

Prof. Feynman At Assembly

**Quantum Mechanics
Subject of Talk**

"The Laws of Mechanics at Atomic Dimensions" (another name for it is quantum mechanics) will be the academic-sounding title of the talk to be given by Prof. Richard Feynman at tomorrow's assembly.

It seems that the behavior of atomic particles doesn't run exactly parallel to that of billiard balls, to use a worn out analogy, Prof. Feynman stated. As a matter of fact, physicists aren't certain whether these so-called particles are really particles at all. They might be a type of wave motion, he continued. The study of their actual behavior constitutes the basis of quantum mechanics.

Witty Speaker

After having Prof. Feynman over for dinner last Thursday night, the members of Ricketts house will testify to the fact that this assembly should be very interesting and entertaining.

Prof. Feynman attended MIT and Princeton and was professor of theoretical physics at Cornell for five years before coming to Tech. During the war he worked on the atomic bomb project at Los Alamos.

Amour d'Ozarks

Five points of hillbilly living were presented to Techmen at last Friday's assembly by a group of actors from PCC. "Sparkin'" was the name of the one-act play presented.

In addition to the play, the group also presented a 15-minute act concerning life aboard a whaling ship.

Y's Doings

by Rubinstein

The Frosh Luncheon club, meeting Tuesday noon at the training table, will have as guest speaker Oliver Prickett of the Pasadena Playhouse. He will speak on "The Theatre and the Activities of the Playhouse."

Hedley to Speak

The Faculty-Graduate Luncheon club meeting Wednesday noon at the Athenaeum, will hear Dr. George Hedley, chaplain of Mills College, speak on "The Superstitions of the Irreligious."

That evening Dr. Hedley will speak to the Wednesday Evening Discussion group meeting at the Y residence, 391 So. Holliston, on "Religion and Our Political Decisions." This will be the first of a series of four sessions.

Comic Topics

Other topics will be "Religion and War," "Christianity and Economic Justice," and "Christianity and Communism."

Israel Problem

Last Monday noon the Y Faculty Luncheon group heard Dr. Bonne of Hebrew University of Israel speak on "The Problem of Incentive in Underdeveloped Areas."

Dr. Bonne, talking to a packed dining room, stated that the fundamental issue of the world of the second half of the 20th century will be development of these backward areas.

Different Problems

He pointed out that the problems of underdeveloped areas are not the same as those existing in Europe before the industrial revolution. Speaking mainly on Asia, Dr. Bonne stated that there were four main reasons why the new situation is encountered.

The first of these was the urge of the people for changes and improvement. This in a large extent is lacking in Asia today.

Limited Capital

The second problem was one dealing with the desire of orientals to invest in land, thus limiting capital for speculation in industry.

The third point was that the formation of an effective labor force is something that cannot be done over night. The as-

(Continued on Page 4)

Dr. Horace N. Gilbert, shown above pointing to Frankfurt-am-Main, in the American Zone of Germany, where he worked for a year, will speak in the Athenaeum tonight. A professor of business economics here, Dr. Gilbert served as economic adviser to our occupational government in Germany.

Prof. Gilbert Reports On German Economics

Horace N. Gilbert, professor of business economics at Caltech, has recently returned from Germany where he served with the state department on the staff of the U.S. High Commissioner for Germany. He spent a total of 18 months abroad—from October of 1949 until just last month.

Economic Adviser

Prof. Gilbert's general assignment was to study German industry and to advise on it. More specifically, he was concerned with the determination of industrial sectors to receive Marshall Plan aid; he reviewed the dismantlement program with the intent of stopping dismantlement where there was Marshall Plan significance; he tried to remove industrial disabilities caused by the limitations placed on industry by the occupational government; and he was economic adviser in the preparation of contractual agreements to replace occupation statutes.

Our Policy OK

In trying to put over our ideas, Prof. Gilbert said, we are not as effective as France and England. These two countries have interfered with our policy of salvaging German industry. Prof. Gilbert stated that our policy is OK, but we have not been able to sell it as well as the British and French have sold theirs. One reason for this, he feels, is that we do not have the most competent people over there to do the selling.

Although the Germans have made what he called a "remarkable economic comeback," Prof. Gilbert feels that the American policy is the best one, and we shouldn't stop trying to sell it. "It may be too late," he said, "but it's worth trying."

Germany in Good Shape

Nevertheless, Germany appears to be in good shape. If it were not for the Russian threat, and if Marshall Plan objectives were even partially attained, he said, Germany would be well off. Prof. Gilbert has also been following with interest the Schuman Plan, which is the French equivalent of our Marshall Plan.

Faculty Members Visit

Prof. Gilbert had his family with him in Germany for one year out of the 18 months. While there they were visited this summer by Mr. George Tanham and Dr. Harvey Eagleson of the Caltech humanities department, and Nick Hurley, a Caltech alumnus studying at Zurich.

Ham Club

A special meeting of the Caltech Amateur Radio club will be held at 11:00 a.m. Monday in 401 Bridge.

A discussion of the constitution, by-laws, and future organizational plans will be the order of business. All members are required to attend.

