

At any rate the pressure was off, and the tensions built up over the past week were released in a round of spontaneous parties throughout the houses.

Freshmen and upperclassmen alike were filled with a feeling of relief. The freshman was relieved that he could settle down and rear in new house, without switching every two days to a new house and new bunch of followers for meals. The sophomore, junior, or senior was relieved that he could stop being quite so nice to the freshmen.

It was especially relieving to know that those eloquent dinner speeches that he had heard repeated four times would not again impinge upon his ear drums as he ate...

Yes, it was certainly nice to have the bell toll rotation week off.

The next morning; however, as he sat eating his breakfast without assistance of knife, fork, and spoon; he realized that the feeling of initiation week had just begun.

P. E. committee men named

The following five faculty members were announced by Dean Eaton last week as being the members of the 1956-57 Physical Education Committee: Dr. Richard H. Jahn, (a Caltech alumnus, class of '35), Dr. Robert B. King, Coach Bert Labaronnier, Dr. George P. Mayhew, Coach Ed Freiser. The function of the Physical Education Committee is to make judgments on students with FE deficiencies, and to make decisions concerning intercollegiate sports, intramural sports, and physical education policy. The committee also plans and approves intercollegiate sports schedules.

These men also serve on the Athletic Council along with four Caltech students and one alumnus.

Beavers seek first conference win against Pomona-Claremont

Coach Bert LaBruherie's footballers play host to Pomona-Claremont's Sagehens Saturday in the Rose Bowl, as both squads try to break into the win column in 1956 SCC competition. The Sagehens have played two non-conference games, losing to two Marine teams, from San Diego and Barstow. Caltech has a 1-1 record, with a 6-0 win over Cal Baptist and a heartbreaking 13-10 loss to a powerful Redlands. After winning two conference championships in a row the past two seasons, Pomona-Claremont was pardoned by graduation lines, which left the Sagehens with only thirteen lettermen. Halfbacks Jim Lindblad and Herb Meyer and fullback Gordon Stolfoff are the chief threats of the Pomona-Claremont single wing attack. Hugh Martin and John Devereaux, all-conference selections last year, are the standouts in the line for the Hens. Caltech will go with Bill Moier and Gene Stanley, ends, Larry Berry and Larry Whitley, tackles; Jim Snyder and Russ Pitzer, guards; Lance Hays, center; Dick Van Kirk, quarter-back; Don Stocking and Charley Malone, halfbacks, and Ed Krehbiel, fullback.

Interhouse Softball

The fourth game of a 10-game interhouse softball schedule gets under way today with Blacker pitted against Fleming.

This will be Blacker's second game of the season as they played in the opening game of the season with Ricketts and lost a 4-3 decision.

In Monday's game, Blacker started right out in the first inning when Don Stern got on first with an error and scored as Bill Kern singled. A double by Ted Lang drove in Kern. However, in the bottom of the first, Pomona-Claremont got on with walks and John Price smashed a double, driving in both Montoya and Mehlert. In the third inning Ricketts came to life once more. Montoya walked again, and Bill Hecht then blasted a triple, scoring Montoya. Hecht came in on an infield out.

Welcome!

There once lived a crazy, mixed-up old giant. He lived his kicks out of a little red hen. Of course, that wasn't bad, because that chicken laid golden eggs.

Now down at the bottom of the stalk lived our boy, Jackson. Our boy was low on loot and his mother ... man, she wasn't making it at all. The feedbag was M.T. So Jackson started thinking of a way to get loot fast: "How," said he to himself, "could I get that frantic chicken away from that character upstairs?" He looked around the hut for something to trade—How about an old piano roll? Mom's bifocals?

Uncle Loopy's electric banjo? Wait a minute! In the cistern was a six-can carton of Budweiser! So he gets the Bud and ashays up the stalk. Well, citizens, there's no use dragging this Budweiser bit out: The giant buys the Bud, gives Jackson the hen, mom's doing great and so will you if you're up to date. Get Budweiser, man ... it's the world's favorite-beer!

All cisterns ... and brothemas, too, for that matter ... should discover that there is a difference in beers. This Budweiser ... it is the most.

Budweiser

**Redlands edges Caltech, 13-0, in defensive battle**

By Howie Bloomberg

Caltech's Beavers stubbornly fought a highly rated Redlands eleven before bowing 130 Saturday night at the Rose Bowl.

The game primarily was a defensive battle as the Beavers gained but 100 total net yards, and they held the Bulldog offense to only 100 net yards. The Bulldogs went only a week before host routed Inventive 416.

