

Faculty Votes For Women

by Jim Cooper

A large majority of the approximately 300 faculty members in attendance Monday afternoon at an Athenaeum faculty meeting voted to recommend to the administration that Caltech admit women as undergraduates. In an interview for the **California Tech**, Dr. Norman R. Davidson, Chairman of the Faculty, pointed out that the actual decision of whether or not to admit women still rests with the administration.

Dr. Davidson voiced the opinion that even with administrative approval in the near future, he estimated that it would still be at least two years before women were actually admitted. Dr. Davidson also stated that a great many questions remain to

be answered before any final administrative program could be arrived at. More specifically, he mentioned the problem of housing facilities and the question of what changes, if any, would have to be made in the admission requirements to achieve an optimum number of women actually admitted. He felt that this optimum number should be approximately 10 percent of a class.

Dr. Davidson was firm in the belief however, that whatever changes are made, he changes are "not going to make a parity of the number of male to female students at the Institute."

Of more immediate impact to the Institute, was the approval at the same meeting of a new freshman curriculum. Again being approved by a large majority

of the faculty present, the changes will allow next year's freshmen more freedom in the planning of their initial year at Caltech than is available now.

The now official curriculum will reduce the minimum required units for next year's frosh to 42 per term, and the maximum will be 51 units the first term, and 48 units second and third terms. During first term, 42 units are in required courses, but a freshman will still be able to take a nine unit elective. Second and third terms, however, only 36 of the necessary 42 units will be required, meaning that a freshman would have to take at least a six unit elective course, with an opportunity to take up to twelve elective units.

Part of the reason for the in-

crease in freedom stems from the elimination of Ph 1 Lab as a requirement, and the elimination of all except the first term of Chem 1 Lab as a requirement. However, freshmen will be required to take at least nine additional lab units during their first year. These nine additional units will be taken from elective courses offering lab credit, such as Biology 1 or Geology 1, or from the now being developed second and third term freshman physics and chemistry lab, which will eventually be catalogued as Ph 3a and 3b, and Ch 3a and 3b. Other departments are also plan-

ning to offer courses as freshmen electives, but overall plans are as yet not final.

Dr. Davidson stated that it was generally agreed that whatever electives the freshman chose, he still would be able to enter any option. However, Dr. Davidson stated that some options would still probably require certain freshman courses, and if a student did not take those during his first year, he would at some later time still have to make them up. This could mean that more freedom in the first year would result in less freedom in later years.

Kuchel to Face Ghetto Problems In Tonight's Beckman Address

by Brad Lee Holian

Senator Thomas H. Kuchel, Senior U.S. Senator of California, will deliver a major address in Beckman Auditorium tonight at 8:15. Senator Kuchel's speech will be on the subject, "Facing the Ghetto: Brinkmanship or Commitment," and will be given in conjunction with the Caltech YMCA's year-long program, "The Ghetto and the City: Blight and

Promise."

Senator Kuchel has served in the U.S. Senate since 1953 and was overwhelmingly re-elected to a second full term in 1962. He has served as the Republican Whip in the Senate for several years, in addition to serving on two of the most important Senate committees, namely, the Appropriations Committee (which handles all measures providing

funds for the operation of Federal agencies) and the Interior and Insular Affairs Committee. His popularity with the people of California, the power he wields in Washington, and his progressive political interests all place him in a particularly well qualified position to speak on the relevant, practical political realities concerning the problems of race and economic opportunity in the cities as well as the future possibilities of action to be taken in these areas.

Moderate progressive

The Senator believes in an orderly process of change in society, improved by "well-organized and well-directed" political and moral persuasion. In this sense, his represents a moderate position of progressive, legal transformation of society as the only workable alternative to the radical Negro revolution that calls violently for "black power now!"

His address concerning his views on the "establishment route" toward the solution of the problems of the ghetto should prove to be one of the most significant and educational events in the Y's program for this year. Free tickets are available for all students, faculty, and staff at the Beckman Ticket Office or the Caltech YMCA office in Winnett.

