### Craig Elliott wins ASCIT election

**House meetings held last week, master keys, tests discussed**

House meetings were held in the student houses last week to discuss the honor system. The meetings were conducted by the Board of Control members, discussing the honor system that has come to light in the last few months. Those meetings after dinner. Skating, tobogganing, and all other snow sports will be available thirty minutes away at Snow Valley.

**Juniors hold snow party at Arrowhead**

This Sunday, February 26, the junior class will hold a snow party at Arrowhead and Snow Valley. Howard Marshall's helpers will have a dance and the center of activity; lunch and dinner will be served there. Upperclassmen are invited after dinner. Skating, tobogganing, and all other snow sports will be available thirty minutes away at Snow Valley.

The Marshalls' home, which has a forty-foot snow slide and huge windows, blends perfectly with its rugged surroundings.

Lunch, which will be spaghetti, garlic bread, and hot chocolate, will be served from noon to one o'clock at Marshall's house. During the afternoon, people can take the trip to Snow Valley or amuse themselves at Arrowhead. There will be delicious homemade hamburgers for dinner, which will be from five to six. After-dinner dancing will fill the rest of the evening. All juniors are invited. For more information, see Gene Barnes in Dabney, Herb Rausch in Fleming, Doug Ritchie in Richlotta, or Harry Bloomberg, junior class president.

### Applications for Honor Keys due

Applications for Honor Keys must be given to ASCIT vice-president Howard Berg by Monday, they may be placed in the “IP” box or taken to him in room 27 Dabney. The current honor point list, which may be found up on page 106, shows the points of this year’s “Little T.” Students may request points for activities and jobs not listed. The Honor Point Committee, consisting of ASCIT vice-president and first and second representatives, will decide how many points each applicant receives. To receive an honor key a student must have a total of 100 points, each student who has 50 or more non-academic points will receive an honor certificate. Those who have 50 points are to be classified as “Honorable.” Those who have 100 points or more are to be classified as “Honor.” Those who have 150 points or more will receive an honor key.

### Pre-registration deadline is today

Pre-registration for third term ends today. Students who plan to study here next term must have pre-registered by this afternoon. Underclassmen must have their pre-registration cards turned in to the registrar and returned to 119A. Throop before the office closes this evening. Anyone with questions regarding sections, courses or units should see Mrs. Duff in 119A.

---

**Houses schedule dances and picnic**

**Because of the ICC Dance, this will be made more clear for social events for tonight. For Saturday night, Hicker is planning a dance in their lounge. Fleming will be enjoying an ex-chaplain and English major from Dabney will have a picnic in the desert on Saturday. The Throop Club will have the last evening of the year.**

**AUFS man Barnett reveals views on Red China future**

by Barry Bass and Frank Kofsky

Red China is actively seeking to win Japan, India, Burmese, and Indonesia, to her camp in the cold war, AFSU representative A. Dock Bennett told at a California Tech interview Tuesday. Bennett is the Communist mind's officer is concerned with the UN.

### Film Series slates Hitchcock picture

This Sunday’s Film Series picture, “Strangers on a Train,” will be shown in Culbertson at seven thirty. This 1951 picture, which was directed by Alfred Hitchcock, stars Ruth Roman and Farley Granger.

Two strangers meet on a train. Each has someone he would like to kill; each has such a strong motive that his crime could be easily traced to them. Their solution is to trade victims. The late Robert Walker portrays a psychopath in this picture, and turns in what is probably his finest performance.

The story reaches its climax in the final scene: a chase on a runaway merry-go-round.

Also to be shown are “Wings Over Burma,” a war travelogue, and Madeleine, a UPA cartoon, based on the stories of Ludwig Bemmel and Madeleine, about twelve little girls in a French school.

### Applications for Honor Keys due

Applications for Honor Keys must be given to ASCIT vice-president Howard Berg by Monday, they may be placed in the “IP” box or taken to him in room 27 Dabney. The current honor point list, which may be found up on page 106, shows the points of this year’s “Little T.” Students may request points for activities and jobs not listed. The Honor Point Committee, consisting of ASCIT vice-president and first and second representatives, will decide how many points each applicant receives. To receive an honor key a student must have a total of 100 points, each student who has 50 or more non-academic points will receive an honor certificate. Those who have 50 points are to be classified as “Honorable.” Those who have 100 points or more are to be classified as “Honor.” Those who have 150 points or more will receive an honor key.