Soph Class Meeting

The sophomore class will hold one of its rare meetings Monday morning at 11 in 201 Bridge, according to Jim La-Tourette, class president. New officers will be nominated, and the subject of dues will be discussed.

Campus Calendar

Air Force ROTC Program Begins Next Year at Tech

Four Year Course Will Turn Out 50 Active Reserve Officers Annually

Caltech was advised today of its selection by the U. S. Air Force as the site for a new Air Force ROTC unit.

Enrollment in the four-year program will begin with the freshman class entering the Institute next fall.

DuBridge's Statement

(In Washington, where he is attending the University of Minnesota Centennial, Lee A. DuBridge, Caltech president, said "The California Institute of Technology has always stood ready to serve national defense in time of need. At this time therefore, the Institute is glad to make its facilities available to the United States Air Force for use in providing technically trained officers.")

McKinney Winner To Be Chosen Next Thursday

This year's McKinney Prize contest finalists will meet next Thursday at 11 a.m. in 206 Dabney to battle to a verbal finish in this significant contest.

The finalists are Kwok-Ying Chong, Alexander Dessler, Bernard Engholm, and Sanford Sweet. Chong and Sweet are seniors, while Dessler and Engholm are juniors.

The first-prize winner will collect \$75 while the second man will get \$50 and the other two men will receive valuable books. Anyone who would like to see the fracas is welcome to attend.

Pauling Steps Into APS Office

Prof. Linus Pauling of Caltech has been elected vice-president of the American Philosophical society, one of the country's oldest learned societies.

Founded 1743

The society was founded in 1743 on the initiative of Benjamin Franklin for the promotion of useful knowledge. Its 500 domestic and 75 foreign members represent the physical, geological, biological, and social sciences, mathematics, and the humanities.

Prof. Pauling is chairman of the Division of Chemistry and Chemical Engineering at Caltech. His fields of interest have covered all branches of chemistry and have extended into physics and, in recent years, into biology and medical research. He presented a paper on "The Hemoglobin Molecule in Health and Disease" before the annual meeting of the Philosophical society last week.

Activities

He is a former president of the American Chemical society, a member of the National Academy of Sciences and the American Academy of Arts and Sciences, and holds a World War II Medal for Merit, highest civilian award for outstanding contributions to the war effort.

Navy Commissions Offered to Grads

The U.S. Navy is offering to all prospective graduates an opportunity to apply for appointment to commission in the U.S. Naval Reserve immediately. Basic qualifications depend on draft or selective service status and educational background.

Draftees May Apply

Those students who become eligible for the draft upon graduation may apply for the general line program or the Medical Service Corps Program for immediate active duty. Those students who are not eligible for the draft upon graduation may apply for the other programs; i.e., general line, electronics specialist, petroleum engineer, medical service corps, supply corps, or civil engineer corps.

Students who are interested in obtaining further information should inquire at Dean Eaton's office, 119 Throop, or at the Navy Recruiting Station and Office of Naval Officer Procurement, 751 S. Figueroa St., Los Angeles 17.

CIT Thespians To Present Play

Caltech's Drama club offers its annual production, the mystery-farce "Mumbo-Jumbo," Thursday and Friday evenings next week in Culbertson hall.

The three-act play by Jack Barnard boasts an authentic treatment of Haitian voodoo practices, as well as a million and six good laughs.

The director is Shirley Dean, who has brought drama to Caltech the past four years, and the cast features the cream of Tech talent together with gorgeous actresses brought in by talent scouts all over the country.

The action involves the attempts of collegiates Dick and Pee-wee to raise a thousand bucks to purchase Pee-wee an annulment. Stranded at an uncle's country home, they start a boarding house, accumulating a pair of kidnapers, a native witch doctor and her retinue of hypnotist and beautiful victim, a blind man, and Pee-wee's promptly murdered chorus-girl wife. The latter brings two county sheriffs, a state cop, and a sheriff's idiot nephew.

Featured in the production are Jesse Weil, Pete Verdier, Ted Einwohner, Barney Engholm, Bob Laff, Betsy Heim, Nan Hale, Les Earnest, Virginia Dixon, Jim Wilson, Carol Aguilar, Dave Tilles, Nancy Noffsinger, Bob Profet, and Larry Starr.

Tickets on Sale

Curtain time is 8:15 p.m. May 3rd and 4th at Culbertson. Tickets can be secured for 60c and 75c at the bookstore or from members of the cast.

A benefit performance sponsored later by the Service League will be given Saturday, May 19, at the McKinley High School auditorium.

Jr.-Sr. Garden Party On Sunday, May 6

The Junior-Senior garden party will again see the light of day on Sunday afternoon, May 6. This annual event allows the students of the classes of '51 and '52 to hobnob with the faculty in an atmosphere completely free of the academic influence that is ubiquitous on all other occasions.

This gala congregation, which will occur in Dabney gardens, will be enhanced by the music of Verne Boyer and his band.

Habiliments for the men, dressy sport; for the women, cocktail dresses. The repast served will include punch and French pastries.

