Mobilgas Run to take place March 18 - 24

The 1956 Mobilgas Economy Run will be leaving Caltech spring vacation, from Sunday, March 18, at midnight to the morning of Saturday, March 26.

Registered students of Caltech are eligible to enter as official American Automobile Association Observers. Where the run will end has not yet been announced, but is expected to be in the U.S. or Mexico, perhaps as far south as Guadalajara.

The forty-odd Caltech students who go on the run will be hired jointly by Mobilgas and the AAA. They will be official observers on break-in runs on all Mobilgas stations. At the final run, each car will be entitled to 200 miles of break-in run under their supervision.

This year's pay-rate has not yet been announced, but Prof. Peter Kyropoulos, chief observer on the run, has said that it will probably be the same as it was last year: $1.50 per hour plus expenses on break-in runs. $10.00 per day on the final run. Hotels and food on the run are on their own.

This will be the sixth year that students have taken part in the event, having started in 1951.

The top list for those who wish to take part in the run is in the Mechanical Engineering Office, Room 201 Engineering.

AUFS representative E. A. Bayne speaks on current problems in Middle East area

by Frank Kosky

"Iran has entered its most potentially productive period since the Nation was declared Edward A. Bayne, Middle East expert with the American Universities Field Staff, former adviser to the Iranian Government and to the Pontifical Commission in the Middle East. Mr. Bayne made the announcement at an informal meeting with the California Tech staff last Tuesday afternoo..."

Dear Sir:

Student body morale from the student's point of view varies
accordingly as his own. It is extremely difficult for the individual
observer to determine whether it is high or low, and still harder to
determine which way it is going. Morale itself is hard to define
regardless of conditions there is a desire to make them better.

Because I live under this defi-

nition, it is not possible to say

that student morale is high.

Unfortunately, it seems that
several students who are not en-
tirely apathetic feel that there is a general disagreement on pol-
icy between students and facul-
ty. I disagree, because I feel

that neither knows the other's
views. The faculty is operating
on a few misconceptions, and has a tendency to place the ris-
ings and failings of student mor-

one on isolated trivialities, while the

students have no knowledge as to the true sincerity with

which the faculty has been at-
tack ing the problem. At student camp the freshmen

were talkers. They talked of

Earpert Lab can duplicate varying climatic conditions

by Januo Riebert

Nearly every climatic factor over which plant growth is possible can be duplicated in Caltech's Earhart Plant Research Laboratory. This lab, located on the corner of San Pasqual and 3rd St., was made possible by a grant of $60,000 from the Earhart Foundation.

Elaborate techniques are used to control every climatic factor to a high degree of precision and to maintain stability in the lab. All sand, soil or gravel to be used in the lab is first subjected to steam treatment; all air entering the building is treated by filtration and electric precipitation. All personnel must wash and change clothes before entering the lab. The lab is divided into a large number of separate growing rooms in which all climatic factors can be varied individually. Heating and refrigeration equipment make possible experimentation over a wide range of temperatures. Humidity is also controllable throughout the lab. Either sunlight or artificial light can be used for the growing of plants. Various types of artificial light enable research on the effect of light color on plant growth. The glass in the growth section of the lab has water continuously running over it to filter out heat. The moistened sprays and a fog machine that can penetrate particles of different particle sizes permit variation of precipitation conditions. In some of the rooms, the exact content of the air is variable, and the lab even contains a wind tunnel.

The variation of all of these factors results in a large mass of data for each experiment. Thus all data reduction is done by computer. The results for each plant used in an experiment are being coded on an IBM card.

A variety of research is conducted at the Earhart Lab. One experimental project, for example, was to determine whether varied climatic conditions affected the ratio of carbon isotopes in plant material. Another project was a study of the effect of precipitation conditions on the bud formation and flowering of the coffee plant.

The operation of the Earhart Plant Laboratory has represented a significant advance in plant research. It has enabled detection of plant data of a uniformity previously impossible, and has permitted a precise analysis of the interaction of climatic conditions in affecting plant growth.

Essay contest offers prizes

"The Scientific and Society" is offering a three-year McMillan Essay Contest topic. The contest is open to all Caltech undergraduate graduates except previous first or second place winners.