Drama Club To Present An Eve of One-Act Plays

Caltech's Drama Club will present its first production of the year tomorrow at Winnett Student Center: an evening of one-act plays. The program will include **The Sandbox**, by Edward Albee; **Here We Are**, by Dorothy Parker; and **The Lady of Larkspur Lotion**. They will be directed by Jon Hall, Gary Yarbrough, and Barton Gordon, respectively.

The first play is a comedy, the second is an episode about a newly married couple on the way to their honeymoon, and the third is a sketch about a

cruel landlady who destroys the hopes and dreams of a destitute woman and thwarts the attempts of a derelict writer to piece the woman's life together again.

The production is run by Teckers with assistance in the female roles and artwork from girls from nearby colleges. Head of the entire evening is Jeff Moller, president of the Drama Club.

After the one-act plays, the Drama Club will begin work on their major production for second term.

Lynne Nelson and Rich Drews in a scene from "The Lady of Larkspur Lotion." — "The Brazilian rubber plantation is only a few miles from the Mediterranean, but you can still see the White-chalk Cliffs of Doer."

Nixon, Percy Take Honors

by Greg Brewer

A Republican ticket of former Vice President Richard Nixon and Illinois Senator Charles Percy received sixty-nine percent of the votes cast last Thursday, November 16, in another YR referendum. In polling 37 percent of the undergraduate Student House population, the Nixon-Percy ticket was strongest when pitted against the incumbent team of Johnson-Humphrey.

A 66 percent vote for the Nixon-Percy ticket against a dove ticket of Kennedy-Ful-

Peace Corps Volunteers Get Draft Deferment Aid

The Peace Corps plans to intervene on behalf of Peace Corps volunteers seeking draft deferments for two years of overseas service.

Agency Director Jack Vaughn, concerned by mounting induction calls to volunteers serving overseas, said he will take an "active role" in seeking future deferment cases before the Presidential Appeal Board—the court of last resort for draft reclassifications.

In the past the agency performed a largely informational function — advising volunteers and trainees of Selective Service laws and procedures and confirming to local boards the fact of the volunteer's service.

In future appeals, Vaughn will write letters to the board describing the circumstances in each case and urging board members to grant a deferment until completion of the volunteer's overseas tour.

"We have a serious situation," he said. "The problem of induction notices to overseas volunteers is becoming a major concern for us. Pulling a volunteer off a productive job at mid-tour is unfair to the nation, the host country, the Peace Corps and the individual."

Vaughn said Peace Corps volunteers have lost about 60 deferment appeals before the three-man board in the last six and one-half years. While adverse rulings by the national board have involved less than one-half of one per cent of the estimated 15,000 draft-eligible men to have served in the Peace Corps, "virtually all of these have occurred in

the past year," he said.

Of the approximately 25 volunteers who have already returned to the United States for draft induction, two were disqualified for physical reasons and returned to their overseas assignments.

Service "in the national interest"
The vast majority of Peace Corps Volunteers are granted deferments for two years of over-

Notices

EPC LOVES OFF-CAMPUS STUDENTS

Any off-campus undergraduate having comments or complaints about any courses he is taking may bring them to the attention of the EPC by contacting the EPC member from his former Student House, by leaving a note in the Lloyd F box addressed to Freeman, or by writing in a comment on the EPC bulletin board near Louise Hood's office in Winnett.

PLACEMENT PROBLEMS

Donald S. Clark, Director of Placements, will discuss general placement problems with all interested students on Tuesday, December 5. The meeting will be held in Room 206 Dabney at 7:15 p.m.

INSIDE VIETNAM

Don Luce, a former director of the International Volunteer Services in Vietnam, is speaking at Harbison Hall at P.C.C., 8:00 p.m., Dec. 6.

ALPINE CLUB CLIMBING TRIP

There will be a meeting of the Alpine Club this Thursday at 8:30 p.m. in Winnett Clubroom 1 to discuss plans for a climbing trip this Sunday.

Editorial

Mystery Meat Rules

In the Noember issue of *Moderator*, the "Grapeshot" section devoted to the universal college food service and its ever-present faults and failings. Especially taken to task are the servings of "mystery meat," tokenism in response to student complaints, and the general feeling of "Adventures in Good Eating. What goes down must come up." Here at Caltech, we enjoy our own little version of the aforementioned three items, and despite constant complaints, little has been done to improve the situation, although small ineffectual tidbits are thrown out to us as the mood and occasion demands.