### Pre-registration deadline is today

Pre-registration for third term ends today. Students who plan to study here next term must have pre-registered by this afternoon. Underclassmen must have their pre-registration cards turned in to the registrar and returned to 119A. Throop before the office closes this evening. Anyone with questions regarding sections, courses or units should see Mrs. Duff in 119A.

### Workman loses out in presidential contest; Moulton successful in vice-presidential race

Craig Elliott was elected ASCIT president by a large margin. He was elected on Sunday by a vote of 325 to 147. In this contest, Rube Moulton was defeated by the president, being out by a vote of 277 to 200. These two men, Elliott and Moulton, will lead the Caltech student government for the coming year.

Don Nichol was defeated Russ Hauge for the position of student body treasurer. The vote in this contest was 230 to 253. For ASCIT first representative Dave Lassen was the victor, defeating Dick Stark by a vote of 234 to 253. The team of Tom Dodge and Frank Kofsky was chosen to be the California Tech council for the coming year. They defeated Don Van Kirk and Bob Walsh by a vote of 273 to 192. In the contest for business manager of the Big T, Walt Peterson defeated the team of Al Kopp and Dick Pallone by a very large margin. The vote in this race was 357 to 114.

The vote was extremely close in the contest for athletic manager. Glenn Converse won by 105 votes and Edward Kriebel with 106 votes will take part in the run-off election. The two candidates receiving the greatest number of votes, Bruce Rausch with 213 and Vincent Taylor with 206, will take part in this run-off election.

Engaging in a run-off for rally commissioner will be Chuck Bonwell with 200 votes and Bill Meade with 198 votes. Candidates for ASCIT second rep will be Bob. Jabbour, who received 143 votes and Doug Carmichael with 128. All of these run-off elections will be held next Monday, with a very narrow margin as he received 145 votes.

The unopposed candidates were all elected. They were Dick Kirk, publicity manager; Jim Cribbs, yell leader; Stan Baker, Big T editor; and Ed Park, California Tech business manager.

### IC Dance to be held tonight; Les Brown to provide music

The annual Inter-college Council Dance will take place this evening from nine to twelve. The semi-formal affair will take place at the Pasadena Civic Auditorium. Les Brown’s “Band of Renown” providing music.

Tickets ($2.00 per couple) may be obtained from any BOD member or house social chairman. Students from many local colleges will attend the dance. Pin呐, your student’s buddy. Those attending will be shown a costumed dance in the theme of “Strangers on a Train,” which takes place in the final scene: a chase on a runaway merry-go-round.

Also to be shown are “Wings Over Burma,” a war travelogue, and Madeleine, a UPA cartoon, based on the stories of Ludwig Bemmel and Madeleine, about twelve little girls in a French school.

### The California Tech unit

The California Tech unit, which has a history of service and dedication to the community, is responsible for this show. Student representative Jon Harrod, “The California Tech unit doesn’t need a dance to draw an audience.”

The Les Brown Band is well known for its place on the Bob Hope show; it has made appearances in the Hollywood Palladium and its many records and performances.

The intermission talent show will feature a variety of groups from Occidental, Pomona, and Whittier Colleges. Last year Caltech took part in this show, providing a quartet from the Glee Club.
The big 'if'

By Sta. Richert

Even if you're not a millionaire, you can perhaps afford to spend the summer in Europe. American Youth Hostels, Inc., a not-for-profit organization, offers a wide variety of economical trips through Europe, Canada, and the United States. These trips make possible interesting, educational, and comparatively low cost travel throughout these areas.

The economy of these trips is achieved through low cost transportation and rugged living. The transportation on these trips is almost exclusively by bicycle (on European trips, however, a portion of the trip is made by steamer), and sleeping and eating accommodations are in hostels; of which there are a number in the United States and Canada, and which form an extensive system throughout the European countries. Hostels provide sleeping, cooking, washing and recreation facilities and are operated under the supervision of house-keepers. Members of hostels do their own cooking, and guests are able to travel on a low budget.