Ideas for the essays are to be drawn from the following reading materials: "The Gadget Maker," by Maxwell Grant; "The Value of Science," by Richard P. Feynman, published in the December 1955 issue of "Engineering and Science"; Robert A. Millikan's autobiography, and "The Big Secret" by Merle Colby.

Essays should be submitted to Dr. Kent Clark, before the April 22nd deadline. Judging will be done by a five-man committee, a scientist, two men from our Humanities division, and two men from outside Caltech.

Four prizes are offered, first prize $75, second prize $50, third prize $25, and fourth prize $10. Additional information may be obtained from Dr. Kent Clark, 310 Dabney.

Bayne Speaks (Continued from page 1)

action taken since 1963, it is by no means dead.

"We should not forget," Mr. Bayne pointed out, "that Iran has the longest frontier shared with Russia of any of the few Asian countries. And although the government is attempting to bring better existing conditions, aid is slow in coming. In many large areas where such poverty and misery exist, the party that promises relief has a fertile ground with which to work."

Bayne concluded by saying that even though Americans would like to reduce foreign aid, to cut down our support of the Iranians at this time would endanger the progress Iran and the West have made toward a mutually productive political climate. If Iran is to be a military factor in the Baghdad Alliance, it must be as a result of high morale among the Iranians, due to continued economic development and technical military improvements. Both of these will prove costly, and Iran does not have sufficient resources to undertake both simultaneously, unless there be a continuation, perhaps even an increase, of American assistance.

I take a job from scratch

The Air Force introduced Forrest L. Hurst to communications. In 1953 he was Communications Officer at Lowry Air Force Base near Denver, Colorado. He was responsible for the communications setup of the President's "Summer White House," and in this assignment he met members of the local Bell telephone company.

"The telephone people I met," says Forrest, "were always helpful. I cone to them for their technical advice. They gave me very good impression of the Bell System. So three months before I was discharged, I wrote to Indiana Bell for an interview, and subsequently I was hired as a Student Engineer."

Today Forrest is in Indiana Bell's Engineering Department, working with carrier facilities—the means by which a number of telephone calls can be sent simultaneously over one circuit.

Forrest is given the basic circuit and equipment requirements for a job. "My boss farm's it out to me," Forrest says, "and I take it from scratch." Forrest does the complete engineering job. He writes the specifications, including wiring plans and the list of equipment for the job. Then the installers take over.

"I really feel that I'm contributing to the telephone business," Forrest says. "My wife does too. When we're in the car we get a kick out of driving by a Bell Telephone Company truck. That is a real achievement in my life."

Forrest graduated in 1952 from Purdue University with an E.E. degree. His career is typical of those which exist in other Bell Telephone Companies, and in Bell's Telecommunications Laboratories, Western Electric and Sandia Corporation. Your placement officer has more information about Bell System companies.

The Sports Corner

by Bob Walsh

Over the weekend Tech lost two more basketball games to make a total of ten for the season, running our losing streak to seventeen.

There admittedly is a certain amount of character-building in sports, even when losing, but a team that consistently loses tends to kill character rather than build it. When a team goes into every game assuming it will lose, and when even the coach takes every humiliating defeat as if it were to be expected, then it is time to ask ourselves whether it might not be healthier to forget intercollegiate athletics entirely.

A team that no longer has a will to win can no longer be said to be engaging in sport. And anyone who has followed our team closely must admit that the spirit and drive which are the life of any team are not particularly noticeable here.

Our biggest weakness is a defeatist attitude based on the unfounded assumption that technical studies are naturally inferior athletes. And this attitude is supported by coaches who accept losing as the natural order of events.

Tech has only one disadvantage against other schools its size. The individual here has slightly less time than the individuals at most other schools. This means either a little less time for practice or a little less time for sleep. But this disadvantage must be slight, since we do hold our own in the individual sports of track and swimming.

We have in Phil Conley potentially the best center in the conference. Howie Bloomberg, Dan Chilton and Rolland Moody give the team a fair background of experience, and Glenn Converse, Dick Van Kirk, Jim Welch and Jim Workman give the team a depth of ability rarely seen on Caltech squads.