Our present complaint (is this the camel's last straw? is the situation which currently exists over Institute holidays, when the Food Service closes down, lock, stock, and can opener. During the past four-day weekend, the only food available on campus was obtained from vending machines, and during this period, there were enough people on campus to provide sufficient business to justify Chandler's remaining open.

We therefore submit most humbly that in the future, some dining facility remain open during short term breaks, as the distance to the nearer commercial restaurants disallows convenient regular meals.

—Kirk Benson
Les Fishbone

Teckers to Experience Actual Ghetto Life

by Robert Fisher

What's it like to be black? Not many college students can answer this question from their experience. The Caltech YMCA is interested in helping people find out.

Two miles away there is a ghetto. Today it's effectively a thousand miles away. Communication between the black and the white ghettos of America is inhibited by a lack of mutual experience. The diversity of the ghetto and the magnitude of its problems cannot be understood vicariously — they have to be experienced! To comprehend racial discrimination you have to feel it; you cannot hear about it. To visualize ghetto life you have to live it, not read about it.

Contact

Here will be a chance. In response to a YMCA poll, nearly one hundred Caltech students expressed an interest in further contact with the racial crisis in America. For these, as well as any other interested individuals, a program has been planned for second term in which students will see the racial issue from a unique vantage point. From January 17th to 20th, up to fifty students will work, eat, and sleep in the Pasadena ghetto. They will be given an opportunity to feel the wrong of "separate and unequal" as it should be felt — from inside. Hopefully, this will

attune the participants to the subtle, more corrosive effects of racial prejudice.

This won't be particularly easy on the volunteer. He won't be able to stand comfortably back and observe, but will have to face the ghetto's problems on an intensely personal level.

People interested in this program can obtain information in the YMCA office.

Letters

New Option Not Final

Editors:

There is one important error in the generally excellent and accurate article by Jim Cooper in last week's California Tech dealing with the actions of the Faculty Board at its meeting on November 13. The article states that the Faculty Board approved the creation of Distributed Studies option and then referred the proposal to the Curriculum Committee for detailed implementation. The Faculty Board did not approve or disapprove of the principle that there be a Distributed Studies option. It requested the Curriculum Committee to consider the problem and to develop a more detailed description of just how such an option would work. The Board felt that a judgment as to whether or not such an option would provide a desirable alternative course of study for some Caltech students could not be made without a more de-

tailed description of what is actually involved.

I do not mean in this letter to imply any criticism of Mr. Cooper. It is quite possible that the error is due to my failure to explain the actual situation clearly. However, it would be unfortunate if Caltech students drew the conclusion that the principle of a Distributed Studies option has been approved and its implementation is only a matter of time.

Norman R. Davidson
Chairman of the Faculty

We thank Dr. Davidson for this clarification.—Eds.

Iration!

Editors:

Some of us who are not members of your student body subscribe to your paper because we are interested in what goes on at the Institute, and you do have a monopoly on student publications.

If some of your "news stories" are going to continue to be silly, childish pranks perhaps you should cancel our subscription.

Mrs. Robert L. Foreman

As we have said before, the experiment conducted in the issue of October 26 and explained in the issue of November 2 was not a prank. Moreover, the California Tech has no monopoly on student publications.—Eds.

Did you like beer the first time you tasted it?

A lot of people say no. They say beer is one of those good things you cultivate a taste for... like olives, or scotch, or kumquats.

Maybe. But we think it makes a difference which brand of beer we're talking about.

We think Budweiser is an exception to this "you've gotta get used to it" rule. It's so smooth. (You see, no other

beer is Bechwood Aged; it's a costly way to brew beer, and it takes more time. But it works.)

So whether you're one of the few who has never tried beer, or a beer drinker who suddenly feels the urge to find out why so many people enjoy

Budweiser, we think you'll like it.

From the very first taste.

Budweiser®

...best reason in the world to drink beer

Experience Too Valuable For Mid-Tour Dropouts

(Continued from page 1)
seas duty because their service is deemed by their local boards to be "in the national interest," as recommended by Lt. Gen. Lewis B. Hershey, the draft director.