Rhodes Scholarships Open to Outstanding Caltech Students

Internationally minded students interested in studying abroad should take note of the annual Rhodes scholarships offered to students throughout the nation.

Eligibility

Men between 19 and 25 years old who will be in the junior class by the time they graduate and are single U.S. citizens are eligible for the scholarships. Candidates are chosen on both scholastic and extra-curricular achievements.

Those interested in applying should see Dr. Norman Davidson in 102 Gates. Students applying before Nov. 3 will be notified of acceptance in December and will be off to Oxford the following October. The grants are valued at 500 pounds sterling, equivalent to \$1400 in U.S. money and are granted initially for a period of two years, extensible if the student's work warrants it.

Dr. Davidson, who is handling applications here, and was himself a Rhodes scholar, emphasized that the selection of students is not made on a purely scholastic basis or just on campus activity but with respect to intellect and character.

Exceptional Opportunity

The Rhodes scholarships present to exceptional persons an opportunity to study abroad under prominent men in their field and to benefit by the personal instruction peculiar to the Oxford tutorial system. The scholarships are designed to enable the student to vary his educational experience and achieve a greater potential of work and service.

Students interested in competing for these scholarships should consult their professors, and whatever material that is available concerning the nature of the work they are interested in as it is being studied at Oxford.

Faculty Approval
Acceptance of the program was voted unanimously by the Caltech faculty, and a majority of students expressed approval of the proposed unit.

This will be Caltech's second ROTC unit. The first was established in 1916 and disbanded in 1929. The Institute had a Navy V-12 program during World War II.

The program, which is being undertaken with the understanding that a minimum of 50 officers will be commissioned annually starting with the first group to complete four years' training, will be staffed by three officers and three airmen. The senior officers, who will be appointed Professor of Air Science and Tactics, and the other officers, who will have appropriate academic ranks, will teach material prescribed nationally.

Two Years Basic
The first two years of the program will consist of basic courses in air science and military drill, with more specialization in the last two years. The freshman-sophomore group will have two class hours and one drill period weekly, while junior-senior men will be in class four hours and have one drill period a week.

Upon completion of the four-year course, the graduates will be commissioned second lieutenants in the U.S. Air Force Reserve, and will be subject to call to active duty at any time.

Students will not live in barracks and will wear the blue air force uniforms which will be provided them only for air force classes and for drill. They probably will be deferred from induction into the army under the selective service law as long as they maintain good standing in the air unit as well as Caltech.

One Summer Training
Reserve officer candidates normally will be required to spend part of a summer in training at an air force base between junior and senior years.

Resignation from the AFROTC is possible at any time.

Students enrolling in the ROTC program must meet the standard Caltech requirements for admission. Any C.I.T. freshman, except those with major physical disabilities will be eligible for the four-year course.

The faculty committee which negotiated with the Air Force included L. Winchester Jones, chairman; Foster Strong, R. R. Martel, E. H. Swift, and E. C. Watson.

The Beavers--Who They Are

Ever since its establishment in 1935, the Beavers has been one of the most misunderstood and misinterpreted organizations on the Caltech campus. Because many of its activities and services are somewhat unpublicized, students are often tempted to think of the Beavers as a "mutual adoration society" which performs no useful functions. The fact that most of its members are active in student body offices, and that membership is by invitation, understandably causes many to believe that the Beavers is something like an animated Honor Key.

Platform of Service

One of the principal platforms upon which the Beavers was founded is the performance of service in all phases of student and Institute activities. Its members must logically, therefore, consist of men who have shown themselves willing to serve the Institute voluntarily and frequently. If many of its members happen to be student officers, then, it is because those who voted them into the organization believe these men will enthusiastically join in the many Beaver services.

Besides the basic aim of service to the Institute, the Beavers strives to broaden the intellectual interests of the undergraduates into fields other than engineering and science. It is now mostly through individual effort that the organization carries out this function, although at one time it supervised freshman attendance at assemblies, certain campus lectures, and weekly bulletins on important events at Tech.

Faculty Advisers

The Beavers also endeavors to develop student leadership, to improve "school spirit," and help make relations between the student body and the faculty harmonious and mutually profitable. For these reasons there are certain faculty members of the organization who offer their viewpoints, explain the policies of the faculty, and act as valuable advisers to the Beavers. In the field of school spirit, the Beavers encourages attendance at Varsity games, and during the War, when such a service was badly needed, they operated a car-pool system which enabled everyone to see our teams compete.

The Big Three

At the present time the Beavers performs three outstandingly important duties, the first of which is the student camp for incoming freshmen. Organization and supervision of this annual event is left in good part to Beavers, who choose which old students shall attend, arrange for the cabins assignments, run a commissary, plan the lecture program, transport supplies to and from the grounds, and so on, ad infinitum.

High-School Propaganda

The annual program of high school talks is left in the hands of the Beaver vice-president, and is one of the most important sources of publicity Caltech possesses. Students make trips to various high schools in perhaps a 50-mile radius, lecturing to college prospectives about the curricula, opportunities, and advantages of Caltech.