The first half was marked by neither squad could get a prolonged drive started. With less than four minutes left in the half Redlands recovered a Tech fumble on the Beaver 35. The Bulldogs marched 86 yards on the ground with fullback Howie Newman picking up the final three yards. Fint Gee Hower converted, and Redlands led 7-0. In the final seconds of the first half Merle Lovenberg intercepted a pass from Beaver quarterback Dick Van Kirk and intended for tthe Huron district. Van Kirk and Bob Ingram took to the air but each of their passes fell incomplete, and Redlands took over on downs.

The Bulldogs struck quickly in the third quarter for their final score. After Redlands had bullied their way to the Tech 37 yard line, Tip.<h><h>7 Dutch Brasfield with touchdown toss. It was the only completed aerial out of eight tries for the Dogs, but it sewed up the Redlands victory.

Tech muffed their only real scoring opportunity late in the fourth quarter. With the clock showing only a little over two minutes remaining, Van Kirk threw a long third down pass to Moor. The Caltech left end took the fifty yard pass inside Redlands twenty and scampered to the two before being tackled. Fullback Ed Kilbride lost three yards on each of the burly Bulldog line. Van Kirk and Bob Ingram took to the air but election of their passes fell incomplete, and Redlands took over on downs.

Rees, Martin tally in Tech loss to UCLA

Friday the Caltech waterpolo team met defeat at the hands of a strong UCLA aggregation, 13-2, at Westwood. Poor passing, breaking and shooting up Tech's part were the main causes of the lack of improvement on last year's 10-7 score, although it must be admitted that the Bruins had quite an edge on experience.

Clarke Rees and Keith Martin tallied the two Tech goals while Drum and Fox took care of the home team's points.

Rees started the game at center forward with Vince Taylor and Bob Blandford on his wings. Bob Smoak, Ed Park and Norm Velinsky took care of the defense with Don Wiberg—guardian—the goal.

Coach Web Emery has brought the inexperienced team along nicely concentrating on breaking and passing. Teamwork, which was noticeable by its absence in the UCLAn encounter, will undoubtedly improve as the season progresses.

**The Sports Corner**

by Dick Van Kirk

Next Saturday's game against Pomona-Claremont rates as just a setup to most observers, and the breaks could decide the game for either team. The Sagehens' from all appearances, just don't seem to have the material they've had in previous seasons, and the grinding single wing style of play doesn't seem to be clicking like it did for last year's SCIAC champions. This doesn't mean that the Sagehens aren't a tough team to beat. Before that reason began many prognosticators were listing Pomona-Claremont as a conference with Redlands for this season's league crown. But Caltech, mostly on the strength of its fine defensive showing against the Bulldogs last weekend, has thrust itself into the picture as a large obstacle in the path of the somewhat deflated Sagehen probability.

---

Monday morning quarterback dept.... One of the most noticeable differences between Redlands and Caltech (besides the score) last weekend, to this observer, at least, was the manner in which an opposing passer we crushed by the defensive line. Every time a Beaver threw a pass, he immediately found himself lying prone on the turf with two or three men in gray tying him up, all of which left him wondering just what had been the outcome of his throw. Redlands passed eight times, and the Bulldog passer was never seriously threatened by the Beaver line. This may have been due to th fact that the Redlands passers fanned back deeper than Caltech's fanglers. But it may have been more of a fifteen yard penalty for roughing the passer, a penalty which is sometimes assessed, though for all practical purposes in a game it is about as plentiful as those many bras of driver pigeons that frequent the Rose Bowl.

---

Plug of the week dept... This Saturday afternoon on Pad- dock Field in Tournament Park the freshman football squad tangles with bite 1956 edition of the Whittier Poetsbees. Come out and support the squad in their season opener.

**A Campus-to-Career Case History**

Roger Lindblom is one of many young men who are finding rewarding careers in Bell Telephone Companies, Bell Telephone Laboratories, Western Electric and Sandia Corporation. See your placement officer for more information on career opportunities in the Bell Telephone System.

---

Roger Lindblom

---

**Roger Lindblom**

B.S. in General Engineering, Iowa State College, '49, is today District Plant Superintendent for the 11,000 square miles of the Huron, South Dakota, district.

"The openings are there," says Roger, "and the telephone company desires you to fill them. I joined Northwestern Bell in 1950 and spent one year learning pole line and cable construction. This was about the same period in other departments, gave me a good telephone background and distributed supervision."

"My experience really grew when I became an installer-repairman, then a construction crew foreman, and, in 1952, Training Engineer at South Sioux City, Nebraska. There I was responsible for the 3500 dial phones that served the town."