These trips are made in groups, which usually consist of ten members and a trained leader. The travel follows a set schedule which averages 3500 miles a day. Each group more or less plans its own actions, the group leader acting not as a guide but as a translator and an experienced man who "knows the ropes.'

A typical American Youth Hostels trip is the Northern Europe tour. This trip lasts from 10 to 11 weeks and covers England, France, Belgium, Netherlands, Denmark, Sweden, and Norway. The total cost of this trip, including steamship fare, is $710. Other trips, at about the same cost, cover western, central, south-west, and southern Europe. For those who don't want to be tied down for the whole summer to a specific schedule, special four-week tours are offered, which allow one to learn to live as a hosteler, and then spend the rest of the summer on his own for as little as $200 a day.

A number of hostel trips in America are also offered. These include trips through New England, Quebec, the Canadian Rockies, Mexico, and a transcontinental tour in special railroad cars. The costs of these trips range from $135 for the New England trip to $500 for the transcontinental trip.

The American Youth Hostels trip is perhaps the best opportunity for world travel to persons of limited means. Further information regarding trips and details can be had by writing American Youth Hostels, Inc., 14 W. 8th St., New York, N.Y.

Youth hostels offer budget-minded student economical access to European countries

by Marty Tangora

Usually when students around here get down in the dumps a few of the most vocal ones start crying "Student morale! Student morale!" and begin to claim the faculty for not doing enough thinking about the problems of student morale. It does seem as if a little effort on the part of the students would be helpful.

A week ago at the Oxy basketball game a well-organized group of students, led by some of the oldest and potentially best respected men on campus, did more to crush school spirit at Oxy than the faculty could do in a month of finals.

It is hard to believe that students act as slow as 19 or 20, and as intelligent as Techmen are supposed to be, could behave the way they did. If they were making a deliberate effort to destroy Caltech's already low reputation among Oxy students, they did quite well.

The most obvious aspect of their misbehavior was centered on an incredibly noisy auto horn which, for them, symbolized all the spirit of a strong rooting section. It wouldn't have been at all wrong to take the horn along and use it occasionally in a moralistic way. But the chaps who used it got particular delight out of hearing it loudest and most frequently just while the Oxy band was trying to play its intermission numbers.

If that part of these guys' behavior showed stupidity and inconsideration, one other incident showed a social fatuity and general slowness well calculated to draw contempt from even the most liberal-minded spectators. This was the bit where a roll of toilet paper was loosed in the Tech rooting section and the unmistakable long white strands of tissue proudly displayed in full sight of the Oxy stand. This too must have contributed to the overall effect of disgust and contempt.

Well probably have a small crewel anyway tonight at our game with Brown. But if these guys haven't learned how to rise above the annual level when they don't have to, they shouldn't show up.

The World and Tangora

U.C. RADIATION LABORATORY

Interviews will be held at the Caltech Placement Office, Feb. 28th, from 9 a.m. until 4:30 p.m. for the following positions with the University's Radiation Laboratory in Los Angeles and Berkeley.

SENIOR PHYSICISTS: Exceptionally well qualified Ph.D.'s in theoretical or experimental work in nuclear and atomic physics or in advanced areas of research. Or M.S. level. Openings in semi-theoretical and in experimental work, applying nuclear and atomic physics in both atomic weapons research and non-military research, at Livermore, California.

JUNIOR PHYSICISTS: Graduates in physics at B.S. or M.S. level. Openings in semi-theoretical and in experimental work, applying nuclear and atomic physics in both atomic weapons research and non-military research, at Livermore, California.

MECHANICAL DESIGN ENGINEERS: Positions available for qualified mechanical engineers at Berkeley and Livermore: The Radiation Laboratory employs over 100 mechanical engineers engaged in the design of a wide range of equipment for use in fundamental and applied scientific investigation. This work includes nuclear and thermonuclear test devices and instrumentation, high energy accelerators, ultra high speed cameras, large scale high vacuum equipment, detection systems, radiation fields, equipment for remote handling and processing of radio-active materials and accessories for nuclear reactors. Organization is on a project basis with close cooperation between teams, either with degree and research experience or obtaining degree in June 1956.

The well-known GUIDED MISSILE "TERRIER" is a product of this division. CONVAIR - POMONA offers country living near metropolitan Los Angeles in beautiful Southern California.