Supervision of Pajamarino

Finally, the supervision of the Pajamarino may be cited as a major Beaver responsibility. In cooperation with the ASCIT Rally Committee, the Beavers helps make the numerous arrangements for the parade, the entertainment, and the retention of reasonable order during the gala evening.

In its effort to serve the Institute, the Beavers seeks the cooperation of the entire student body, and hopes that it will be recognized chiefly as a service organization, with the aim of bettering student life on the campus as well as aiding the school itself.

Bernard Engholm
President, Beavers

The Engineer

Who is the man designs our pumps with judgment, skill and care?
Who is the man that builds them and keeps them in repair?
Who has to shut them down because the valve seats disappear?
The bearing-wearing, gearing-tearing Mechanical Engineer.
Who makes the juice for half a cent and wants to charge a dime?
Who, when we've signed the contract, can't deliver half the time?
Who thinks a loss of twenty-six percent is nothing queer?
The volt-inducing, load-reducing Electrical Engineer.
Who is it that takes a transit out to find a sewer to tap?
Who then with care extreme locates the junction on the map?
Who is it that goes to dig it up and finds it nowhere near?
The mud-bespattered, torn and tattered Civil Engineer.
Who builds a road for fifty years that disappears in two?
Then changes his identity so no one's left to sue?
Who covers all the traveled roads with filthy, oily smear?
The bump-providing, rough-on riding Highway Engineer.
Who thinks without his products we would all be in the lurch?
Who has a heathen idol which he designates 'Research?'
Who tints the creeks, perfumes the air, and makes the landscape drear?
The odor-evolving, grass-dissolving Chemical Engineer.

Egad!

Have you heard about the garage man's daughter: She's not to be sniffed at.

"People wore a path to their door when they started serving Angostura* in Mannhattans."

Root Mean Square

One of the most talked-about subjects recently is the Truman-MacArthur controversy, and to test student opinion on this topic this question was asked: "In the recent Truman-MacArthur clash, do you side with Truman, MacArthur, partly with both, or do you have no opinion?" It was agreed almost universally that the question was too general. Of those who support Mr. Truman many stated that they supported him only with respect to his firing of MacArthur, and not with respect to his foreign policy. Whatever they mean, though, the figures stand as follows:

For Truman	50
For MacArthur	21
Partly for both	19
No opinion	10

Total 100

The next subject under consideration was the matter of the new plus-and-minus grading system. The question was, "If the old system (without plus and minus affixed to the grade) had been used, would your grade-point-average have been higher, lower, the same, or don't you know?" Results:

Higher	29
Lower	34
The same	25
Don't know	12

Therefore the new system seems to have helped more students than it hurt. Despite the effect on the GPA, 75% of those asked approved of the new system.

The third and last question was of great interest to the Tech staff since it concerns your reaction to the feature page. It turns out (as we expected) that Campus Brewins is the most generally read column, and we were glad to hear comments about its being somewhat better than it has been in the past. It is also encouraging to note that the editorials are the second most widely read feature. The exact question was, "Which of the following columns do you read? Which do you like?"

Read it	Like it
Campus Brewins	79 54
Editorials	64 51
Buttin' In	
(sports page)	61 55
Space Beaver	31 25
On the Record	29 24
Who Dealt This	
This Mess?	18 18

It is realized, of course, that columns such as Space Beaver (science-fiction) and the bridge column (Who Dealt . . .) have strictly limited appeal, and will not be as widely read as a general column such as Brewins.

Editorial note: During the past few weeks the editorial staff has been discussing and experimenting with this column, and the following policy has been established concerning Brewin's. The writers of this column shall remain anonymous, and it will be read only by the feature editor and the editor-in-chief before publication.

Since by its nature Brewins can become a very malicious piece of writing, no girls' names shall be mentioned in it. Also if anyone has a legitimate reason why he thinks his name or escapades should not be included, either of the above editors will listen to his sad story. It is hoped that these new policies will help make Brewin's a less vicious and more collegiate column.

Shades of last term! The Beak stood placidly on the corner of the stairway wondering how people could become so hardened to their environment. They hustled by . . . books, slide rules and thoughts of the impending doom in week five. We gazed again at Apollo, and waddled back to the student houses.

Ricketts Baby

Before we could get through the Ricketts lounge an enthusiastic crowd of Brad Housers stamped in our direction. When the cloud lifted there were numerous cigars stuffed in the Beak's hyper boll weevil coat. Mrs. Houser now has an eight-pound eleven-ounce baby girl to

take care of now. Oh, well . . . better late than never.

Nevada Escapade

Whilst visiting his slot machines in Las Vegas der Beak espied familiar fezes. Porisky and Dave Elliot were observed observing a certain wheel at the tion with statistics, books, graphs, tables, slide rules, stop-watches, and a cleverly marked kitchen sink for tedious hours; they had their system . . . it couldn't lose. And it didn't . . . but it didn't win, either. The house forbade them to bet and they retired, no richer, but certainly the moral victors.