In March of 1954 I went to Grand Island, Nebraska, to help supervise dial conversion projects in that district. Everything I'd learned to date came in handy on that job.

"A year later I went to Omaha on a staff assignment, and in March, 1956, I moved up to my present position.

"I head a group responsible for installing and maintaining Plant equipment in the Huron district. We supervise dial conversion projects, and I'm responsible for personnel and employment. I work with other department heads in the administration of our district."

"Each assignment I've had has been broader than the last, and believe me, the more I learn, the better I like it."
Caltech Glee Club begins 43rd season with 62 men

by Robie Monson

In February of 1953, 8 men under the direction of Olaf Froshad, began singing once a week and the Caltech Glee Club was formed. It died a natural death from the disease of non-success. Last year's club, which received high praise from musical directors attending the Intercollegiate Glee Club Festival held at UCLA, boasted some 50 members, but this year's club is about the size of one former member who attended. In addition to the fact that only 4 men are leaving, the club is looking forward to its most successful concert season to date.

When asked what type of music the club would sing this year, Mr. Froshad said simply, "the works." This statement will indicate that religious, secular, romantic, folk, and show music will all form a part of the club's repertoire at UCLA, boasting some 50 members, willing to add to the club's versatility.

On the agenda so far this year is a joint concert with the Occidental Choir, a Los Angeles TV appearance, and a religious program at the Holliston Avenue Presbyterian Church.

The Caltech Glee Club was begun in 1904, and lasted until 1946 when, like so many non-successes here, it died a natural death from the disease of non-success.

Artists present chamber music by Jacob LeBlanc

This season's Chamber Music Concerts, sponsored by the Humanities Division, will be presented bi-monthly during this Sunday. In addition, a special recital by the Thomas String Trio will be given on Thursday, October 25, in one of the student houses.

Among the renowned artists appearing for the Caltech concert series are pianist-composer Ingolf Dahl, soprano Marni Nixon (who, I am told, provided the voice for Deborah Kerr in "The King and I") and violinist-conductor Israel Bakst. The music will range from the late Renaissance (William Byrd) to contemporary.

The present, as well as the Classical period, will be represented by the Monday evening's concert, the chamber music series in the Los Angeles area. I shall preview the program of the California Research Corporation, and hope to discuss other events in the weeks to come.

STANDARD OIL COMPANY OF CALIFORNIA CALIFORNIA RESEARCH CORPORATION AND OTHER SUBSIDIARIES Representatives will be on the campus

OCTOBER 17 AND 18, 1956 to interview

Chemists; chemical, civil, electrical; mechanical engineers; mathematicians; metallurgists; physicists; for career employment in California and other areas.

HOMECOMING (Continued from page 1)

the queen will make her first public appearance by riding around the field with her attendants in a new convertible equip-

cally for the occasion, driven by Jim McBride. If the at-
tendance at last year's Homecoming (vs. Oxy) Day in any in-
dication of what to expect this year, the queen will be chosen

by a record crowd of Tech root-

ers and their dates. 

As if this were not enough activity for one day, the annual Homecoming Dance will follow the game. A caravan will leave the Rose Bowl for the Tech gym-

Sponsored by the Alumni Association the dance will feature the sweet music of Tony Perillo and his band, plus some special guest musicians. The dance will be a sock hop.

The coronation ceremony fol-

ows the traditions of other tech clubs with Mr. Craig E. Elliott, Student Body President, introducing the candidates.

Take a 2-minute preview of your path to RCA engineering

Specialized training program

Earn a regular professional engineering salary as you work on carefully selected assignments giving you a comprehensive view of RCA engineering. Your indi-

individual interests are considered and you have the

chance for permanent assignment in the area you prefer. Your work goes careful review under RCA's advancement plan and you receive guidance from experienced engineers and interested management.

Following training, you will enter development and design engineering in such fields as Radar, Airborne Elec-

tronics, Computers, Microwave Electronics. For fac-

tory engineers, there are positions in quality, materials or production control, test equipment design, methods. You may also enter development, design or manufacture of electron tubes, semiconductor com-

ponents or television.

Direct hire

If you are qualified by experience or advanced education, your interests may point to a direct assignment at RCA. The RCA management representative will be glad to talk with you about your professional goals and how RCA can help you reach them.

Now... for a longer look at RCA

See your placement director about an appointment with an RCA engineering management representative who will be on campus.

THURSDAY, NOVEMBER 17, 1956

Talk to your placement officer today... ask for inter-

view about your RCA engineering future. If you are unable to see RCA's representative, send your resume to:

Mr. Robert Halldran, Manager, Placement