Contact your Placement Office for time and place of interviews.
Secretary's Report

Amendments to the By-Laws of ASCIT (commonly found only in the less-read section of the Little T) were proposed by the Board of Directors at a meeting on Wednesday night. These amendments are designed to bring the By-Laws up to current practice and to eliminate ambiguities. As required by Article XVI, they were read and discussed at a student body meeting Monday night. The student body meeting will be held in the courtyard between Ricketts and Fleming, and will serve, with this article, to explain the changes.

1. Vacancy election procedure

Article VI, Section II, will read, as amended, "All vacancies shall be filled by a special election and the student body shall be governed by the rules and regulations as set forth in Article VII. At the discretion of the Board of Directors, the time interval between nominations and elections may be shortened."
The concluding sentence constitutes the amendment and is inserted here.

2. Committee Changes

The second amendment calls for deletion of Section I, Article XI which provides for the Courts of Tradition, a tradition that didn't复查 for World War II.

Amendment three establishes another body: "There shall be a rally committee as follows: a) The Belmont Manager and b) the Belmont Manager shall serve, with this amendment, in the capacity of a secretary."

7. Big T Commissions

The seventh amendment concerns commission for Big T business managers who sell more ads than the budget requires. The applicable statement, as amended, reads, "The Business Manager of the Big T shall be guaranteed a 20 percent commission on all the advertising sold and paid for; and after all costs and expenses of the Big T shall have been paid for including the above, 20 percent commission shall be distributed evenly between the corporation and the manager."

The final clause constitutes the amendment which replaces the original "then the Business Manager shall receive the funds left, up to but not to exceed an additional 10 percent on the advertising sold and paid for."

Students are encouraged to inform themselves on these amendments in order to vote knowingly on them next Tuesday.

--Tom Bergeman

Projects you can sink your teeth into

Clifford J. Downer started his telephone career in the building engineering department of the Southern New England Telephone Company. At present he is working with the Bell System's manufacturer, Western Electric, helping to build facilities for housing a Continental Air Defense project. His assignment is to survey locations and develop a proposal for a new plant.

One of the most interesting features of my present job, says Cliff, is making decisions on the spot. For example, drawn by a map on the wall the location of the new building is indicated. A draft of the building is placed on a drawing board and the size is reduced.

The site is picked by the manager and the new building is drawn on the map and pared to the size of the building. The site is marked and the proposal is completed.

"Projects you can sink your teeth into" has been a job offer for years, but the opportunity to work with the Bell System is a new challenge.

Clifford J. Downer, 26, is a member of the American Society of Civil Engineers, and has been working at the Bell System for the past year.

What Next, Mr. Engineer? Your best move to make next . . . is to check the outstanding opportunities available to engineers in the field of electronics.

Dick Kirk

"Gad, Dad," sympathized the man, "keep cool: I'd think of something. You can count on it."

So the prof rickshawed home and took a bath. Soon he was back to the office, "Eureka!" (in Chinese, of course). He had solved the problem by inventing the abacus.

Next day he brought in a counting gismo made of bamboo and cranberries. With this mechanical brain he was able to introduce the time-payment plan, because one day a patron and Wu did this bit across the mahogany:

"I have a yen for two cold ones to go," said the customer. "Sorry, friend, we don't accept Japanese currency," Wu later told. "I'm flat, cat," came the reply, "got a suggestion?"

Whereupon Wu played a few fast notes on his abacus, figured the terms of a loan for two beers and said, "Borrow one and carry two". two terms still used in modern mathematics. So you can see that's how Wu got a charge out of his abacus.

"Wrong one and carry two". two terms still used in modern mathematics. So you can see that's how Wu got a charge out of his abacus.

MORAL: When it comes to mathe- matics, you can count on an 'abacus if you want to. But when it comes to beer, figure on Budweiser. It's the best draught beer any side of the Yangtze. You can count on it.

- Al Parley
AUFs man Barnett discusses current situation in Red China

(Continued from page 1)

ment is to build up heavy industry. As a result, the economy has become more stable, but this is not improving the living conditions of the people.

Communist China claims that theirs is the true Chinese government, implying all Chinese possessions are hers. She threatens to attack and seize Formosa from the Chinese Nationalists. Said Barnett, "It's very unlikely that Red China will take military action against Formosa."