Without a Diploma

Slumming in Flumming brought the Beak face to face with a man who claims he charged the police department \$5 an hour for washing their cars. Behnke was given a choice of \$50 or three days by the judge (speeding home from the Blacker Stag, you know, . . . and it's a good thing the officer didn't kneel down to smell his breath. Excon Behnke has opinions that the food he received was no loss in any way when compared with student house food. Our man, however, managed to get back on the student house diet one day earlier than expected because of his cooperation in a one-man police car cleaning project. His biggest fears were for his disposition.

No Beech

Flumming also had a beach party . . . He was afraid he would get the tired but happy

Gridmen Start Spring Practice Next Week

Intra-squad Game Will Climax Practice; Prospects Look Good

Tournament Park will again echo to the calling of signals and the clash of leather as spring football practice gets under way this Monday at 4. First meeting for the gridmen will be held tomorrow, Friday, at 11 in the athletic office building, and Coach Bert LaBrucherie urges all experienced and prospective players to be there.

This looks like the long-awaited year when the Beavers win. With nearly all of last year's lettermen back and some good men up from the frosh, Bert expects to have done with that idea of "Well, the boys tried hard, anyway." And we think he's right. It's about time Techmen got rid of their defeatist attitude so they can give their whole-hearted support toward a winning team.

Spring practice is scheduled to last four weeks and will culminate in a big intra-squad game Saturday, May 26, at which we'll get a chance to see the boys in action for the first time. So let's back up the gridders with everything we've got this year.

Beginning next week and running throughout spring practice, the sports department of the California Tech will run a series of articles on progress of the practice and prospects for the year, including all pertinent data on who is out for what position.

Buttin' In

by Butler

Congratulations to Throop club for finally breaking the Red machine's hold on the IH trophy. By virtue of their 8-0 win over Blacker's football team, Throop clinched the trophy race and brought the coveted cup back to the shelf of the original winners.

What Happened

The swim team's trouncing at the hands of the Oxy Tiger was somewhat surprising to this writer. On paper it looked like only five or so points separated the two clubs; so a 50-25 score was highly unexpected. But an analysis of the results gives good reason for the defeat. That old nemesis, no depth, was undoubtedly the cause, as the Beavers failed to cop many of the second

(Continued on Page 4)

Gray's Pitching Beats Whittier

Caltech's baseball team moved into a tie with Occidental for first place in the conference last Saturday by beating Whittier ten to two. Oxy in the meantime lost to Redlands two to one.

Norm Gray did the pitching for the Beavers and did a beautiful job, allowing six hits and two runs. The team was in there backing him up all the time. This was the first game this season in which the Beavers did not make any errors.

Wins Own Game

Gray was also the big stick, batting in four runs. Two came in the fourth, after Johnson and Neverman singled and Pfeiffer sacrificed them to third, and two in the fifth.

Big Inning

In the big fifth Koons led off with a single. Then, with the aid of hits by Karasawa and Gray, and five Whittier errors, the Tech team scored seven runs. The last run came in the eighth when Stallkamp walked and Koons batted him in with

Throop Cinches Interhouse Cup

Congratulations to Throop club for being the first house to win the coveted IH sports trophy from Fleming's walls since Fleming first snatched it from the Non-Residents back in 1933. The volleyball games haven't been played yet, but Throop is way ahead.

The pertinent poop is as follows: Throop has 123 pts. and Blacker has 109½. If Blacker placed first in volleyball and Throop placed last, Throop would end up with 126 pts. and Blacker 124½. The only way Throop can lose is by not even getting a volleyball team together.

Football Champs

After severely clobbering Throop in football, 21-6, the Rowdies eked out an 18-12 win over Fleming, being behind most of the game.

By turning this game around, the Rowdies won the I-H championship, undefeated, and with only three touchdowns against their career.

a long triple.

4-1 Record

This makes four wins and one loss in the conference for the Beavers. The diamondmen will try to get revenge for the game they lost to Oxy this Saturday on the Tech diamond. A loss in this game would give Oxy two losses, and Caltech has a very good chance of going the rest of the way without another loss. Let's see a good crowd out next Saturday for the game.

Oxy Hosts SCIC Trackfest Saturday

Pomona Ekes Out Narrow Win Over Beaver Trackmen

By Pete Mason

This Saturday afternoon the SCIC wins up its track season with the annual all-conference meet at Oxy. While Oxy is a heavy favorite to take the meet, and even most of the first places, the struggle for second will be hot and heavy.

On the basis of dual meets it figures to be Redlands, Pomona, and Tech, but it is difficult to predict just how it will come out, since competition in each event is much stiffer than in the duals.

Tiger Shift

Oxy's John Barnes will probably take the mile, while distance man Bob McMillan will move down to the half. The two mile should be a good race, what with Oxy's Bill Straw running 9:58 in the Stanford meet, and Redland's Don Creacy running 9:57.6 against Whittier.

Photo Finish

Last Friday Tech hosted Pomona in what turned out to be a race right down to the wire. Final score was 66½-64½, with the balance being tipped by Pomona's Roger French, who took three firsts and a second.