However, some local Selective Service boards refuse deferments even though Peace Corps service does not relieve volunteers of their draft obligations. If the local board is upheld by the State Appeal Board, the case may reach the Presidential Appeal Board, which makes the final decision.

The appeal process often takes months to be resolved and the Peace Corps frequently sends volunteers to their overseas sites

while their appeals for deferment are pending.

Intensive Training

Vaughn said the Peace Corps, having provided upwards of 400 hours of intensive language training during the 12 to 14 weeks of preparation, often sends volunteers overseas to begin service "rather than risk the loss of their newly-earned language fluency during the long waits for final approval or disapproval of deferment requests."

Vaughn said, "So long as the chances for deferment are good this system makes sense, but as more and more volunteers lose their appeals we may have to reconsider the process and keep them, a wasting asset, in the United States until their cases are resolved."

He also said induction calls for volunteers overseas "disrupts the continuity of carefully planned projects by host country governments who also have invested a large amount of time and money in the program."

Vaughn also noted that in a number of cases host country governments have been unable to replace drafted Volunteer teachers.

Into the Incinerator

Are You Upset Over Something?

by Jim Cooper

Freshman Edward B. Barrelmaker of the Mythological Institute of Theocracy summoned his fast fading strength and weakly tapped at the door of one of his dorm's student waiters.

"Come in!" intoned a hearty voice.

Barrelmaker managed to turn the knob, but found he could not budge the door. "You'll have (gasp, gasp) to let me in."

There was a sound of footsteps from inside the room and the door swung open. The first thing Barrelmaker saw was enough to prevent him from seeing anything or anyone else in the room. There, in the middle of rumpled bed, was the most beautiful, voluptuous, fully-packed box of Ritz crackers Barrelmaker had even seen.

"FOOD!" shouted Barrelmaker, and he leaped toward the box of crackers with the strength of a freshly-soaked noodle.

Two strong arms grabbed him and shook him, and the owner of the arms said, "Snap out of it, Barrelmaker, old man. Come to your senses." With those words, he slapped Barrelmaker sharply across the face.

Barrelmaker crumpled into a heap on the floor. "Thanks! I needed that," said Barrelmaker. "I'm all right now."

"That's good," said the waiter, as he sat down on the bed.

Ritzzy room

Now that Barrelmaker had calmed down, he could see that the Ritz crackers were not the only foodstuffs in the room. To be exact, there were two cellophane-wrapped doughnuts, three Milky Way candy bars, three cans of Canada Dry Sparkling Cola, a half-eaten ham-sandwich, four apples, and the waiter. Barrelmaker mentally jerked himself out of his reverie. He had not sunk to cannibalism — at least, not yet.

"I was wondering —"

"Yes, Barrelmaker?"

"I was wondering if you — well, if you could lend me something to eat."

"Certainly. Here, take this box of crackers, but go easy on the first few."

"Thanks a lot," said Barrelmaker. "I'll be sure to take it easy on the first few. I really hate to ask you for anything, though."

"That's quite all right."

"You see, with food services here at Theoc cut-off during vacation, and as I am temporarily somewhat short of funds, I can't afford to get a meal as often as I should."

"I understand perfectly. The same thing happened to me last year."

"You should think that they would keep at least some kind of food service here on campus going for students who were also unable to get home."

"Yes, you would, wouldn't you? But the administration has its reasons."

"What do you mean?" asked Barrelmaker.

"Well, just think of next Monday, when you'll be able to get three regular meals a day again."

Maniacal

Barrelmaker did not see the maniacal gleam in the waiter's eyes, so he fell into the cleverly laid trap.

"Yes," perked up Barrelmaker, "it will really be great to get some — Oh — Oh no! — What have I said?"

"That's the reason! That's the reason!" cackled the waiter, his maniacal tendencies full to the fore, now. "The reason food services are stopped over holidays is so that on the day they are reopened, the staff can have the delight of seeing all the students who had to stay here at Theoc gorge themselves on institute food. Seeing the ravenous horde descending upon the food we set out is more than enough to make up for all the complaints we get the rest of the year. Ha-ha-ha-ha. . ."

But Barrelmaker no longer heard the waiter. A pained look crossed his face. "Oh no!" he thought. "I've actually admitted to looking forward to institute food. I think I'm going — I'm going — . . ."