On the other hand, she may attempt to attack the off-shore islands - islands now under Nationalist control.

The Nationalists have declared that they will fight to keep these possessions. The United States has promised to defend Formosa against the Chinese Nationalists. Barnett approved of this action against Formosa. Barnett says that the Chinese Nationalists become able to attack, the masses, which have become adjusted to the Communist way of life, would not join them, in all probability.

There is at present wishful thinking on the part of some Chinese Nationalist leaders that the Nationalists will be able to repossess the mainland by force. They feel that when they attack the Red regime, large numbers of the people will aid them by revolting and casting out the Communists. Barnett says that even should the Nationalists become able to attack, the masses, which have become adjusted to the new government, would not join them, in all probability.

Chem Engineers to visit process plant

The Chemical Engineering Club will visit the Stauffer Chemical Company next Tuesday afternoon. The group will leave the Athenaeum parking lot at two. After a short discussion of the processes of the plant, which manufactures sulfuric acid, the club will tour the facilities of the company.

Persons desiring to attend who are not notified by the club are requested to contact Bob Defeyre or to leave a note in the 'D' box in Blacker.

Liquid air talk will be given tonight by Professor Watson

"Liquid Air" is the title of this week's Friday Evening Demonstration Lecture at Caltech. The lecture will be given by Professor Ernest C. Watson at 7:30 p.m. in room 201 Bridge. Professor Watson, who is Dean of the Faculty at Caltech, and came to the Institute as assistant professor of physics in 1918. He became full professor in 1930, and Dean in 1946. In his lecture on Friday, he will discuss and demonstrate the properties of liquid air.

The Sports Corner

by Dick Van Kirk

Phil Conley certainly came through in the first meet of the season last Friday. His throw of 229'5" should stand up as one of the best marks in the nation, and could well rank first at the end of the season, providing he doesn't improve on the mark himself. Other highlights of the meet were the thrilling race to the wire in the quarter-mile between Roger Willemen, Marty Tangora, and Chuck Bonwell and the exciting half-mile relay race between the two Caltech teams.

Coach Web Emery unveils his 1956 swim team today at 4:30 in a varsity-fresh meet designed to give the Caltech students a good look at the Beaver swimmers. So now's your first chance to get a good look at Coach Emery's crew of swimmers. Go out and give them a little vocal support today.

The Sports Corner takes its hat off to Jack Bass, guard on the freshman basketball team, who decided to take off a little more than that when the Frosh traveled to Oxy recently, and paraded through the Tigers' gym wearing only a towel. I've got to hand it to him (somebody hand him something, quick). He certainly did a good job of enhancing our reputation as eccentrics and egoists. Congratulations, Mr. Bass, and if you'll drop in at room 118, Throop, you can pick up your prize. There's one condition, however, you've got to bring your own couch.

With the loss of Wes Santze for this year's Olympic track team, Uncle Sam's hopes in the distance runs are pretty slim. From where I sit it looks like Tom Courtney, Arnie Sowell, Bobby Beauman, and Horace Ashenfelter are the main hopes for the U. S. in the longer races at Melbourne this year. Probably the best showing made by the States will be in the field events, where Pappy O'Brien, Bob Richardson, and Charles Goetz, Fortune Gordon, and Ernie Shelton are likely bets for gold medals.

Beavers whip Naz 108-23;
Van, Phil star

Caltech's varsity track team opened their dual meet season Friday by taking a convincing 108-23 victory over the Pasadena College (Nazarene) Crusaders at Paddock Field in a meet marked by outstanding performances on the part of two-part-timers.

Dick Van Kirk and Phil Conley took time out from their basketball duties to lead the Techmen in the win. Van Kirk was the leading scorer of the meet with 13 points, while Conley took first place in the broad jump and javelin, throwing 229'5" in the latter event. His toss was less than his fifth place throw in last year's NCAA meet by only two feet, and probably will put him at the top in the NCAA rankings to be released soon.

Van Kirk took first place in the 130 yard low hurdles, tied for first with Gordon Barrientos in the high jump, and garnered second place points in the broad jump and high hurdles. He also ran on the winning relay team, along with Ed Krehbiel, Marty Tangora, and Chuck Bonwell.