Pomona's sprint ace, Roger Reinke, co-holder of the conference 100 record in 9.7, was out of action, as was Tech's Ray Heacock, who had sprained his ankle earlier in the week.

Good Marks

Best mark of the meet was probably Jim Kliegel's 15.8 in the (Continued on Page 4)

Frosh Sports Roundup

By Chuck Sargent

Tomorrow our frosh thinclads will be out at Pomona with one thought in mind: vengeance on Pomona for the 85½-36½ defeat suffered at their hands (feet?) last Friday. Although they failed to make a clean sweep of any one event, the Sagehens' victory was quite decisive.

Two Firsts

Only two beaverbabes were able to win; Kaiser in the shot, and Williams in the discus. Others scoring for Tech were Munn, 6 pts., Campbell, 5½, and Cramer, 4. Munn placed second in both the 100 and 220, which were won in the slow times of (Continued on Page 4)

Poet Courtmen Visit Saturday

Caltech's court inhabitants will meet Whittier for the second time this season on the local courts this Saturday at 1:30 p.m. This should prove to be a good challenge and an exciting match for the Beavers, who were beaten by Whittier last time by only a slight margin, and have promised to change the tide.

Shut-Out

The weather man made last week's practice match with L.A. State indecisive, but he didn't act fast enough to deprive the singles men of a good workout. The week was topped with a most decisive win by Tech over Chapman with a final score of 9-0.

Scott Tournament

John Lamb encourages the men in the Scott Tournament, now in progress, to play their matches as soon as possible. Loser of a match is expected to pay for the balls used.

Oxy Unleashes Swim Strength

Last Friday the Oxy Tigers proved their willness by coming out on top in the first of two meets with Caltech, 50-25. In the course of the meet, which was held in the Oxy pool, several of the Tiger splashers were revealed as capable of much faster times than they had previously allowed to become known to the public.

Von Herzen Stars

Top man for the Beavers was von Herzen, who took first in both the 220 and the 100. The win in the furlong was something of an upset. Oxy's Ragan, who was figured to win, took a poor third, while McCoy raced von Herzen right down to the finish line, coming in only a tenth of a second behind.

Campus Interviews on Cigarette Tests

Number 18...THE RACCOON

"They can't trick an old grad like me!"

Shades of the roarin' 'Twenties! All duded up in his ancient benny — but he has modern ideas on testing cigarette mildness! He's tried every "quickie" cigarette test in the book — and they're not fooling him one bit! He knows for dang-sure that cigarette mildness can't be determined by a cursory sniff or a single, quickly-dispatched puff. He doesn't have to go back to school to know that there is one real test — a test that dispels doubt, fixes fact.

It's the sensible test... the 30-Day Camel Mildness Test, which asks you to try Camels as your steady smoke—on a pack-after-pack, day-after-day basis. No snap judgments needed. After you've enjoyed Camels — and only Camels — for 30 days in your "T-Zone" (T for Throat, T for Taste), we believe you'll know why...

More People Smoke Camels than any other cigarette!

HOW TO PREPARE FOR YOUR DRAFT DEFERMENT APTITUDE TEST!

In May or June you will be given a "draft deferment aptitude test," upon request. Your score will determine whether you can serve your country best by continuing your studies, or entering the Armed Forces. NOW is the time to prepare for this all-important test—and there is no quicker, easier, more inexpensive preparation than "Practice for the Army Tests." This "on-the-ball" book contains complete, simplified study material for the questions to be asked on the "deferment test." Crammed with hundreds of questions and answers on the FOUR SUBJECTS you must know to obtain a high score!

SEE IT AT YOUR COLLEGE BOOKSTORE If you can't find it at your bookstore—order it direct! Just mail the coupon, together with \$2.00—and we'll rush you your copy of "Practice for the Army Tests." Take this important step NOW.

DuBridge On Commission

Dr. Lee A. DuBridge, president of Caltech, has accepted the invitation of Gen. Dwight D. Eisenhower to serve as a member of the new National Manpower Council established at Columbia University, it was learned here today.

Third Recent Appointment

This is Dr. DuBridge's third recent appointment in this field. He has been named by President Truman to membership on the Science Advisory Committee of the Office of Defense Mobilization, and he also is a member of the Scientific Manpower Advisory Committee of the National Security Resources Board.

The 15 members of the Columbia University group include four college and university heads, two presidents of national labor organizations, two newspaper executives, and noted industrialists, business executives, administrators, and professional leaders.

Ford Foundation Grant

The purpose of the council is to appraise the nation's manpower resources "in a period of enduring emergency," according to Columbia President Eisenhower. He plans to participate in the group's work whenever possible while on leave from Columbia as commander-in-chief of the supreme headquarters of the Allied Powers in Europe.

Bacher Head Of Committee

Prof. Robert E. Bacher of Caltech has been appointed chairman of the Committee on Atomic Energy in the U.S. Department of Defense Research and Development board.

Dr. Bacher, who was the sole scientist member of the Atomic Energy Commission for two and one-half years, is professor of physics and chairman of the division of physics, mathematics, and astronomy at the Institute.