Although at least half of the men mentioned did not play basketball in high school, they have not been taught the fundamentals of the game—screening and defense, for instance. Coach Carl Shy has not given the team a definite offensive pattern to work from.

With their first meet only eight days away, the Caltech swimmers have been working out in earnest in preparation for the coming season, under the direction of head coach Web Ensminger. Friday, Feb. 3, the team travels to Lynwood to compete in the AAU relays to be held there.

After finishing a strong third in last year's conference meet, the Beavers are tabbed as one of the favorites to win the title this season. Ensminger plans to build around his seven returning lettermen and members of last year's freshman team which took the league championship. Among the returning lettermen are Dick Johnson, Jim Ball, Bill Davis, Blaine Navroth, Ed Frink, Ross Brown, and John Thomas, team include Clark Rees, Vince Kline in the breaststroke, Pat Taylor, and Don Wiberg.

Gilmer leads L. A. State to 58-41 win over Tech

An ebony-skinned whirlwind, clad in a black jersey and char­

treuse shorts, paced the L. A. State Diablos to a 58-41 win over Caltech in a non-conference basketball game Tuesday in the Scott Brown Gymnasium.

With guard Fenton Gilmer swishing the nets for 24 points and continually setting up scoring opportunities for his teammates, the Diablos kept the Beavers off balance throughout the game and were in complete control all the way. Caltech had its usual difficulty in finding the basket on their field goal attempts, hitting on only 30% of their shots while L. A. State made 54% of theirs.

The Beavers missed several opportunities to close the gap by missing several free throws mainly because of an inability to hit from the free throw line. The Diablos made only 7 of 22 attempts for a 31.8 percent, while L. A. State made 18 of 27, or 66.7 percent. The Diablos also had the edge in the rebounding department, gathering 50 to the Beavers' 37.

Phil Conley, following his regular pattern, was Tech's leading scorer with 20 points, hitting eight of 15 field goal attempts and making four out of nine free throws. Howard Bloom­berg was second high scorer for the Beavers with seven points, while Dan Chilton and Jim Ball had four points each.

BOX SCORE

Player                                      Caltech                   L. A. State

Converse                                   18                        4
Batch                                      0                          0
Chilton                                    15                        4
Moody                                      20                        1
Conley                                     18                        3
Gard                                      10                        5
Van Kirk                                   10                        0
Bloomberg                                  20                        1
Workman                                    10                        0
Welsh                                      4                          0
Ball                                        3                          0
Totals                                     77                        19

Tech had its usual difficulty in finding the basket on their field goal attempts, hitting on only 30% of their shots while L. A. State made 54% of theirs.

Caltech invades Whittier, hosts La Verne Tuesday

Whittier’s Poets are favored to hold Caltech another defeat Saturday night as the Beavers travel to the Quakers’ gym in the first round of conference play. The Poets have a one-win-loss record in SCC play thus for this season, having beaten Pomona-Claremont and lost to Redlands and Grand Canyon.

Among the players the Beavers will be especially trying to contain one factor—Dick Vitz, Hubert and guard Joe Wohlmuth, both all-conference selections last season. Tech will probably lead forwards Howard Bloomberg and Glenn Converse, Phil Conley at center, Jim Welsh and Jim Workman at guards. Others slated to see considerable action are Dick Dan Chilton and guards Roland Moody and Dick Albo making the trip are Kay Sugarman, Herb Rauch, Bill Kern, Don Webster and Fred Ishihara.

Tuesday the Beavers host tiny La Verne College’s Leopards in what promises to be a close contest. The man to watch for the Leopards will be Glenn Stanford, who set a new school scoring record over Grand Canyon College of Phoenix, Arizona, earlier this season. The high-scoring forward is also La Verne’s key rebounder. Supporting Stanford are Warren Carter, center; hustling Hines, a guard, and Larry Deal at forward.

The Leopards split with Westmont, winning 64-41 early in the season and losing 104-46 after the holidays. In games against SCC foes, they have lost twice to Redlands and split with Pomona.

Next night home game for the Beavers is Saturday, February 4, when the Redlands Bulldogs, second-place team in the SCC, invade Scott-Brown gymnasium.