Barrelmaker hurriedly left the room of the waiter and headed for another room down the hall.

Tech Tankers Take Last Two

Caltech's water polo team decided to end the season with a victory or two and came through by producing the first two game win streak in over two years. By winning the last two league games of the season, the tankmen raised themselves to a three way tie for third in league competition, and a season record of 4 and 16. In other happenings, the all-conference team was announced and Tech's only man to make the team was Henry DeWitt; he made the first team.

Against Redlands, Tech came from a 4 to 1 deficit in the first half to score a 6 to 5 victory. Scoring was done by DeWitt, 3 goals, Norm Whitely, 2 goals, and Larry Hunt. This is the first time in recent history that Tech has beat Redlands at Redlands, a feat that was not even accomplished by 1964's co-championship team.

The following Saturday the tankmen faced Oxy to decide the years series, until then split one and one. Tech won on heads up play that produced two goals in scrambles in front of the goal to win 6 to 4. Again DeWitt led the scoring with 3 goals with Whitely, Hunt, and Larry Watkins adding one each.

8 Beavers Make All-SCIAC Teams

Eight Caltech athletes who participated in fall sports have been named to all-conference teams by the Southern California Intercollegiate Athletic Conference.

JOHN FRAZZINI was selected first string all-SCIAC defensive end. He improved steadily all year and looked great on a defensive unit that finished last in the league.

THOMAS BURTON led the conference in total offense with 1506 yards in eight games, was second in scoring with 47 points, and finished third in passing. Despite this phenomenal performance, Tom was not named to the first string, but was SCIAC's second string QB.

MIKE GIRARD, Caltech's Mighty Mouse, earned an all-conference position at second string defensive back. Mike sparked Caltech's relatively weak secondary to its finest hours during the second half of the 1967 season.

LONNIE MARTIN was the conference's second best receiver

with 51 catches for two TD's, but had to settle for only a second-string berth in the all-conference selections.

NELSON BRICENO, center halfback on Caltech's undergraduate soccer team is one of the finest defense men in the conference.

RICHARD BURTON plays both forward and center halfback. Dick is the Beavers' captain and one of the team's leading scorers.

JOE TEMPLETON is Caltech's freshman goalie and has done a fantastic job in his maiden season at CIT.

HENRY DEWITT was named a first string member of the SCIAC water polo team. DeWitt is one of the leading scorers in water polo.

Discobolus

Fleming defeated Page in last week's Discobolus match played in pool and billiards. Page won the first match 50 to 49 and then lost the next three matches. Fleming was paced to victory by John Forbes, Tom Beatty, and Bill Waggle, while Page's lone victor was Tom Bichnell.

Ruddock has challenged Fleming in touch football, handball, and track and track and field. An additional challenge was made in 11-man touch football or rugby. Fleming has accepted in 6-man touch football.

Dabney still leads the pack with 13 points. Page has 7 points and is being trailed by the Flems with 4 points. Ruddock, Ricketts, Lloyd, and Blacker are all grouped at one point.

Varsity Soccer Ends With Loss

The Caltech Open soccer team exhibited its gross superiority over its undergraduate Beaver counterpart last Tuesday by solidly whipping the undergrads 6-1 in a challenge match.

The contest was never close as the Open squad scored all of its goals in the first half and coasted to the victory. The undergraduate team takes pride in winning the second half.

Actually, that may be no small consolation as the Open kickers were undefeated in league competition this season. As a matter of fact, Caltech has in her Open team one of the nation's finest college squads.

What the interviewers won't tell you about General Electric.

They won't tell you about all the job opportunities we have for college graduates — engineers, science, business and liberal arts majors. Not that they wouldn't like to. It's just that there are too many jobs and too little time. In a half-hour interview our man would barely have time to outline the scope and diversity of the opportunities we offer. That's why we published a brochure called "Starting Points at General Electric." In plain language

it will tell you exactly how and where a person with your qualifications can start a career with General Electric. Pick up a copy at your Placement Office. Then arrange for a productive session with our interviewer. He'll be on your campus soon.

GENERAL ELECTRIC
 An equal opportunity employer