Purpose of the AEC

His new appointment, announced in Washington by Dr. William Webster, RDB chairman, again will put him in close touch with the AEC. One purpose of the Committee on Atomic Energy, Dr. Webster said, is to coordinate the research and development activities of the De-

Beebe Wins ASME Student Award

Wayne M. Beebe, senior ME at Caltech, is the winner of the 1951 student award of the ASME, Region VII, for technical reports presented at the annual convention.

Beebe's paper was entitled "A New Method for Rapid Reduction of 45-Degree Strain Rosette Data."

Six Schools Represented

Eleven contestants representing six schools spoke at the annual tourney held Friday and Saturday at the University of Southern California. Competing in addition to Caltech and USC were Stanford, the University of Arizona, the University of Utah, and Santa Clara.

Boyer Also Enters

Caltech's second entrant was Robert Boyer, of Oakland, Calif., also a senior in Mechanical Engineering. Dr. Dino Morelli, assistant professor of mechanical engineering and faculty adviser of the Caltech student chapter of ASME, accompanied the speakers to the tourney.

Each contestant spoke 15 minutes and answered questions following his report.

Y's DOINGS

(Continued from Page 1)

tee rate of new workers is high. They have failed to develop a conscientiousness of their importance.

The fourth and final point was the need for capital. Dr. Bonne estimated that it would take \$200 billion to raise the standard of living of the 700 million Asians to a decent level.

Answers to Problems

The answers to these problems are being worked out in Israel. The approach is to bring in an element of development knowledge from outside, but mainly to educate the people and thus create a conscientiousness of the importance of this development to them.

partment of Defense with those of the AEC. The committee, consisting of four civilian and six military members, also will assist the RDB in the atomic energy aspects of the military research and development program.

CAMPUS BREWINS

(Continued from Page 2)

void in the social schedule was filled by the Scripps dinner-dance and the Whittier formal. At the Schmitts field event Stockebrand at last met his equal. He is still muttering "What a woman!" and wondering if he did the wrong thing in asking her for two dates at once.

Another Blow

Tom Scruggs, looking at least on his sleek, high-powered motorcycle, ran out of gas as he was crossing Eaton canyon on a high-tension wire cable. The resulting fall broke two bones in his left leg and set the surrounding brush on fire. The blaze took five fire companies and six hours to put out and burned down a ranger station in the process. The Forestry Department will start a \$10,000 suit against Scruggs in June. Be brave, Tom... we all have to go sometime.

FROSH SPORTS ROUNDUP

(Continued from Page 3)

10.5 and 23.2.

Kaiser Breaks 40'

Gene Kaiser put the shot 40' 1/2" last Friday; it was the first time any frosh has broken 40' this year. At the rate Gene is improving, we can expect a victory for Tech in his event, and maybe even an assault on the school frosh record of 44'9".

Others Lose

Friday the swimming team lost to the Oxy tiger cubs by the score of 33-12. It was a walk-away from the beginning, with only four second places taken by Techmen.

The baseball team also lost at Oxy, 20-5; this was closer than March's 30-4 game. The tennis team lost, 4 1/2-2 1/2, to Muir. This Saturday the tennis and baseball teams travel to Whittier.

(Continued from Page 3)

a first in the 50, and was touched out for second in the 100, which is usually his favorite race. Weil and Connor also missed taking second places in their respective events by very slim margins. Houser came through with his best time ever in the 440, but still missed winning by a second.

Good Times

Most of the Beaver natators turned in their best times of the season. Such improvement bodes well for the next Caltech-Oxy meeting to take place in the PCC pool next Tuesday afternoon. If the results of some of the close races of last week are reversed at that time, victory may be ours.

Whittier Again

Tomorrow at PCC the Poets again visit us. An easy win is contemplated after the 60-15 win of two weeks ago.

Results:
Medley—Oxy (Peterson, McClusky, W. Peterson), 3:22.2.
220—von Herzen (CT), McCoy (O), Ragan (O), 2:28.8.
50—Libbey (CT), Manning (O), Ensign (O), 25.5.
Diving—Sparrow (O), Stanaway (CT), Delaney (O).
100—von Herzen (CT), McCoy (O), Libbey (CT), 57.5.
200 Back—Manning (O), Ensign (O), Weil (CT), 2:35.0.
200 Breast—McClusky (O), Bonham (O), Connor (CT), 2:43.5.
440—Ragan (O), Houser (CT), Weil (CT), 5:43.2.
Relay—Oxy (Ensign, W. Peterson, McCoy, Manning), 3:57.4.

OXY HOSTS

(Continued from Page 3)

highs. Also worthy of note was French's 2:02.3 in the 880, especially after his win in the 100 and second in the highs. He then went on to win the lows for 18 Pomona points.

Doubles

Shearn of Pomona scored a double win in the 440 and 220, while Mason scored the only double win for Tech in the mile and two mile. Worthy of mention was Pilkington's 10:21 in the two, some 20 seconds improvement over his previous best.