**Writer critical of Tech’s hoopsters**

As a matter of interest in connection with the column on the opposite page, we offer the following excerpt from a pre-game article in the Daily Trojan, the La Verne College’s student newspaper. The article preceded the January 17, Caltech-Pomona basketball game, which Pomona won 74-45.

“Tech in basketball is remarkably similar to Tech in football—Phil Conley plus a lot of guys named Joe. Conley is one of the finest players in the conference, and has been averaging over 15 points per game, but he can’t carry the load all alone, and the rest of the team is spectacularly bad.

“Despite the complete lack of ability exhibited by the ‘Tech squad so far this season, the ‘Tees can’t be too confident of a win, for since the Redlands Tournament they have speedily dropped, simulating the fall of a dead duck. If they continue their disgraceful downward trip, tonight’s game could well be a battle to see which is the worst team. They have lost to some teams that a good high school squad would run right off the court.”

**Beavers bow to Chapman**

Chapman’s varsity hoopsters dropped their tenth game of the season to a hustling bunch of Chapman Panthers Saturday night in a gym visitors’ gymnasium.

Playing a smooth ball-control game, the men from Orange dominated the play in the first half, pulling to a 20-7 lead early in the period. Coach Carl Shy’s Beavers in the second half couldn’t knock the ball effectively, and as a result most of their shots came while off balance. Chapman controlled the backboards almost completely in the first half, and with guards Art Bias and Dick McCariter hiking well from outside and big center Bob Hambur-lin scoring from the pivot, the Panthers piled up a 31-17 halftime lead.

In the second half the Beavers began to score more frequently, but the Panthers more than matched Caltech’s point output. Chapman broke through the Tech defenses for 42 points, while the Beavers poured 33 points through the sets for their largest scoring effort of the season for one half of play.

Phil Conley led the Caltech scorers with 21 points.

**Meet the Varsity**

**Jim Welsh**

One of the bright spots in the Caltech basketball picture is Jim Welsh. The 5’1” hustler has been a sparkplug of the Beavers defenses in games to date, and his elusive-ness is vividly demonstrated on the “go ahead” play, as he passes into the center and drives in, taking a return pass for an easy layup.

Welsh, who escaped the winn-ing streak by being hit by West­mont, coming to Tech, is in the geochemistry option, and is as yet undecided about postgrad uate plans.

After serving a year’s appren­ticeship on the freshman bas­ketball squad, Jim moved up to the varsity last season to find it overloaded with guards, but a year’s hard work and a few graduation losses have combined to put him at the top of the list.

**The Sports Corner**

(Continued from page 4)

each game, and the opposition meanders at will against an uncertain defense.

And worst of all, Shy has made little attempt to instill a winning spirit in the men. If any-thing we have seen this year is a reflection of Tech philosophy and technical perspective, yet small enough

They have lost to some teams that a good high school squad would run right off the court.”

**Frosh Sports Roundup**

by Brent Banita

Same old story for the Frosh basketballers last week: lack of aggression plus poor shooting, two possible wins. After a slow start against Pomona-Claremont, 48-49 on the seventeenth, the Junior Beavers came back strongly on the following Friday to drop a very close one to Fas­don Nazarene, 54-50.

A margin of three to five points was all that separated the Beavers and Nazarene during most of the second half. If Tech hadn’t gone completely cold for a span of several minutes in the half, the score probably would have favored us. A lot of in­creased hustle by the Beavers held down the Panadese fast breaks, giving the guards a fair chance of breaking up the plays, Fred Newman and Jerry Just garnered most of the points in both games.

A heartfelt break-through, that it seemed like the Frosh would be ready to climb all over Chop­pan on the next evening, but even some great defensive work teamed with Fred Magalena and Fred New­man’s fine play, and a further deficiency in poor shooting, the Frosh found themselves tied 60-60.

We just missed too many shots, most of which were

set up through some really af­fective rebounding by Bob Lebo­vitz, and ball-handling by guards Ray Seaver and Fred New­man. In the scoring department, Newman and Lebovitz were high with 20 and 13 points apiece.

Starting lineups for the past few games have found Jerry Just at center, Bob Lebovitz and Bill McClure at forwards, and Fred Newman, Bob Ingram, Dave Menn or Jim Cribbs in the guard spots. Support in the stands hasn’t been really outstanding in recent weeks; how’s for a big change this Saturday when the Frosh take on Whittier away.