John Lukes was Tech's only other double winner, taking first place in both the 100 and 220 yard dashes. Roger Willemen picked up eighth place with a first in the 440 and second place in the 220. Other first place finishers for the Beavers were: Jerry Lawrence, 120 yard hurdles; Jim Lloyd, pole vault; Ted Lang,三级跳; and Del McCune, shot put.

Morris, Nelson blank Nazarenes

Strong pitching was the feature of the opening game of the 1956 baseball season at Caltech, as the Beaver horsehiders edged Pasadena Nazarene 1-0 Wednesday at Tournament Park.

Ed Nelson and Hal Morris combined to shut out the Crusaders on five hits, with Morris pitching the first three innings and Nelson taking over for the last two. Morris struck out nine and allowed only one walk, while Nelson contributed with by giving up only four hits in the five innings he toiled. The Beavers scored on early run and proceeded to hold Pasadena scoreless in the late innings mostly on the strength of sparkling defense, played by outfielders Don Stocking, Jim Koontz, Chuck Norman, and Gene Nelson.

In the first inning Ray Weymann, erstwhile pitcher playing baseball on base with a single and went to second on an error by the Crusader left fielder. Norman singled Weymann home with the only run of the game and the Beavers were out in front to stay.

Caltech's freshman baseballers also begin their workouts Monday under the direction of Dave Wilson.

Fresh Sports Roundup

by Brent Banta

It's great sport, and it's changing; a change: the fresh sure deserve some credit for holding up the tempo in this tournament. Jim Cribbe rates a special vote of thanks for consistently good ball handling throughout the game. That really counts when the game is tied, 9-9, at the end of regulation time.

Oxy Striders rate as favorites to take the last place in the conference, could easily outscore both the Striders and the Beavers.

Coach Bert LaBrucherie's varsity trackers tangle with two of the toughest track and field teams in the country tomorrow when they travel to Occidental to meet the Tigers and Pasadena Striders in a triangular meet.

With six members of the 1952 Olympic team on the squad, the Striders rate as favorites to win. Only Matt Berlin, shot putter, and Dick Haddon, high jumper, all of whom placed in Occidental include Bob Gutowski, pole vaulter, Tom Meyer, last year's NCAA meet.

Morris, Nelson blank Nazarenes

Great Neck, Long Island, New York
Frosh drop L.A. Pacific in 4 overtime, 73-70

Caltech's frosh basketball team went four overtime to pick up their second win of the Saturday, 73-70 over LA Pacific.

Play was slow during the first period; score at halftime was 31-26, in favor of Pacific. Second period went much like the first, but Tech managed to pull up even at 49-49 for the Beavers, and the team Pacific caught up at 53-53 as the opening jump again, and still no decision, as the third period began with just 4:40 left.

Jerry Just controlled the tip followed for two and the lead. The period ended. Just won helped Tech to another fast four, so the score was tied at 57-57. The tiping the ball to Fred Neuman for an immediate bucket. Purtious scoring followed on both sides, and Tech was ahead 66-64 with only a second to go. But in the final seconds, shot went off a shot which dropped the net as the buzzer sounded. Again, control of the tip went to Tech, and a flurry of shots netted a quick seven points. From then on, the Beavers held the ball, allowing only six to Pacific.

Neuman was high point man with 34. Just was close behind with 27. Throughout the game, Just cleared the boards well, and his control of the tip in the extra periods was of vital importance.

Final game of the season is this evening at 6:30 in the Tech gym. Against Pomona-Claremont, the junior Beavers stand fair to pick up a final win of the season.

Tigers, State rap Beavers

Coach Carl Shy's hoopers dropped a pair of games last week to run their losing streak to 25 games, one of the longest in college Basketball, at the Quadrilateral. Tigers and the L.A. State Diablos took easy victories over the Beavers.

Wednesday, February 15, the Tigers grabbed an easy 89-57 win to climb into a tie for the conference lead with Redlands. Against Pomona-Claremont, the junior Beavers stand fair to pick up a final win of the season.

Netters split with ELAJC, Pomona

Caltech's varsity tennis team opened regular season play Saturday, dropping a 6-3 match to Pomona-Claremont, but the Beaver netters bounced back to trounce East L.A. Junior College 9-0 Tuesday at Caltech.