Final scores and results:
Pomona, 66 1/2; Caltech, 64 1/2.
Mile—1, Mason (CT); 2, Calvin (P); 3, Lombard (P), 4:34.9.
440—1, Shearn (P); 2, ackson (P); 3, Johnson (CT), 52.1.
100—1, French (P); 2, Cunningham (P); 3, Walker (CT), 10.5.

House Social News

Dinner Semi-Formal For Ricketts, Fleming

Saturday, April 28, has been chosen as the night to enshroud the annual Ricketts - Fleming spring semi-formal. The dinner dance, with food provided by a well-known caterer and served buffet style, will be held in the court between the two houses.

Dancing Beneath the Moon

Tables will be arranged on the walk under the arcade, and dancing—to the music of Jack Hummel's Mellow Men—will be under the sky on the portable dance floor. The dance will be lighted a la Ricketts by the waning moon.

The formal this year promises to be better than ever, according to social chairmen Walt Eager, Don Handen, and Bob Lynam, who arranged the affair.

Hawaiian Festival

The following Saturday will find Ricketts deserted—its members evacuated en masse to the Luau. To outsiders a Luau is a sort of Hawaiian feast, with a pig cooked whole in a pit and various exotic native dishes... a very good time, according to Al Sereno, who is in charge of the fete.

Dancing, beach games, and an authentic Hawaiian show are featured. A limited number of invitations are available to members of other houses at six dollars per couple.

Javelin—1, Middlebrook (CT); 2, Woody (CT); 3, Stefanides (CT), 159'5 3/4".
Shot—1, Swift (P); 2, Cunningham (P); 3, Woody (CT), 42'2 3/4".
120 HH—1, Kliegel (CT); 2, French (P); 3, Irwin (CT), 15.8.
HJ—4 way tie between Glahn (P), Hastings (P), Sutton (CT), Waid (CT), 5'8".
PV—1, Tautz (CT); 2, Riggs (CT); 3, Mills (P), 11'6".
880—1, French (P); Deis (P); 3, Aagard (CT), 2:02.3.
220—1, Shearn (P); 2, LaTourette (CT); 3, Cunningham (P), 23.5.
Discus—1, Hauptert (P); 2, Woody (CT); 3, Swift (P), 125'8".
BJ—1, Waid (CT); 2, Mills (P); 3, Hastings (P), 21'6 1/2".
2 Mile—1, Mason (CT); 2, Pilkington (CT); 3, Calvin (P), 10:16.2.
220 LH—1, French (P); 2, Kliegel (CT); 3, Waid (CT), 25.1.
Relay—Won by Caltech (La Tourette, Aagard, Parnes, Johnson), 3:35.6.

Blacker Has Exchange, Aqua-Barbecue Dance

A combined barbecue and swimming party followed by poolside dancing has been scheduled by the Blacker social committee for this coming Saturday night. Swimming will start at 6:00 p.m. followed by a barbecue at 7:00.

Swimming and dancing will round out the evening. The two heated pools at Wagner's in Altadena will be at the disposal of Blackermen and dates.

Friday night an exchange with Oxy has been planned.

BUTTIN' IN

(Continued from Page 3) and third places.

Baseball—Rah!

The Beaver diamond team came up with something new last Saturday; the lads played errorless ball. And coupled with their fine field play the Engineers collected enough hits to drop the Poets 10-2. Behind Gray's twirling and general overall improvement there is a swell chance that the Beavers will annex the Conference championship. Noting that Tech is in a first place tie with Oxy makes the picture now look even brighter.

Last of Track

This weekend brings track lovers the SCIAAC track meet, with Oxy naturally favored to walk off with the honors. Payton Jordan is fresh from an upset victory over the Stanford Indians and will probably let his charges go full force for this all-important meet. There will undoubtedly be several new records in the books, especially in the mile and two-mile events. Bob McMillan has finally gotten his stride, as his last week's 4:13 mile can well testify.

Tech in Fourth

LaBrucherie might get his boys fired up enough to take third place. But that close 62 1/2-64 1/2 defeat at the hands of Pomona figures the Beavers in the No. 4 spot.

Be Happy - Go Lucky!

Dating here without a car is tough as it can be, But since I've changed to Lucky Strike The girls are asking me.

J. Paul Sheedy* Switched to Wildroot Cream-Oil Because He Flunked The Finger-Nail Test

SHEEDY looked bird-seedy with his ruffled hair. He didn't know feather to bury his head, or go on a wing-ding! "Owl I ever get a date for the prom?" he asked his tree roommates. "You're robin yourself of popularity, birdbrain," they chirped. "Better be cagey and get Wildroot Cream-Oil! It's non-alcoholic! Contains soothing Lanolin! Grooms your hair neatly and naturally. Relieves dryness... removes loose, ugly dandruff!" Now Paul's flying high! The sweetest little chickadee on campus has him out on a limb. So get a bottle or tube of Wildroot Cream-Oil at any drug or toilet goods counter tomorrow. And next time you see your barber, ask him for a professional application. Then you'll really be in there pigeon!