**Intermediate sports**

Matches get under way at 9:30 Saturday in the Intermediate Ten­nis Tourament. The meet is a one-day affair, and J. H. Norris, Director of Interhouse Athletics, hopes to finish the last matches in the afternoon. Each house will enter three men for singles competition and a dou­ble-team team. By the end of the day each man will have played 48 matches, 12 against each of the other houses.

**A frank message to graduating electronic and mechanical engineers**

You know it . . . we know it . . . so let’s be frank about it.

The demand for engineers—experienced or graduate—for exceeds the supply. And, from now on, you are going to be sought after more than a triple threat halfback in next year’s varsity.

You will be promised many things (including the moon) by those who will be going to Farnsworth or elsewhere. You are old enough to make up your own mind. If you look back on the past year, you have probably just started to realize these things are pretty hard to resist.

So, again, let’s be frank. We at Farnsworth won’t promise you the moon. (Although we are working on some ideas that may eventually get you there some day.)

You are old enough to make up your own mind. If you look back on the past year, you have probably just started to realize things are pretty hard to resist.

So, again, let’s be frank. We at Farnsworth won’t promise you the moon. (Although we are working on some ideas that may eventually get you there some day.)

You are old enough to make up your own mind. If you look back on the past year, you have probably just started to realize things are pretty hard to resist.

superior taste comes from superior tobaccos

Marcel Marceau, French pantomimist, returns to the Biltmore Theatre this week to present "Marcel Marceau and a Setting of Pantomime." The audience will witness several pantomimes; some of which are very good, others miss their mark entirely. The evening as a whole depends on one's point of view. As such, the audience can be considered highly entertaining or exceedingly dull.

THE MOCKING BIRD STILL SINGS: Mexican Players present origin story about life in early Calif. Wed, Thu at 8:30; Wed & Sat mat 2:30. Pahsa Hills Theatre, 3 mi N of Claremont. $1.50

THE MOKING BIRD STILL SINGS: Mexican Players present origin story about life in early Calif. Wed, Thu at 8:30; Wed & Sat mat 2:30. Pahsa Hills Theatre, 3 mi N of Claremont. $1.50

HELEN'S APARTMENT: Fifties Girls, Johnson. Glamorousornings, stogy, costume, stage, white face and white jumper, against a black back drop and into his routines.

This type of performance, to be at all appreciated, demands the strict attention of the audience. Marcel Marceau not only demands attention but gets it. Even in some of the slower parts of the show, the audience cannot for get the silent white figure on the stage.

Marceau starts out left footed with a pantomime, "Walking against the Wind," that is hardly hilarious, but he improves as the evening proceeds. When he fights an imaginary opponent in "Fight-Of-War," one can almost see the rope jerking him across stage. The Public Pigeon" gives Marceau a chance to put his talents to work in impersonating 14 people.

The second act, which features BIP, Marcel's creation, is considerably more lively than the earlier part of the evening. In "BIP plays David and Goliath" Marceau runs rampant, dodging behind a small black screen as David and emerging as Goliath. This is undoubtedly one of the high spots of the evening.

Some of the pantomimes unfortunately did not measure up to these performances, making the evening somewhat spotty. Two assistants, Pierre Verry and Paul Sanchez, who hold placards announcing Marceau's pantomimes, do much to keep the show tied together.

All in all the evening is interesting in a diffuse sort of way.

Marcel Marceau will close Sunday night. In addition to his evening performances, he will present matinees Saturday and Sunday at 2:30 p.m. The Biltmore Theatre is located on 5th at Olive in Los Angeles. Tickets for the evening performances are priced from $1.65 to $3.30. A limited selection of refreshments is available up to curtain time.

—Dick Kirk

JENNY KISSED ME: starring Rudy Vallee is a very enjoyable comedy. Pasadena Playhouse, 39 & El Molino. Pasa, Fri-Sun thru Thurs 8:30, 9:00-$2.45; Fri & Sat eve 8:30-$1.95-$2.30; Sat matinee 2:30, 9:00-$3.50.