Gene Barnes was the only man to win a singles match from the Hens, and he teamed with Dave Yount to take one of the doubles matches. Tom Hayes and Bernie Mueller took another doubles match.

Against ELAJC, the Techmen won every set played, including four at six-love. Tomorrow the Beavers play host to Redlands.

Hens here for lastgame-tonite

With hopes high for a sole win to soften a tragic season, Tech's Beavers will host Pomona tonight.

Glenn Converse, sophomore forward, returns to the active list tonight, but Sonny Nelson is still benched with a knee injury.

The Beavers will open with Jim Ball and Howie Bloomfield at forwards, Phil Conley at center, and Roland Moody and Jim Welch in the guard slots. Dick Beggroesser is Pomona's center, John Nichols and Leonard Tooley start at forward, and Gary Bizzante, Pete Carlson, and Ron Zambran rotate at guards.

Interhouse sports

Interhouse swimming competition opens Tuesday with the trials for the Interhouse Swim Meet.

Eliminations will be conducted in the 50 and 100-yard freestyle, 50-yard backstroke, and 50-yard breaststroke. A diving event, a 75-yard medley relay, and a four-man 400-yard relay will also be held in the finals on the following Friday.

Dabney holds a strong 20-point lead in interhouse standings for the year. Fifteen interhouse points will go to the winner of the meet, and the other places will be awarded 12, 9, 6, and 3. Football and volleyball are the only sports to be held third term.

"Women are the root of all my troubles—fortunately."
—Winston Churchill

of Don Lewis

Sometimes he slept in

Reliable information has it that the Dabney snow party (sic) was well attended, and not as well chaperoned. Further rumors relate the following scenes from real life:

Time: 12 midnight
Place: Caltech ski hut
Enter a dark figure.
Voice (female): Who is it?
Voice (masculine): It's me. Dale.
Dale: What do you want?
M: My date wanted a drink of cider.
D: Why all the noise?
M: I can't find the bottle.
D: Well, turn on the light.
M: I can't, I'm nude.

The postman cometh.

There were those in Ricketts who seem to have a monopoly on the daily mail. Among those individuals are Brent Banta and Carl Nelson. Banta, who is new facing legal action by the Church of Ball Pall, has been charged with receiving no less than six letters in one delivery. All those from the same female, too. As punishment for this mortal sin, layman Childs has suggested that the contents of the letters be made public.

An evening of sex was enjoyed by many at Ricketts, Friday night. Among those present were Tony Leonard and Frank Kofsky. Both asked the same girl home. The last information received by this department was that both were taken to the infirmary one Queen who nurse now.

Of Ken Dinwiddie. You'll find a passion root cometh a one-time bandy tin size letters be made public. and the author's bell TECH are the Friday he found Gopher: one room still healing his babble. cradle the daily mall. Among these passion root cometh a available figure. postman FACT THAT female friend of facing legal action by the party night. Among those present were Tony Leonard and Frank Kofsky. Both asked the same girl home! The last infor mation received by this depart ment was that both were taken to the infirmary one Queen who nurse now.

The Beak has it that there is

in the infirmary one Queen who supposedly serves as night nurse now.

Ray Sugihara, and the author of the World and Mt. T (along with a candidate for ASCIT office) went to the infirmary with the laudable purpose of soaking the wounded foot of one basketball player on last Sunday night. (You know what we mean.) Anyway, they rang the bell only to see coming to the door another less appropriate night nurse. Our heroes turned tail and ran. In case she doesn't know who the night prowlers were, we print this public announcement.

300 pounds of black passion
A sequel to the strange case of Ken Dinwiddie. You'll remember how he tried to ditch this seventeen year old girl. It seems that last Friday he found the wonderful truth about Sherry from a female friend of a friend. Miss Sherry had been out of it for the last few years, i.e. she didn't know what to do. She then realized that she needed a passionate master and woke her up at seven A.M. to tell her this. He also arranged a date for that night. What a night, Dinwiddie and Miss unleashed seventeen years of frustration on each other. This one-time cradle robber is still healing his wounds. Anyone interested in a neat fourteen year old sister?

Puzzle Dept.

One more item the Beak can't make head or tail out of: Why would Dave Gardner's sleeping bag come back from the Blacker snow party stretched?
